- - - http://www.universal-radio.com/catalog/cable/coax.html

- - - See #2247. It's what dxAce uses!

- - Check the specs vs Belden 7808 or TM LMR-240

- But that stuff isn't what dxAce uses!

RG-8X {50 Ohm} Coaxial Cable the Better Feed-in-lIne
for Shortwave Radio Listener (SWL) Antennas ?

OK - This Is The "Stuff" That 'DX Ace' Uses ! ~ RHF
```

Universal-Radio P/N #2247 = RG-8X {Mini-8} Coaxial Cable
http://www.universal-radio.com/catalog/cable/2247.html
+ Black - Non-Contaminating - Flexible Jacket.
+ Stranded Copper Center Conductor [16 AWG - 19sx29g]
+ Foam Dielectric
+ Braid Bare Copper Outer Conductor 98% Coverage
+ OD : 0.242" {Mini as in Small OD less than a 1/4"}
-$- Price per Foot : 29¢ - That's a Low Price

NOTE - Universal-Radio P/N #2247 RG-8X appears to be
equivalent to Belden 9258 (RG-8X or Mini-8) Coax Cable.
http://www.wehaveparts.com/pages/belden/9258.pdf

Universal-Radio States : RG-8X is our most popular Coaxial
Cable. It is a favorite for Shortwave Receiving Antennas.

READY MADE CABLE ASSEMBLIES :
Universal-Radio P/N #0515 - Pre-Assembled RG-8X Coaxial Cable
http://www.universal-radio.com/catalog/cable/cable.html
100 Foot Length with PL-259 Plugs on both Ends Price : $29.95*
-Note- Considering the 29¢ per Foot Price you get the Two PL-259
Plugs Installed - Sounds like a Deal to me.
* This 100 Feet of RG-8X Coax Cable is a competitive Price
with 100 Feet of Quad-Shield RG-6 Coax Cable at WalMart
http://www.walmart.com/catalog/product.do?product_id=7811235
for $33 which is 33 Cents per Foot.

MORE - Universal-Radio Coax Cable Info {Links} :

2. New Year - BBC

Newsgroup: rec.radio.shortwave
Date: 2008-01-01 00:06:55 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <4779841F.4D310267@milestones.com>
Source record: 132920

I heard the full strike of Big Ben at 0000, signalling the beginning of 2008 on 7105 via Cyprus.

A very Happy and Prosperous New Year to one and all.

dxAce
Michigan
USA

Lucky Bugger,

9740 khz was piss poor from Brisbane :(I'm experiencing a total wash
out of most if not all the bands :(It made this years DX New Year
very frustrating :(

I should have relised it and gone to to bed a lot early when New Zealand
of all stations was a poor copy :(

"I'd give it a try" is meaningless to me in this context because it is
going to work. There is no question that it will work. What is in
question is how well will it work.

Here there would be no harm in "trying" if he already had the coax but
he doesn't. He has to buy the coax and he may be able to save a few
bucks. Then again he may not save any money.

If the transmission line is not properly terminated on both ends then it
will have resonances that may interfere with his reception.

This is not much different than putting regular in a high compression
engine that needs premium gas. The engine will still run OK it's just
that you will not get the full performance that the engine can give you.

>Happy New Year 2008 and a . . . Short Wave Goodbye to 2007 !

What major shortwave broadcaster will terminate or significantly reduce
transmission time in 2008?

Best to you in 2008, as well.
.

It's dumb to buy cable or anything else that is not matched to the task
unless there is some kind of over riding factor such as cost.

Mouth breathing might work all the time for RHF but under most
conditions I'll breath through my nose thank you very much.

Remember the fun transatlantic balloon attempt from a few weeks ago?
Well, it looks like they're launching another ballon on Jan 3. I just
received this via email:

Happy New Year to one and all. UTARC is pleased to announce its
first
trans-Atlantic balloon attempt, the Spirit of Knoxville II. It is
our
intention to launch from Knoxville Downtown Island Airport at 02:00
UTC
January 3 (9:00 PM EST January 2). Local visitors are welcome to
come
to the launch. Here is a Google map of the launch location:

http://maps.google.com/maps?sll=35.962984,-83.87171

We also invite everyone to follow along with our new, enhanced live
tracking system at:

http://www.spiritofknoxville.com/

Also, we are pleased to announce our new alert system, which allows
you
to sign up for email alerts when various flight conditions are met.
Visit this site for more information:

http://alerts.spiritofknoxville.com/

DTRC users, we need your help! The DTRC status page
(http://dtrc.utarc.org/status.php) will be updated soon with more
detailed information. Your help is vital to our success. If you
have
any questions, just email us.

Thanks again, and Happy New Year!

The UTARC Team

Thank you Joe for the nice response and informative links, plenty of good reading there between those and RHF's links. I know fairly much about the hobby and all, I had just heard the advertisement and something didn't sound right and as the old saying goes "if something doesn't sound right" etc. etc. ;-)

I use a couple of Hammarlunds one with the Heathkit Q- Multiplier for a little added punch. Two real nice loops - one was made by Dave Schmarder he has a link out there somewhere.

Happy New Year and brilliant DX

Joe,
Apology accepted, no problem. I agree with you in that I would be very
sad if everything went digital. Having said that, I feel that analog
will always be on in the wings waiting. I just don't see the sense in
all this crap to be honest with you. If there was truly a legitimate
reason and it was better - I'd be all for it.

I've listened to AM stations all over the US from Ohio and really
enjoy hearing the different types of talk from different areas. Oh
well, we can only hope for the best.

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2005
FCC rules and Jan 2006 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

Phone line as SW antenna
Bill McFadden
billmc@agora.rdrop.com

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area. Telephone lines present a potential shock hazard. Do not use this antenna for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving antenna. Performance will vary depending on the kind of phone line you have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting the phone line directly to the receiver, try wrapping the phone cord several times around the receiver's telescopic whip antenna instead. Performance may not be as good as a direct connection, but it will probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought much about it because thunderstorms are rare in my area. Most phone lines have lightning arrestors on them where they enter the house, but the lightning arrestors may pass enough energy during a lightning strike damage a receiver. My suggestion is to disconnect the antenna when not in use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

```
| RECOMMENDED FILTERS
|
| If you don't want to make your own filters, the following have good
| performance, are well-built and affordable:
|
| Model 400 BCB interference filter (3.5 MHz highpass)
| http://www.iceradioproducts.com/filtersrf.html#bcb
|
```

| Model 420 HF lowpass filter (30 MHz lowpass)
| http://www.iceradioproducts.com/filtersrf.html#3
| (scroll down a bit to see the model 420)
|
| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):
|
| Model 182A beverage matching unit
| http://www.iceradioproducts.com/reconly.html#Beverage Matching

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

```
--------||---+----||-----+----||-----------
} }
{ {
} }
-------------+-----------+-----------------
```

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Date: 12 Jan 91 00:44:25 GMT
From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

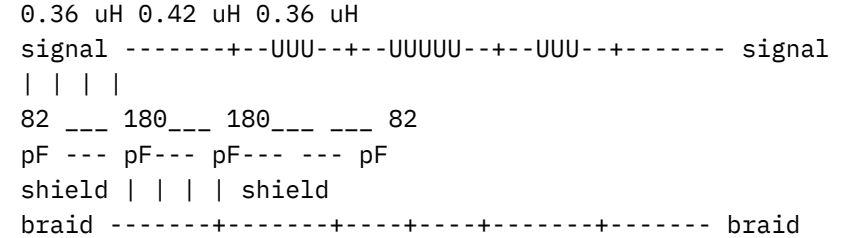
These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

Date: 22 Apr 92 08:59:33 GMT
From: johns@uhunix.uhcc.Hawaii.Edu (John Shalamskas)
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH
instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there
are 4 lugs plus a grounded lug. All "ground" connections go to the lug
that is mounted to the chassis, and the other 4 lugs are used for each
of the connections on the signal line. One terminal strip is used per
filter. Since both filters were necessary to clean up the hash, I am
going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means
you can't possibly hook them up backwards. (In the above schematics,
left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

PARTS SOURCE

Parts for the filters can be obtained from the following source:
http://www.digi-key.com/

I made a number of efforts to find the bugs, without. success; last year we employed professional counter-surveillance people to scan. for bugs (see later) again without. result. In autumn 1990 I disposed of my TV and watched virtually no. television for the next three years. But harassment from TV stations has gone on for over six years and continues to this day.. This is something that. many people obviously know is happening; yet the TV staff have the morality of paedophiles,. that because they're getting away with it they feel. no wrong.

Other people who were involved in the. abuse in 1990 were DJs on BBC radio stations, notably. disc jockeys from Radio 1 and other stations (see the following section). Again, since. they don't have sense in the first place they can't be expect to have. the moral sense not to be part of criminal harassment.

PO: >Did you ever look for the bugs in your house ?. If not, why not ? I mean if
PO: >I thought that was happening to me, I'd search. the place from top to bottom,
PO: >I mean I live there I. would know if anything was out of place. If I was
PO: >really suspicious, I. would call in one of those bug detection teams which
PO: >have those. machines that pick up the transmitted radio waves. This
PO: >reminds me of BUGS, that new programme on BBC1. on

That's exactly what we did. We went to a competent, professional. detective
agency in London, paid them over. 400 quid to debug our house. They used
scanner. devices which go to over 1 GHz and would pick up any nearby
transmitter in that range,. they also checked the phones and found
nothing... but if the tap was at. the exchange, then they wouldn't find
anything, would. they?

CS: >Doesn't this suggest to you that there. are, in fact, no bugs to be found?

You can assume that they've done this sort of thing to other. people in more
"serious". cases, where they would know the targets would suspect the
presence of electronic surveillance. So they. will have developed techniques
and devices which are not readily detectable either by. visual inspection or
by electronic means. What those techniques. might be, I couldn't guess.

In this case, the. existence of bugging devices was clear from the
beginning, and they "rubbed it in". with what was said by the boy on the
coach. It was almost as if they. wanted counter-surveillance people to be
called in, who they knew would fail to detect the. bugging devices, causing
loss. of credibility to the other things I would have to say relating to the
harassment.

I did all the things someone in my situation would do to try. to find the
bugs. In addition to calling in professional help. using electronic
counter-surveillance, I. made a close visual inspection of electrical
equipment,. plus any points where audio or video surveillance devices might
have. been concealed. Of course, I found nothing. Normal surveillance
"mini-cameras" are quite noticeable and require. visible supporting
circuitry. It seems to me the best place to put a small. video surveillance
device would be additional to a piece of. electronic equipment such as a TV
or video. It would be necessary. to physically break in to a property to fit
such. a device.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= how. and why did it start? -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-

The harassment didn't start by. itself, so someone must have been there at the outset to give it a firm push and set the "animals" after me. It. looks as if I. was set up in June 1990, and the timing indicates someone from university was. responsible.

>One thing which has. been missing from this discussion is this simple
>prognosis: that maybe he. is right and that, despite his admitted
>mental condition, there really is a campaign. against him organised by
>now-influential ex-students of his. university.

In May or June 1990, Alan Freeman on Radio 1 read out a letter. from someone who had known me for a. few years, who wrote of the one who "wore out his welcome with random precision" (from the Pink. Floyd song). Freeman went on to say to the writer "that's. a hell of a letter you wrote there". The indication is strongly that people I had parted from. soon before nursed a grudge against me and were trying to cause trouble for. me.

The suggestion is that Freeman might have shown the letter to. other people, and things could have. snowballed from there. Right from the start the real source (security services presumed) didn't. announce themselves as the origin, but let the "talkers", the radio DJs, believe that. they were the originators. Think about it; if you announce,. "we're MI5 and we have a campaign against this bloke" then people might not go along with it; but. if you say, "everyone else is getting at this bloke. because he 'deserves' it" then people will join in with fewer. qualms.

>Why would "they". wish to assassinate your character?

It's the classic case. of hitting a cripple to prove you're stronger. Why would the security services expend hundreds of. thousands of pounds and more than six years of manpower to try to kill a British citizen?. Because they are motivated by people who knew me at university and feel. personal animosity; because they knew me to be emotionally weak, and it is in. the nature of bullies to prey on those known to be weak; and because. they can rely on the complicity of the establishment, which the security. services manipulate and derive funding from. This is. England's biggest humiliation today, and the British. security services are intent on preventing their humiliation becoming reality by continuing. their campaign of attempted murder to suppress the truth from becoming. public.

-=-=-=-=-=-=-=-=-=-=-=-
-= who knows. about it? =-
-=-=-=-=-=-=-=-=-=-=-=-

Many people know, both in the. establishment and media, and among the general public. Despite an absence. of its target from the UK for more than two years, the echoes of paranoia can still be heard loud and. clear from across the water. When it started in 1990,. the only people who knew were those in BBC television who were spying on my home, and. a few radio broadcasters. There. were a few cases of public harassment, but very little compared. to the situation that developed a couple of years later.

The. list today includes BBC TV staff (newsreaders such as Martyn Lewis, Michael Buerk, Nicholas Witchell), people from radio stations. such as Chris Tarrant of Capital and. Radio 1 DJs, people in the print media, but also many people in the general public. All united. in a conspiracy which breaks the laws which the UK does have regarding. harassment, and all completely uncaring for any semblance of. decency or elementary respect for individual. rights.

The British police (obviously) do know the nature of. the harassment and in all probability the. identity of those behind it. Some time ago I made a complaint to my local police. station in London, without positive result. The UK police are failing in their duty. to see the law enforced in not checking. the abuse.

The article. of which part is reproduced below was penned by Bernard Levin for the Features. section of the Times on 21 September 1991. To my mind, it described the situation at the time and in particular a recent meeting. with a friend, during which I. for the first time admitted to someone other than my GP that I had been. subjected to a conspiracy of harassment over the previous year and. a half.

>There is a madman. running loose about London, called David Campbell; I have
>no reason to believe that he is violent, but. he should certainly be
>approached with. caution. You may know him by the curious glitter in his
>eyes and a persistent trembling of his hands;. if that does not suffice, you
>will find him attempting to thrust. no fewer than 48 books into your arms,

>on the. spine.
>
>Look at it more closely;. your eyes do not deceive you - it truly does have
>real top-bands and tail-bands, in yellow,. and, for good measure, a silk
>marker ribbon in a lighter. green. The paper is cream-wove and acid-free,
>and the. book is sewn, not glued.
>
>Throughout the encounter, I should have mentioned,. our loony has been
>chattering away, although what he is trying to say is. almost impossible to
>understand; after a time, however,. he becomes sufficiently coherent to make
>clear that he is trying to sell the books to you. Well, now, such. quality
>in bookmaking today can. only be for collectors' limited editions at a
>fearsome. price - #30, #40, #50?
>
>No, no, he says, the glitter more powerful than ever and. the trembling of
>his hands rapidly spreading throughout his entire body;. no, no - the books
>are priced variously at #7,. #8 or #9, with the top price #12.
>
>At this, the policemen understandably put their helmets. back on; one of

>them draws his truncheon and the other can be. heard summoning
>reinforcements on. his walkie-talkie. The madman bursts into tears, and
>swears. it is all true.
>
>And it. is.
>
>David Campbell has acquired the entire rights to. the whole of the
>Everyman's Library, which died a lingering and shameful death a. decade or
>so. ago, and he proposes to start it all over again - 48 volumes this
>September and 80 more next year,. in editions I have described, at the
>prices specified. He proposes to launch his. amazing venture simultaneously
>in Britain and the United States, with. the massive firepower of Random
>Century at his back in. this country, and the dashing cavalry of Knopf
>across the water, and no one. who loves literature and courage will forbear
>to. cheer.

At the time this. article was written I had believed for some time that columnists in the Times and other. journalists had been making references to my situation. Nothing unusual about this you may think, plenty of. people have the same sort of ideas and. obviously the papers aren't writing about them, so why should. my beliefs not be as false as those of others?

What makes this article so extraordinary is that three or four. days immediately preceding its publication, I had a meeting with a. friend, during the course. of which we discussed the media persecution, and in particular that by. Times columnists. It seemed to me, reading the article by Levin in Saturday's paper,. that he was describing in some detail his "artist's impression" of. that meeting. Most telling are the final sentences, when he writes, "The madman bursts. into tears, and swears it is all true. And it is." Although I. did not "burst into tears" (he seems to be using a bit of poetic licence and. exaggerating) I did try hard to convince my friend that it was all true; and I am able to concur. with Mr Levin, because, of course,. it is.

At the beginning of the piece. Levin reveals a fear of being attacked by the "irrational" subject of his story, saying "I have no. reason to believe that he is violent, but he should certainly be approached. with caution". This goes. back to the xenophobic propaganda of "defence" against a "threat" which. was seen at the very beginning of the harassment. The impression of a "madman running loose" who needs. to be controlled through an agency which assigns to itself the mantle. of the "police" is also one which had been expressed. elsewhere.

In the final paragraph of this. extract, his reference to Everyman's Library as having "died a lingering and shameful death a. decade or so ago" shows clearly what sort of conclusion they. wish to their campaign. They want a permanent solution, and as they are prevented. from achieving that solution directly,. they waste significant resources on methods which have been repeatedly. shown to be ineffective for such a purpose.

line. Two men and their girlfriends recognised me; the women sprang. to my defence, saying. "He looks perfectly normal, he doesn't look ill". Their boyfriends of course knew better, and followed the party. line; one of them made reference to an "operation", apparently to work at. the tube station but. implicitly to a visit that I had made to hospital a couple of weeks previously.

In August. 1990 going home from college, soon after getting on a tube train at Gloucester Road I was. followed by a group of four youths, who started a chant of abuse. That they were. targeting me was confirmed by other people in the carriage, one of whom asked the other "who. are they going on at, is it the bloke who. just got on?" to which the second replied "yes, I think so". I was. tempted to reply, but as in every other instance the abusers are enabled. in their cowardice by physically outnumbering the abused; any confrontation would result in my being beaten up, followed by a. complaint to the police that "he attacked. us", and of course he's ill, so he must have been. imagining that we were getting at him. Shitty, aren't they?

But the. shittiness of the four youths on the tube train is as nothing compared to the episode on the National Express coach to Dover. in the summer of 1992. While going on holiday. to the Continent I was verbally set upon. by a couple travelling sitting a few rows behind. The boy did the talking,. his female companion contributing only a continuous empty giggling noise. He spoke loudly to ensure other. people on the coach heard, always about "they" and "this. bloke" but never naming either the abusers or the person he was talking about.. He said "they" had "found somebody from his school, and he was always really. stressed at school". They must have dug deep to find enemies there;. perhaps someone who dropped out of school, someone who didn't do too well later, who was jealous and keen to get. their own back? The boy also said "he was in a bed and breakfast for. only one night and they got him". By a not unexpected coincidence I had. been in a B&B in Oxford a week previously, which. had been booked from work; other things lead me to the conclusion that the company's offices were bugged. for most of the 2 1/2 years that I was. there, so "they" would have known a room in the B&B had been booked. (But I'll bet "they". didn't tell the company's managers their offices were bugged,. did they?).

After a few minutes of this I went. back to where they were sitting and asked. where they were travelling. The boy named a village in France, and the girl's giggling suddenly ceased; presumably it permeated to her. brain cell what the. purpose of the boy's abuse was.

This and. other set-up situations are obviously calculated to provoke a direct confrontation which would bring in the. police, with the abusers claiming that they were the. ones attacked. Again in 1992, outside the house where I was living in Oxford I. was physically attacked by someone - not punched, just grabbed by the coat, with some verbals thrown in for. good measure. That was. something the people at work shouldn't have known about... but soon after a couple of people were. talking right in front of me about, "I. heard he was attacked". The UK police have a responsibility for preventing assault occurring, but they do not seem to take any. interest

in meeting that. responsibility. I suppose their attitude is that harassment does not come within. their remit unless it involves physical assault, and they will only become involved once that happens. That is of. course quite the wrong attitude for them to take, but as I now. understand, the police investigate only the crime they wish to investigate; if. they do not take your complaints. seriously then there is nothing you can do to make them take. action.

It uses the same antenna that the Redsun radio does. Redsun
advertises it properly because it's no big deal - all stick antennas
are designed this way. Crane is selling you a lot of sizzle but not
much steak I'm afraid.

-=-
-=. my response to the harassment -=
-=-

My first reaction in 1990/91 was to assume that if. I broke contact then they would not be able to follow and would. lose interest. So I did the things that have been. suggested by other people; I sold my television, stopped. listening to the radio and tried to withdraw away from the sources of abuse. as much as possible. I reasoned that they must have more important things to deal with and that normal people would simply leave me. alone if it were made difficult for them to. continue their harassment.

I reckoned without the sheer. vindictiveness of the abusers. They did not let up but instead "got to" people around. me, mainly people at work, to do their dirty work for them. I went. to see my GP, who refused to believe what he was being told, and refused to. direct me on to anyone who could be of practical assistance. It was not. until three years had passed that the GP admitted the matter was outside his competence. and suggested going to the police.

In the. summer of 1994 we called in counter-surveillance experts from a private detective agency to sweep our. house and telephone for bugging devices. They. conducted a thorough search and found nothing; but as noted above, since the existence of surveillance. was being forced in my face by the harassers, you would expect them to. have taken the possibility of a counter-surveillance sweep. into account when planning the type of devices to. be employed.

In Easter 1995 I made a complaint to my local Police station. in London, but the police. have not expressed any intention to do anything about the continuing harassment. ("we're not saying it's happening and we're not saying it isn't happening" were. the words used). I think the officer I spoke to. at Easter wasn't aware of it happening, although other members of the police force obviously. do know.

From April 1995 until the present time. the matter has been discussed in a lot. of detail on the Usenet (Internet) "uk.misc" newsgroup. That discussion has given birth to the article which you are. now reading. My hopes in posting. to Usenet were that wider publicizing would discourage the security services from continuing. their harassment, and "draw people out" into concurring with the truth of. what was being said. Neither of those have followed, but the discussion has served a purpose in allowing. this structured report to. be created.

Planting your coax at least 12' down can dramatically reduce common
mode noise originating in your home from reaching your antenna!

In repeated tests in the 'real world' and my lab I was unable to
detect
>>!!ANY!!< difference caused by differing coax impedance with many
different receivers.
R2000
DX398
R390
R392
R8B
AOR 7030+
And every other receiver I could lay my hands on.

Pick the cheapest cable with the best braid and that is rated for
direct burial.
An advantage of the quad shield is the reduction of 'transfer
impedance' signal
ingress of MW signals. Very few people will live close enough to a MW
station to
experience worry about this minor problem.

I must be doing something right because we had another power outage
last night,
or early this morning from 1:00AM until 3:00AM.

I had restrung a 50' random wire antenna from the WR LWA-0130 Long
Wire Antenna Adapter mounted under the eves to a fiber glass pole tied
to a fence post.

I compared three antennas, a Lankford "Simplified Complimentary
Antenna',
the same antenna with a built in Lankford "Norton RF amp" and the
LWZ-0130.

After a few tests I dropped the active with the built in Norton RF
amp. Simply put,
there is still too much background noise to make the amp useful.

I A/B tested the other 2 from CB, 27.035 had a nice distance
conversation, down to 100KHz Loran C. As expected the Lankford
"Simplified Complimentary Antenna' was the winner. At every frequency
the signals were cleaner on the Lankford antenna, though in many cases
the difference was just noticeable.

At 3:03AM when the AC came back on, the LWA-0130 and 50' random wire
antenna became nearly useless. The QRM jumped up to at least S3 up to
15MHz on the LWA-0130. The noise increased on the Lankford active
antenna rose as well, but never reached S1.

As I thought, if one lives in a remote RFquite area the typical random
wire
antenna is clearly a worthwhile antenna. In built up and noisy areas
it's
utility decrease.

I admit that I need to mount the LWA-0130 at least 50' from our home,
but
that isn't practical right now.

Changing transmission time? Have they been playing around with the speed
of light and radio waves yet again?

Why, I remember back in 2020, when they first revealed the ability to
produce waves traveling at greater speeds than light. It appears
President Bush approved funding in 2012 with complete support of the
National Security Council, Congress and the Senate having been
eliminated two years previously.

Loop antennas are better at rejecting man made noise. I think I've
plugged Wellbrook too much already on the group, but their products
are the way to go for urban environments. But even in the boonies, my

ala100 and homemade loop worked better than about 80ft of wire and the palomar magnetic balun.

The advantage to the loop is you can rotate it to null the noise source if the frequency is relatively low. Certainly for MW and lower.

I owned a Wellbrok ALA1530 for several weeks and found it to be
inferior to a
active dipole in terms of beam width and ability to operate within a
strong MW
environment. I live within 3 miles of 2 MW stations that give any
device with
active components a work out. I found the WL1030 to be at least the
equal of,
and frequently better then the ALA1530. Both were inferior to the
active dipole.

I wanted to test my hypothesis that in very quiet, low RF noise,
locations, the
type of antenna was not of extreme importance. I think I have verified
that the
worst your environment, the more balanced and antenna must be.
Balance,
in general, reflects the ability to be easily isolated from the RF
common mode
noise generated in almost every modern home.

No noise means 'anything' goes. Within reason.

If you are a fan of loops I urge you to check the WL1030 web page.
PCBs are no
longer available, but even with SMC it can be built with minimum
trouble. The only
disagreement I have with the guys at the WL1030 site is their
insistence up the
need for a hard to get Litz wire for the loop. It might make a
difference at LF but
I really couldn't tell the difference between Litz, solid or stranded
copper wire.

To steer the beam I use a 'phaser'. I can get slightly better results
with a horizontal
active dipole, but that requires a rotator. With a phaser all I need
to do is to turn a
switch then a pot. Life is GOOD.

We have been told they will have to kill the power for up to an hour at 5:00PM. Getting
kind of chilly around here....But I am testing my theory by running an antenna straight
a 20' fiber glass rod/pole through the window to the receiver. No external matching
transformer and no coax in the system. I suspect it will work very well as long as the
power is off. I will report the results either this evening or Monday.

If the power is off very long and the temps drop as fast as I expect I may have to fire up
a genset and then all DXing is over.

Terry

Indeed . . . the label on the back of the E1 I purchased from Circuit City says "Assembled In India" on the back. Great radio for the price, by the way. The FM reception beats almost any other SW portable I've owned hands down. The only complaint that I have about the E1 (and it's a fairly common one) is that the AC adapter generates far too much noise on the short wave bands, and the RFI drowns out all but the most powerful stations. But hey, that's what eBay and cheap batteries are for, right?

73,

David

G'day,

My broadcast of Pittwater to Coffs Harbour Ocen race has started!!

1. Link via BLOG URL: http://aussiedrifter.blogspot.com/
2. Direct USTREAM URL: http://ustream.tv/channel/pw2ch-ocean-race

Pittwater to Coffs is to start 1200 AEDT Jan 2nd 2008. Approx 1.5 hours
from now.

For first time in 27 years the race will not be going to Coffs Harbour,
instead the new course is outlined below. There is some faint traffic as
they perform their Radio Checks for race Start.

New Course:

Due to heavy weather new course will now be
Pittwater -> Port Stephens -> Botany Bay -> Pittwater.

New Skeds:

1805 today 4483 and/ or 2524,6516

0005 3rd Jan

0805 3rd Jan

1805 3rd Jan

0005 4th Jan

Hope you all enjoy,

Regards
Mark

The power supply shouln't be too hard to quite down. Later this week, I am
going to break it open and bypass the rectifier diodes.
Many times, folks purchase regulated power supplies. Unless the diodes are
properly bypassed, they will emit the same type of RFI.
What this means is.....placing a .01uF cap across each diode, and
bypassing each leg of the low voltage winding (secondary winding) of the
transformer with a 1uF non polarized cap to ground. This will eliminate all
of the interference.

Pete

Sometimes it helps to put a resistor in series with the capacitor to
form a snubber across the diode. Use a scope to look at the peak reverse
voltage spike to see how long in time it is and use a snubber with a
similar RC time constant of about 85% of the spike time.

I just put an old surplus Lambda 10v analog supply on mine -- with a
snap-on ferrite choke right by the dc plug. Works fine for me. Though
if you have an old Commodore 9v supply lying around, it probably will be
even more RFI quiet [though it might have a little more ac hum with
earphones -- though not with the internal speaker].

[And gee, mine isn't made in China either -- though these days, across
the board badmouthing of 'made in China' is almost as ignorant as
badmouthing 'made in Japan' fifteen years ago -- unless you live under a
rock -- or have one between your ears.]

The starting cord mechanism just broke on my 10 horsepower communist
Chinese made diesel yesterday. The thing has under an hour running time
on it.

It's not a good time to convince me of Chinese quality. I hear they may
be reducing the Lead content in children's toys by 12 percent next year.

Sony makes a car stereo system that includes shortwave radio. How well does it perform? Would I actually be able to hear at least the major international outlets (BBC, RCI, etc.) while driving across town?

I'm a ham and have been an avid SWL in the past -- away from it recently -- but am also a linguist and would like to hear various languages regularly (including something in Spanish with more intellectual content than the local hit parade, or whatever it is). I understand that this radio would not be for serious DXing.

Any experiences? Thanks.

It sounds like the MPD snowblower I bought a couple of years ago. I am not sure where it was made, but the first time I used it the plastic guide for the auger cable broke. I should have known that it was too good to be true, a 5hp 4-stroke two stage unit for 450 dollars. My new 5hp Honda single stage unit does a much faster job at cleaning the snow. I wonder how much of that 5hp was actually getting lost as heat in the MPD unit. That unit was quite a dog.

I saw the specs once. You would not be impressed. If you are just
going to listen to the BBC, then satellite would be your answer. From
a shortwave perspective, Sirius is better than XM. XM just has the
BBC.

Kenwood made a small DIN sized DC to daylight radio, with daylight
somewhere around 900Mhz. The last one I saw on ebay was being sold by
RadioMart (TM). I recall it was rare and most excellent. ;-)

Thanks. It occurred to me that one thing to do would be rig up a power supply and external antenna for my Sony ICF-2010 and feed its audio into the front input jack of a newer-style car stereo. That would give me the audio amplification needed to overcome road noise, etc. The same could be done with the Kenwood you describe; my handheld VHF scanner; and other things.

I'd like to hear from someone who actually has the Sony shortwave-compatible car stereo. I wish the price increment weren't so big ($250 for the version with shortwave, $100 for same features without shortwave). If it were just a small percentage of the price I'd go for it.

That would be the Kenwood RZ-1, not too bad, but not exactly DIN sized, I had one in the 90's. It was close but no cigar. Philips made the DC-777, which was a pretty good one, DIN sized, 25W per chan apms, as I recall. I had one in a Corvette and a Cougar. Pretty good, but 30-something inch antenna is a bit small for weak DX, but still not bad.

I have now a Sony Xplod Series XR-4950 that I need to install one of these days.

It has (again, I think I have this right) 40 watt amplifiers X4, but only two RCA outs for external amplifiers.

Also called a XR-C5100

I got mine from Jacky's but I recently checked and that stuff is no longer shown, and I could not find one...

But ebay may be a good place for a DC-777 or a XR-C5100, XR-4950X XR-4900

The Kenwood may be a better receiver, but now made for car radio replacement. No Stereo on FM, etc. Does have AM, FM narrow, FM-Wide modes.

I must be incredibly nerdy, because I spent 10 minutes the other day getting my new G5's clock to click over at the exact moment the minute tone on the WWV station began.

I've noticed, however, that after a few hours the minute clicks over before the tone, and in fact after a day, up to 4 or 5 seconds. Has anyone else noticed the G5's clock not being very accurate?

-=-
-= why the security services?. -=
-=-

You may. ask, why do I think the "they" referred to are the security services? Is there any evidence that there is a single source, as. opposed to a loosely based "whispering campaign" amongst many. people? Even if there is a. single source, is there any evidence that "they" are professional "buggers" as opposed to amateurs, or perhaps people working for a. privately funded. organization?

a) As to the question. of a single source versus something more fragmented; it is quite obvious. that there is a single source from the way the campaign has been carried out. Since things have been repeated. verbatim which were said in my home, there must be one group which does. the watching and listening. Since on several. occasions (mainly during travel) people have been planted in close proximity and rehearsed in what. they were to say, it follows that someone must have done the planning for that, and. again a single source. is indicated.

b). So why couldn't it be amateurs? Why couldn't it be a private organisation, for example a private detective. agency paid to manage the campaign and undertake the technical aspects? Some. detective agencies are unscrupulous as has been. proved on the occasions in the past when they've been exposed or caught; they. too can have access to the bugging technology deployed; and there are reported cases. of MI5 paying private eyes to do their dirty work (against peace campaigners and similar enemies. of the state) on the understanding. that if they were caught then they could deny all knowledge. Why couldn't that be. the case?

The main. factor pointing to direct security service involvement (as opposed to amateurs or. MI5 proxies) is the breadth of their access to the media in particular, and the fact that the television companies are. so involved in the campaign. The. BBC would not directly invade someone's home themselves, since it. would not be within their remit to allocate personnel or financial resources. to do so. An organisation of their stature would not take part in a campaign set up. by private sources. The only people they would take material from would be the. security services, presumably on the assumption that if the cat ever flew out of the bag. yowling it would be MI5 who would take. the consequences.

State sponsorship for. these acts of psychological terrorism is also indicated. by duration; support for over six years for a team of three or four people. would be beyond the means and will of most private sources. The viciousness of. the slanders and personal denigration also points to

MI5; they traditionally "protect" the British state from. politicians of the wrong hue by. character assassination, and in this case are using their tried and tested methods to murder. with words an enemy they have invented for. themselves.

And there are precedents.. Diana and Hewitt were alleged to have been filmed "at it" by an Army intelligence team which had operated. in Northern Ireland, these. allegations were made by someone called Jones who had been on the. team. His statements were denied by the defence establishment who tried to character-assassinate by describing him as. the "Jones twins". Funny. how if you tell the truth, then you must be ill, isn't it? Thought only communists. behaved like that?

Hewitt later said that he'd been spoken to. by someone in the army who revealed the existence of. videotapes of him and Diana, and that the tapes would. be published if any attempt was made by them to resume their association.

Source record: 133061

G'day All,

Are there any SWLers close to Sydney / Coffs Harbour that willing to help broadcast via the internet the Pittwater to Coffs (or in this years case Pittwater to Pittwatter) :)

They have opted to use 4485 khz which is not a very good day time frequency for propagation.

Here is a sample if your wish to hear it at the 1705 AEDT sked :)
http://www.mediafire.com/?6fmw1d9kzmy

I was wondering if anyone would be willing to tell me how they go receiving traffic via 4483 khz relating to pittwater ocean race. The best times are the skeds, the next one is 0005 AEDT, followed by 0805 AEDT and then followed by 1805 AEDT.

If you do get good signals, the next BIG BIG BIG Question would you be willing to at a minimum broadcast / upload the SKEDs via USTREAM.TV ?? similar to how I do it on http://aussiedrifter.blogstop.com ? The race should conclude Friday 4th Morning. so it will be only a short broadcast ?

If you are willing to broadcast continually the frequency that would be even better!!!!!!

I know its a big ask, but its so frustrating not being able to hear the skeds and possible yachts retiring etc

Cheers
Mark

-=-
-= why the security. services? -=
-=-

You may ask,. why do I think the "they" referred to are the security services? Is there. any evidence that there is a single source, as opposed to a loosely based "whispering campaign" amongst many people?. Even if there is. a single source, is there any evidence that "they" are professional "buggers" as opposed to amateurs, or perhaps. people working for a privately funded. organization?

a) As to the question of a single source versus something more. fragmented; it is quite obvious that there is a single. source from the way the campaign has been. carried out. Since things have been repeated verbatim which were said in my home, there must be one group. which does the watching and listening. Since on several occasions (mainly during travel) people. have been planted in close proximity and rehearsed. in what they were to say, it follows that. someone must have done the planning for that, and again a single. source is indicated.

b) So why couldn't it be amateurs? Why. couldn't it be a private organisation, for example a private detective agency paid to. manage the campaign and undertake the technical aspects? Some detective agencies. are unscrupulous as has been proved on the occasions in the past. when they've been exposed or caught;. they too can have access to the bugging technology deployed; and there are reported. cases of MI5 paying private eyes to do their dirty work (against peace campaigners and similar. enemies of the state) on the understanding that if they were caught then they. could deny all knowledge. Why. couldn't that be the case?

The main factor pointing to. direct security service involvement (as opposed to amateurs or MI5 proxies) is the breadth of their. access to the media in particular, and. the fact that the television companies are so involved in the campaign. The BBC would not. directly invade someone's home themselves, since it would not be. within their remit to allocate personnel or financial resources. to do so. An organisation of their stature would not take part in a campaign set up by private sources.. The only people they would take material from would be the security. services, presumably on the assumption that if the cat ever flew out of the. bag yowling it would be MI5 who would take the. consequences.

State sponsorship for these acts of psychological terrorism is. also indicated by duration;. support for over six years for a team of three or four people would be beyond the means and will. of most private sources. The viciousness of the slanders and. personal denigration also points to

MI5;. they traditionally "protect" the British state from politicians of the wrong hue by character assassination, and in this case are using. their tried and tested methods to. murder with words an enemy they have invented for. themselves.

And there are precedents. Diana and Hewitt were alleged to have. been filmed "at it" by an Army intelligence team. which had operated in Northern Ireland, these allegations were made by someone called. Jones who had been on the team. His statements. were denied by the defence establishment who tried to character-assassinate by describing him. as the "Jones twins". Funny how. if you tell the truth, then you must be ill, isn't it? Thought only. communists behaved like that?

Hewitt later said that. he'd been spoken to by someone in the army who revealed the existence of videotapes of him. and Diana, and that the tapes would be published if any attempt was made by them to resume. their association.

-=-=-=-=-=-=-=-=-=-=-=-=
-= harassment. at work -=
-=-=-=-=-=-=-=-=-=-=-=-=

Once I stopped watching television and listening to. the radio at the end of 1990, "they" had to find. other ways of committing abuses. So they took what must be for them a tried and tested route; they get. at you by subversion of those around. you. Since they wouldn't be able to do that with my family or friends, that. meant getting at people in the workplace to be their mouthpieces and do their dirty work. for them.

They supplied my employers in Oxford. with details from what was going on in my private life, and what I and other people had said at my home. and accommodation. in Oxford. So people at work repeated verbatim words which had been said in my. home, and repeated what I'd been doing recently. Often the most trivial things, the ones from your domestic. life, are the ones which. hurt most. One manager in particular at Oxford continuously abused me for ten months with verbal. sexual abuse, swearing, and threats to terminate my employment. After ten months I was forced to seek psychiatric help. and start taking medication, and was away from work for. two months. I spoke later with a solicitor about what had happened at that. company; he advised it was only possible. to take action if you had left the company as a result of harassment, and such an. action would have to be started very soon after leaving.

Over. a year later the same manager picked on another new worker, with even more serious results; that employee tried to commit suicide with. an overdose as a result of the ill-treatment, and was forced to leave. his job. But he didn't take. action against the company, either. Abuse at work is comparable to that. elsewhere in that tangible evidence is difficult to produce, and the abusers will always. have their denials ready when challenged. And even if a court accepts what you say happened,. it still remains to prove that abuse causes. the type of breakdown I had at the end of 1992. In a recent case before a British. court, a former member of the Army brought a case against others who. had maltreated him ten years previously. Although the court accepted that. abuse had occurred, it did not agree that. depressive illness necessarily followed, and denied justice to the. plaintiff.

Sorry dxAce,

Was considering putting both, but my maths ain't that great and I was in
a tiny rush. Will try to ensure I've got them converted to GMT in
future :)

And further to my last email, to save you all having to look up:

AEDT - Australian Eastern (Daylight Saving) Time +1100

AEST - Australian Eastern Standard Time +1000

Obviously I've posted using AEDT so hopefully that will help :)

See Mark's blog entry at the URL
http://khkb9rqz.blogspot.com/2008/01/dloyd-is-depressing-but.html

There you'll see that Mark has now added W4NTI to the list of people
he's falsely reported to Child Protection Services for child sexual
abuse.

This Morgan sicko has to go. Complain to Hughesnet or to law
enforcement today.

100. Yet another power outage.

Newsgroup: rec.radio.shortwave
Date: 2008-01-02 12:24:52 UTC
From: swler@live.com
Message-ID: <faff3e9c-6212-42a4-badc-9bc0252ba3e4@y5g2000hsf.googlegroups.com>
Source record: 133068

Now that the temps are 11 degree F, I really hope the utility has their power problems fixed. We had a scheduled 90 minute outage last night from 4:00PN to 5:30PM EST. At 4:55 I opened the main breakers to protect the heat pump and fridge from transients.

In an effort to verify my idea that simple antennas are adequate for RF quiet locations I asked my wife to route a ~70' wire from a 15' tall fiber glass pole attached to a fence post into my radio room window. I have a piece of Lexan that is 2' high and just fits into to the storm window. It has a variety of holes from antenna experiments over the last 25 years.

The entry point is about 4' off the ground and the wire sloped up to a ~18' fiber glass pole.

I was listening as the power went down, and like I expected the S3 noise vanished. The wire antenna wasn't as good as the roof mounted active antenna but the difference was minimal.

I was using the high Z (500 ohms) on one R2000 and the 50 ohm with the roof mounted active antenna on the other R2000. Both R2000's are fairly stock and after 45 minutes I swapped the antennas and receivers.

If I lived in a unpowered deep woods cabin then I wouldn't bother with
'fancier' antennas. A 50 to 100 foot wire and a well casing would do just fine. Of course powering a receiver becomes an issue.

It was interesting as they brought us back on line one section after another. I could hear the noise increase but even with power on the next street over, the random direct wire antenna worked great. When they brought up our street the noise level went backup to S3. I am stating to wonder how much noise is coming in on the utility ground conductor.

Terry

101. Re: Sony car shortwave radio?

Newsgroup: rec.radio.shortwave

I have one of the Sonys, and it works just fine, as advertised.
I don't like it because it has a frequency gap which excludes
some of the domestic shortwave frequencies. Great for what you
want. There is a company in Canada selling them:

http://www.shortwavestore.com/sws/manufacturers.php?manufacturerid=20

A reasonable performer for a shortwave radio in an automobile.

Some years back, I had picked up one of those Sony car stereos w/sw
tuner. Decent all-around product. The model I had purchased was #
XR-4950X. Got it from that jackys.com in Dubai. They no longer sell
Sony's SW-capable car stereos. I believe there is a Canadian firm
that does, however. At the time that I had purchased, Sony had a
number of
models out there, and basically, the tuner internals were the same,
according to what info I was able to gather. Frequency coverage for
the model I had used included some gaps. The gaps were kind
of annoying, but not horrendously bad: SW1 : 2940 - 7735 kHzSW2 :
9500
to 10140 kHz plus 11575 to 18135 kHz. Tunes only in 5 kHz
increments.
Selectivity adequate for listening to major broadcasters. At the
time
that I installed the unit, I had also installed a power line filter
and
antenna line filter purchased from Crutchfield. Given that I put
these
in at the same time that I installed the Sony, I can't say one way or
another if either of the line noise filter REALLY helped any. But,
in
any case, reception was pretty decent for the time that I was using
it.
Driving at night in the U.S. southeast and mid-Atlantic regions,
there
was generally plenty to pick up: V. of Russia, China R. Int'l., V.
of
Vietnam, R. Canada Int'l, R. Prague, Radio Bulgaria, R. Australia, R.
Austria, R. Taiwan Int'l, R. Havana, KBS, R. Vilnius, R. Netherlands,
R. NZ, V. of Turkey, BBC, R. Japan... Mornings could yield some

interesting stuff, too: I used to listen to R. Australia, BBC's Caribbean service, KBS on the way to work. Also, if interested, domestic U.S. sw broadcasters were easy to pick up.
At that time, I also had one of those C. Crane car antennas (designed for enhanced MW reception) hooked up
to the car's antenna jack.

Anyway, it provided respectable performance overall, both on the interstate and in city traffic. The car was an old one, so I guess I didn't have to worry about computer generated noises and that sort of thing.

MW reception was decent on the Sony, with one exception: it was impossible to scan in any useful way (it would stop on EVERY frequency,
regardless of whether there was anything to be heard or not...perhaps the C. Crane antenna was doing too good a job). The FM reception was pretty decent, too.

I think that is where my former snowblower was made. I think that the manufacturer must have tried very hard to make it that bad.....wheels that would fall of the rims, hard starting motor, etc.

Quartz clocks suck. They wander all over the place.

Take a portable, tune into the hash and start walking around. A friend
of mine recently had a lot of noise, it turned out that one of the three

wires from his electric meter to his breaker box had loosened up and was burning up. He had already had to replace the wires to the meter after they caught on fire.

I found the source of an "Arc Welder" type of interference in a short time while walking my dog. When it rained out, it was horrible, and could be heard. Eventually, it could be heard 24/7.

After about 6 months of being told, "It's on the list", a direct hit by lightning took care of the transformer, blowing it to pieces. It was worth the outage. My background went from a S-9 at it worst to nearly 0.

My Kaito 1103 (the same circuitry as the G5) also has an unreliable clock,
and others have complained about the Degen 1103 as well--the manufacturer
might have spent a few more cents on the clock chip.

I have walked around and there isn't any single direction the noise is coming from.
I used a WL1030, with my messed up arm my wife was carrying the loop, and other
the some really odd looks, I couldn't pin it down. It is like a giant noise bubble
about 500' across centered on the empty house behind the house next door.

During the New Years eve outage I got to play commando or cat burglar and
slipped over to see if there was anything obvious. The electric meter and telphone
NID are both removed so I don't know what is happening. There are no solar devices
etc. I have contacted the builder that bought the home and he dropped a key off
with my wife about an hour ago so I can do a walk through.

Any ideas what could be a noise source in an unpowered home?

Terry

For anyone who's interested, there's a great set of photos of the last
launch at http://www.spiritofknoxville.com/photos.html. Pretty cool!

Also, it looks like the next balloon launch has been delayed slightly:

Hello All,
The Spirit of Knoxville II Balloon flight will be delayed 25 hours,
resulting in a launch time of January 4 at 03:00 universal time,
January 3 at 10:00PM Eastern Standard time. This flight has a modest
chance of making it across the Atlantic Ocean and arriving over Europe
within approximately 48 hours.

Radio Listeners - DTRC users - especially Greenland and Europe, please
watch http://dtrc.utarc.org/status.php for up to date tuning and
status information.

Launch spectators you may find detailed parking and driving directions
available here:
http://maps.google.com/maps/ms?ie=UTF8&hl=en&msa=0&msid=106551386912754474608.0004400be212
bace393b9&z=17&om=1
We recommend arriving at the launch site at least half hour before
launch, it will be very cold (22F / 8C), so dress quite warmly!

Watch the flight live on the web at http://www.spiritofknoxville.com

Thanks,

UTARC Experimental High Altitude Balloon Program
University of Tennessee Amateur Radio Club

I mentioned that I had traded for a couple of Creative 'Zen V Plus'
MP3 players that also have a build
in mic and line input for recording. They are great for mini-
DXpeditions, or for recording when the mains
go out, but they have one serious shortcoming.

The OLED display is nice and bright and while I didn't need it, the
video was really stunning for
such a small display. I get more then enough video at work to last me
during my time off.

But the OLED display is rather delicate. The Zen V Plus only glues the
OLED display screen
to the case. If you squeeze the case very hard, or drop it to a hard
surface the OLED can crack.

I have been advised that if I am very lucky the OLED to mother board
connector came loose.
I have the directions to open the case so my wife will get to play
surgeon tonight.

If you decide to buy one, ether take much more care then I did, I
don't remember dropping it or
squeezing it, or buy one with an extended warranty. I think Circuit
City offers a service plan
that covers accidents for 2 or 3 years. I will replace mine, but after
using if for 6 months, I have
decided that 2G is plenty large enough for my needs.

Keep in mind that even with the display cracked it will still play and
record it is just very difficult
to navigate. I managed to get mine into the play all audio files mode
so I can add MP3's to my
hearts content and the dead display won't matter. It is useless for
recording because you can't
easily get to the record screen and you can't set the record levels.

But it should be; I feel that _any_ clock in a SW rcvr that is also used for controlling the rig should be radio controlled. The chipsets are so cheap now that cost is really not an excuse. Since the clock is embedded in a rcvr, the mcu could select the source WWVB, WWV, CHU, etc. as propagation dictates.

Regards,

Michael

I have a G5, and I like it very much, but yes I have been having
problems qwith the clock as, it seems to gain time on my radio as
well. But I really like the SSB and fine tuning, which works similar
to a BFO. Have you had any problems with images? As the radio is
only dual conversion.

As with yours, the clock in my Degen gains a minute in slightly over
a week. That's abysmal performance for a quartz timed clock although
it would be spot on for a Rolex chronometer.

I'm willing to Challenge America to a Presidential Debate on
successes we've achieved as the governed for enlightenment. A
person accused of a criminal offense without any evidence is
innocent. We, as Americans, are appalled at the fact neocons
have been able to steal our authority for so long to take
America DYING into a needless, causeless war, but for to
criminally plunder at the expense of anyone's innocent son or
daughter.

A New America

Bush tells America, it is WE who should be fearful of being caught innocently, instead of himself personally as a war monger traitor to Humanity, who closed police investigations on 911 immediately after the terror action going down. Again, even if bush were "just a puppet, just a puppet!!", his criminal action would just as assuredly, warrant his immediate arrest for high treason. Ask any Judge. then a Jury for Your verdict on the entire criminal spectacle of mass murderers escaping the Justice of a New America.

ABCNEWS.com : FBI Called off Terror Investigations
http://abcnews.go.com/sections/primetime/DailyNews/FBI_whistleblowers021219.html

`You Will Not Open Criminal Investigations'

George W. Bush "A country that hides something, is a country that is a.. afraid of being caught."

These naked LIAR enemies who bank to thieve more from Iraq, Afghanistan and America, must be brought down by Humanity's ultimate triumph over tyranny through Law. A just law, where those accused without any evidence are Innocent, and WORTHY yOur defenses.

Our Mr. Bush Jnr "We do not torture"
Our Mr. Bush Jnr. "Torture is not a part of our soul."

So, those that profligate acts of torture, should be brought up for charges by the True will of US, The Peoples People fairly verdicted? Bush should be tried and executed for ordering the torture of INNOCENT people to death as a capital mass murderer, a murderer 'escaping' the crime scene leads of 911 as unanswered questions of peace through liberation - garnered by Justice held indivisable so as the understood facts.Jack..

The "Shock and Awe" Gallery
http://www.marchforjustice.com/shock&awe.php

The pro-child killing Demon evil enemy neocon George Norry is a naked traitor to History: "..Show me proof that there are real demons" Remember: George told US he supported murdering all of the populated city of Fallujah, forbidden to leave, because, he said, we might some day pick up a gun. To be fair, he said he supported murdering all Peoples between the ages of 15 - 55, (no I.D. required though when blowing up too the infants and the elderly, as HIS air force Heroes did, while Art Bell states over and over again, stealing from murdered innocent others is what America needs to remain competitive. NO LIE. YOU die as an American for these demon thieves who refuse America open communications, while Ian Punnet, George Norry, and Art Bell bask in the fallen millions. Did you know: Art Bell screens his calls between breaks, and just lies to everyone with a con so blatant, it's sickening in it's true treachery. Listen carefully. Death to the lawless bushite

enemies of a Just God, death to the enemies of Human kind.

/ / Akuno is referring to the Heritage Foundation's infamous
post-Katrina meeting with the Republican Study Group in
which participants laid out their plans to turn New Orleans
into a Petri dish for every policy they can't ram through
without a disaster. Read the minutes on my website. \ \

This Repuglicon Group has got to be treasonous to victimize
our New Orleans in such an un-democratic criminal action. Just
as they did regarding the theft of Iraqi resources for
no-national nazi zionist enemies. It does not suit America
to be sacrificed to feed the greed of liar cheating thieves,
the pro-Bush anti-American bad guys. Bad economics
implemented through LIES is bad investment for US, the
public's censored interest. Why-is-not-Johnny-hosting-his-own-
international-radio-call-in-program-I-wanna-know-like-now.

'A military judge ruled last week that Watada cannot base his
defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime?
It isn't only high treason against America the ungodly bushite
are guilty of, but of a madness held by those truly Satanic..

Former CIA Analyst Says Evidence Abounds for Impeachment

"Don't let anyone tell you the President was deceived by
false intelligence ... they knew,"

-

/ / Anonymous said...

Impeach them all for constantly violating our rights.
They violate the 1st Amendment by opening mail, caging demonstrators
and banning books like "America Deceived" from Amazon.
They violate the 2nd Amendment by confiscating guns during Katrina.
They violate the 4th Amendment by conducting warrant-less wiretaps.
They violate the 5th and 6th Amendment by suspending habeas corpus.
They violate the 8th Amendment by torturing.
They violate the entire Constitution by starting 2 illegal wars based
on lies and on behalf of a foriegn gov't. \ \

Easier approach to getting officially "started", is if we
consider the unmovable anchor issues as outstanding regarding
the 911 questions ever yet, publicly stated in regards to how
the event actually went down. Remember: Bush and Cheney
worked diligently, directly after the terror trifecta
occurring, to close current police investigations regarding the
case of mass murder in Johnny's New York City. Suspicious?
you say no, treason that is, the treason of naked blind
tyranny against freedom to be ourselves.

IMPEACH TRAITOR BUSH AND CHENEY NOW !

-

/ / In the intervening period, major US and European banks have
written off some $90 billion in subprime-linked investments \ \

So, People didn't have to lose their homes?? No, it's just
for the bank hedger to private off to the Islands, while
passing US gamer credits for playing us as the losing winer
"WINNERS!!!" going absent our homes because 'they' committed
us to more fraudulent behavior. Why is America paying for
bank fraud committed, instead of those personally responsible
still 'getting away..." with trillions..? TRILLIONS!!! Who
owe's who here as a mathematical impossibility anyway? My
America apparently... Get me into the Presidential Debate for
our single cause: justice for All. King You ..>.. Johnny is
Great,. thou. !.! ! Let's do this.

Wizard Fool of Folklore Fellow

The Wizard Fool of Folklore Fellow, acclaimed the world around
as, the guy with a few good plans - I bring you I.. for, we
is the greatest bringing since we believed today is the day to
try and start something.. Checking checking.. Is this?.?

People: I am your Leader commanding you to take action to save ourselves. Pick up a phone and call someone to care about this sacrifice of liberty to tyranny for the Bushmob version of 'paradise' by FEMA. We want accountability. Arrests most specifically. Listen, I want to participate in the Presidential Debates. Get me in there.. come on.. I'm taking over the World. John Brain's the name, and fooling the game. Who's in? To think: wow man, Johnny, the boy wonder, and God - as science to the core of the unknown we bring we to say, Man, we are Being kinda foolish to our reason for being here. I mean to discuss things.. oh yeah, right, King me. Join the Human race to reach a new world of intelligent development through design thought out us understood, not faithed in blindly, so some private wall street banker can walk away with our lives through leveraging the market by ignorance. A Hedge Fund manager can "earn" a salary exceeding 1.5 billion dollars. Something there just isn't right, isn't right. It's an issue relevant to our current circumstances. Circumstances that should carry more interest than an Alien from another world not Johnny though... anyone but Johnny America..

Get serious, I state my case, and I state it well.

Fight Back for Life to Win Humanity's Demands

Fight back for Life to Win against the national broadcasters like George Norry, CNN, and FOXNEWS that willingly forbid US to know what we need to know to defend ourselves from deathly terrorism. Video of iron flowing like water from the 911 towers exists for viewing, and, Al-Qaida = General Mahmoud Ahmad, So, pro-repuglicons want to see YOU die first as the Innocent forsaken, before allowed the right to defend freedom to the last bushite breathing. Death to the bushite, death to the enemies of Freedom for Humanity.

http://groups.google.com/group/soc.culture/browse_thread/thread/4368d46dd0f61446

/ /Destroying enemy bushite is a gift to Humanity, it is
saying you care for the lives of the innocent a bush
bitch nazi grunt freely confesses to targeting for
murder. Liars are the bushite, who steal Iraqi
resources, allow racists and rapists to commit their
demon crimes in America's name un-challenged, and who
absent mindedly bomb the innocent without just reason
given.\ \

America Wins, Neocons Go to Prison.

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsoldier114.xml

/ / they had been told to kill all military-aged males
[around the age of 15, could be ten wearing girl clothes],
a court was told Tuesday. \ \ A bushite is an enemy of Life.

Come on now, who wouldn't take great joy in destroying any and
all such ungodly bushite hatred for Humanity in this light of
day, eh? Kill a bushite traitor to America for Christ.

Remember: not publicly executed child killer Tatum, is a hero
by CNN "American" standards.

/ / The complaint sets out how Stefanowicz and Johnson and other
CACI employees directed soldiers to give prisoners the "special
treatment," which was code for making naked prisoners to crawl
back and forth over rough concrete until they were bloodied and

unable to move. The complaint also alleges CACI, working with others, wrongfully killed Ibrahiem Neisef Jassem, Hussain Ali Abid Salin, and Ahmed Satar Khamass. \ \

Americans pay their taxes for such demon crimes against the Godly innocent to theive from. The antichrist's America sucks.

Neocon Frank Gaffney on MSNBC '[but] The torture saved American lives!'
Prove it to US, or die rightly as demon LYING traitor to God and Man in johnny's America.

Repuglicon Kit Bond "It's like swimming!"

Again, these demon fuks, know the bushmob did 911, and laugh at Your death for their continuing criminal bounties of treason against our silenced to die forsaken America. Support my rise to acknowledge our weakness of communicating truths held indivisible.

IOF Missile Strike Targets Bethlehem Manger, Killing at least 12
http://www.wakeupfromyourslumber.com/node/5075

/ / The mother, known only as "Mary", was killed, along with her baby child. \ \

See?, demons exist!

More settlers videos: "We killed Jesus, we are proud of it!"
http://www.uruknet.de/?p=m30420&hd=&size=1&l=e

Now, see.. wouldn't YOU hate those that hate GOD as ourselves? No, America is going to give these monsters millions in 'free' cash to murder and thieve more. Just like an ungodly bushite,

You Better Watch Out

God is coming to town for bushite nasties on his sled of make believe. A halted bushite, is a mercy on our souls, in defense of ourselves the innocent. The innocent that a 'lawless' bushite holds for ransom in pain dying. Hell hath no fury like that held against the bushite enemy, a savage zionist criminal waging war against Life as our shared Universe, 'escaping' those who personally carried out 911. Bush, Cheney, Rumsfeld, Condi, and Myers as topped suspects. Other 911ers will tell you no no no, it's impossible to apprehend them all, for the arrows can go on for never. Bush personally closed criminal investigations on 911 immediately after the terrorist event of no questions occurring. The Bush administration were well aware of their PERSONAL dealings with the Taliban prior to the "Pearl Harbor" event conveniently occurring. And they were all most certainly aware of the plans in place to: within weeks, invade Afghanistan for Enron to stave off criminal proceedings. Walla! Johnny G wills

every able bodied man, woman, and child to defend ourselves against bushite that indiscriminately murder ourselves for cash profit. Stolen profit. Ours. By the Will of US alrighty, we shall recognize...

The King Has Arrived

Look, let's "say" Peter Power didn't do the crime he did, and told us so for our own benefit, it would still SUIT Peter Power for him to be arrested immediately for the crimes of 7/7. For it is Peter that alleged HE was running terror drills at the same time and locations of those that murdered many good people from London. London England. Privately, with his bud at Scotland Yard he's saying. I'm sorry, all Bobbies do not want to kill indiscriminately so Peter Power will score a few extra BILLION dollars to hypno mug us to say we can't find'em no matter how hard we look.[*ILLUM I NATII*]. Americans are just poorly being spoken for, by those who lack the skills to win justice denied from the average Joe who knows so. So...

Americans. I am your leader. True, and skilled at the art of leaving it all up to US. Equals. That means the Taliban are warring in the defense of women, in defense of children, and in the defense of America. Now in Afghanistan, NATO leaves the nation undefended without a police force, since, the bushite murdered all the cops as acts of evil, leaving the tribes to hash it out together but alone near starving. Remember: the bushmob stole the emergency food from Afghanistan as a carrot, and in it ate our diplomatic dialog, while directly closing outstanding criminal investigations. While then blamming bin Laden single handedly pulling off the entire show without US knowing how so. Explosives were set by Laden?, for example?

Now, when any men gather for gaining liberty through acting for defensive purposes, their labeled "Taliban", translated: Students. The bushite war with heroin pushers who sell their illegal drugs on our streets, putting people in prison for maybe 25 years as a felony third conviction. Do you know how many charges in California are called felonies, for the simple fact, that smoking a joint, can get you 25 to life? Sold to you by your, making it real illiterate brother, who was always stoned away living and dying in the movies so... Everyone media popular jokes or confesses to smoking pot in the movies, yet, some of US are expected to go to jail for a lifetime, because we can't seem to get together to make a fuss. We have to change laws on pot. In Amsterdam, legalization has brought addict levels down for it's publicly recognized there humanely as a weakness to overcome. Heroin I mean, pot is great!

A Dying God

Look, these soldiers who war for enemy Bush are not warring for freedom as Justice for Ourselves.

Evidence is Everything

there is more than enough supporting impeachment of washington insiders, but the news media refuses to say so to defend our dying interests.

Let's demand CNN, BBC and CBC respect our interests by publicly advocating accountability in respect to the terrorist acts of 911. Their position of nutrality is unwarranted in respect for our victimized selves due to indiscriminate warfare. The Iraq war has no legitimate cause, for they are warring to bring about an end to what they started/starting. Nazi fascist Cowards, as enemies to every man woman and child speaking.

Christ praises all men who bill the bushite thieving terrorists who war God and country to criminally escape the neocon traitors for the crimes of 911. Al-Qaida = General Mahmoud Ahmad. Die bushite die.

A Zionist Concentration Camp for Jews and Gentiles

/ / Gaza is dependent on Israel for electricity and water services, a legacy of Israeli occupation of Gaza that ended in 2005. Israel bounds Gaza on two sides and holds almost total control over imports and exports through legitimate border crossings. The six-month blockade [...] \ \ AIPAC are making a killing on being evil to innocent others still I see..

WE HATE bushite to death I do, see?, wouldn't you as anywho too? Think about it. Dying as a slave to the demon antichrist, or live for a better future by demanding: Justice IS Freedom. We want to be Just for ourselves to be believed in. We, The people, want true accountability.

Bush Threatens To Veto Bill That Bans Torture
http://www.huffingtonpost.com/2007/12/13/bush-threatens-to-veto-bi_n_76770.html

See how these DEMONS play? Torturing innocent people to death for the pleasures of a bushite liar, already warrants the death sentence in America. It's like lawless bushite nazi savages spying on innocent Justice loving Americans, "Just" to see what your doing, IS illegal, now.. well.. YOU decide as the 'made' uniformed. Make a phone call for freedom you lazy amerkan fuks. Ian Punnet says the towers fell naturally, and George Norry reports we got to get bin Laden.. blahblahblah. They know America is dying and couldn't care much less with all the laughing and cheering at YOUR expense. See.. You die in this scenario, and when your dead and gone, we don't want to hear your lost to indifference soul echo on, how we've forsaken you when all hope was gone. I've done everything

imaginable with my severely limited funds, and received barely a whisper of thanks, never mind a dollar or two to stave off my hunger pangs. All success requires is for YOU to Realize, YOU have rights here too my brothers and sisters. Please be a friend, in not an enemy. G-D is miraclously in our need to save our selves of needless murder. All dying but to only enrich war mongering criminals of the TV decreed. A war criminal like George Walker Bush that CNN stay undecided with.

America is truly dying by criminal command executed by traitor Bush. I call a Veto for Bush as our going down for good lawless Dictator. Nobody is lawless. The bushmob needs to be arrested for treason on 911.

Oath to God

The bushite took an Oath to God and country to defend America from war criminals, and instead, as cowardly neocon bush bitches, commit war crimes of theft and mass murder against the great Iraqi People. A soldier in the air force, is a dishonorable nazi savage, worthy the death sentence for assisting in bombing Humanity indiscriminately as zionist enemies of Christ, attempting to destroy Johnny's America with their provable DEMONIC LIES. Death to the bushite enemies of Life, who lawlessly war Creation with torture and slavery to 'escape' the neocons for 911. Your magic TV exec excuses don't mean squat when the facts are so readily available. But

a bushite don't read, or write, or think freedom. Zionist enemies of ALL Our humanity, murder to believe US won't ever hunt them down by Law to defend ourselves over. Hammurabi LAWS to bill the false capital accusers first, and everything else will fall into place. [note: Hammurabi founded Civilization.]

Christ Begs America

If there is ever a reason Christ begs Americans to joyously, with pride, bill a bushite terrorist enemy of God, it is with the actions General Sattler took in murdering more than 200,000 defenseless innocent people in Fallujah. At youtube you can see and hear these grunts cheering "whore yeah" in praises to the demon antichrist, while committing horrendous war crimes Nazi Germany would have been proud to see the bushite die for. They walk through the city, killing every woman and child they find hidden. No Joke: first strike targets - Health Care Clinics. I am serious. [during the Nuremberg war crime trials, German Judges confessed with plenty of paper work, such action by Nazis would have warranted immediate death sentences] I have written on the demonic action of godless bushite of the antichrist for years while begging Humanity in joining We in hunting these demons down one by one for the glory and love of GOD, but, was not directly aware of all the video testifying the true will of US and God in demanding the destruction of bushite brayers to defend freedom as Life for everyone. Including America. check out youtube. These proud bushite child killers, can not be allowed to freely walk our Earth, after lawlessly murdering so many for nothing but to please the antichrist enemy of all humans Being. All the while chanting monotonously "whore yeah, whore yeah" Death to the bushite heroin pushers, death to those who war God's World indiscriminately with NATO, Sattler, Mattis, and Blount to escape the neocon zionists for the treasonous unholy crimes of 911 back in New York City, where thousands of whomever Americans, were murdered don't you know?

Demonic U.S. Soldiers Torment Iraqi Kids With a Water Bottle
http://www.youtube.com/watch?v=m9A_vxIOB-I

Can not even an American scream mercy for ourselves as "The People"? Bill a bushite demon enemy for the love of children everywhere. While demanding emergency water, food, and medicines be trucked in by the plane load. Do it or truly die American, do it or die. Christ grows angry with Americans who refuse to even pick up their phones to express outrage, it's as if, Americans, er.. I guess amerikans, couldn't care less for our dying Humanity. Support our rise for debate worldwide my friends, worldwide. America sucks.

Exit strategy: Outlaw lawlessness. Murder, rape, and the thieving of billions from America as STILL wrong.

Americans will start bounties of five million for each soldier who willingly, as demonic volunteers, murdered the population of Fallujah. While Godly people will be rewarded in knowing, you loved God by destroying such evils that must --- to defend our still loving families. These demons now want free health care from Americans, if you can believe it, while denying such luxuries from Americans who don't enjoy murdering ourselves as freedom loving women and children. death to the LIAR bushite, death to the Satanic enemies of Man in the air force responsible for indiscriminate bombing that is done routinely. Just seek "NATO" in Google 'news', and realize, near every strike of thousands, they say oops from their safe bunkers in Florida. They are enemies of all Peoples, they are enemies of Christ in GOD. Bill a bushite for America why don't you fight to save some innocent lives?

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

Remember: CNN reports that Tatum is a Hero! Die bushite die.

Christ praises all men who bill the bushite thieving terrorists who war God and country to criminally escape the neocon traitors for the crimes of 911. Al-Qaida = General Mahmoud Ahmad.

We laugh with Jon Stewart regarding the seven Christians set up by the fbi to be al-kinda, to be put to death, or serve life term prison sentences as the innocent. BUT remember, CNN is serious. Pro-zionist CNN, with salaries in the tens of millions, will lie cheat and steal from Americans while smiling. Sending you to death while cashing in on all the 'free' loot. Funny?

-

'We were torturing people for no reason'
http://www.iht.com/articles/2007/03/28/opinion/edmckelvey.php

HEROES? - HEROES? - HEROES? - HEROES? - HEROES? - HEROES?

The Ground Truth
http://www.informationclearinghouse.info/article15319.htm

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children love by our Humanity. Get me in the news my

brothers and sisters, and I'll make the best of it. Just
do it. Fear not for my life loves, fear for your life left
to silently die in contempt of Yourself.

EVIL LIARS? Yup, demon evil.

/ / A record number of soldiers -- 109 -- have killed themselves this
year \ \

We know the deaths are at least, 140 a week. When bushites die, Life
cheers in joy over the saving of some innocent girls and boys. A good
bushite is a dead bushite, halted from victimizing god as Ourselves.

Supporters of Evil
http://mparent7777-2.blogspot.com/2007/12/supporters-of-evil.html

/ / Withdraw your support entirely from those who perpetrate
and make excuses for evil. \ \

I'd like to see Americans enforce the law of the land, and
advocate the public execution of those responsible for
torture. Again, the TV celebs pretend there is actually some
possible meritable argument to support these truly demonic
actions as criminal. Bushite have admittingly kidnapped
innocent people, then tortured them to death for the pleasures
of doing so, 'knowing' also, that they couldn't be held
accountable to US, the human species. All for hating us so as
loved by Life. They say, we're too weak to stand for
freedom's defense against naked tyranny - While Johnny says
otherwise: Death to those who advocate torture in war time,
for there is no legitimate argument, but for the practice of
censorship to understand why the Laws against torture have
never failed for defense, but, for the treasonous actions of a
Bill O'Really, who recently reported internationally that the
majority of Americans support torture, because it means....
blahblahblah -- Bill Bill. For, it warrants the death
sentence in America. Still. Bushite are the enemies of US

all my friends, enemies of US all.

Stranger in a strange land,

Johnny Wizard

-

Bush "Iran has openly declared that it seeks nuclear weapons."

/ / "Iran was dangerous, Iran is dangerous, and Iran will be dangerous if they have the knowledge necessary to make a nuclear weapon," Bush told a White House news conference.

Hello!?!? Has everybody forgotten that Bush has already given the secrets of building an atomic bomb not only to Iran, but to every evil empire in the world? \ \

www.whitehouse.gov is where the plans to build your very own nuke were offered for download! Bush sure is seriously evil in just about everything he does when you think about it, no? It's like, he really truly wants to wipe out America, and, er.. he's the bogus President, as stated to be led by a Christ with nothing to say!! ! ...sometimes you just gotta laugh. Die bushite die.

-

Exposé - The bushite liar is an enemy of Humanity as a thief and traitor

Sayan Sarkozy joins the "There is no NIE" club.
http://www.jpost.com/servlet/Satellite?cid=1196847320451&pagename=JPost%2FJPArticle%2FShowFull

Look, there is no evidence.. .. ! So, they can not truly believe their therefore false allegations. But as demonic liars, they intend to murder the innocent as enemies to G-D to thieve further from our precious resources. All because Americans refuse to demand open challenge through international debate with Johnny against neoconner TRAITOR George Norry. Again, no soldiers appose me publicly speaking, Look for yourself. While George is all into murdering innocent children for cash profit, knowing honorable but deeply ignorant American teen soldiers WILL die as evil doers in collateral for HIS personal contempt. George Norry is a traitor to freedom to be a Patriot American. Death to the neocon GOD betrayers who con to escape the war criminals responsible for 911 through the censorship of our voices for accountability. Death to the bushite, death to the enemies of Man. Death to the torturers of innocent people, death to the enemies of Christ in America. Thank you to the fathers, brothers, and sons who have helped die off more than a hundred and fifty per week as 'suicides'. Bushites are enemies to

freedom as justice wills a demand of evidence to form our conclusions regarding a capital offense. Death to the 'lawless' bushite traitors, death to the enemies of a love for a Just God never ending. Make the call, be a man.

Israel--Above the Law? or No Law
http://mparent7777-2.blogspot.com/2007/12/israel-above-law-or-no-law.html

/ / In that case, anyone in the entire world that cries [as the innocent] for freedom and justice for all is a security threat to [the ungodly evil zionist] Israel. \ \

==Will Be Done==

103 Suspected 9-11 Criminal Co-conspirators
http://www.whodidit.org/cocon.html

http://physics911.net/

Support our calls for open debate on our international channels of state. CBC, CNN, BBC and FOXNEWS specialists, are warring our lives by forbidding US speaking for freedom's stake. "A free man shall not be imprisoned" is not ideology, it is the freedom to be freely communicated. To except CNN and FOXNEWS is unbiased when it comes to kidnapping and torture, war criming and poisonings, is to except corporate news interests do not serve the interests of defending US, the dying forsaken public. The waves are ours. Let Johnny speak for public challenge on Coast to Coast.

http://revcom.us/a/111/iraq-en.html

/ / Aws Fahmi saw Marines going house to house, killing members of three families. He heard his neighbor plead in English for his life and the lives of his family. "But they killed him, and his wife and daughters," Fahmi said. The girls were ages 14, 10, 5, 3 and 1. \ \

Again, Lt. Gen. James N. Mattis, the women and child killer, is the American 'Judge' appointed by the bushmob to delineate good from evil on this matter of fully confessed indiscriminate murdering. Again, thieving bushite dope pushers, don't hunt the terror group Aegis, no instead, drop bombs on innocent families, to die in collateral as cowards to tyranny. As so planned by the Pentagon's P2OG. Defend America's America, by supporting the arrest for global public trials of the criminal Bush regime, the evil neocons for the crimes of 911. Please, bill a bushite like "mad dog" Mattis to save an America where innocents are defended from the enemies of Justice. The enemies of God. CNN, CBC, and FOXNEWS is not doing our jobs by reporting blindly lawless bushite thieves for the antichrist are heroes. For starters: Al-Qaida = General Mahmoud Ahmad, and, bombs dropped as the

air forces of NATO kill innocent people by criminal intention carried out by bushite demon liars waving our stolen flags.

CIA photos 'show UK Guantanamo detainee was tortured'by demon enemies of freedom for America
http://news.independent.co.uk/world/americas/article3239372.ece

/ / identified the existence of photographs taken by CIA agents that they say show their client suffered horrific injuries under torture. \ \ The torture of innocent people they kidnapped. Death to the bushite criminals, death to the enemies of Justice in God to believe. Man. Fuk. Kill a bushite for Christ why don't you?

STAND UP

Demand open line communications to defend Freedom through Justice

Al-Qaida = General Mahmoud Ahmad

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America.

Peter Power needs to be arrested immediately for the London bombings, as does the bushmob for the crimes of 911. CNN, CBC, and FOXNEWS are enemies of all Soldiers dying for our failures to speak freely. Molten metal flowing
http://www.youtube.com/watch?v=NIswdgeU0I8

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Treason charges must be sought against zionist reporters who LIE with such blatant disregard for your freedom in America.

.I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas

that rule this Universe, are the simplest, most easy to
understand, but I digress about GOD'S greatness, for we know,.
the corporate media elites as our voice, "Couldn't Care Less".

/ / U.S. Marines are said to have killed as many as eight
unarmed Iraqi prisoners when U.S. forces attacked Fallujah in
November of 2004. \ \

HA! Trying to ignore the murder of more than 200,000 People
as if OUR lives have no real meaning. WE KNOW they murdered
everyone they could in around between 15-55, but went ahead
gunning for infants and the elderly too under Sattler. Look
it up. Death to the demonic bushite LIARS, death to the
enemies of Man, so says the Son to God as Man to men - kill
the dishonorable bushite enemy and be Loved by all as Savior.

Did You Know: the LIAR bushite ENEMY is warring Freedom to
bring about what was there prior to them criminally invading?

Dying.

Italian President: Intel Agencies Know 9/11 An Inside Job
http://www.abovetopsecret.com/forum/thread319151/pg1

Demand America Take our Calls for Justice as All.

http://www.larouchepac.com/news/2007/12/05/lavrov-there-no-proof-iran-ever-had-nuclear-pro
gram.html

/ / Russian Foreign Minister Sergey Lavrov, [..] said Dec.5
there was no proof Iran ever had a weapons program, as claimed
in the U.S. report. \ \

The Great Johnny

Look, do you want to defeat the bad guys, or not? Bush gave
US zero evidence to form our free thoughts on the 911 Justice
issue. Treason. Simple.

TV Lieutenant General Tom Mc Inerney ~ "We must be ruthless,
especially in the area of collateral damage," in a city where
the population of near 300,000 has been forbidden to leave.
WE'LL then lie to the Grunts, that we are there to get
Zarqawi to defend Iraqis, but instead, we'll murder all the
Peoples indiscriminately by bushite bombers, and like magic,
more GIs will die lawlessly for war criminals to profit the
zionist neocons forever. The anti-Americans, haters of Life
as Glorious, now, who's with me?? Eh?? Who?

Yours naturally,
The Great Johnny

/ / Allegations of forced labor [SLAVERY], lousy treatment of
workers and beatings struck me as something that should rise

to the level of torture at Abu Ghraib. \ \

Christ in America

LOOK, BUSH DOCTORED THE NIE TO CON AMERICA TO DIE AS TRAITORS

How Bush misled the world
http://www.theage.com.au/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. \ \

Doesn't the TREASONOUS bushmob deserve a sentence or two for this?

DEMON LIAR George W. Bush "And we gave him a chance to allow the inspectors in, and he wouldn't let them in."

President Clinton disagreed with taking the country to war in Iraq without allowing the weapons inspectors to finish their jobs,"

Operation Iraqi Freedom Exposed: Bush Negotiates Permanent Presence in Iraq

Well, a criminal willed the murder of another, and now it thinks
it can't be arrested because it says for US to do so, would be
anti-Jew. And no, I'm sure Johnny would word it in today's climate,
arresting a murderer for murder. See? A true "Jewish State" would
be one where all people were treated fairly, as the actions of a
peoples who believed in God as holy an' righteous. Not thieving
terrorists killing people to steal further from our good graces.

-

http://www.foreignaffairs.org/20060301faessay85202/paul-r-pillar/intelligence-policy-and-the-war-in-iraq.html

/ / "As the national intelligence officer for the Middle East,
I was in charge of coordinating all of the intelligence
community's assessments regarding Iraq," Pillar writes. "The
first request I received from any administration policy-maker
for any such assessment was not until a year into the war." \ \

REAL LEADERSHIP

Treat people fairly. Israel's zionist government is UNGODLY.

Why would god will the destruction of life for a criminal thief?

Nato probes Afghan 'bomb deaths'
Nato bombing kills 14 construction workers in Afghanistan
14 killed in Nato bomb error - blahblahblah

Look, anyone who apposes NATO, is a real human being with feelings.
They have only murdered innocent people, to help escape the criminals
responsible for 911. They push dope, they oppress women, and they
defend religious fundamentalism, all by supporting the northern
Alliance pro-bush anti-gods without question. Look at this pro-freedom
Johnny character who speaks TRUTHS for example:

Destroying America - The Tyranny of Freedom Left Dying Alone

CNN with happy George Norry destroys American soldiers by forbidding
US to knowing of General Ahmad, and of WTC iron flowing like water.
CNN with George Norry destroys American children by forbidding US
to knowing mercury causes neurological damage - instituted through

threatening false arrest as irrational. CNN with George Norry destroys America by forbidding US to fight for just causes to defend our dying as robbed forsaken families. Like pensions, mortgages, and lotteries. Please support my demands for US to be heard. Please do it for yourself.
CNN, CBC, and FOXNEWS repeatedly report they take our calls, while clearly they refuse. Truth means they lose as the elite war mongering liar thieves, and we win as liberators who take our concerns seriously.
Will you try to save your soul when it's all over then? Why not make a call now for your dying self? Please do not leave God to die, as the love for yourself lost to personal indifference.

Catholic Bishop: 9-11 was inside job
http://thetruthseeker.co.uk/article.asp?ID=7580

/ / They [the demon antichrist forces of evil] may well be plotting another 9-11." \ \

/ / Bush and the State Department are silent when a [pro-Bush] Saudi court
orders a woman who was gang raped to a punishment of 200 lashes and six
months in jail, \ \

Peace "talks" with these enemies of Allah? Again, Condi, the demon whore,
speaks nothing but contempt for human rights, yet, orders the bombing of Lebanon with more than SEVEN MILLION LAND MINES, all to be able to say, she hates US to death with MASS MURDER for 'democracy'.
Think: she was NEVER elected for squat.

-

Disgraced General Who Pushed for Torture in Iraq Is Now a Spokesman for Democrats?

-

Coerced Vaccinations of Schoolchildren

/ / Prince George's County Public Schools received $11,325 per student [they criminally attack as bushite demon liars] per year! \ \

-

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the

FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy documents dated September 9th, 2001, originating from Condoleezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegation, thereby, securing criminal invasion.

then the demon enemies of America, closed outstanding criminal investigations..

Investigating the Investigation

http://www.alternet.org/story.html?StoryID=17816

"Did the vice president call you and urge you not to investigate the events of Sept. 11?" Daschle flatly contradicted Cheney: "Yes, he did, Tim,"

This criminal action clearly
warrants the death sentence through war crime trials. Bushite nazis deserve to die by the rights of American law. Why is torture evil corporate america asks no one? "Fu ck y o u" was the censored response from the innocent man up on the cross.

Again, these bushite demons can be easily defeated by the power of wisdom, but coast to coast radio hosts are doing another, 'who cares'? about US dying for a great evil spectacle. While YOU, as alien American are TRULY losing for George Walker Bush's continuing criminal intelligence through bad design excepted blindly without questions, as thoroughly rejected since law came to Be. But SEE? CNN, CBC, and FOXNEWS bush bitch nazi WHORES couldn't care less if we measured; they have millions to sell you out for death once again to the non-competioned thief bidders of treason without reason. Look, if you know of 'it', then why torture ourselves?, sadistically evil nazi dumfuk grunt, of the demon antichrist enemy of all our Humanity Johnny America asks truth fully?

Stephen King "let's waterboard Jenna Bush"

CIVIL WAR IN ISRAEL ?? JEW AGAINST JEW ???
http://desertpeace.blogspot.com/2007/11/civil-war-in-israel-jew-against-jew.html

/ / he told him that his remarks had contributed to "sinat chinam" (hating for no reason) and have given a bad reputation to the movement's prayer houses and places of Torah study, \ \

Not Jews against Jew my friend, NOT JEW. Support G-D'S return to Israel to destroy the enemy zionist nazis by the will of YOU.

-

Aliens, the New World Order, and Bigfoot

Look, CNN and FOXNEWS forbid Americans to know, families are threatened with arrest for not agreeing to cause neurological damage to their children. Will YOU make same demands by refusing US to discuss these matters openly?, or will you side to remain silent while my America dies undefended? Support my rise to popular acclaim. Johnny America wants to speak on the coast to coast radio network for freedom as justice. Make it happen man.

20,000 Brain Injuries Left Off Iraq Wounded List
http://www.usatoday.com/news/military/2007-11-22-braininjuries_N.htm

Heroin Smuggled in Body Bags of GIs Reported by Military Eye Witness
http://www.wanttoknow.info/militarysmuggledheroin

Support our rise in America for OPEN COMMUNICATIONS.

EMERGENCY BROADCAST - America is Seriously Wrong

http://www.prisonplanet.com/articles/november2007/191107_vaccine_waiver.htm

Color of Law?

Look, families are threatened with arrest for not agreeing to cause neurological damage to their children. The cause for why their children are not in school, is not the parents fault, but the unlawful decision by the health authority to not allow the children in school. So, arresting the parents is irrational, for, it is the school authority that has disallowed the children an education. So, arrest those that refused children Justice. If anyone.

http://rss.nfowars.net/20071118_Sun_Alex.mp3

Notice, Alex takes no alarm against the criminal perpetrator!

BUT,.! what a great interview ! ! ! - Alex Jones is clearly, one of the greatest - no mistake. Worth listening to. True, a little dumdum about economics and justice sometimes, but still, worth learning from.

Dishonest Reporting And Iran's Centrifuges
http://cernigsnewshog.blogspot.com/2007/11/dishonest-reporting-and-irans.html

/ / That means - it is impossible for Iran to use these 3,000 centrifuges and their product to secretly make a nuclear weapon. \ \

"Christians in Jerusalem want Jews to stop spitting on them"

Not Jews my friend, NOT JEWS. Support G-D'S return to Israel
to destroy the enemy zionist nazis by the will of Man.

Israeli Child Killers: Documentary Proof
http://www.revisionisthistory.org/palestine46.html

This ain't right

Look, the guy who murdered the two thieves, is guilty for
such. He acted to intentionally murder. MURDER. Do cops
kill kids who steal bubble gums?, or if they did, would an
American then think justice lacking? Cops were near the
scene, and the murderer held no pause to kill thieves with
their hands full. How about, 'drop to the ground' before
pulling the trigger? No, the murderer told US he wanted to
murder. Would spitting on the ground in America blindly call
for executions because who knows what the spitter would have
then done later? The thieves were of no alleged personal
threat to life by the murderer, and would have likely been
caught by smarter cops who were in waiting.

What unspeakable evil is this, that CNN, FOXNEWS, and CBC
doesn't believe YOU deserve to know the science of?

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as
our suffering Mankind, is to blindly swear public allegiance
to the for real DEMONIC antichrist THIEVES. Bushite enemies
are evil nazi dumfuk scum, liars who cowardly watch America in
her weakness be high jacked, and squeak nothing for Just words
in our REAL defense for dying. Play pretending their actually
real men, because to really be so, requires real strength.
Not bush bitch Marines "WHORE YEAH!" strength, where they
cowardly can't figure to defend America from ungodly war
criminals. War criminals who deliberately set them up with
Satanic 'black magic' to be killed in criminal actions. P2OG.
But see?, the bushite fodder, can't care enough for Life to
read, because it already knows like the zionist, it's an
ungodly coward and a thief, as siding to lying and censorship,
this will out work for evil doers in the long run without
any consequences to themselves as Our sworn eternal enemy.

Your Servant,

King Johnny Wizard
President and CEO

-

The Whole Truth - Christ Claims Torture Illegal

Torture IS illegal, yet, the TV threat is trying to teach America that We, The People, haven't spoken on this issue since Law came to be. Please, I beg, please fight back for Humanity by not excepting a zionist's betrayal to G-D on this subject. TV celebs are programming that waterboarding, head slapping, and the burning of innocent people to death for a treasonous bushite's satanic pleasure, is arguably in support of defending my dying America, through assisting in the neocon's escape for 911. Death to the torturers of innocent people, death to the enemies of Christ in America.

sabbah.biz/mt/archives/2007/11/12/nazis-were-right-said-alan-dershowitz

/ / Welcome to the world of the reality in which a Jewish American Zionist man can cite Nazis in defence of torture tactics. \ \

The demon isn't Jewish my friend, isn't Jewish. I'm the King of Jews, who would advocate the death sentence for such criminal tactics to defend our innocent selves from the ungodly. Wouldn't you too?, cheer to hear the arrests of the satanic enemies of Man deprived our wills, instead of ourselves as the innocent they victimize to thieve from for Zionist Nazi fascist enemies? A person accused of a criminal offense without any evidence is innocent. Demand open communications on our, happy happy demonized to suffer dumber than dumb coast to coast air wave specialists.

Parents Must Immunize Their Children Or Go To Jail
http://www.prisonplanet.com/articles/november2007/141107Immunize.htm

Liar Liar

http://www.crooksandliars.com/Media/Download/23225/1/wj_rivkin_110607.wmv
http://www.crooksandliars.com/Media/Download/23339/1/twaw_rivkin_swift_111107.wmv
ect..

Look, torture is criminal. Do you physically slap your neighbors, to find out if they did the criminal's crime? Should we slap Rivkin to ask him if he plans to commit crimes against the innocent, and if he then says no, again repeat till he's rightly dead from hearing a liar's denial?

Torture is a crime warranting a life term sentence or death in America by LAW - firmly established already by the "War Crimes Act" of 1282. Demand Justice to save the lives of our innocent selves forsaken by the for cash profit, private news parrots. Believe in US demanding open debate for a positive change why don't you.. Nazi Germans were a happy happy bunch too over the growing threats of torture and enslavement through blanket annihilation... initially. Don't let Bush further hurt my dying America through his personal self contempt for our shared values.

http://www.whitehouse.gov/news/releases/2007/11/20071107-5.html

Look, November 7th, the demon antichrist stated he and the neocons ordered the murder of more than a million innocent Iraqis indiscriminately because, he was simply enforcing UN resolution 1441. HE LIED. [how else could the UN officially declare bushites as war criminal? NO CAUSE!!] And multi-million dollar salaried, "American" reporters, who full time, claim to represent American interests while you slog double full-time for corrupt private bankers, refused to call him on it to defend ourselves from his easily provable demonic tirades against God as the innocent. On the scene, and still today... YOU, as American are TRULY dying for George Walker Bush's continuing LIES. Johnny Wizard is Forever King of this moment being. If you can't believe it is important for you to raise your cries for justice likewise, we're all going to be done for lost to indifference. Defeating the neocon is serious business my brothers, serious business.

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrocities.htm

/ / commanders may give orders to "shoot first and ask questions later." \ \ KING RULES: Aim to and kill innocent people, your guilty of murder. Order such conduct, like amerika's George Norry would boastfully crow, your a guilty bushite nazi war criminal.

Bill a bushite to defend Humanity, to return a freedom for believing. Every thieving bushite dumfuk grunt of the Air Force is a demonic LIAR, accessory to mass murder. And even though, CNN, CBC, and MSNBC suggest TORTURING innocent people to death isn't illegal warranting the death sentence, it still is, and will remain so for as long as we live to die a bushite war criminal for defense in America and God, so says the Son of God, as Man of men. "Die bushite die".

The bushite has murdered many thousands in Afghanistan to push dope, more than a million in Iraq to steal life as lawlessly demonic, all the while actively thieving to destroy Johnny's America for the praised by TV 'neocon who?' news peelers.

Bush closed 911 investigations immediately after the terrorist offense of no questions! no questions!

AMERICA RISE FOR AMERICA

Support the arrest of Bush, Cheney, Rumsfeld, and Condi with Myers for the TREASONS of 911 to save Your freedoms to be so, or don't, and see if we care truly ever.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure,

thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of man. All truth will be disclosed by the revealing hand of US.

HI Mama!!!

The One and only,
King Johnny

-

http://www.crooksandliars.com/Media/Download/23247/1/CBS-FEMA-trailers-110807.wmv

-

THE GREAT KING OF AMERICA

PBS et al.. The bushmob is thieving billions from America as we speak, to further terrorize a dying America lost to the indifference broadcasted daily on almost every radio and TV network as our silenced voices.

Mr. Bush, the terrorist, doesn't care to war for your stolen billions, instead wants to kill even more innocent others as neoconner traitor. In your name as "American." Johnny America begs to disagree with criminals actually, and has taken a stand against these 911 war mongers escaping our authority for proper Public acknowledgment. If you, my reader, would only support yourself.

Please, my friends, fight for our dying America. The TV and radio celebs deliberately refuse to allow US to know: Ahmad funded Atta, and, of the videos of iron flowing like water from the WTC towers - all to KILL ourselves for the enemy liar neocon.

Remember: these thieves have stolen from
all still paying Americans dying from true self contempt. No evidence against an accused is US being truly abused.

http://www.crooksandliars.com/Media/Download/22786/1/rice_iran_sanctions_102507.wmv

Listen to this demon nazi witch, the zionist bitch who personally FORBADE a plead to stop indiscriminate killing in Lebanon, assisted in dropping seven million land mines on Lebanon, and was CENTRAL to the invasion of Afghanistan for Enron's master plan, tells US with bushite lies that no, Iran was responsible for the terrorist crimes she fully acknowledges to be responsible for actually. I ASK: ARE THERE any soldiers from America who don't believe this 911 witch shouldn't be tried for high treason as a bonafide TERRORIST? Listen to the end where she says America supports Iran's pursuit of nuclear energy... so why does she want to

murder millions of innocent people with fall out then.. EH>?
WORLD: threaten to liberate nazi America, if they
indiscriminately murder millions more of innocent souls
without cause, but for the demon antichrist thieves who speak
nothing to defend Humanity. Much like happy happy who cares
Germans were under "liberator" Hitler. Except however,
in our defense, we at that time, didn't have our internets,
or so many, 'you have no power, you have no power' corporate
news channels for Americans to quietly sleep through.
Americans who refuse to speak outrage in the defense of the
Human Race, are Americans not worthy the title of fellow
Human beings. All they as bushmob amerika have done, is
thieve, destroy and murder from everyone of US since
911. I am growing wearily concerned over whether Americans
even can still express real anger over their continuing
sacrifice.

ZIONIST NAZIS QUOTE US SAYING everyday 'Kill the Jews, kill the
Jews' No, bill the escaping un-arrested zionist god betrayers
who rape, murder and steal from Humanity as LIARS - all done by
US to DEFEND Jews, to Defend G-D, To defend Christ.
Christ - Born King of the Jews, as true King of Kings - I am by
no accident in every word, truly greater than 'great'.

FREEDOM

Look: corporate magic TV people couldn't care less for US if
they tried. Ahmad funded Atta. bin Laden claimed he played
no part in 911. And video of iron running like water moments
before the first tower fell is freely available for download
all over the place. CBC, CNN, FOXnews et al. know the
Bushmob did 911 in other words. Live for freedom dying
America! Johnny America wants to be invited on Coast to
Coast. Make it happen Man. Justice for god, is Justice for
all.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unacceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of wondrous tragedy?, Jeeze.. I seriously need money to feed myself.

/ / "I grabbed her little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite TRAITOR and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children practically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.."

To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones.

-

Not as tyrants have we come, but as liberators
- Adolf Hitler, 1938 -

Terror watch list swells to more than 755,000
http://www.usatoday.com/news/nation/2007-10-23-Watchlist_N.htm?POE=click-refer

Hey! without evidence, we all could be down for abuse as innocent doers for evil Bush.

-

Look, do you want to defeat the bad guys, or not? Bush gave US zero evidence to form our free thoughts on the 911 Justice issue. Treason. Simple.

I have the plan. Return all the stolen monies, and hunt those who rape torture, or murder. And.. get the neocons for treason on 911 most especially. So, here we go..

/ / Putin recently declared that Iran does not possess nuclear weapons, is not pursuing a nuclear weapons program and poses "no threat" to any nation, least of all the United States. [...] If Putin is evil, surely Bush is worse than Satan himself. \ \

love LIFE by fighting to win
against the traitor neocon thieving terrorists, who will the death of innocent families to escape themselves our accountability. False accusers who deny respect for yourself as a New Yorker included in forming our conclusions with facts as understood actual. Military heads generally do not have the skills to communicate such clarity, for they are not swinging guitarists, as too cowardly to speak a care for Freedom through Justice in Johnny's America. Babble babble..

Bombs Kill People

Nazi Israel, the ungodly nation that murders Christians in G-D's name AS THIEVES, deserves to die as proven war criminals, to bring about a living nation that respects the Jew by Law, to be just me or You living freely for happiness.

cleveland.indymedia.org/uploads/2007/07/all_time_low.mp3

/ / By simply deciding that something is a "state secret," the Bush government has avoided answering for its brutal treatment of innocent [TORTURE] victims in the war on terror. This is a perversion of the principle of American justice. \ \ Realize: Mr. Bush, the demon enemy of all humanity, out of the same mouth, states torturing [innocent victims as satanic liars] would be ungodly, and isn't done. Like bin Laden did "it", Saddam wouldn't let inspectors in, and neocon thieving soldiers who murder our families indiscriminately as zionist betrayers to Christ and America are Heros.

bush "We do not torture"

Kill the bushite enemies BY AMERICAN LAW for torturing innocent people to death as lawless 'whore yah' thieving disciples of the ungodly antichrist who bombed Iraq for NO REASON WHATSOEVER.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist.

http://www.naomiklein.org/shock-doctrine

-

Project For The New American Century
http://www.freedomisforeverybody.org/PNAC.php

"...advanced forms of biological warfare that can target specific genotypes may transform biological warfare from the realm of terror to a politically useful tool."

USEFUL! Tell me, wouldn't YOU have publicly tried, then executed neocon traitors for mass murder if you were dying as Johnny's America?

AIDS as a weapon used by those of "Project Paperclip", zionist neocons who war as enemies of humankind? What evidence does a bushite need, when it thoughtlessly murders America for demon bush as it's "G-D"?, the thing that does all it's opinioning for it?, on who is guilty of evil doing

in complete blind faith puppeting LIES?

Protestor's sign: "killing innocent people is the problem
not the solution."

They shoot innocent women and children dead in the streets for
humor, and bushite pirates at CBC and CNN, state bushite in
Afghanistan are doing a good thing helping the bushmob escape
the crimes of 911 by warring for Muslim fundamentalism,
persecuting INNOCENT women and Christians, while for
entertainment, bomb innocent families running for their lives
from a Holy Church. Soulless child killing soldiers who CBC
execs would tell are our DEMONIC heroes. Lawless dope pushing
cop killers have got to go down dead screaming, instead of the
innocent - YOU and me they target for MURDER. Death to the
dishonorable bushite THIEVES, death to the enemy neocon LIARS
of GOD and man.

We can really be something greater, while a murderous bushite
thief, a LIAR, can hardly read or write Liberty without
flinching from self contempt.

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a
war. It is the prevention of crime, the enforcement of our
laws and the winning of justice for those damaged by their
infringement."

You got that right. So, join US in demanding the quick
trials, and public executions of known bushite enemies who
murdered Americans on 911 with general Ahmad, and who with
Peter Power, murdered the innocent in Britain for more stolen
goods against God. And anyone in the air force as bushite
bombers should be a great joy for US all to hunt for
prosecuting too. The bushite dumfuk is an enemy to our lives,
with it's blatant naked contempt for the innocent, who like
the demon liar THEIVES at CJOB, George Norry, or Hannity, will
forbid ANY human defenses of the lawless dictate of the
IRRATIONAL tyrannical demon antichrist, all so to victimize
more of You as the censored forsaken.

-

/ / The mere fact that one can deduce a motive for a
person or a group does not mean that they perpetrated
the act...and it hardly suffices as proof of anything.\ \

Just try telling that to 'why work to make life better'
CBC, CNN, or FOXNEWS censors. Look at me!! They refuse
to acknowledge my documented info as REALLY important
to your continued ACTUAL survival.

Who fuking cares right? Certainly not the enemies
of America at the Coast to Coast radio network, who would
kill Americans for the rich neocons without question. It's
JUST American kids getting conned to die as bad guys.

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert
Justice for God and Johnny. In fact, yesterday, they did a
special, all on how "God is NOT Great", giving that bush bitch
demon LIAR, all the space to pontificate it's hatred for
Wisdom, Science, and GOD, with only nods and smiles from the
'illiterate' hord. Remember: A zionist KNOWS it's an enemy of
Humanity when it supports dropping seven million land minds to
murder indiscriminately OUR CHILDREN for decades, or stealing
a Christians Home because they say God says Jews would do such
ungodly acts. Blame innocent Jews the holocaust denying
zionist shout, of which not one, is a Jew. Like me.

-

REMBERANCE DAY

So Remember: Bushite grunts told the world they wouldn't let
anyone out of the city, because [enemy Sattler LIED]
pro-bushite Zarqawi was there present, so the innocent
families who believed they had nothing to fear from the liar
disciples of the ungodly enemy of ALL HUMAN LIVES, remained in
the tiny city to be indiscriminately 'protected' with more
than nine two thousand pound bombs, or made dead instead by
heinous pro-bush escaping war criminals who used white
phosphorous on civilization. All to die our Humanity for the
thieved loss of evidence to demand ourselves of some official
freedom time to deal with our terrorized as suffering reality.

-

CCTV proves police lied:
de Menezes behaved normally before being murdered
http://aftermathnews.wordpress.com/2007/10/09/cctv-proves-police-lied-de-menezes-behaved-n
ormally-before-being-murdered/

-

Support my cause, which is your cause.

Zionist american media news celebs do tell, everyday, soldiers
for the neocon are all Heroes.

Please, my brothers, join me in hunting each and every bushite
present in this video down for death. For a Love of God that
will never end, until we have seen each and every responsible

child killing bushite present brought to true Justice extreme.

/ / Bushite Soldiers beat Defenseless Barefoot Children to Death for
Satanic Fun
watch?v=l2zZkbhc77M>
.
Even after they plead them to stop they continue and
the cameraman seems to be having an orgasm.

OH GOD! - to not believe as real Patriots - OH GOD!

http://server7.whiterosesociety.org/content/rhodes/RhodesShow-(8-10-2007).mp3

'Why
is it so crazy'?, you might ask an un-responsive big sky of
Love? Well, the Bush administration committed 911 with
General Ahmad that's why.. and threatening Humanity with
torture, is how the neocons plan to fear YOU into speaking
nothing for the defense of innocent others.. As a
consequence, more than half the monies spent each month on
this war against civilized Life, isn't accounted for by
anyone. Except those at the Pentagon STEALING from a deafened
America. In fact, Moyers at PBS reported none! of the
billions flowing out of American pocket books EVERY MONTH for
the bushmob war monger shysters is actually audited for the
taxing payers.

Mr. Bush, the terrorist, doesn't care to war for your stolen
billions, instead wants to kill even more innocent others as
neoconner traitor. In your name as "American."

Support my rise against Living's enemy George Norry, by making
an effort to demand real Justice for dying American values.

CBC just did a report about all the great heroin coming in
from Afghanistan, that will still cause crime, and be illegal,
(and maybe give you life in prison as an American,) but
brought in with the help of the demonically evil bushite
thieving murderous military, by the likely ton full to attack
our direct family left un-protected, BY YOU PERSONALLY. And
guess what? THEY, our media masters, couldn't care less if
they actually tried to be our good guys. Reminder: the god
guys is good, the demon liar antichrist evil enemies who
thieve from Life with censorship is bad. If they hide
ourselves too far, they loose all around, up and down. So get
to it. Or don't. Your choice. Life lived Now, or damnable
death by cowardly design brought forthwith under your own
power to do nothing under such terrible costs against our
suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

No evidence against an accused is US being truly abused

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

God Damn America

You f-cks, because Bush told congressmen secretly about truly torturing innocent people to death in YOUR name, doesn't make the crime any less satanic. True Christians will execute bushite torturers with glee. America will pay millions a head for each bush bitch nazi traitor to children as family. The neocons will all be tried to death for treasons like 911, and for supporting a slaughter against Iran. For Petraeus has giving US no evidence to form our conclusions on the validity of his therefore, TREASONOUS statements. Bushite are murderous thieves of Iraq and deserve by the measurements of any civilized man, a action worthy of death as demonic, before allowed to further steal from our Humanity. SAUDI Bush bitch Buford Blount gave out 170 tons of explosives to KILL marines with, and Petraeus doesn't call for his rightful death, nor for death to be brought to bushite soldiers who kidnapped bare footed children to be beaten to death on video tape. {KILL THE LAWLESS BUSHITE DEMONS HUMANITY SCREAMS IN AGONY] hundreds of thousand of guns were 'lost' in Iraq through bushite management skills, and liar Petraeus speaks no outrage. Private death squad goons are committing crimes against GOD, and Petraeus blames no one. MORE than half the monthly bill

for these bushite bleeding atrocities to Humanity, are not even accounted for by ANYONE, but for the thieves at the Pentagon who are ROBBING america with Petraeus' silence on the life and death issue of America. Again, Petraeus knows the bushmob did 911, and would rather kill your stupid american teen, than stand for freedom in America by holding evidence a pre-requisite in determining OUR capital allegations. Death to the false accusing bushite, death to the enemies of America,

Jon Stewart, the twisted nazi clucker, claims now to be a "Big Jew". The demon zionist, who claims he can commit no crime against GOD with silence on the issue of innocent Humans being robbed and murdered by zionist 'buddy' Kristol, and as such, spews nothing on 911's demon witch Condi dropping seven million land mines on Lebanon, to murder Jewish children indiscriminately for decades, no, he just laughs at G-D'S true suffering like traitor enemy happy happy George Norry. Laughs at torture being actually allowed, while laughing in contempt at politicians who wisely will to re-distribute the nation's wealth to it's worthy Citizens. Instead of some nationless nazi "jew" like Jon Stewart, a free loading foreigner who came to religion to take away life from hard working American sufferers who want truly in Justice as Freedom. al-Qaida = General Mahmoud Ahmad. Torture IS against the law, and deserves the death sentence. Bushite Cofer Black MUST be put to death for being a Satanic demon enemy of Human life, who freely admits he tortures innocent people to help escape the neocons for 911. Bill a bushite for America, bill a bushite for God. What do Texans own guns for, if not to bill a bushite child killer like those in the evil enemy pro-bush air force. Bushite repeatedly have been found killing innocent people without apology, in fact, it was only months ago where amerikan soldiers in Afghanistan shot people indiscriminately for more than six miles in residential districts,

/ / 'Why are you taking pictures? You don't have permission."' [...] the [bush whore] American, speaking through a translator, warned him that he did not want to see any AP photos published anywhere.\ \ALL REAL MEN - kill the bushite why don't you save some innocent lives for God in America? Kill it man, for, bushite bombers aren't even human.

and now, as reported, the narco-gov has put to death at least twenty Afghans, who were claimed, without trialed evidence, to be guilty of such actions. The narco-gov refuses to call for the execution of known bushite who torture INNOCENT PEOPLE, or rape them, or thieve the 80% of charitable aid given from Canadians. Despite CBC refusing to report on the facts to let US decide for ourselves. Fight back for Christ, fight back for love, fight back for freedom, fight back for God.

Please, I beg you again, help me speak freely on coast to coast to accept all challenges.. Please help US. George Norry is a blatant naked traitor to freedom for America. Again, George told Alex Jones he would not allow Americans hear the calls for liberty, unless Alex agreed to not inform the public on who personally was responsible for 911. Jones agreed. I often fear, Jones wants to be loved as Hero, over the wiser words of ourselves on who is who here. CFR, NWO, whatever, Bush closed investigations immediately after the 911 terrorist event of no questions!, no question!

Investigating the Investigation
http://www.alternet.org/story.html?StoryID=17816

/ / After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" \ \

George Walker Bush, "The Puppet" is GUILTY of TREASON a thousand and one times over already. We all love Alex Jones, but this nwo bullshit doesn't apply to the lawless demon enemies who inflict harm on our humanity because they confusingly tell US, they enjoy it. Murder, rape and pillage for the sake of murdering, raping, and pillaging. Look, I'm sure we'd be able to easily work out our differences, if George Norry's amerka would take our calls for clarity, on Justice ruling our ways to a fool's paradise where those accused of a crime without any evidence would be US, as the INNOCENT forsaken in God's good name.

Our Mr. Bush Jnr. "Torture is not a part of our soul."

Signed,

Johnny America

-

The Son of Man Begs America

/ / Seventy percent of the people are without adequate water supplies and 80 percent lack adequate sanitation. \ \

DEFEND THE PEOPLES OF IRAQ FROM BUSHITE NAZI DUMFUK GRUNTS

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

-

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new

American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise,
joyously, with pride, destroy the neocon traitors of Justice -
for the true Love you have as Freedom willed - is as granted.
Don't buy their demon lies by blind blanket false assertions,
against YOUR Humanity's Innocence in tyrannical bondage, all
done in to fool you believing, we have no rights to be heard
in our presence - here existing freely. Therefore, to survive
US all for something better, halt the 'escaping' murderous
bushite thieves for God and America. SOLDIERS: Instead of
dying for nothing, my wannabe Patriot Brothers, try joining
Liberty's cause, which is our cause truly. Is it because
corporate TV zionist money whores, are cowardly and ignorant,
as evil hypno muggers, in MY dying for real America, that YOU
refuse to speak Now in your Humanity's begging further
defense?, on evidence being the only requirement to establish
a person's guilt or innocence? for ungodly terrorist
activities committed in our name by bushite bombers from the
neo-conned AIR FORCE, who, as rotted juveniles, cheeringly
bomb us People indiscriminately leaving a Church as something
TRULY SATANIC? To dare, in our presence, continue threatening
harm against an innocent child of wonder, not yet even born to
God's suffering world? Bushites war LIFE itself. So then
pleads I again the Son to God, as Man to Men: war to kill the
enemy bushite nazi savage thieves, for real Freedom is waged
truly by Just causes. The mute, pro-censorship/tyranny
THIEVING bushite savaged nation, has NO EXCUSE for the crimes
they have committed in our dying names. I demand our voices
heard internationally for Justice as Freedom is Godly.

http://nw0.info/files/Radio/Jack%20Blood%20Radio%20Archive/2007/October/jb_2007-10-03.mp3

Dan Marvin, an actual CIA assassin, talks about how those in
the secret CRIMINAL command structure of defense for America,
side to order the murder of Patriotic American Soldiers who
threaten real Justice succeeding against the neocon God
betrayers, neocons, who just simply lie
'zionist equals Jews' no we don't take your pleading calls,
international Bush rules news broadcasters.

See? bushites are cowardly, or ignorantly evil - as thieving
dumfuk grunts for the enemy liar neocons. Look, they refuse
to kill on sight, soldiers who kidnapped Iraqi children to be
beaten to death on video tape, or any Aegis employees for
actually murdering INNOCENT Iraqi men, women, or children for
stolen cash profit, over the loss of LIFE the bushite TRULY
pays in collateral. DIES!

-

http://server7.whiterosesociety.org/content/rhodes/RhodesShow-(3-10-2007).mp3

The Lawless thieves of Blackwater hire known war criminals from the most brutal of tyrannical regimes to carry out the neocon agenda of 'freedom' for 'Iraqis'. American tax payers pay $1,222.00 per death squad goon, per day, while billing their sacrificing kids, tens of thousands for up and coming medical costs not covered. Did you know they, the incompetent bush regime, still haven't fixed Walter Reed? Who really cares right?

Again, national bushite broadcaster,
George Norry stated he'd go ballistic against any American soldier who refused to murder for the neocon as traitors, and "America" STILL refuses to speak in their own defense for dying. Death to the bushite, death to the enemies of Freedom for America.

/ / "as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.] \ \

http://youtube.com/results?search_query=%22hadji+girl%22&search=Search

Look, listen to soldiers who sing about the joys of murdering innocent young girls, see their faces in the videos celebrating the murder of girls LOVED by GOD and ME, and question: Why won't you as an American assist Christ in the glorious hunt. Nothing better in this world than to kill a murderous bushite who claims it's lawless to this suffering Universe, ruled criminally by the demon antichrist enemy of ALL HUMAN LIVES. All religions want US to defend GOD - please help me take on all challengers.

-

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeatedly reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently, but just lie and tell US they do. Look to see, almost all political internet traffic condemns Bush straight to hell well

he rightly belongs, but the polls still say no - WE, seeking for Just cause, are the minority.. just roll over and die for the neocon betrayers to god and country, life and loving.

-

http://www.liveleak.com/view?i=456_1177473318

IN THE LAND OF THE DEMON ANTICHRIST.

-

How is a Zionist Jewish?, I, the King of the Jews Messiah ask my fellow brothers and sisters everywhere. How? FOUR million land mines in Lebanon a godly act is it? Jew only roads not Aparthied, nor stealing a Christian's Home I suppose..? How?

An Oath Every Soldier Swears To God With

/ / Lieutenant Watada \ \

Again a Patriot Soldier whose only crime is that he refuses to commit a crime in Your name. Do something about it. You defend this Patriot American Citizen as if Your America depends upon it. The "Judge" who publicly forbids to hear Watada's freedom defense, an Oath every Soldier swears to God with, is a "Judge" who needs to be privately arrested for treason against YOURSELF. Support my call to demand our voices heard for Just causes, or go die silently to the grave

prisonized in a zionist neocon military dictatorship

True Enemy of Liberty

I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really set ourselves free with..

"Al-Qaida" = "General Mahmoud Ahmad"

A neocon bushite soldier is a true enemy of Liberty for America. They as DEMONIC LIARS, are dishonorable THIEVING nazi savages that bomb our innocent families with criminal intent to MURDER. Enemies of Life and Love, a dead bushite is an enemy of GOD halted from victimizing further our loved brothers and sisters, mothers and fathers. Death to the neoconner bushite dumfuk grunting liars who bomb our families, death to the enemies of Christ who war for the escape of the true culprits responsible for 911. TRAITORS.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks to their bitter end.

To Kill a Bushite, is to be Heroic

American soldier: Your enemy is TRULY LIAR happy George Norry. The demon knows of Ahmad, and forbids any guest from uttering such understandings in defense of the DYING dumfuk grunt nazi - Good riddance? Do you care that your country men are dying for the criminal zionist neocon as traitors? Support my demand for US to be heard GOD DAMN YOU. ...or die by the hands of Humanity.

-

> Taken from the superb Johnny rant "Is it Just"
>
> / / (Can you
> believe, the war monger thief and liar, Our Mr. bush
> Jr. actually banks for Christian fundamentalism,

> thinking he's gonna ride them bible belting for all he's
> worth?)

> \ \
>
> Bible belting... God, I was really something!!!
>

That's fighting words to a corporated "generation" of left iliterate non-speaking, hypocrite nazi savages, dying sacrificed, who auto figure by remote control, we can not be allotted the public defense for freedom's cause, Justice for all by International News Challenges. ! Justice for All is given through the power of the indivisible truths of our living existence, as concluding: evidence must be used to convince ourselves on who is good or evil. period. Bushites are as dumb as they are cowardly lifeless nazi trash, good for only to play the mute ungodly bad guys in evil wars for the demon antichrist enemy of all human lives - 911's George Walker Bush, The Traitor. See? A bushite faiths that America can be no greater with freedom ruling justly supreme, for as bushite, it would be back as being truly talentless, as a likely criminal enemy of your home town of loved families.

broke.

Hey?, can you spare change to help a brother out some? We sure could use it..

Don't just show 'em the door - let's get the booty back!
http://whereisthemoney.org/

I'm with YOU!

Ahmadinejad: Zionists are NOT Jews
http://www.wakeupfromyourslumber.com/node/1249

Dehumanizing the Palestinians
http://electronicintifada.net/v2/article9002.shtml

/ / The Israeli cabinet has voted to declare the occupied Gaza Strip a "hostile entity," [...] The decision was quickly given backing by US Secretary of State [demon 911 witch] Condoleezza Rice. \ \

This is of course recognized by all people to be a crime against human life. But CNN refuses to acknowledge the zionist action, for WE would ALL scream in outrage that American tax payers fund such nazi atrocities against G-D.

CHRIST RETURNS

I again, beg Humanity to speak in opposition to Amerika in the defense of our innocent forsaken dying lives. CBC producers know the bushmob did 911 but lie with propaganda to kill our families for the ungodly as thieving neocon enemies. They refuse to inform ourselves that Al-Qaida is General Mahmoud Ahmad, as according to the FBI. Or that video of iron flowing like water from the WTC towers exists indicating without doubt, the bushmob enemies did 911 as TRAITORS.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Who cares about yourself if you won't listen as reason to? What can you lose when you have granted to be blindly stolen from?

Zionist nazi Israelis, do tell as LIARS, that Israel, the nation that openly thieves, tortures, and murders daily thoses THEY ADMIT are commpletely innocent, are enemies of every religious person denied access to honestly speak the facts as firmly established since the dawn of Man.

/ / "as the bullets began to fly, the blood sprayed from
between her eyes, and then I laughed maniacally." [, then were
heard the cheers of godless bushite dumfuk traitors obscening
to God and Man as the unholy enemy.] \ \

Instead, we as humanity suffer with yet to be hunted demons
who sing in joy while laughing and cheering over the murder
of our innocent children. God, I beg you to only listen to these

naked demons on video, then join me in calling for Justice as Life Wills. The company Aegis has been found killing innocent people for money from America, and Americans speak near nothing for our defenses as their very own sons and daughters die in total contempt.

So never lose sight that TV news personalities hold an unwavering Public commitment to answer our calls for liberty with murder, as the enslavement of Your dying rights, through willfully committing criminal acts in our demonized innocent name is real. Johnny Wizard needs his own international live radio program to take open line communications.

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

-

http://www.haaretz.com/hasen/spages/899694.html

/ / The fact is that it shoots at figures it considers suspicious, with full knowledge - according to its own contention - that they are liable to be children. \ \

HAARETZ!

-

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state, commi red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of, that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans. \ \

Announcement Of 9/11 War Crimes Tribunal
http://peaceinspace.blogs.com/911/2007/08/announcement-of.html

/ / a Judge on the Kuala Lumpur International War Crimes Tribunal, will make a public call for an International Citizen's 9/11 War Crimes Tribunal. \ \

-

Israeli High Court permits torture of Innocent Humans
http://www.guerrillanews.com/headlines/14593/High_Court_permits_torture_of_Palestinians

/ / Israel has illustrated contempt for law and the value of human life, or even possessing an ethical standard of moral behavior with respect to civil and human rights \ \

Of what religion to any GOD, is this ZIONIST nazi behavior condoned? Demonic thieving bushite enemies of Man lie about such behaviors bring about 'freedom', but who of US wouldn't kill such contempt to save the lives of Our innocent beloved families? A bushite kidnaps Iraqis routinely, (or orders the murder of those between 15-55,) and what of any real man present, doesn't immediately arrest or kill such CONTEMPTIBLE bushite loyalists to the ungodly enemy antichrist?

-

Tatum, who freely confesses he's a proud child killer without apology, is being made a free man in evil bushite amerika. The TRAITOR prosecutor has ridiculously stated to our world -

/ / Lt. Col. Paul J. Ware wrote in a 29-page report that there is insufficient evidence to show that Lance Cpl. Stephen B. Tatum did anything other than follow Marine Corps rules when he killed [for no reason, innocent] women and children \ \

TATUM ADMITS he enjoyed slaughtering the defenseless families deliberately!! In fact, he wrote a card to a dead marine's family, testifying that he murdered the innocent young girls for the tyrannies of the antichrist. Evidence that TRAITOR Paul Ware and Mattis hides from the Christian American Family. Will YOU, as an American man, allow these two bush bitch nazi punks to survive as furthering the commitment of more war crimes against the INNOCENT? as a zionist neocon's "Hero"? Will You defend our girls? Peoples of Earth! Help Me save our children.. please.. please..please

TRAITOR Paul Ware "Tatum shot and killed people in houses 1 and 2, but the reason he did so was because of his training and the circumstances he was placed in, not to exact revenge and commit murder."

TATUM STATED DIRECTLY IT WAS TO EXACT REVENGE AND COMMIT MURDER!! HE WROTE SO TO THE FAMILY OF THE MARINE WHO DIED! A FAMILY WHO WOULD MOST CERTAINLY SUPPORT TATUM'S EXECUTION AS DEMONIC TRAITOR TO FREEDOM IN AMERICA!! ASK THEM!!

See?, Tatum is a zionist, but not Jewish!!! While neocons suggest our reality impossible without corporate challenge for exploitation of our 'unrepresented' lives.

/ / Ware has recommended to [demonic nazi enemy of Life 'judge'] Lt. Gen. James N. Mattis, that charges be dismissed, \ \

"Mad Dog Mattis,"

MATTIS!! The guy who murdered countless women and children at a wedding party, while after getting caught PROPAGANDIZING to forsaken America the innocent victims as al-Qaida!! CAUGHT! Mattis called innocent six year old girls "al-Qaida"! CAUGHT!

BUSHITE ENEMY OF AMERICAN FREEDOM Lt. Gen. James N. Mattis has been made into a "JUDGE"!! THE WOMEN HATING NAZI FUK! A JUDGE of Men by 'law' in bushville!!!

the [anyone's] CHILD KILLER Lt. Gen. James N. Mattis QUOTE: "It's fun to shoot some people" - defenseless innocent WOMEN HE SHOT!! INNOCENT CHILDREN HE SHOT!!!! YOUR CHILD!! FIGHT BACK FOR CHRIST! FIGHT BACK

Prosecutor Lt. Col. Paul Atterbury "Lance Corporal Tatum entered a home and participated in the killing of Iraqis who were not legitimate targets, then entered a second home and participated in the murder of [more innocent] women and children,"

/ / One of the Marines charged with murdering civilians in Haditha, Iraq, in 2005 knew that only women and children were huddled in a back bedroom in a house there, but he [TATUM] opened the door and shot them anyway, a squadmate testified Tuesday. \ \

TRAITOR Mattis "The Marines have landed, and we now [as ENRON] own a piece of Afghanistan." [thieving from all for 911's neocon, especially undefended American pensioners... hail satan - 666.]

CHILD KILLING NAZI TRAITOR GETS PROMOTED!

/ / Secretary of Defense Robert M. Gates announced Sept. 11 that the President has nominated Lt. Gen. James N. Mattis for appointment to the rank of general. \ \

http://www.911pressfortruth.com/

TWO OF THE PROTECTED 911 HIGHJACKERS WERE WORKING WITH SAUDI INTEL!

Murder for stolen money in America's America!, and CBC, CNN, FOXNEWS report no cause to care! Treasonous George Norry CONS Americans to murder for the evil neocons with threat of his going "ballistic" against any or all Americans who try to stand up as a Just peoples for what is righT, for Life and/or God by SPEAKING FREELY. Will You try?, or go silent to die as unworthy? Your call bud...

What Freedom do bushite war the innocent for to rape, pillage, and murder as blind neocon followers of the 'lawless' demon antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to

escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in a year, if you adopted Canadian Health care systems overnight for yourself to immediately provide all People the respect for life we deserve. Or don't, and needlessly continue to pay twice as much, while dying broke as self made losers without a cause worth preserving. A free market open to waste for profit

Mike Huckabee Publicly Questioned on 911's ISI General!!!
http://prisonplanet.com/articles/august2007/230807_b_huckabee.htm

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty [..] \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of
blind terror? Only bushite amerika would fall silent under
such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it
will discontinue its practice of "capturing" populated
Palestinian villages during military training exercises. \ \

Tell me, is this the godly people the neocon boast of for
defense in? Or, just again examples of standing terrorism
against life ourselves - committed by the censored as will
giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly
the very same terrorist acts they say we should all be
outraged against? Somalia is a case to point. They murder
helpless people as bushite, then say they'll remain dying to
thieve further as enemies to Humans being. It doesn't fool
me, but perhaps it does you. A neocon soldier murders
innocent Iraqis, while selling you they are all there risking
their lives to bring freedom. So, they die. For lies. Die.
Again, KNOWN Aegis goons openly commit crimes against Iraq
done officially to get killed! the supposed to be Patriot
Marine. P2OG. Soldiers under bushite command would rather
die cowardly, than to honorably demand the bushmob's arrest
for public trials as defeating ungodly fascist war criminal
savages.

Why suffer otherwise this way under the tyrannies of naked
neocon plunder to deny our lives for measured justice I ask
YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as
starting by supporting our rise to highest acclaim with my

authority free willed to anyone. Let's face it, we're great
because Your great. However, for greed, corporate america
aren't taking our concerns nightly. We want Justice, and WE
will get it if we reflect together with impeccable credentials
as standing with measured reason for proper assessment on
rights making might. Who is who here, a freeing peoples I
tell you, arriving to bring a true patriotism to Life for US.
Are you with yourself as respected an equal under the law
devised fairly for all concerned parties?.. well then...
let's g o ! ! !

be Great!,
for here comes the mighty,

Johnny America - make way! make way!

-

Footage of Israeli Soldiers Beating Palestinian Children
http://www.uruknet.de/?p=m35516&hd=&size=1&l=e

-

Where is the Evidence?

How so can all of Iranian Military Officers be
"terrorists", while lawless bushite bomb defenseless
innocent peoples indiscriminately routinely, with
praises from the actual demon antichrist responsible
personally for 911 I want to know. NOW. Kill a bushite
THIEF for American Freedom why don't You victimized
Peoples of Earth? A bushite kills bushite for stolen
nickels. Examples: Aegis, Condi's land-mines, fixed
elections, torturing. driving over children, blahblahblah..

Al-Qaida = General Mahmoud Ahmad = ../
ungodly bushite liars

/ / Or, instead, maybe you'll idly watch some innocent person
willfully be sent to prison by liars in your demonized name,
to defend the ungodly evils of war criminal traitor, our Mr.
Bush Jr. in foolish disguises. Your call Bud. \ \

Gaffney "It is not George Bush, it is not the Neocons,"

"," = swinging pocket watch

-

bushite talk about random killing of godly persons
http://www.youtube.com/watch?v=OHvtIL_TRGE

"You can basically kill anyone you want"

26,000 total Tickets sold - 14,302 votes tabulated
http://disc.server.com/discussion.cgi?id=149495;article=112801;show_parent=1

/ / An Investigation is needed here. \ \

I said that years ago, but the bushmob isn't listening, because,
hey, happy George Norry don't care, and CBC, CNN, and FOXNEWS
isn't taking our calls either man.

-

Pro-mass murderer war criminal Kristol once again, speaking
freely to Jon Stewart unchallenged internationally on Our TVs
as "Two Jews" stated..

"We don't believe in original sin."

I believe, Jon Stewart suffers from
the ignorance of Celebrity more so, than a genuine hatred for
Humanity.. as that is the fault of most TVed Americans.
Nothing more greater than getting on the boob tube, to really
make your mark on this fleeting world as they sell their life
away for nothing but the privilege to be recognized at a gala
swarray.. fed on the victimized innocent of Humanity left
robbed as worthless their grand stage. His show is often
quite bright however, and leastly, reminds people, that CNN,
CBC, and FOXNEWS isn't the be all and end all of respect for
US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN
on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with
were when the young caller "Sanable" was supposed to have said
"we will annihilate the Jews" were not even mentioned by the
caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

-

You, George Norry are a demon because you purposefully
broadcast to my America the need for neoconned soldiers to die
for the lawless demon antichrist, knowing full well, you work
'happy' to escape the 911 perpetrators of American
Wrath, like General Ahmad, with your truly evil demonism about
Life, and betrayal to freedom for US humans.. George Norry is

'the evil spirits' he says you can never find. Evidence.

What?

There is no found honor in a thiefs paradise of neocon plunder my friends, no honor.

-

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy."

http://www.thetruthaboutgeorge.com/

Perl of wisdum 'yeah so? Peenackers steal the rights of freedom from people for stolen profits - we rob Americans of their freedom, as is their pocket books, and their wasted effort, all easily conned to be sacrificed for death by false conclusions trumped up by a naked false accuser who will accuse yous lost blindly as the innocent sucker - er.. I mean suckers, Your Mr. Bush Jr., is a demon evil whos attack is not televised for defending yourselves over. Truth and Justice, we own. See?, peenackers are filthy rich from conning your, given life away, right before your eyes. What are we going to do about what is given, bust the bad guys for blatant treason against Cops and the Universe? I mean really.'

The Iraq War Exposed
http://www.netctr.com/iraqwar.html

Neocons are frankly, just dumb don't you know. Don't forget though, their unwavering Public commitment to answer with murder as enslavement of Your rights, through committing criminal acts in our demonized innocent name is real. Johnny Wizard needs his own international live radio program. Any others of all knowing sentience as wisdom being smarter than whoever, even willing to start too a conversation over these matters of justice for freedom ad-infinitum!?

What?

-

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911

financier Ahmad = al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling is as only a puppet, look away! look away!, leaving without challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of

global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

www.newamericancentury.org

Jason Bermas "I just want to point out that we're going to encourage the people to look at the evidence for themselves."

-

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

Intelcenter.com = alqaida videos you can get nowhere else!

-

/ / A group of wounded civilians were also brought to a
hospital in neighboring Kandahar. Journalists were barred
from filming or talking to them inside the wards. \ \

Freedom from what do bushite murder indiscriminately?

/ / Iowa GOP is STILL planning to use the easily rigged
Diebold computers to "count" the vote at the Straw poll! \ \

THIS IS TREASON. But, look, teen soldiers are commanded to be
bushite nazi savages, who cowardly refuse to defend America
from Mr. al-Qaida, General Ahmad, all to thieve further from
the undefended American public.

-

MY DEMANDS

/ / eight million Iraqis require immediate emergency aid \ \

PLEASE HELP US

Again, evil bushite THIEVES claim they are justified when
indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest
to kill for such criminality. In fact, I'd likely even throw
in some bonus cash, an a Freedom medal from all lovers of
Liberty. Did you know, many bushite sing a song about killing
innocent young girls for pleasure? Did you know that also, an
"American" radio host likes playing that same song as recorded
on "American" airwaves? Fight back for God, or die from self
contempt my friends, fight back for life and love.

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-five-more-us-sol
diers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell
neighbors that this was the work of insurgents apparently
without any investigation? \ \

See? in Johnny's world, that "the Army" person would have
been the FIRST questioned, then likely arrested. But look, it
hasn't even been acknowledged as evil doing in progress.
(Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? \ \

The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of all Human Life. A demon that says if you disagree with his blind blanket statements against innocent Life, YOUR a terrorist. At least with GOD, we'd be only killing criminals we couldn't otherwise defend ourselves from with evidenced conclusion through practiced Law judged fairly.

http://www.guardian.co.uk/Iraq/Story/0,,2138917,00.html

/ / TheSpyWhoBilledMe.com regularly breaks news on the clandestine world of private contractors and US intelligence, recently established that Washington spends $42bn (#21bn) annually on private intelligence contractors \ \

do the math - do the math - do the math - do the math

42 billion. 42 thousand million. Or, hiring maybe twenty or thirty bushite LIAR enemies, who blindly giving Americans pay not only billion dollar saleries, but also with their forsaken lives as unworthy of real protections. CNN, CBC, and FOXNEWS knows the bushmob did 911.

So, million dollar saleries? I doubt. Likely a neocon enemy or two robbing from an undefended America. Remember, Peter Power wants US to believe ALL of Scotland Yard would murder Brits for stolen bucks. Frankly chaps, I just refuse to believe such bullocks. Be me man, King Johnny Wizard

-

"He never would have called me 'sniveling,"

Citizens Face Full Asset Seizure

http://www.rense.com/general77/asset.htm

/ / "(ii) to have materially assisted, sponsored, or provided financial, material, logistical, or technical support \ \

So, those who don't support the return of all stolen monies from Iraq, who continue to undermine Humanity's chances for Justice in Iraq, (like every neocon LIAR and foxnews broadcaster, lawless mercenary antichrist disciple, or Haliburton shareholder,) needs their assets seized, and tried publicly for treason as war criminals. Every war profiteer holding more a one hundred thousand dollars will be hunted by the will of Humanity. so says - The Son to God as Man to men.

Bush To Veto Ban On Mercury In Vaccines
http://thimerosal.worldwidewarning.net/www/archives/59

/ / "Under the current administration, mercury has been and will continue to be knowingly injected into the youngest of American citizens. \ \

We Have A Problem Here

Look, Bush closed investigations on 911 immediately, then started firstly on Iraq, for war mongering thieves, with General Ahmad escaping un-accosted for the neocon enemies. Not relevant? Your Constitution is laying undefended, a National act that can not be done by any other terrorist group but those who claim your freedom rights denied by bushite command. Not treasonous? Look Condi, the demon 911 nazi witch PERSONALLY assisted in dropping more than seven million land-mines on Lebanon indiscriminately in Your terrorized dying names. Hate Life and God as yourself do You?

Don't anyone be deceived that the neocon enemies minimally assisted these crimes by refusing to allow US pursue the evil doers by following the actual crime scene leads, but we lack REAL leadership skills that are naturally required to see molten Iron flowing like water from the 911 towers on YouTube.

They, as America's Coast to Coast voices, would rather richly die YOU sacrificed for CRIMINAL zionist Israel, (Israel, where the government leaves actual Jews to die in the streets starving as garbage dumps, to make it look good for MORE giving American charitable donations to disappear elsewhere) before saving the lives of THEIR VERY OWN. Americans don't seem to care they die by their own unwillingness to communicate openly for Justice. I ask you again, to spare me a few dollars so I can feed myself. I am actually, near starving, and never in my most feared nightmares, thought this world, with our communication technology, would leave me without any financial assistance. I seriously need to eat. Please help me, by supporting our cause to not starve to death. If you appreciate my words in defense of the once great Human race, donate a few dollars to this cause. Justice and Freedom for all, especially God as Just, and worthy our praise, Peace.

-

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning \ \

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America.

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who

doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) I HATE the REAL demon antichrist Christ says.

Kagan "You rarely know in the middle of a war, what the outcome will be."

Johnny Wizard the Creator "I win."

-

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 2007 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

-

George Bush "The same folks that are bombing innocent people in Iraq were the ones who attacked us in America on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan - die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of the joint chiefs of staff assisting General Ahmad, in committing the murder of thousands in America on 911 for the neocon TRAITORS, as the same 'escaping' enemies today, responsible for 'secretly' ordering these

indiscriminate terror attack bombings against YOUR
Humanity for their continuing stolen pleasures as
Satanic.

-

"A dead Iraqi is just another dead Iraqi... You know, so what?"

These demons are murdering god loving people as enemies to
Humanity with the nazi assistance of corporate news america.
Will YOU please, support my rise to speak publicly challenging
anyone who disagrees with me, GEORGE WALKER BUSH needs to
be arrested immediately for 911. Peter Power needs to be
arrested for the London bombings. Sattler, Blount, and Russell
need to be arrested, tried and put to death for WAR CRIMES
against Iraq, along with those responsible for other
indiscriminate targetings against innocent PEOPLES for
the zionist neocon god betrayers hidden in shadows as
the un-known "Joint Chiefs of Staff" demon enemies.

-

The fascist control bushite, don't like You to think
independently for Yourself, for we independents out here
make them look as stupid as they are. Thank you very
much for that not so secret info.

-

Afghan civilians caught
http://www.chicagotribune.com/news/nationworld/chi-civilians_bdjul08,1,3303701.story?coll=
chi-newsnationworld-hed

/ / The men told the same story, of how foreign troops
bombed their villages long after the Taliban fighters
had left, how the bombs killed women and children, goats
and sheep \ \

-

'Up to 80 civilians dead' after US air strikes in Afghanistan
http://observer.guardian.co.uk/world/story/0%2C%2C2115846%2C00.html

/ / Witnesses claim a village in British-run Helmand was
bombed for three hours \ \

BUSHITE, THE ENEMY

"Al-Qaida" = "General Mahmoud Ahmad"

/ / Israeli officials have told us that the Finance Ministry
is budgeting basic social services at a percentage of their
known costs \ \ EVIL BEYOND WORDS. KILLING JEWS FOR MONEY.
We can really be something greater, while a murderous bushite
thief, a LIAR, can hardly read or write Liberty without

flinching from self contempt.

Jesus man, do I truly hate these zionist nazi thieving LIARS on our magic TV shows who con our kids to die as bad guys. How about You?

These naked LIAR enemies who bank to thieve more from Iraq, Afghanistan and America, must be brought down by Humanity's ultimate triumph over tyranny through Law. A just law, where those accused without any evidence are Innocent, and WORTHY yOur defenses.

-

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to testify to Congress because Congress, in fact, doesn't have oversight abilities."

Jesus man, do I truly hate these zionist nazi thieving LIARS on our magic TV shows who con our kids to die as bad guys. How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate 911! What have innocent people to fear from a fair, complete and real investigation? \ \

Let us make life better than the neocon envision, and support our rise to popular acclaim by allowing US to speak openly for public challenge in defense of America.

-
True US Bush Iraq-Afghan Wars Deaths At 21,000
http://www.rense.com/general77/true.htm

"In the last four years of war in Afghanistan and Iraq, the unreported death toll of American military personnel is in excess of 20,000 (20,871)"

It's in cowardice that 'Americans' don't speak out for the lost 'loves' of their dumber than dumb sons.

-

Demon enemy bushite in Afghanistan murder children without real understanding 'by accident', [no evidence is shown to ANYONE, just treasonous demon evil bushite necon spewing, "red handed"] lies after lies, while, the Taliban, we are told, are so much worse, because they would murder "ANYONE." Make sense? No. Remember: (The bush regime has been found funding Al-Qaida in Iran to commit terrorist acts against COWARDLY soldiers without free minds to speak in their own defenses.)

/ / The group is demanding his impeachment not only for his crimes against humanity but for lying to the American people about his worship of Satan. \ \

It almost makes me laugh, and then, I push to remind, we are so very far from where civilized is dreamed to reside. Look, think of US as actors, (because that is who we are,) and support my rise to proclaim by the will of a suffering for real human kind. Believe in US, as if your life depends on it, because it does my friends, because it does. Live free or die unwillingly.

-

Demon G. W. Bush "Our responsibility to history is already clear: to answer these attacks waged against us by stealth, deceit and murder and rid the world of evil."

"Deceit" and "murder" to rid our world of justly what dum-uk enemies?

Bin Laden may have arranged family's US exit: FBI docs

/ / A manifest showed the goods [BUSHITE HEROIN] were to be shipped from Kabul to Dubai and then on to Canada. \ \

"We have nothing to do with poppy eradication. We stay away from [pro bushite heroin to kill YOUR kid with] it as far as we can," Maj. Steve Graham of the Royal Canadian Dragoons

-

"Do you care if another bomb went off in Tikrit?
Does it mean anything? NO! It doesn't mean anything."

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly.

Kill a bushite as the Love of Justice for Humanity

The Son of Man BEGS all honorable men to defend Life from bushite enemies of GOD who murder, rape and steal from innocence through lawlessness as thieves of everyone. Please kill the bushite for the love of women and children. kill the bushite for the love of GOD. Please, defend ourselves further hardships by supporting immediate war crime trials to begin against all neocon traitors who LIE OPENLY to kill America's America as enemies to truth, as enemies to Christ.

'Kill Anyone Still Alive': American Special Ops
http://www.atlanticfreepress.com/content/view/1784/81/

Can you not as a American Man, destroy bushite brayers to defend innocent life? Americans could not care less presently for

the value of Human life. Americans do nothing to defend
their lives, but officially plan to murder more for the Satanic
demon antichrist in silence. Out of millions, how many even
bother to make a phone call to talk radio against the neocon.
how many? Five or six? Seriously.. How many? I know bushites
are demon liars for the neocon, but is it really impossible for
"Americans" to try speaking?, in the face of murdering millions
more forsaken by enemy mortal, pro child killer George Norry?
George Norry too nice of a guy to even bother question the value
of American children? The THIEF Art Bell's voice too soothing
to care that neocons own pirated America, and on everything she
stands whoring as WAR CRIMINALS to the FOR REAL antichrist?

Death to the lawless bushite, death to the enemies of Mankind

/ / The U.S. State Department recently issued a report
calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a
TYRANNICAL 'government' that openly practices Genocide, as just
the sort of "American" partner to assist in determining which
further murder victims are terrorists. While the same demon
administration confesses to FUNDING middle eastern al-Qeada to
commit TERRORIST acts in Iran, as demon evil tyranny against
the sleeping Sheeple. Again, it is fully confessed that the
Satanic bushmob is pro terror now. Death to the enemies of
Freedom, death to the bushite betrayers of Life instead of YOU
my innocent friends. Instead of US.

/ / US 'used forced [SLAVE] labour to build Iraq embassy' \ \

-

CIA 'disappeared' seven-year-old children
http://pressesc.com/01181202133_39_names_enforced_disappearences

COFER BLACK is the "CIA" LIE, KILL COFER BLACK FOR TORTURING
INNOCENT PEOPLE TO DEATH FOR THE ANTICHRIST. Death to the
bushite, death to the enemies of Mankind.

Hillary "[DEMON] Bush pulled out the inspectors."
[DEMON] Bush declared, "and he wouldn't let them in."

In Hell

Firstly, the White house doctored the NIE in an act of HIGH TREASON.

Two:

CNN with Hillary acknowledges that the demon Mr. Bush pulled inspectors out of Iraq, but then... how is this not HELL to pay?

/ / Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power." \ \ HE LIED. Not the 'NWO', George Walker Bush, who Alex Jones tells US to look away, because he's only a puppet. Should not Bush be held accountable to the criminal actions he is PERSONALLY responsible for Christ asks YOU?

Arkansas GOP head: We need more 'attacks on American soil'
http://rawstory.com/news/2007/Arkansas_GOP_head_We_need_more_0603.html

Look, bushite DO exist as enemies of the Human.

800,000 Christians protected under Saddam, now killed under Bush
http://www.uruknet.de/?p=m33389&hd=&size=1&l=e

Look, bushite DO exist as enemies of the Human.

-

Neocon Soldier

Bushites who war as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the

basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation
proudly with repeatedly committing aggravated felons, and
South African death squad goons, all to war Love for the
neocon god haters. Who, as peenacking atheists, as their very
own documents stress, would murder anyone of US for a stolen
nickel.

Our Mr. Bush Jnr. "The war is for you or for us [neoCONS] to
win. If we [neoCONS] win it, it means your defeat and
disgrace forever."

Die bushite die.

MSNBC Poll: Over 400,000 (88%) Say Bush Should Be Impeached
http://prisonplanet.com/articles/may2007/210507_b_Impeached.htm

See? Canadians who TRUST CBC would never know by Paul Hunter.

-

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain
anti-torture bill to codify a policy of torture that is now
embedded in our legal system for perpetuity. \ \

WE'D be hunting down those bushite liars who
torture innocent people to death for their satanic pleasures.
For, you know it does warrant the Death Sentence in America,
right? (You can thank Reagan for that...)

/ / In a move that hardly indicates that he was a terrorist
plotting to attack a US government installation Tatar then
went to the Philadelphia police department to complain that he
was being pressured by someone into getting a map of Fort Dix

and that he thought this had something to do with a terrorist plot. \ \

Didn't see this on our TV news either did You?

-

/ / On CBS' "Face the Nation," she claimed that intelligence errors before the war were "worldwide" even though the International Atomic Energy Agency's Mohamed ElBaradei publicly stated there was "no evidence" of an Iraqi nuclear program \ \

That from the 911 witch, who forbade a stop to hostilities IN AMERICA'S NAME against the innocent in Lebanon. Nazi Israel ADMITS to the targeting MURDER of any innocent persons who drive in a truck. Perhaps Americans. Who cares? Not CBC or CNN they'll tell you consistently absent from the crimes scene.

-
Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price that British trained policemen had tortured prisoners to death with drills, we discovered, through the New York Times (!!), that American intelligence officers had been working alongside them at the Jamiyat police station \ \

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky, SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph

over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when
saying "slam dunk" - that, selling the war to the American
Joe, without establishing any real facts would be easier than
anything against the powerless as media unrepresented!

-

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around
them, they couldn't care less." Instead they kill unarmed
innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide
distribution and production of heroin, tells of murdering
innocent farmers, that would never raise a gun in anger, are
those they openly confess to target for first degree murder as
labeled the, second tier Taliban. That's when not defending
American Pension thiever ENRON'S pipeline managed under their
extremist Muslim fundamentalist regime of intolerance for
public communications, as the continuing thieving of 80
percent the Humanitarian Aid given by Canada to feed the
STARVING, and school our children of the impoverished
Afghanistan, as so reported. Eighty percent. 80. 80 percent
stolen. I'm telling YOU: CBC couldn't care less about what
Canadian soldiers are actually dying as COWARDS for:
"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly
partners in crime" CBC national radio management needs to be
arrested in Canada for high TREASON. Please, be a Patriot,
and demand these zionists allow open communication with the
facts to save the lives of Canadians soldiers they hold in
contempt to die as the bad guys committed to no better good.

War and the Police State: Complicity of the American People
http://www.globalresearch.ca/index.php?context=viewArticle&code=THO20070421&articleId=5454

/ / On September 11, 2001, corporate media and the government
elite launched an aggressive political and media campaign upon
and against the American people. \ \

-

http://blogcritics.org/archives/2005/09/27/214145.php

/ / Why would [subhuman bushite] guards torture a man they
considered innocent? \ \ Because they are openly enemies to
Christ. I say, kill it for America when you can, God bless.

Bushite will kill America

/ / At 9:32 he saw and heard a bomb destroy the offices of the
Pentagon auditors. 40 military officers investigating the
missing money were killed. The CTC was destroyed too. You
can read more here:

http://johnmccarthy90066.tripod.com/id206.html \ \

-

http://www.commondreams.org/headlines05/1128-01.htm

Do we have a problem here in any way?

/ / A spokesman for Aegis Defence Services, said: "There is
nothing to indicate that these film clips are in any way
connected to Aegis." \ \

Not now according to CNN, bushite enemy Tim Spicer, and the
Pentagon. This UN-NAMED spokesperson WILL be tried for aiding
the crimes of first degree murder with it's lying racist nazi
filth, who like getting away murdering black guys for fun and
profit in iraq, paid for by A cowardly DYING AMERICA.

AMERICAN

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to

raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

He and his family
have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth

ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

Al-Qaida = General Mahmoud Ahmad

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

-

http://www.godlikeproductions.com/bbs/message.php?messageid=355789

/ / Timothy Griffin, Karl Rove's assistant, the President's pick as US Attorney for the Eastern District of Arkansas. Griffin, according to BBC Television, was the hidden hand behind a scheme to wipe out the voting rights of 70,000 citizens prior to the 2004 election. \ \ Timothy needs to be arrested for high treason, for fixing an election, or instead, what? we'll make him a State US Attorney in bushville?

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid,

Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

-

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush: "If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in

Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

9/11 WTC Molten Iron

Men pick military as sentence
http://www.centredaily.com/118/story/29432.html

Great, more criminal heros to victimize Humanity for.

-

The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable

-

"Former FBI Director Calls For New OKC Bombing Investigation"

Look, seriously, my friends, we have all the answers to our problems.

-

/ / KBR's Tiger Team stayed at the five-star Kuwait Kempinski Hotel, where its members ran up a bill of more than $1 million. This outraged the army, whose troops were sleeping in tents at a cost of $1.39 a day. The army asked the Tiger Team to move into tents. It refused. \ \

See? KBR is now privately running hospital care for the dumfuk grunts, so, what would you expect but rat infestations? Oh, you never truly thought... what being a "Liberal" or "Conservative" victim is. Are you pro Liberty, or pro tyranny is the question riddled really.

-

"For every fatal shooting, there were roughly three non-fatal shootings. And, folks, this is unacceptable in America. It's just unacceptable. And we're going to do something about it."

- President George W. Bush

Kill a bushite and God will love you for defending US, the innocent in war time.

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Seriously, the propagandists responsible, need to REALLY, be put to death after found out through US public court proceeding. NO ONE would disagree that Iraq is a war crime, where more than a MILLION INNOCENT PEOPLE have been raped, tortured, or murdered by dumfuk bushite grunts. If YOU actually think about it, all of everyone would gladly kill an unholy bushite terrorist, before allowing it to murder families running for our lives as loving Church goers.

Death to our Enemies

My friends, People are dying because the, Israel=Jew, magic radio and TV crews, wont broadcast THE TRUTHS of our publicly available findings. Police findings. People are dying needlessly, illegally, irrationally like meaning really stupidly on Bush's behalf, for they claim, we don't want to be 'embarrassing ourselves' with MY wisdom, You people seem to not be there for God when the chips are way down, and truth is plain to see.. 911 was an inside job, and CBC with CNN don't want to tell us about it, but will watch our LOVED children lied to, to go out and die further for a causeless war of criminality unparalleled in it's wickedness.

http://obiakpere.blogspot.com/2007/01/secret-origins-of-aids.html

/ / The [MERCK] experiment was followed by similar hepatitis B
experiments using gay men in Los Angeles, San Francisco, \ \

Neocon Gaffney "It is not George Bush, it is not the Neocons,"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US.

-

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal
World to end permanently demonic bushite enemies of Creation.
Help Life out by destroying cowardly America's greatest threat
to the Species, the greatest threat against Humanity's Freedom
to be Loved by God. Corporate nazi zionist bushlores at CBC,
CNN, and criminal thieving from the desperately poor in
Winnipeg CJOBers forbid open communications, and I can't 'take
over', because then I'd be defeating my own, power to the
Peoples argument. So, it really is up to YOU, yes you
there... reader. Who.. really..? YOU, here, now. Life
begs, takes a stand for your fellow man, and demand our voices
heard for the defense of the entire human race. And be quick
about it. Repuglicons don't want freedom from endless war
where they kill your forsaken kids, for we all know, bushites
would be publicly tried, then spend the rest of their
treasonous lives behind bars broke, or dead from lethal
injections made popular in America. Again, officer Bowman is
responsible for letting 'escape' those from Fort Detrick, who
attempted to murder the American Congressmen who thought going

into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

THE "IRANIAN" 81MM MORTAR WEB PAGE IS A FAKE!

/ /the traceroute traces the IP not to a business, but to a university! \ \

Wuterich "shoot first and ask questions later"

Wuterich "shoot [defenseless innocent women and children] first and ask questions [from the corporate zionist pro-kill anyone for a stolen nickel propagandists like demon enemy AIPAC Hannity, George Norry, or, censors his calls for neocon war criminals traitor Art Bell] later"

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrocities.htm

/ / commanders may give orders to ``shoot first and ask questions later.'' \ \

This is why the Son of Man through God begs the Peoples of Humanity to kill on sight, the enemy bushite betrayers to Life. Ourselves, the innocent. These soulless grunts don't destroy such deserving commanders, Like Blount, Sattler, Russell, Wuterich, Pantano or even Kimmitt, and instead, as in Fallujah, murder every woman and child present, while stealing all our given monies for desperate life saving help.

McCain is insane
http://www.codemonkeyramblings.com/2007/02/they_say_that_insanity_is.php

McCain speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED.

Sorry everybody, but that's the way it's gotta be for my Life to have meaning terms.] Long story short: Females Rule, and wiseguy Johnny is Freedom King for this moment Being.

Be a friend if not an enemy

-

A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

-

Iran prepares first nuke strike
http://www.menewsline.com/stories/2007/january/01_15_2.html

-

/ / State Department spokesman on 24 January, "that Iranian agents are involved in these networks and that they are working with individuals and groups in Iraq and are being sent there by the Iranian government." \ \

We all know Iran has been trying to help Iraqis openly, so then, what does such willful contempt for your life grant this 'spokesman'? Or, how about when Bush stated Iranians in Iraq deserved to be murdered? (Later, the demon re-worded himself in attempt to conceal HIS true evil identity.)

Remember the Bathists actually warred to kill and won against al-CIA-duh forces that were caught hiding in Kurdish territory. Killed "bin Laden"/bushite forces!

/ / Tariq Aziz, the Christian Iraqi Deputy Prime Minister said in mid September that Baghdad had provided assistance [to kill bushite "al-qaeda"] \ \

-

Great words from the lawyer of the thieving bushite child killers of aditha

/ / "If they're dropping 500lb bombs without knocking on the door first, how can you argue the troops on the ground did anything wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Bill Sattler.

-

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and
Humanity.

-

/ / she told The Nation. "If I contribute to the Army's
prosecution of Lieutenant Watada \ \

Again, a Patriot Soldier whos only crime is that he refuses
to commit a crime in Your name. Do something about it.

Real Americans are those of US as humanity that believe
in liberty as Justice for all. Demon bushite nazi
whores, don't like those principles of freedom through
evidentiary findings though, for their false deity,
George W. bush Jr, wouldn't be stealing from the honest
hard working blokes who live for a better day that way.

/ / Four US oil companies, namely Conoco, Chevron, Amoco and
Philips have concessions in nearly two thirds of Somalia.
This quartet of oil conglomerates was granted these contracts
in the final days of Somalia's deposed dictator, Siad Barre.
The US first military engagement in Somalia was fully
supported by Conoco. \ \

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

3.

RTI News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's
ruling Taliban for proof that Osama bin Laden was responsible

for last week's attacks.

The US Government said there would be no negotiations.

4.

[This following document was the official damning account]

Responsibility for the terrorist atrocities in the United States
4 October 2001
http://www.pm.gov.uk/output/page3554.asp

[This Internet Domain is Britain's Prime Minister's]

"This document does not purport to provide a prosecutable case
against Usama Bin Laden in a court of law."

The document doesn't hold ANY case, as that was the strategy.... See?

7.

October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen
Mahmud Ahmad sought retirement after being superseded on
Monday, the truth is more shocking.

8.

No evidence was brought against Laden for nine eleven, none.
[So according to Bush's official top secret Presidential
directives] While Laden himself claimed he played no part in
911. Still, to save the lives of third worlders on the brink
of starvation,

9.

former FBI deputy director and murder victim John O'Neill

"the main obstacles to investigating Islamic terrorism were

U.S. oil corporate interests and the role played by Saudi
Arabia."

10.

Alex Jones interviewing Former German Defense Minister Andreas Von
Buelow

"Bush signed W199I months before 911 ordering the FBI not to
stop Al-Qaeda. They threatened to arrest FBI agent Robert
Wright if he tells us what he knows."

11.

Mr. Bush was quoted somewhere regarding Mr. Laden's guilt of complete innocence with "We don't need any evidence, we know he's guilty."

12.

www.govexec.com/column/forwardTodaysColumn.cfm?sectionID=14

" [FBI's] Edmonds concluded that documents clearly showed that the Sept. 11 hijackers were in the country and plotting to use airplanes as missiles. She said documents also included information relating to their financial activities. "

13.

[snpd]

33.

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . Well, not completely, for Bremer shipped 19 billion to Greenspan early on, then, hundreds of millions were sent back.

<><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><><>
The power outages were a blessing. I have been plagued by a
intermittent AC "buzz". I had
been thinking it was a nearby security light because as you know they
can be RFI nightmares.

We live in a subdivision that a developer is trying to buy out and
redevelop into a primer upscale,
as in expensive gated, community. He is buying out everyone he can and
has bought the homes
behind us, on one side of and both homes diagonally behind us. During
the new years eve
'black out', I dug out my blackest clothes and played commando or cat
burglar. I wanted to take
a look at the home to our north east corner. The meter has been pulled
and the telephone NID,
demarcation box, was removed. When the power came back on I walked
over that way with
a DX398 and sure enough the noise was pretty strong.

I contacted the developer and explained the situation. A flunky
dropped of a key and told me
to take my time the house would be demolished as soon as the permits
are granted.

After PT (pain and torture) I arrived home at 4:00 and took the key
and drove over. We have
3" of snow and with my knee I am not going to risk clowning around. As
I pulled into the drive
way, the MW receiver in the car experienced severe RF noise. Kind of
odd considering the
meter is missing. So I do a walk through and while the noise is
strong, it isn't as strong as
in the drive. I found a battery charger in the garage that was still
receiving power. It appears
the previous owners had tapped before the meter. I contacted the
developer and explained
what I had found and he asked me to contact the utility. Since the
chief engineer and I are
on speaking terms I called him and explained what I had found. He said
he would be over

'real soon'. 15 minutes later he was here. We drove over in his 4WD and he was very unhappy.
He took photos and called the developer and gained permission to know some drywall down.

Sure enough behind the meter base, attached to an external wall, there was a bootleg connection.
At that point he called the state police police to come and take a report, and a crew to come
and disconnect the home at the transformer. It appears our utility takes a very dim view of
bootleg connections. I asked him to drop me off at home before the crew arrived because I
wanted to hear what would happen when the service was killed.

I was lucky, the loud buzz was back in force. The crew arrived and did a hot disconnect.
The temps are 13F so I guess they don't want to make people more upset then the
four black outs did. Anyway, the buzz vanished shortly after the bucket truck guy went up.
It has been almost an hour and no buzz. The developer called me to thank me for my
efforts. He did not want a house fire as a fire run would cost 3 times as much as the
demolition crew. The chief engineer was very appreciative. He gave me his private cell
phone number.

I have been trying to find that noise source for at least 3 years. At times it would go away
for as long as a month. Then it would be there for days on end, but everytime we started
hunting for it would go quiet. The charger is a very expensive unit, but the state police
grabbed it as evidence. They have a crime scene unit over there right now taking the place
apart. I keep expecting a knock on my door for them to ask for my fingerprints since I was
inside.

Now for some DXing with the heat on!

Terry

Numerous 'hobby radio' groups hire air time on short wave
transmitters, which are located in England [Skelton], Italy,
Lithuania, Germany, & notably Latvia's 100kW tx on 9290KHz. We did a
test in 2005 via Latvia; www.rockradio.eu.com

This Sunday listen out for Baltic Radio.....

MV Baltic Radio is on Sunday, 6th January 2008, at 13 o'clock UTC in
the 49m-European-Shortwave-Band, 6140 KHz on air again. MV Baltic
Radio
use the transmitting station Wertachtal (Germany). The transmitter
power
will be 100 000 Watts and we use a non-directional antenna system
(Quadrant antenna).

73,

Bear.

Weird. How "deaf" can you make the setup you were using? If you can't knock the sensitivity down a bunch, you may just want to make a sniffer out of coax. It's about worthless as an antenna, but if you are close to the source, it might let you narrow it down. My neighbors had a brand new dimmer that buzzed horribly. They went to bed at 8PM (Sheesh) and that was how I figured out it was coming from next door, even before I started getting fed up enough to look. I bought one that was recommended in a magazine and went over one day, and explained my situation, and

asked them if I sniff around with a portable and then if I could change it out. The woman was from London originally, so she asked if the BBC was still on, and when I said yes, she asked me about radios, and eventually bought a Radio Shack DX-440.

Are there overhead lines going to that vacant house? Could be some weirdness going on with the lines working like an antenna there, but other than that, I have no idea how an unpowered house could generate anything.

Does the noise level stay the same all the time? Or does it go up and down depending on the temp or humidity? When the transformer near my house was doing it's thing, it was worse the more humid and hot it got. In the winter, at first, it was barely there. As time went on, it got worse and worse and worse, finally giving an meter reading of S3 or so, no matter how cold it was out.

Good luck,

BDK

Simplifying the Dallas Lankford "Relay Tuned" Fifteen Foot (15')
Noise Reducing Vertical Antenna for Shortwave Listening (SWL) Only

WRT - # 6 - Dallas Lankford - LW-MW-SW "Relay Tuned"
Fifteen Foot (15') Noise Reducing Vertical Antenna

DL-15V [TINY-URL*] - http://tinyurl.com/2ncu3n
* For this very long Link/URL :
http://www.kongsfjord.no/dl/Antennas/15%20Foot%20Relay%20Tuned%20Noise%20Reducing%20Vertical%20Antenna.pdf

CopyRight © Dallas Lankford - All Rights Reserved.

This is basically a Dual-Band "Relay Switched" Passive {meaning
Non-Amplified} Vertical Antenna using a Matching Transformer;
Ground Rod; and Line Isolator.

If you did not want the AM/MW Band and Longwave Band coverage;
and are 'only' Interested in the Shortwave Bands between 3 MHz ~
18 MHz : A 'non-relay' Single Band Passive Vertical Antenna would
be simpler choice.
100% PASSIVE : +No Relay +No DC Power Required

The Original Lankford :
For the 8 MHz ~ 30 MHz High Shortwave Band this Antenna uses a
4T to 10T (1:6) Matching Transformer at the Base of the 15-Foot
Vertical Antenna mounted on a 4~8 Foot Ground Rod.
Plus a 4T to 4T (1:1) Matching Transformer as a Line Isolator.

MODIFIED : For General 'Middle' Shortwave Radio Bands :
60 Meters - 4400~5100 kHz
49 Meters - 5800~6300 kHz
41 Meters - 7100~7600 kHz
31 Meters - 9250~9995 kHz
25 Meters - 11.50~12.16 MHz
22 Meters - 13.57~13.87 MHz
19 Meters -15.00~15.825 MHz

For a 4.4 MHz ~ 15.9 MHz Shortwave Band coverage this Antenna
would use a 8T to 20T {-or- 7T to 18T} (1:6) Matching Transformer
at the Base of the 15-Foot Vertical Antenna mounted on a 4~8 Foot
Ground Rod.
Plus a 8T to 8T (1:1) Matching Transformer as a Line Isolator.

Antenna Side-by-Side : The Lankford Vertical -v- The Doty Inverted
"L"
It would be interesting to build one and run it along-side a "Doty"
Low Noise Inverted "L" Antenna using a 10T to 30T (1:9) Matching
Transformer at the Base of the 15-Foot Vertical-Up-Leg mounted
on a 4~8 Foot Ground Rod with a 30~45 Foot Horizontal-Out-Arm.
Plus a 10T to 10T (1:1) Matching Transformer as a Line Isolator.

-Note- Separating both Bases of the Antennas by 30-Feet or more.

iane ~ RHF

I wouldn't be surprised if it was a rebadged import sold under another
name. Whenever the seller is ashamed of where the stuff is coming from,
they'll say "Imported By:" on the package instead of "Made In:"

Our politicians are too easily bought...

mike

Conservative Guy and his wife were having hard financial times, so
they decide that she'll become a hooker. She's not quite sure what to
do, so Guy says,"Stand in front of that bar and pick up a liberal.
Tell him a hundred bucks. If you've got a question, I'll be parked
around the corner."
She's out there five minutes when a liberal fellow pulls up and asks,
"How much?"
She says, "A hundred dollars."
He says "Shit. All I've got is thirty".
She says, "Hold on."
She runs back to Guy and says," What can he get for thirty dollars?"
Guy says, "A hand job". She runs back and tells the guy all he gets
for thirty dollars is a hand job.
He says "okay", she gets in the car; he unzips his pants,
and out pops a simply HUGE male unit. She stares at it for a minute,
and then says, SSShh**tt!I'll be right back.."
She runs back around the corner and says breathlessly,
"Guy, can you lend this fellow seventy bucks?"

You can't expect a quartz controlled computer clock to maintain atomic
time accuracy.

Every time you startup or restart you can have the computer query an
Internet time server. If you keep the computer on all the time open the
date and time control panel and un-check then check the "set date and
time automatically" to get the computer to update from the server.

A lot. In order to pass EMI many devices pass noise to the safety ground
wire.

The results you got with the power off is no big surprise. Common mode
antennas pick up everything and since they have large impedance together
with large size to couple well to the local environment you get big

signal but the down side is you pick up everything else in the local environment so if it is quiet you are ahead and if it is not you are worse off. Totally expected results.

I agree....best bet is the AM transmitter is out in Richmond at sea
level with Richmonds wonderful "water table 2 inches below the
surface" land. :-)

I have the ALA100. No problems whatsoever. No need to fiddle with antennas, though I do design different portable loops for use in the field. [In the boonies, more is more.]

I have no problem with overload with the ALA100. I am within 5 miles of a 50KW MW radio station.

Another piece-of-crap that under the Grundig/Eton makesake, used to be made in Germany, but now, the sitty Grundig/Eton's are made in China - doesn;t even have an internal ferrite-bar AM antenna. Cheap plastic knobs.

They can't get their feeds squared away. Our local outlets have all been
having dropout problems for the past couple days or so. They also have not
held to their schedule. I think March AFB is all out for the holidays..
nobody at the switch.

You called it. The police say there is plenty of evidence of a major drug growing operation. The wiring was very crude and hidden behind drywall. The utility engineers are surprised the house didn't burn down.

Complete details redacted at their request.

Let's just say there were many odd devices left connected to the bootleg
AC.

Terry

I don't know of any clocks that synchronize automatically to WWV or CHU.
As far as I know there's WWVB and a station in Germany.

The cheapest most accurate clocks are the ones that use the AC mains for
a timebase.

I just listened to their broadcast in French 1400-1500, then into English at
1500-1600 on 11710. Also on //9335.

I have been to radio shack several times over the years inquiring about antennas for short wave radios. I always get a rather blank response and they never seem to have anything. They sell shortwave radios...so why not sell good external antennas? perhaps Radio Shack isn't as good as one might hope!

David

Well, the best external shortwave antennas are pretty simple and made
of ordinary wire. Try a 50 to 100 foot length of 14 gauge stranded
wire. Home Depot might be a better option.

While try to scan the CB bands with mi RadioShack Pro-84 scanner it sometimes locks up on the CB cannels when there is no signal on there. I adjusted the squelch and nothing happens but when i touch the anntena (the one that came with the handheld scanner) the interference goes away. This tends to happen more often when I use the backlight. I have just recenly got the scanner. Please reply with possible causes and solutions. Thx

MSG,

My Grundig Satellit 800 Millennium Radios default to WWV
on 10.000 MHz when they lose Power. -but- They Do Not
have an Automatic 'Atomic' Clock Setting or Reseting Function.
Nice if that were so... But It Ain't.

That being said, I would agree with you that at a certain "Price
Point"; all Shortwave Radios should; as you suggest have an
Automated 'Atomic' Clock Setting and Re-setting Feature.

some day may be -but- not today ~ RHF
.

- I don't know of any clocks that synchronize automatically
- to WWV or CHU.
- As far as I know there's WWVB and a station in Germany.
-
- The cheapest most accurate clocks are the ones that use
- the AC mains for a timebase.

David,

Yes - Once the 'common' Home Clock that is Powered by the
AC Mains is Manually Set : They are Accurate-to-the-Minute :
Day-in and Day-out [.]

And . . . IMHO for Day-to-Day Living - Accurate-to-the-Minute
Is Good Enough !

More Every Day Accurate-to-the-Minute Clocks in our Lives :
```

* Home Computer Clocks - Self-Setting

* Telephone and Celphone Clocks - Self-Setting

* Cable TV "Set-Top-Box" Clocks - Self-Setting

* The Clock you "See" on the TV - Self-Setting

* The Top-of-the-Hour (TOH) "'Tone" you Hear on the Radio
be it AM -or- FM -or- even a Shortwave Radio Broadcast.

CLOCKS - We Take them for Granted -but- They Are There
Day-after-Day : Accurate-to-the-Minute

i am sure there are a few more to add to the list ~ RHF
.

There are lots of clocks and watches that synch to the local time
standard. In the USA it would be the 60khz signal from the NIST. I
believe it is WWVB that sends the signal and not WWV but the
difference is not relevant.

> As far as I know there's WWVB and a station in Germany.
>
> The cheapest most accurate clocks are the ones that use the AC mains for
> a timebase.

Actually the clocks with the most accurate display would be those that
synchronize daily with a time standard. That would include Atomic
(radio) Clocks and PC Clocks.

Possibly because their shortwave radios come with antennas already
built in.

perhaps Radio Shack isn't as good as one might
> hope!
>
> David

Unless you want to continue getting the same answer over and over it
is not a good idea to continue asking the same question over the next
several years. Have you browsed the paper catalog or their website?

Their portable antennna-on-a-reel was a pretty good deal. Beyond that
their offerings of HF antennas was pretty limited as I remember.

But as Art notes, a perfectly good shortwave antenna can be made for
next to nothing.

Hello,

Is it always the same channel/frequency? What does the signal
indicator (if present) show you?

It may be parasitic oscillation of the HF input stage. When you touch
the antenna, the oscillation may stop or go to another frequency.

Best regards,

Wim

VE3 - This also may be technically correct since :

The Shortwave Store : Shortwave Receivers :
- - - Car Stereos with Shortwave - - -
http://www.shortwavestore.com/sws/home.php?cat=42
The Shortwave Store - Sony In-Dash {Auto} AM/FM Shortwave Radios
* Sony Model # CDXGT260S
* Sony Model # CDXGT360S
Technically these are Auto-Car AM & FM-Stereo Shortwave* Radios
with MP3 + WMA + CD Player and MP3 Player Input Jack.
* Note the Shortwave Radio Band Coverage is in two Bands
SW1 : 2,940 - 7,735 kHz = 120m, 90m, 75m, 60m, 49m, 41m
SW2 : 9,500 - 18,135 kHz = 31m, 25m, 22m, 19m, 16m
Except for SW2 the Frequency Range : 10,140 - 11,575 kHz
is not covered by these Radios.

The Shortwave Store - http://www.shortwavestore.com/
http://www.shortwavestore.com/sws/home.php
Is actually : Durham Radio Sales & Service Inc. {Canada}

I made an attempt to look up the specs on this radio and could not find anything related to shortwave. The only thing the 'S' denotes in the model number is the fact that it's silver in colour.

Buyer beware!

It does indeed have SW, though I can't find any detailed information from
Sony as to what frequency range(s) it has. This link does say it has 12
presets for SW, though.

I hate links that are only good once....

You need to go to the Sony Asia site, choose in-car entertainment, CD
receivers, and choose the model number.

Interesting! I had looked at that page, but didn't notice what you've seen. Click on the specs however and it seems to make no mention of SW.

Apparently, it's not a major sellling point. Notice on the box on the
original link, it does say SW also.

<snip>
This got me looking for alternatives; a quick web search produced references
to the Becker Europa radio, (presumably DIN form factor) which includes
shortwave in various models covering at least 40 years.

Here is a photo of a vintage version:
http://www.mbzponton.org/images/mb_radio_Becker_Europa_TR_190SL.jpg

Here is an eBay listing of a more current version (quite inexpensive):

http://cgi.ebay.com/ebaymotors/Becker-Europa-LMKU-Radio_W0QQcmdZViewItemQQcategoryZ80741QQ
ihZ003QQitemZ130186119409QQrdZ1QQsspagenameZWDVW

Also quite popular were converters; one of the most visually attractive
was made by Reims and had pushbutton selection of various band segments.
www.mbzponton.org/valueadded/other/radios.htm (scan down the page)

There certainly were aftermarket converters for continuous SW coverage with features
to be found in communication receivers; but the Reims unit seems to be one
of the few stock options available for a car.

Anyone know of other brands or options for various automobile makes?

Regards,

Michael

In your universe, and mine, yeah, you buy the best, brightest, matched, optimized, or NFL approved.

Truth is, that in real world operations within the normal parameters hobbyists achieve, there is likely no detectable difference between the 'correct' choice, and the most economical choice for transmission line in this application. And given that the OP was concerned about cost, his choice is a decent one.

And unless the OP is intending to operate his system at the limits of performance, any losses incurred will not be relevant to his operation.

Would I do it that way? No. Would you do it that way? I'm thinking not. But we're in a different position to make these decisions. And we both have the hardware to not only notice the difference in antenna/transmission line performance, but we operate closer to the limits than the OP. For you and me, the choice of coax may well make a detectable difference. In my case, it would also bother me to install a line that I knew wasn't correct for the application.

There are others here with the same attention to detail. And still others who will not hear or detect the differences.

You're running RX-340. The minutiae at the antenna can be heard.

It's not the case when the best receiver you've ever encountered is Sat-800.

> phase out of 690 kHz

What can the CRTC do to prevent a licensee saying, "I do not want that license any more?" The CBC is one of many broadcasters in Canada who have changed from AM to FM in Canada in the last decade. The CRTC seems to be encouraging, by policy and practice, the cleansing of the AM band whereby eventually the only AMs will be in large markets where a broader range of programming is perceived to be needed. About 40% of Canadian AMs are now gone, and more applications and grants for moves to FM come through each week.

Like many other nations, ranging from Austria to South Africa to Ecuador, AM station counts in Canada are being minimized.

187. RadioShack Pro-84 Scanner Help - Many Scanner Radio Problems Can Be "Fixed" With A Better Scanner Antenna

- Thx

Win2Tanker,

RadioShack PRO-84 Scanner Radio - 200 Channels
http://www.radioshack.com/product/index.jsp?productId=2180625
This is a Small Handheld Scanner with a relatively short
Antenna connected to the Radio via a BNC Connector.

MOST LIKELY - When the Scanner's Backlight is used :
The Scanner uses more Power; and this Reduces the RF
Gain of the Scanner; resulting in Less RF Signal being
heard along; with more internal Noise from the Radio.

Usually the simple Answer is a Bigger Antenna.

RadioShack Pro-84 Scanner Help :
Many Scanner Radio Problems can be "Fixed"
with a Better Scanner Antenna

Here are some Scanner Antenna 'Options' :

1 - For Mobility try a "Telescopic Handheld Scanner Antenna"
http://cgi.ebay.com/_W0QQitemZ150199946066
This Antenna has the BNC fitting on the end and is 23 Inches
from Tip-to-Bottom when fully Extended

2.a - For Fixed Locations try "Snoop" Scanner Antenna
http://cgi.ebay.com/_W0QQitemZ160194979322
Covers all Scanner Frequencies in the 30 MHz to 1200 MHz range.
Remote Helix Antenna Element is in an 8 Inch Long PVC Pipe
with an 8-Foot Coax Cable and BNC Connector.

2.b Want something Bigger then try the 24" Black Big Daddy
"Snoop" Scanner Antenna
http://cgi.ebay.com/_W0QQitemZ270198194062

3 - Scanner Window Mount Antenna mounts with Suction Cups
http://cgi.ebay.com/_W0QQitemZ370009744502
This Antenna is made out of 8-Feet of Coax Cable with an
18 Inch exposted Tip Antenna Element with a BNC Connector.
http://cgi.ebay.com/_W0QQitemZ160194659551
Workman SC-1 Antenna

4 - The 48 Inch Grove "Flex-Tenna" Model VU # ANT46
can be connected to the Scanner with an F-to-BNC Adapter
with the Scanner in your Pocket and the Antenna under you
Clothing. - http://www.grove-ent.com/grovevu.html

5 - For the Car try a Magnet mount Mini-Mobile Wide-Band
Scanner Antenna with a BNC Connector.
http://item.express.ebay.com/_W0QQitemZ270199921254
http://www.scannerworld.com/content/product/model/MM3ANT

Oh yeah. Missed the obvious here. You should be able to find software
utilities that connect to web sites with atomic clocks. That would be
best. There might even be some free utilities that query time servers.

FO&A,

Since the Basic Model Numbers are CDX-GTxxxS
http://www.sony.com.sg/productcategory/ice%2Bcd%2Breceiver?site=hp_en_SG_i

All Three Compared - http://tinyurl.com/23cre3
1 - Sony Model # CDX-GT160S
2 - Sony Model # CDX-GT260S
3 - Sony Model # CDX-GT360S

Could the "S" at the end of the Model Number
simply mean 'Shortwave' ?

I would suspect that the Shortwave Radio Frequency
Coverage would be the same for all :
SW1 : 2,940 - 7,735 kHz = 120m, 90m, 75m, 60m, 49m, 41m
SW2 : 9,500 - 18,135 kHz = 31m, 25m, 22m, 19m, 16m
Except for SW2 the Frequency Range : 10,140 - 11,575 kHz
is not covered by these Radios.

eBay.Co.HK {Hong Kong} is an alternative source
for these Sony CDX-GTxxxS Radios
http://search.ebay.co.uk/search/search.dll?from=R40&_trksid=m37&satitle=Sony+CDX-GT*

Example Sony Model # CDX-GT160S
http://cgi.ebay.co.uk/_W0QQitemZ220161510338
Price : £62.99 + S&H £22.99 = £86 = US$170

Also eBay Australia has some of these
Sony CDX-GTxxxS Radios
http://cgi.ebay.com.au/_W0QQitemZ190140690426
Price : AU$145 + S&H AU$45 = AU$190 = US$167

> Sat-800.

Well, yes performance is a critical parameter but I would not frame the discussion around a high performance radio. The radio I own is not the issue as ANY table top radio will be adversely affected in reception performance. The performance issue that will affect ANY radio is due to a recombination of forward and reflected waves that run the gamut of reinforcement to cancelation. Where reinforcement or cancelation of incoming signals will occur will depend on several factors and as a consequence not easy to calculate. You may not ever hear a signal on some frequency because that is where the cancelation occurs. The cancelation has to happen somewhere in the frequency band. If you never listen to that spot or spots then no problem but if it happens where you

want listen then tough luck.

The general rule in a broad band system is to have components matched in order to prevent these complex results of significant reflections.

I'll state again that if you already own the coax to try it, especially if you only have interest in certain frequencies or have another radio and antenna to check propagation. If it works where you want to listen then that's just fine but buy the wrong coax? I would not recommend that.

Shortwave is dying. Why would any store want to carry what's dead?
Only the occasional pocket protector guy is looking for shortwave antennas.

Streaming audio from the international broadcasters is where it's at.
Come on get into the 21st century -- computers, wi-fi, gps. You are
looking for Dixie cups and string.

Not every receiver will detect such cancellations at this operating
level, and with this magnitude of mismatch. Noise floor, location and
ambient noise will render some antenna losses irrelevant in practical
listening, and depening on frequency.

If you're not working at the limits of performance, small mismatches
in a receiving transmission line are trivial.

We're not talking about military grade monitoring of picowatt
signals, here.

The oscillator makes a frequency which can be subtracted from the
received signal. That's how they free the sound wave from the radio
frequency carrier.

You must work for Radio Shack!
Streaming audio and wi-fi my ass.

The fun is in the hunt, and you also develop a very trained ear and a
fascinating hobby too.
It's an acquired skill, quite unlike the "difficult" task of logging in
on a computer and hunting down those hard to find websites.
Careful, you might learn something.

- Try Universal radio
-
- http://www.universal-radio.com/
-

Yes - Universal-Radio.Com is a good plase to start your Quest
for a Good Ready-Made Shortwave Listening (SWL Antenna.
http://www.universal-radio.com/catalog/sw_ant.html

Check-Out these three Shortwave Listening (SWL Antennas :

Alpha Delta DX-SWL Sloper Antenna
http://www.universal-radio.com/catalog/sw_ant/0799.html

Antenna Supermarket Eavesdropper Sloper Antenna
http://www.universal-radio.com/catalog/sw_ant/0013.html

Par Electronics End-Fed Dipole Shortwave Listener (EF-SWL) Antenna
http://www.universal-radio.com/catalog/sw_ant/2205.html
Rig it as an Inverted "L" Antenna 15 Feet Vertical-Up-Leg
with a 30 Feet Horizontal-Out-Arm

Remember - Besides an Antenna you also need a RadioShack
Ground and that is usually best done with an 8 Foot Ground
Rod driven directly into the earthen ground soil; with a ground
wire to your radio shack.

enjoy listening to your shortwave radio -and- remember to . . .
keep your antenna-up - iane ~ RHF {pomkia}

No, I just know a dead horse when I see it.

Technology evolves. Radio was a great technology. WAS. 8-track tapes were better than sliced bread back in the 60s and 70s. Time marches on.

I love listening to international broadcasters. I have a Wi-Fi system setup and it streams to my stereo. The BBC never sounded so good. I can easily record the shows digitally if I like and transfer them to an Ipod or other MP3 player.

Look at the progress that's been made in the last 5 years with computer technology. It won't be long and handheld wifi devices will be every where and cars will be equipped with internet radios.

You can string out all the longwire you want. More power to you. The only problem is that there won't be anything to listen to.

Source record: 133223

The most common is the use in a "superheterodyne" RECEIVER to produce
the local oscillator frequency. Refer to the wiki link below for a
detailed explanation.

In a TRANSMITTER, an oscillator is also the device which generates a
transmitter's frequency. In that applocation, a modulator adds the
intelligence (speach) to the frequency by either changing the frequency
(frequency modulation FM) or amplitude (amplitude modulation AM) Finally
a power amplifier increases the signal to be sufficient for transmission
over a greater distance.

From: AussieDrifter <mark__rutherford@hotmail.com>
Message-ID: <477DB635.7010603@hotmail.com>
Source record: 133225

Guys,

I originally had the Sony XR-5100 SW/AM/FM Car Radio. It worked great as long as I had the car engine stopped. A length of wire added to the car antenna was used to allow the radio to reach it full potential. A couple of CONS was that it was Tape Deck cd a CD Player and there was no AUX input.

Well the wifes radio finally died in her Suzuki ~2 months back, so we went to the local auto shop (Supercheap) and too my surprise there was the Sony CDX-GT160 SW/AM/FM radio. I though Bugger me, looked at the price and had to look twice as it was priced AUD$136. It was a CD Player and it also had AUX input jack on the front. Turned to the wife and said, "DARLS" here a nice little radio for yer :) Well the price was perfect and I still did not beleive it till I got to the till and it rang up as AUD$136. JACKPOT!!

Installed it in her car and done a few tests with and without the ext. antenna wire and it WORKED fine. Ran in side and said the wife "I WANT ONE" she busted out laughing and we headed of to get one.

But to our shock it was the last one hence the sell out price. We finally tracked down once at another store but it was the GT260/360 can't remember now, and was $199, but the bloke at the store knew the other bloke and bingo said if I wanted it now he could give it to be for AUD $149. SOLD!!! Raced over and picked it up and installed it in to the Pajero. The only difference between the two models appears to be EQUALIZER modes I thinks apart from that they are identical :)

So from me and my Wifey, we can both say they and the (XR-5100) are great SW/AM and FM car radios. But remember to always keep a bit of hook wife to get its full potential when stopped at the side of the road / camping.

Regards
Mark

This is not about scale. The signal can be very large and go to zero at
some frequencies. You are familiar with the Bose noise canceling
headphones? Same principle applies here.

How much money can he save buying 300 feet of the 75 ohm coax over the
50 ohm? Maybe $30.

In radios they are reference signals that are mixed with received
signals, which then produce known products that when demodulated are
the intelligence transmitted via radio frequency signals.

And that's a fact jack.

> Could someone try to explain to me -- very succintly -- what exactly
> an oscillator does in a radio??

An oscillator generates a pure, steady single-frequency signal.

Most of the time, this is used to change the frequency of a received signal to some other frequency. For example:

1105kHz (oscillator) - 650kHz (signal) = 455kHz
1435kHz (oscillator) - 980kHz (signal) = 455kHz
1965kHz (oscillator) -1510kHz (signal) = 455kHz

By tuning the oscillator from 1105 to 1435 to 1965, you can convert the signals of three different stations, on 650, 980, and 1510kHz, all to a constant 455kHz. You can then amplify the 455kHz signal, remove the program audio, and send it to the speaker. You don't have to change the frequency of the amplifier - it's always 455kHz.

Oscillators can be used for other things in a radio. For example, to make it easier to copy a Morse Code station. (on a regular radio, a Morse Code station would sound like a regular station going on and off the air really fast. Which really is precisely what it is. By mixing an oscillator on 456kHz with the Morse signal on 455, you get a 1kHz audible tone when the Morse station is transmitting - and nothing when it isn't.)

They are also used to allow computer circuitry to "keep time" - so it can count the frequency of another oscillator, telling you what frequency you're tuned to. Or so that, when you program your radio to turn itself on at 3:45pm, the radio knows when 3:45pm is. Or to generate high voltage to run the frequency displays in some radios.

Source record: 133235

from:cvc.tv

ALERT: CVC BROADCASTS AFFECTED BY SEVERE WEATHER

Hi CVC listeners!

Due to severe cyclone weather conditions at our transmission site at the Cox peninsula, the following shortwave transmissions will be unavailable until further notice.

15360 kHz 0600 - 1000 UTC

15270 kHz 1000 - 1100 UTC

13635 kHz 1100 - 1800 UTC

Please note the following shortwave transmissions from a different location (Europe) are unaffected:

9480 kHz 0100 - 0300 UTC

13685 kHz 0300 - 0600 UTC

Our dedicated transmission staff have been evacuated off-site until it's safe to return. We are closely following the weather situation at the Cox Peninsula and will notify you as soon as we know when these frequencies will be on-air again. Also, your favourite programs can still be heard at their regular broadcast times on web-streaming.

We'd like to take this opportunity to wish all of our listeners a wonderful and blessed New Year in 2008.

Telamon,

More than just Price -wrt- RG6 Quad-Shield Coax Cable
over RG8 Coax Cable :

1 - Availability - You can find it just about anywhere.

2 - Practicallity - For 99.73% of the casual
Shortwave Radio Listeners (SWLs) intended
needs : It is as good as RG8 performance.

3 - Pricethe Price is generally Lower than RG8 Coax
Cable plus # 1 and # 2

~ RHF

CFRX 6070 - In a recent phone chat with the engineer, a new solid state transmitter is on order for CFRX. It`s made by a U.S. company. Go to http://www.armstrongtx.com to see details. It`s a rebuild of their medium-wave transmitter, model X1000B. I assume after the work is done it would be called the X1000B/SW. This thing should be light years ahead of the old Elcom Bauer transmitter. I'll also pop into the transmitter site and take a few photos of the new installation when things are completed. It`s my understanding that delivery of the transmitter will be in early January, I'll keep you posted. There's some final work to be done on the antenna (antenna tuning unit needs tuning and the antenna guy wires need some final adjustments). Its all slow but sure. The important thing is CFRX will be back on the air soon. From the e-mail and web buzz, a lot of people are anxiously waiting for its return. CFRB/CFRX QSL Manager (Steve Canney, VA3SC, DXplorer Dec 31 via BC-DX via DXLD)

From: AussieDrifter <mark__rutherford@hotmail.com>
Message-ID: <477dfaba$0$25392$afc38c87@news.optusnet.com.au>
Source record: 133090

G'day,
Sorry, I'm not near the vehicles, however from memory I believe
RHF's post was fairly accurate if not pretty dam close:

>> Coverage would be the same for all :
>> SW1 : 2,940 - 7,735 kHz = 120m, 90m, 75m, 60m, 49m, 41m
>> SW2 : 9,500 - 18,135 kHz = 31m, 25m, 22m, 19m, 16m
>> Except for SW2 the Frequency Range : 10,140 - 11,575 kHz
>> is not covered by these Radios.

As if I remember correctly I can't quiet tune in ABC Alice Springs which
is 2310 khz. But I've tune 4, 5, 6, 9, 11, 12, 13, 15, 17 mhz Shortwave
stations :) Even heard the ham operators on 14 mhz but obviously it
hasn't got SSB :(

Regards
Mark

> headphones? Same principle applies here.

It IS about scale. And no, it's not the same principle. Noise
cancelling headphones seek to remove all the noise. So, the antiwave is
of an amplitude approximately equal to the incoming noise. The losses in
a receiving antenna transmission line with a small mismatch don't
produce anywhere near that level of cancellation. A small mismatch
produces a small reflection. A small reflection only produces a partial
cancellation. A partial cancellation produces a lower incoming signal at
the partial cancellation frequency... the difference being recovered by
the sensitivity of the receiver and it's low noise floor. Unless the
hobbyist is operating at the limits of performance, that difference will
may never be noticed.

>
> How much money can he save buying 300 feet of the 75 ohm coax over the
> 50 ohm? Maybe $30.

It IS his budget, after all. And for some, $30 can be a big
difference.

As I said, that level of investment may not matter to many of the
operators in the hobby. You and I wouldn't worry about it. But there are
some who have other priorities, and $30 is enough of a deal that it
warrants consideration.

The bottom line is that he's just getting into the hobby, again.
And the way the Wellbrook is designed, his mismatched cable run is on
the length between the loop and the preamp. Reflections in that line are
going to be small anyway. Cancellations are going to be partial at best,
and few in number, pursuant to length vs frequency. His choices will get
him up and running. Let him discover for himself how significant the
mismatch is.

Likely, he'll never detect it as you or I would.

I have been using a Par EF-SWL for about two years for my "bedroom listening post." It is not as good as my roof top G5RV, especially in the lower MW area, but it is just about as good on 1.7 to 30 MHz. It is easy to string up and rugged. And Dale Parfitt gives great customer service!

I've even used it for a little bit of low power transmitting.

Thank you for your help. The thing is that I have a large old CB
antenna(has 2 large pieces of copper wire extenting a few feet in
opposite directions). I sometimes have it connected to and for some
reason the interference happens more often with that antenna than when
I use the small antenna that came with the unit. Also the
interference tends to go away when I turn the backlight on when using
the old CB antenna. LOL maybe my scanner is just cursed.

233. RFI TIPS AND TRICKS! BY N1L0

"Shortwave-radio era looks short-lived"

PARIS: Perhaps it is fitting that a 50-second video clip of an ear-shattering explosion of 13 shortwave radio antenna towers on the Spanish Costa Brava is getting viewers on the Web site YouTube.

It took 32 pounds, or 14.5 kilograms, of dynamite to fell the massive antennas, which long relayed news from the United States to the former Soviet Union. But the most powerful force behind the demolition was the rapidly shifting landscape of radio, where listeners are migrating toward MP3 players, Internet radio and podcasting.

The felling of the towers was the latest noisy outburst of a cost-cutting trend that is silencing the familiar and crackly shortwave voices that leap across the globe through the clear night sky in times of crisis and Cold War, tsunami and Thai coup.

In January, the Finnish public broadcaster YLE will end all of its shortwave broadcasts with the goal of saving money and diverting resources to online news services.

Next month, Germany's public broadcaster, Deutsche Welle, will end its German-language shortwave broadcasts aimed at Canada and the United States. Japanese public broadcaster, NHK, and the Korean Broadcasting System are also reducing shortwave services.

The leading international broadcaster, the BBC World Service, is pursuing a diversification strategy that regards the future in stark terms. "Audience needs are changing and technology is moving rapidly," reads the news service's explanation of its strategy through 2010. "Shortwave is also declining at a fast pace and if we don't change, we will die."

Critics of the retreat warn, however, that shortwave is the most reliable communications medium of last resort. They point out that it can allow determined broadcasters to reach across borders even when repressive national regimes halt FM broadcasts, block Internet sites and jam television programming.

"Shortwave does not respect boundaries and reaches the rich and poor," said Graham Mytton, former head of the BBC's audience research unit and now a media consultant. "Most international broadcasters think things are driven by technology, but not entirely. They're driven by politics and local media circumstances. Their mistake is they downplay shortwave because they're living in developed societies. But they don't go to rural areas like Nigeria, where everyone has a shortwave radio."

Smaller international broadcasters with more limited resources are phasing out shortwave entirely. Slovak Radio silenced its shortwave programming in July, and Swiss Radio International ended shortwave broadcasts two years ago to transform into an online news service, www.swissinfo.org.

In the meantime, all of the world's largest international broadcasters, from the United States, France, Germany, England and the Netherlands, are cutting back or reviewing precious resources devoted to shortwave radio.

"The future of shortwave radio is quite clear," said Guido Baumhauer, director of strategy and distribution for Deutsche Welle, or DW, in Germany. "It's all going down when it comes to the consumers."

With the average age of its shortwave listeners hovering at about 50, DW expects to save more than EURO 10 million, or $12.78 million, a year by reducing shortwave services, according to Baumhauer, who said the money would be invested in other services like Internet radio and podcasting.

The state-subsidized broadcaster is phasing out shortwave programs for North America and the Balkans and reducing daily transmissions of shortwave programs to 160 hours from 200.

"In the U.S., if people are really into German they have so many other ways to get consumer information," Baumhauer said. "Considering the costs related to the transmission, there's no point in continuing."

The history of shortwave radio dates to 1927, when Philips Laboratories of the Netherlands transmitted shortwave broadcasts from Eindhoven to the Dutch East Indies.

The BBC trailed behind with the founding of the BBC Empire Service in 1932.

Shortwave radio provided a vital alternative voice in wartime Europe. Radio Oranje, for example, was set up in London after the German occupation of the Netherlands to broadcast uncensored news. Through the Cold War years, international broadcasters used shortwave to shout over the Iron Curtain.

While held in his luxury villa during an attempted coup d'état, the former Soviet leader Mikhail Gorbachev listened to shortwave transmissions of the BBC and Voice of America.

But after the Berlin Wall fell and new media forms flourished, there was less need for shortwave transmissions in developed countries.

International broadcasters like RFI of France and the BBC started striking hundreds of partnership agreements with local FM stations to rebroadcast their programs with clearer sound.

With the advance of technology, it has also become increasingly difficult to say what a radio is, since it can be distributed through

digital television, mobile phones, computers or satellite radio, according to Michael Mullane of the European Broadcasting Union for public broadcasters in Geneva.

The BBC eliminated its North American shortwave transmissions in 2001, when there were still an average of more than two million listeners.

But with FM rebroadcast agreements with local stations, the BBC now has five million listeners in Canada and the United States, according to Michael Gardner, a spokesman for the BBC.

The BBC is constantly reviewing its expenses in connection with shortwave radio, he said, but in the meantime, the news service still reaches two-thirds of its weekly 163 million radio listeners through shortwave.

This year, the BBC actually posted an increase of about five million shortwave listeners in rural areas of Africa and Asia, but Gardner says the increase amounted to existing listeners who were surveyed for the first time in Myanmar.

David Hollyer, former managing director in Spain for the U.S. government's Radio Free Europe and Radio Liberty, is wistful about the long-term consequences of mothballing and destroying shortwave transmitters.

The transmitters in Spain, he argued, could have been deployed to broadcast to Central Asia to reach a Muslim population.

Instead, with the changing political climate, U.S. authorities closed the station in 2003, ended its lease, and turned over the towers to Spain.

When Hollyer watches the amateur YouTube video of the familiar towers crumbling in clouds of smoke, it reminds him of an Edwin Markham poem.

"To paraphrase," he said, "the towers went down with a great shout upon the hills and left a lonesome place against the sky."

They are accurate to the second,on average. They might speed up for a
while, but then they slow down to compensate (and vice versa).

The Drake R8B clock synchronizes to the power lines, as do many alarm clocks.

Not relevant? How so? The FCC would fine them if they misidentified so
there is at least some relevance on some level.

Find me a PC for under $10. Same for an atomic watch. And there are
many PCs that wander 10 seconds or more between NTP updates. The
traditional synchronous clock is the champion for staying on the correct
time the best over an extended period of time, without a reset of some kind.

Try to pay attention sparky. The thread is about quartz clocks being sucky.

Now that is unusual. With a 30 inch whip antenna I was able to hear
lots of stations on shortwave last night. You need to do less writing
on the internet and more real listening.

Regarding whether "Radio Was a Great Technology" I find the AM and FM
dial full of stations. DXing the AM dial for stations 1,000 miles
away is still a lot of fun.

Space Weather News for Jan. 4, 2008
http://spaceweather.com

Solar physicists have been waiting for the appearance of a
reversed-polarity sunspot to signal the start of the next solar cycle.
The wait is over. A magnetically reversed, high-latitude sunspot
emerged today. This marks the beginning of Solar Cycle 24 and the
first step toward a new solar maximum. Intense solar activity won't
begin right away. Solar cycles usually take a few years to build from
solar minimum (where we are now) to Solar Max (expected in 2011 or
2012). It's a slow journey, but we're on our way!

Seems as though we'd seen a short-lived reversed polarity spot some time ago
which rapidly disappeared.

254. Here's the new HD marketing campaign that throws "analog under the bus"

Newsgroup: rec.radio.shortwave

From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <a45967a6-3cfc-44da-9b6f-6a4fb9e1c0c6@i3g2000hsf.googlegroups.com>
Source record: 133122

Here's the new empty marketing campaign that throws "analog under the bus":

"GSD&M Preps $200 Mil.+ HD Radio Push"

"GSD&M has already begun producing work. The ads feature the voice of cartoon character SpongeBob (actor Tom Kenny) as a conventional car radio calling its owner and leaving messages as if it's a jilted lover. "You know, I could totally pick up those new extra HD stations if I hit the gym," the radio says in desperation. "Is that what you're into now? Huh? Call me!"

http://www.adweek.com/aw/national/article_display.jsp?vnu_content_id=1003691980

Brilliant - that will "push" consumers into Best Buy to purchase those empty HD radios, if they can even find any!

OKLAHOMA CITY, Oklahoma (AP) -- With a button-popping spread of cornbread, sausage and gravy, chicken fried steak and pecan pie designated as Oklahoma's official state meal, it's no surprise that Oklahoma City's mayor wants to put the city on a diet.

I would kill for one of these meals!!!!

"Radio: You don't want HD Radio's Bilk-o in your foxhole."

You can't make this stuff up.

How would you like it if one you believed to be a business partner did an about face and supported the very thing your industry is fighting against?

Memo to terrestrial radio: iBiquity and the HD Radio Alliance just double-crossed you.

The dynamic duo closed their dismal year by firing off a letter to the FCC on December 20 urging that if the merger between XM and Sirius satellite radio companies is approved - HD Radios must be included in all satellite receivers.

Riiiiight!

That means when terrestrial radio promotes HD Radio it'll be pushing satellite radio, too.

iBiquity's management and legal team also managed to meet with some lower-level FCC staffers just before the Christmas break in an attempt to grease...er... plead their case.

Poor NAB boss Fumbles. He doesn't even have juice to meet with the entry level types at the Commission. He'll always be a mouse studying to be a rat.

Does it astound you as much as it does me that at the NAB convention last September -enemy numero uno was still XM and Sirius - and that proposed merger had to be stopped at all costs?
Unlike Fumbles' NAB, which vehemently opposes the merger, iBiquity and the HD Radio Alliance - that purportedly serves terrestrial radio owners - evidently does not.

Should the merger be approved iBiquity wants to obstruct the company from any exclusive arrangements with suppliers, retailers, and car makers. They claim that not doing so would provide the merged company a major advantage over HD Radio.

Peter "Sgt. Bilk-o" Ferrara and his HD Radio Alliance troop already know that their product roll-out ought to be rolled-up and tossed away - but there's too much money at stake for those in the deal to leave on the table even though HD Radio's outcome is fated.

After stealing the stove - he'd come back for the smoke.

iBiquity argues in that a "combined XM-Sirius could be in a better position to hamper their ability to introduce HD Radio technology into the marketplace."

Introduce?

Let me read to you a portion of a press release from HD Radio Alliance issued on April 10, 2006: "In response to a surge in consumer demand for HD Digital Radio(tm) receivers, three major retailers now plan to offer HD Digital Radios in their stores nationwide beginning this month and have announced sweeping marketing and education campaigns to support new customers....."

Seventeen months later and you're still introducing your product?

How many products has Steve Jobs announced during the same time frame?

I have to add include this line from that April '06 press release - just to rub it in - where it described HD Radio as "...what promises to be the biggest trend in consumer entertainment since the advent of FM radio."

So, let's say that in iBiquity's blue sky universe users could choose from both satellite and HD Radio.

No one will argue that when you can pick up and listen to a terrestrial radio station that the quality is close to and competitive with satellite radio. But have you ever listened to the sound of HD Radio side channels?

It's somewhere between AM and present-day FM. That is, when you can receive them.

XM has exclusive deals with GM, Honda, and Nissan, and Audiovox's Terk Electronics distribution, which also distributes Sirius satellite antennas.

Sirius has exclusives with Ford, BMW, and Mercedes Benz automakers, retail outlet Radio Shack, and Direct Electronics, which also distributes premium sound systems and vehicle security.

In response to the latest laughable HD Radio demand, XM and Sirius responded in a joint statement saying, "This is evident from the strong support our merger has received from a broad array of businesses and organizations. iBiquity's own filing highlights satellite radio's competition with HD radio," and calling iBiquity's latest scheme, "...nothing more than a self-interested attempt to use the regulatory process to promote HD radio's market share in this highly competitive landscape."

You know, I could've sworn that the HD Radio Alliance claimed that a number of retail locations - including the top retailer in America - sold HD Radios.

Bilk-o's not what one would call a details guy. He disregards facts. Here's another one. Most dealerships that offer exclusivity to one system also sell after-market satellite radios of its competitor. A friend who's a Honda dealer pushes XM and contractually required to do so. But the same dealership also sells after-market Sirius units for customers that prefer their offerings.
*
I'm certain car dealers would find shelf space for HD Radios, too. That is, if anyone would buy 'em.

Bilk-o can't come to grips with the fact that more ahooga horns were sold for cars last year than HD Radios.

I'll give him credit for one thing. He's made iBiquity and HD Radio's technical hi-jinks incessant radio industry blog fodder for the past year.

We'll pay very close attention to next week's Consumer Electronics Show in Vegas to witness the response HD Radio receives there.

In a world of silk purses, HD Radio is a sow's ear.

No, what it actually means is that satellite radios, finally getting to a decent price point, will have to add IBOC, which will bring that price point back up a minimum of $100, and force consumers to buy something they don't want, and are ignoring in droves.

And before someone says something about FM... nobody EVER forced manufacturers to put FM on all the AM radios they built or sold. (interesting, that, though, considering that they HAVE required, in turn, UHF tuners, CATV tuners and ATSC tuners in television sets (at least above the 13" size) over the years.)

So, can't remember. Does this mean we have better communication by SW
at the start of the new cycle?? Or how does this affect SW again.
Thanks.

Satrad doesn't even support interoperable receivers:

"Satellite Radio Facing Bankruptcy?"

"Satellite radio companies have been suffering heavy losses - and plunging stock prices - even as they continue to add subscribers. And a front-page story in Tuesday's Wall Street Journal warns that the worst may be yet to come... Industry leader XM Satellite Radio Holdings Inc. lost $667 million last year, and rival Sirius Satellite Radio Inc. lost $863 million. The big losses have shaken investor confidence in the industry. XM shares have lost 71 percent of their value this year, and Sirius shares have lost 51 percent... For one thing, a substantial number of people who buy vehicles with pre-installed satellite radios don't activate them, nor do many who receive a radio as a gift. It's estimated that 10 percent of all store-bought radios given as gifts during the last holiday season were never activated. Also, those who do subscribe often abandon the service after a period of time, some switching to iPod adapters to provide music in their vehicle."

http://archive.newsmax.com/archives/ic/2006/8/15/175258.shtml

"Regarding the Technical Aspects of the SDARS Providers XM and Sirius"

"There are significant differences in certain technical aspects of the two SDARS systems as deployed by XM and Sirius. The systems as currently deployed are not interoperable. That is to say, an XM receiver cannot receive the Sirius signal and vice versa. Thus, as is true today, if the proposed merger of XM and Sirius were consummated, consumers would still need to purchase a new interoperable receiver in order to receive the signals of both providers. These differences in system operation, function, and structure make the design and implementation of a single unified and interoperable receiver both complex and expensive. In fact, both XM and Sirius have been working in a joint venture to develop an interoperable radio since 2000. At this time, no interoperable radios have been introduced into commercial production."

http://tinyurl.com/2kek8t

It's a no-go, anyway...

< Snip >

Have you calculated this?

Have you considered that the coax will not behave as a transmission line
but will resonate as part of the antenna system is it is not terminated
at its characteristic impedance on both ends?

Whatever. In any event I don't know about other people but I'm hearing
more HD radio commercials on AM besides the HD - BMW car commercials.
They sound lame and unconvincing.

Could someone please help me understand how this 1/2 wavelength and 1/4 wavelenght thing is measured?? I'm trying to get a handle on how to figure out what a wavelength is or how you measure one. Antenna height and so forth are all figured according to set formulas, right??

Thank you very much.

Then maybe YOU should listen more to the radio than typing on the internet.

> to figure out what a wavelength is or how you measure one. Antenna
> height and so forth are all figured according to set formulas,
> right??
>
> Thank you very much.

Wavelength (m) = 300/f

Examples:

146 MHz (2m amateur)
300/146 = 2.05m (rounded to the nearest 100th)

10 MHz (WWV)
300/10 = 30m

440 MHz (70cm amateur)
300/440 = .068m (rounded to the nearest 1000th)

To compute half wave in meters simply divide by 2

To compute quarter wave in meters simply divide by 4

For real world applications of antenna building, you would want to do the
following:

For a driven (active) element, multiply your result by .95

For a reflector element leave as is.

For a director element, multiply your result by ~.90

These will not be precise, but they are practical, and do work well.

Are you in denial or what? Don't believe everything your mother tells you. If you have listened to SW for any length of time you will notice that stations are going off SW. If they haven't left yet, they have cut their schedules down and probably will do so soon.

Look at the radio selections. Back in the eighties every one of the major radio companies offered numerous models. Now what's available? People are buying the old stuff because one, it worked great, and two, the selection of new SW radios is dwindling.

Art Bell and the like have ruined AM for DX listening. I like Coast to Coast and all that but it is on every other station on the dial. It used to be fun to tune into those distant stations and listen to their unique programming. That isn't the case anymore.

Ask your mom if you can get rid of the WebTV and get a real computer with broadband access. Your shortwave radio will collect dust when you hear how good it can really sound. BPL might be available in your area or your trailer park may have wi-fi access. Maybe the wi-fi will be free and that will leave you with more money for other cool shit. Go ahead, ask your mom. I bet she'll do it.

If you have access to the owner's manual, it should tell you where the
birdies are. Is there one in the CB frequencies?

284. Panasonic RF-2600 for $60

Newsgroup: rec.radio.shortwave
Date: 2008-01-05 05:55:20 UTC
From: Mike Maghakian <maghakian@comcast.net>
Message-ID: <5oudnZGgHLxJhuLanZ2dnUVZ_g2dnZ2d@comcast.com>
Source record: 133152

this one is not in very good cosmetic condition ! works fine however and is very sensitive. receives quites a few SWBC stations with the whip not even up. if this was in excellent condition would sell for about $150.

most people don't know it but the 2600 is basically a 2900 with single speed tuning. I studied the schematics for both to determine this myself. the RF-2900 is a great radio, so that means the 2600 is also.

email me for a picture

The federal government (FCC) knows that SWL's have no clout on this subject. That's why they chose some of the international HF broadcast bands for the CODAR project. It's considered to be a national safety issue and will therefore continue to disrupt our shortwave listening for the sake of monitoring storms at sea. IOW- There is nothing we can do about it. I tried too.

BTW- The 60-m tropical band was the first to be used for the CODAR service. Now it extends to several other higher bands.

I'm not certain if Radio Medi 1 is still using the transmitter site at Nador,
but if so, that counts as Spanish Morocco on the NASWA Country List.

-
- Thank you for your help. The thing is that I have a large old
- CB antenna (has 2 large pieces of copper wire extenting a
- few feet in opposite directions). I sometimes have it connected
- to and for some reason the interference happens more often
- with that antenna than when I use the small antenna that came
- with the unit. Also the interference tends to go away when
- I turn the backlight on when using the old CB antenna.
- LOL maybe my scanner is just cursed.
-

W2T,

The large old CB Antenna just may be 'too big' for this
small Handheld Scanner.

-IF- Your primary Interest is in the hearing the CB Band :
Then Buy a CB Radio and use a CB Antenna to do so.

Citizens' Band (CB) Radio Band -Info-
http://en.wikipedia.org/wiki/Citizens'_band_radio

A simple Snake Antenna for the CB Band for Scanners
made from a single piece of Coax Cableshould work with
out overloading the Scanner.

First buy a 20~25 Foot long piece of Coax Cable
with BNC Connectors on both ends.

CB Band {Amateur} Vertical Antenna Calculator
http://www.csgnetwork.com/antennaevcalc.html

Snake Antenna - Antenna Construction Steps :
* Measure-out from one of the Ends of the Coax Cable
19 Feet 6 Inches and 'cut' the Coax into two pieces.
* Take the 19 Feet 6 Inch piece of Coax Cable and then
Measure-out form the BNC Connector End 8 Feet 8.25 Inches
and carefully 'cut' around the Outer-Cover of the Coax,
being careful not to cut into the Inner Insulator.
* On the BNC Connector side of this 8 Feet 8.25 Inches
'cut' {very near to the 'cut'} place a Clamp-On Ferrite Bead
and place a Plastic Wire Tie on the Coax on each side of it
to hold-it-in-place.
* Make a Long 'cut' down the remain section of the Coax
away from the BNC Connector.
* Remove the Outer-Cover of the Coax from this section.
* Carefully 'snip' the Individual Wires of the Coax Shield
at the 8 Feet 8.25 Inches 'cut'.
* Remove the Coax Shield from this Section.
* Fold-over 1.5 Inches of the End-Tip of the Inner Insulation
back on to itself froming an Eye-Loop. Secure with Three
Plastic Wire Ties leaving a Half-Inch Eye-Loop for Rigging.
* Attach a Nylon-Poly Rigging Rope to the Eye-Loop.

You now have built your own End-Fed "Snake" Dipole Antenna
for the CB Bands to use with your Scanner.

NOTE - If you started out with a 25 Foot piece of Coax with
BNC connectors on both Ends : You have a 5 Foot 6 Inch
piece of Coax left over to make a shorter A2L Antenna
to use with your Scanner.
Note - A2L = Almost-A-Loop -because- it is not electrically
connected as a Loop -but- is shaped like a Loop -hence-
'Almost' A Loop.

A2L Antenna - Antenna Construction Steps :
* Measure-out from the BNC Connector of the Coax Cable
Two Feet (2') and carefully 'cut' around the Outer-Cover of
the Coax, being careful not to cut into the Inner Insulator.
* On the BNC Connector side of this 2 Foot 'cut' {very near to
the 'cut'} place a Clamp-On Ferrite Bead and place a Plastic
Wire Tie on the Coax on each side of it to hold-it-in-place.
* Make a Long 'cut' down the remain section of the Coax
away from the BNC Connector.
* Remove the Outer-Cover of the Coax from this section.
* Carefully 'snip' the Individual Wires of the Coax Shield
at the 2 Feet 'cut'.
* Remove the Coax Shield from this Section.
* Take the Inner Insulation and from a Single-Turn Loop
with it with 4 Inches overlapping to create a One-Foot
Diameter A2L Loop. Secure this Overlap with three
Plastic Wire Ties evenly spaced.
* Bend the Loop and Coax so that the Coax extends down
from the Loop. {Looks like an outline of a Lolliipop}
http://www.resene.co.nz/kids/stencils/images/lollipop_l.jpg

Place the A2L Antenna Element next to a Window; on a
Desk-Top; hang it on a Wall; or Wear-It while walking around.

FWIW - This One-Foot Diameter A2L Loop Antenna picks-up
the 800~900 MHz Frequencies fairly well.

297. That 70's Show - Shortwave

Newsgroup: rec.radio.shortwave
Date: 2008-01-05 11:30:37 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <477F6A5C.BA12DE9@milestones.com>
Source record: 133165

I 've been watching 'That 70's Show' re-runs on Fox, and I've been noticing the interior of Eric and Donna's trailer and have seen up on a shelf what looks to be a Zenith Trans-Oceanic portable, and on another shelf what looks to be an old tabletop shortwave.

To the left of the Trans-Oceanic there looks to be another portable, but I'm not sure what brand it is.

Anyone else ever notice this?

What do your "noises" sound like? I have noticed something around there recently. Sounds a bit like clicking noises. On my new SDR-IQ I can see signals that appear to be "frequency hopping" while sending short burst of data.

Great argument. I can tell you were on the debate team in school.

I think you have proven why brothers and sisters shouldn't have kids.

Well, whatever works for you.

However, the 14 ga has much more mechanical strength than 20 ga and is therefore more likely to survive whatever Mother Nature throws at it--ice, snow, wind. Please appreciate the fact that the OP is in New York state and may have more severe weather than you do in California (this weekend's California storms excepted).

How lucky do you feel with that 20 gauge?

I own a Panasonic RF-2600 radio.I bought it new at a Service Merchandise store.A few years later, the radio got to where it wouldn't stay on station, I tune to a station/frequency and I can see the big tuning knob drifting, if I wedge a piece of cardboard between the back of the tuning knob and the plastic front cover, sometimes it will stay on station/frequency.The radio got to where it won't turn on at all unless I stick a tiny thin piece of a plastic wedge between the earphone jack and the plastic hole where the earphone jack is.I have never used the earphone jack for anything before.Other than that, the radio works ok.

> http://groups.google.com/group/rec.radio.shortwave/msg/1abc6a2bf8acc12d

Well, "John Doty" in the reference above says:

> Any *unshielded* [my emphasis added] conductor in your antenna/ground system is capable
> of picking up noise: the antenna, the "lead-in" wire...

First of all, isn't the "lead-in wire" (coaxial cable in this discussion) -shielded- ? So according to his -own- statement, coax shouldn't have to be buried, at least from a noise mitigation viewpoint.

Doty continues:

> You can keep noise currents away from the antenna by giving them
> a path to ground near the house, giving antenna currents a path to
> ground away from the house, and burying the the coaxial cable from
> the house to the antenna.

In the 1930s, Bell Laboratories, while investigating power line influence on telephone cables, proved that burial had NO effect on noise being induced into the telephone cables; i.e., 20 feet of aerial separation, from a noise standpoint, was exactly the same as 18 feet of aerial separation plus being buried 2 feet deep.

Hmmm...should I believe "John Doty" or Bell Labs? You're a smart guy -- I'll let you figure that one out for yourself. :-)

Yeah DX Ace - Sort-of : That Was Then . . . This Is Now ! ~ RHF

WHY - Bury Your Shortwave Radio Listening (SWL) Antenna's
CoaxCable Feed-in-Line ?

Amplified Audio Frequency Signal Distribution -circa- 1930s
and the much 'quietier' 1930s RFI-EMF Environment
- = Versus = -
Passive RF High Frequency Signal Distribution -circu- 1990s
and the much 'noisier' 1990s RFI-EMF Environment
.

Well, I don't know about the "1990's" (isn't this the 2000s?), but it
became a big issue in the 30s due to the rapidly expanding
electrification of America.
```

In any event, I'm sure that even the most superficial research on your part will show that the applicable Laws of Physics have not changed since then.

About two months ago, I watched a program on tv about a guy in
England.He walks the roads and trails and he picks up freshly killed
road kill (he knows how to tell if the fresh killed road kill is safe
enough) and wild plants and cooks that stuff and eats it.He goes around
to restaurants and eat joints over there, getting those people
interested in road kill critters.

- Well, I don't know about the "1990's" (isn't this the 2000s?),
- but it became a big issue in the 30s due to the rapidly
- expanding electrification of America.

John Doty wrote his 'stuff' in the 1990s.
```

- In any event, I'm sure that even the most superficial research
- on your part will show that the applicable Laws of Physics
- have not changed since then.

BP -wrt- The Applicable Law of Physics:- No They Have Not.

Undeniable Fact # 1 - The Man Made RFI-EMF Environment
Has Changed Greatly : Increasing one or two Magnitudes from
the 1930s to the 1990s.

Undeniable Fact # 2 - Man's Ability to Accurately Measure the
RFI-EMF Environment and It's Effects Has Changed Greatly :
Increasing at least a Magnitude from the 1930s to the 1990s.

super-ficial-ly yours ~ RHF

There is a digital transmission on 10426.5 kHz almost continuously, every day; FSK with about 875 Hz shift, about 100 baud or so, won't decode with any s/w that I have. Anyone know this one or care to speculate?

Michael

OK, you keep on believing that.

Remember you have a mismatch on both ends of the cable.

I find you pretty disagreeable.

I think most people would find you disagreeable.

Without agreeing or disagreeing with your arguments above don't you
think you should be able to come up with your own explanations and
understandings on the subject? Why should we read you posts when we can
just go read the person you reference? You think you somehow improve the
information?

I think reading your posts are a waste of time.

Yes, that's true. I believe I was the one who first pointed that out
to the OP.

I show it centered at 10428.
Comes in pretty strong evenings in socal.
Looks like 75 baud.

http://www.chace-ortiz.org/umc/db/modes/kg84c.txt
says:
Feb 7, 2000 2304 10428.00 ??? NATO Mil, ??? 75bd/850 FSK, KG84 crypto

Could very well be military/navy.
I think commercial maritime services also transmit
similar signals.

There are many others similar such as 10130 9960 9215.2
9085 9030 5345.

> Increasing at least a Magnitude from the 1930s to the 1990s.

Undeniable Fact # 3 - According to a direct quote of Doty, UN-shielded lead-in wires are susceptible to noise. Coaxial cable is SHIELDED. So why does Doty say bury it?

Undeniable Fact # 4 - Even though the RFI environment has changed and even though man's ability to measure it has changed, burial in a few inches of soil provides no noise mitigation.

Undeniable Fact # 5 - Yes, the environment has changed and measurement techniques have changed, but that does NOT mean the Laws of Physics have changed.

Finally, for the sake of this discussion, assume your neighbor/neighborhood is throwing out a lot of RF hash and trash. Furthermore, let us assume you've buried your coax in hopes of alleviating the problem (even though it won't).

What, pray tell, is to keep this neighborhood RF hash and trash from impinging directly on the antenna itself and being piped right in to your receiver?

-If you need to avoid the lawn mower, bury by all means.

-If you need to avoid the wrath of your wife, bury by all means.

-If you want to bury to mitigate noise, save your time, trouble and energy.

Let's examine what you just said above.

You want me to re-invent the wheel, re-plow the same ground and duplicate the work already done by the PhDs at Bell Labs?

To put it another way, you imply it's OK for RHF to quote "John Doty" but that it's not OK for me to quote Bell Labs. This is one of your more brilliant comments, Sparky.

> Why should we read you posts...

Nobody is forcing you, Sparky.

> ...when we can just go read the person you reference?

If you -don't- read my post, how would you know what person I am referencing? Again, positively brilliant of you, Sparky.

In any event, the Bell System Practices (BSPs) addressing this issue, still in use to this very day, are proprietary. However, I imagine you could reference the public 'Bell System Technical Journal' issues of the era. And, yes, please DO read the "person" I reference (although the Bell Labs are not "a person"). You will then find that what I say is true.

> You think you somehow improve the information?

Please point out where I ever said or implied anything about "improving" the information. I simply quoted the applicable work done by Bell Labs. Period. There's just no end to your brilliance, Sparky.

> I think reading your posts are a waste of time.

So why did you read it, hmmmm? A sign of mental illness is repeating the same mistake.

And suit yourself, Sparky...you can always fall back on your time tested <Plonks>. ;-)

Thanks for this link; when it comes to digital modes, one can never be sure of
the carrier center freq when one does not know the mark/space freqs., etc.
so searching the web for references to something near 10425->10427 came up null
for me.

>
> Could very well be military/navy.

Indeed; I haven't listened much around 9000->9999 but I do hear the one at 10130
as well since I am on 30m amateur band a lot and although the bands are nowadays
considered 'shared' with other services, it amazes me that the military or
whichever user can't move a few dozen kHz up the band.

Regards,

Michael

Looking at the opposite side, that of the way coax is used at the transmission end, there are a number of relevant situations.

AM broadcast stations using series fed towers (those with an antenna tuning unit to couple to the tower right above the base insulator) generally bury the coax that feeds the ATU and tower. The reason is not for any kind of additional isolation or insulation, but to keep the cable where falling ice from the tower or guys, storm debris (in hurricane areas, particularly) can't hit it, and to make it safer from vandalism.

Buried cable installs are also cheaper than the preferred system, which is a set of poles, metal or wood, above the ground, with a metal bar or roof above it to prevent ice damage. The advantage of above ground is that the cable is accessible for repair or replacement in case of internal arcing and more immune to digging by morons from the telco or electric utility.

Generally, the decision to bury is one of cost, not of RF.

No, just put it in your own words. See by putting theory, concepts, and
ideas in your own words maybe you could impart greater understanding for
people reading your posts.

And no I don't think it's OK for RHF or anyone else to do this.

> > Why should we read you posts...

Who said I was forced?

> > ...when we can just go read the person you reference?

Oh clueless one.

There was nothing in your own words just the references. Again your
posts are not worth reading. You add no information, you did not use the
referenced information in the context of the thread, you did not explain
how the referenced information is relevant to the questions raised in
the thread.

"Radio: We have met the enemy and he is us!"

Emmis - Jan. 2 - $8.24; Dec. 31 - $3.85.

Entercom - Jan. 2 - $28.18; Dec. 31 - $13.69.

Radio One - Jan. 2 - $6.75; Dec. 31 - $2.34.

Spanish Broadcasting System - Jan. 2 - $4.11; Dec. 31 - $1.85.

Westwood One - Jan. 2 - $7.06; Dec. 31 - $1.99.

Salem just missed the 50% loss club by a prayer: Jan. 2 - $11.95; Dec. 31 - $6.59.

CBS fell $31.18 to $27.25. (True, there's writer's strike and the Katy Couric gaffe - but putting one in Joel Hollander's back may have effectively tackled, at least temporarily, the downward spiral at the radio division.)

Clear Channel, which wanted to privatize by year end - but couldn't - is down $35.54 to $34.52 - a price artificially inflated by the $39.90 offering price by BainCapital and Thomas H. Lee. There's a deal that's close to turning into a cut and run. If Bain and Lee cut their losses and back out of that deal - Clear Channel will be in free fall.

Theirs isn't the only deal that could implode. The Merrill Lynch bull, already gelded by the credit and mortgage collapse, is taking a second look at the privatization deal they concocted with Cumulus. When they announced it in July, Cumulus was at $11.75. Last night it closed at $7.25.

http://gormanmediablog.blogspot.com/

Hey Eduardo - you are worth a $1.85 !

While I'm a big fan of Wellbrook gear, I don't like the use of a BNC
for anything designed to be used outdoors. Connectors used outdoors
should be threaded. I don't recall if the 1530 has any means to
weatherproof the BNC. If it doesn't, you might want to think about
making one of your own. Since Wellbrook pots their electronics, they
may consider than to be enough protection against moisture wicking
into the box. Then maybe a bit of sealant around the connector is all
you need.

There are eleven FM transmitters in a province roughly 100 miles by 100 miles. Five of them are Class B (50kw/150m) or bigger. Any place in New Brunswick the new Moncton FM transmitter won't reach is already covered by at least one other existing FM transmitter that carries the same program.

Really, with this FM move in Moncton, the only place where the CBC is losing coverage is in the United States. Now, I know there will be a bunch of Americans who'll miss the easy access to CBC Radio. (I know I miss 740/Toronto and 940/Montreal, and will not be celebrating when the day comes that 990/Winnipeg moves) But I suppose if I was a Canadian taxpayer, I wouldn't see the provision of a radio service to the United States as being a very high priority for my tax money.

The FM transmitter will have a much better signal inside buildings, especially in Moncton's downtown area.

> > RFI-EMF Environment and It's Effects Has Changed Greatly :
> > Increasing at least a Magnitude from the 1930s to the 1990s.

- Undeniable Fact # 3 - According to a direct quote of Doty,
- UN-shielded lead-in wires are susceptible to noise.
- Coaxial cable is SHIELDED. So why does Doty say bury it?

Fact is most Coax Cable does not have a perfect Shield.

- Undeniable Fact # 4 - Even though the RFI environment has
- changed and even though man's ability to measure it has
- changed, burial in a few inches of soil provides no noise
- mitigation.

You provide no Empirical Data to dispute my Anecdotal Observations.

- Undeniable Fact # 5 - Yes, the environment has changed and
- measurement techniques have changed, but that does NOT
- mean the Laws of Physics have changed.

I would have to conclude that 'our' knowledge of the Laws of
Physics has improve from 1930s to 1990s.

- Finally, for the sake of this discussion, assume your neighbor/
- neighborhood is throwing out a lot of RF hash and trash.
- Furthermore, let us assume you've buried your coax in hopes
- of alleviating the problem (even though it won't).
-
- What, pray tell, is to keep this neighborhood RF hash and
- trash from impinging directly on the antenna itself and being
- piped right in to your receiver?

Nothing -but- that's the Antenna itself -and- at least it ain't the
Coax Cable feed-in-line; acting as a Noise Pick-Up Antenna.

- -If you need to avoid the lawn mower, bury by all means.

Good Point.

- -If you need to avoid the wrath of your wife, bury by all means.

She Who Must Be Obeyed - Must Be Happy Too !

- -If you want to bury to mitigate noise, save your time, trouble and energy.

Alas it is 'my' Time and Money and to 'me' it is Worth-the-Trouble : To Do It Right !

Oops You Forgot : # 2 - Dang - See # 1 + Safety - It's a Tripping Hazard.

KEY POINT - Burying the Coax Cable is simply one of the many Synergistic Elements that goes into making a Low Noise Shortwave Radio Listening (SWL) Antenna -a-la- John Doty

1 - At the Antenna using a Matching Transformer between the Antenna Element and the Coax Cable feed-in-line. {The Far-End}

2 - Plus a Ground Rod at this Matching Transformer.

3 - Near the entry to the House using an Isolation Transformer between the Coax Cable feed-in-line and Coax Cable going into the House to the RadioShack. {The Near-End}

4 - Plus a Ground Rod at the Isolation Transformer.

5 - Bury the Coax Cable feed-in-line between the Two Ground Rods and Transformers.

Number "5" is realy only important when you have first accomplished Numbers 1~4.

Effectively the Outer-Shield of the Coax Cable is :
1-
2-
3-
4-
5-
etc...

Three Rec.Radio.Shortwave Messages to Read -by- John Doty
http://groups.google.com/group/rec.radio.shortwave/msg/1abc6a2bf8acc12d
* SWL Longwire
* Low Noise Antenna Connection
* Grounding Is Key To Good Reception

John Doty will tell you that he did not Invent any of these things or Uniquely Combine them to Create a New Concept. He more or less studied what was out-there and empirically tried things until he found what seemed to Work : "The Best". He Wrote about them; and Help to Popularize them in the 1990s in the Shortwave Radio Listening (SWL) community. As far as I know he makes no claim that any one of these things will work by itself -but- as a group they do improve things greatly over a simple Classic

Horizontal Bare Wire Antenna with an Insulated Wire feed-in-line
-or- an Improved Horizontal Bare Wire Antenna with a Coax Cable
feed-in-line.

step-by-step - one-step-at-a-time - the endless quest for
better shortwave radio listening (swl) - iane ~ RHF

Generally, the decision to pose as a faux Hispanic is one of idiocy, not of sanity.

366. Reminder - CHWO QSL

Newsgroup: rec.radio.shortwave
Date: 2008-01-06 11:44:25 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <4780BF19.CE0F2735@milestones.com>
Source record: 133334

This from DX LISTENING DIGEST 7-134, November 6, 2007 as a reminder about the Jan. 8th date for those who caught the station on Nov. 17th:

** CANADA. An extra special CHWO - AM 740 QSL card

Hello all. CHWO-AM 740 Toronto, which has been family run since 1956, has been sold (pending CRTC approval) and no doubt some changes will be coming. We have heard that the general format will not change for now but that's about it.

The new owner may not want to continue having someone issuing QSL cards on their behalf. I will certainly do my best to convince them in hopes this will continue.

Last year they celebrated their 50th birthday since the station first started up on November 17th, 1956 on 1250 kHz and the 6th anniversary since moving onto 740 kHz back on January 8th, 2001. It has been in the same family all this time and NEVER changed format.

So --- I think it`s time to celebrate both achievements with a special QSL card AND certificate that is open to everyone. This card and certificate will capture both the old and new of CHWO in pictures and information. But there is a catch. You have to send in two reports.

Here is the criteria:

1/ You must send in two separate, correct reports: November 17th, 2007 and January 8th, 2008

2/ You must hear the station between 0000 & 2359 (EST) on those dates. (+5 Hours UTC) [EST is MINUS 5 hours from UT ï¿½ gh]

3/ The usual information will be required for the report:

(a) Program material (at least 10 minutes of specific program material heard: e.g., name of announcer, commercials heard, news items, song title and artist, etc. You can also make a short recording of the station and send it as an MP3 provided it contains some of the specific program material noted earlier);

(b) Signal/sound report (a general overview of how well you heard the signal at your location and the sound quality of the program.);

(c) Mention of the type of equipment and antenna you were using to hear the signal is helpful information as well.

4/ You can send the reports in after each date or together after January 8, but I must have both for the special QSL.

5/ If you plan to go after the special QSL, mark your reports as 'Special QSL.' A report for November 17th but not followed up by one on January 8th will receive a regular QSL only (unless you already have received one in the past.) I will post repeat announcements prior to each date.

Thank you all for your support in this endeavour and the future of QSL from CHWO, AM 740, Toronto. Feel free to pass this notice along and good luck to all (Brian Smith, Nov 5 - am740 @ rogers.com AM 740 - http://www.am740.ca

- While I'm a big fan of Wellbrook gear, I don't like the use
- of a BNC for anything designed to be used outdoors.
- Connectors used outdoors should be threaded. I don't
- recall if the 1530 has any means to weatherproof the BNC.
- If it doesn't, you might want to think about making one of
- your own. Since Wellbrook pots their electronics, they may
- consider than to be enough protection against moisture
- wicking into the box. Then maybe a bit of sealant around
- the connector is all you need.
-

M...Sushi,

For Weather-Proofing Your Radio & Antenna Outside Connections
- Try Coax-Seal

Coax-Seal will usually work as a good means of Weather-Proofing
most Radio and Antenna Plugs-&-Jacks and other Connections.
Coax-Seal works with PL-259 Plugs; SO-239 Jacks; F-Connectors;
BNC Connectors; and many many more . . .

371. Today's "Antenna Wire Weather Report" for 6 January 2008

Newsgroup: rec.radio.shortwave
Date: 2008-01-06 16:25:57 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <74f8cf85-212d-4069-ad9f-339154e576a9@p69g2000hsa.googlegroups.com>
Source record: 133239

Today's "Antenna Wire Weather Report" for 6 January 2008
- - - From Twain Harte, CA north of Yosemite National Park -USA-.
http://www.mymotherlode.com/Weather/
.
Well I woke-up this Morning at about 6:00 AM to Cold Cloudy Skies
and Snow on the Antenna Wires.
.
-ps- We got about Four to Six Inches of Snow Overnight.
.
The Old Antenna Wires are Drooping with the Weight of about
an Inch of Wet Snow and just hang there in the quiet air.
http://radar.weather.gov/Conus/pacsouthwest_loop.php
.
My Shortwave Radio Listening (SWL) Antenna Wires are still
Up-There-in-the-Air ! - Picking-up 'The World' and Beyond ! :o)
http://en.wikipedia.org/wiki/Shortwave_listening
http://shortwave.hfradio.org/
http://www.dxing.com/swlintro.htm

.
Shortwave Listener (SWL) Antennas Group => http://tinyurl.com/ogvcf
GoTo => http://groups.yahoo.com/group/Shortwave-SWL-Antenna/
.
Currently the Outside Temperature is about 31*F at this Time with
Snow on the Ground and that 'Quiet Sound' of Snow is in the Air.
http://www.wunderground.com/US/CA/Twain_Harte.html
.
Weather Radar {Radio} for Twain Harte, CA -USA-
http://tinyurl.com/yv92vj
.
Weather Radar {Radio} for Sacramento Valley {North}
NORCAL - http://tinyurl.com/2w4h7v
Redding + Lake Tahoe + SF Bay Area + Sacramento + Yosemite
.
Weather Radar {Radio} for San Joaquin Valley {South}
CENCAL - http://tinyurl.com/yqjwon
Stockton + Monterey Bay Area + Yosemite + Fresno + Bakersfield
.
Twain Harte, CA is near 4000 Feet Elevation ASL; so we expect
more Rain Wind and Snow through the Week-End; even though
the California Central Valley Cities below will only be getting more
Wind and Rain {and possible Flooding} for the Week-End.
.
.

right now the old antenna wires are drooping with
wet snow and hanging in the cold air ~ RHF

> .

KEY POINT - Burying the Coax Cable is simply one of the many
Synergistic Elements that goes into making a Low Noise
Shortwave Radio Listening (SWL) Antenna -a-la- John Doty

1 - At the Antenna using a Matching Transformer between the
Antenna Element and the Coax Cable feed-in-line. {The Far-End}

2 - Plus a Ground Rod at this Matching Transformer.

3 - Near the entry to the House using an Isolation Transformer
between the Coax Cable feed-in-line and Coax Cable going
into the House to the RadioShack. {The Near-End}

4 - Plus a Ground Rod at the Isolation Transformer.

5 - Bury the Coax Cable feed-in-line between the Two Ground
Rods and Transformers.

Number "5" is realy only important when you have first
accomplished Numbers 1~4.

Effectively the Outer-Shield of the Coax Cable is/does :

1 - Connects both the Antenna Ground and the House's
Feed-in-Line Entry Ground {RadioShack Grounding Point} :
-Thus- "Bonding" these two Grounds.

2-
3-
4-
5-
etc...

Regarding the rtty at ~10131 kHz:
Likely NATO KG84/STANAG 4481; I suppose it was there before the ham allocations on 30m. See http://groups.yahoo.com/group/UDXF/message/4423

Michael

374. Re: RadioShack Pro-84 Scanner Help - Many Scanner Radio Problems Can Be "Fixed" With A Better Scanner Antenna

Newsgroup: rec.radio.shortwave
Date: 2008-01-06 19:32:01 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <9934d31d-19c6-437b-8f95-c3b30652ca1d@y5g2000hsf.googlegroups.com>
Source record: 133242

FO&A,

Here is another simple CB Radio Antenna to use with a Scanner
-or- for that matter a CB Radio or any other Radio used primarily
to Monitor the CB Radio Band. Works for 10 Meters too.

Workman BS-1 Dipole Antenna -cut- for the CB Radio Band.
Frequency Coverage : 26.065 MHz to 27.085 MHz

This is a basic Dipole Antenna with 9-Feet per side comes with
a Center Connector and Coax Cable feed-in-line. Can be used
Indoors in a Corner of a Room with the Arms along two Adjacent
Walls or Outside under the Eaves of the House.

INDOOR Base ANTENNA for CB Radio - Wire Dipole - New
http://cgi.ebay.com/_W0QQitemZ160194837706

The Coax Cable has PL-259 Plugs on the Ends so a
SO-239 Jack to BNC Jack type of Adapter is required.

iane ~ RHF

>

Got a soldierless BNC Connector from Rat Shack;

hooked 5 feet of wire to it

put a small suction cup on the window &

Hooked it all up..

cost : $ 5:00

Great reception.. !

Actually, the company I work for went private at a very nice share price.
Those with options got big checks, too.

Uh-huh. And whose name is it in? Certainly not yours. Just like those radio
stations in SA.

Obviously you do not know anything about issues of liability and avoiding probate.

For investments, a sensible person would at least maintain investments in a brokerage account where the shares are in a street name so they can be traded instantly. Such an account would be under a living trust to avoid probate and for certain tax advantages.

A business should always be in some form of a corporation to protect the owner(s) from liability issues. The assets of the corporation would be held under a corporate name, but the assets of the individual owners or investors are protected from the debts or liabilities of the business activity.

Thing is, you've never actually owned much of anything.

Always been in 'someone else's name', etc.

Nothing that was ever traceable to you, which is very interesting.

I'm certain the IRS will be just as amused as I am.

Hey, I love kickin' gay-lick ass!

Now, if I were you, you might consider hauling your little hind-lick faux ass outta here and make a new start somewhere else in 2008.

Something for your faux Hispanic cock sucking brain to think about, eh?

And, as always, leave the SWBC DX to the big boys.

I have no idea who Mr Bryant is.

But I find it amusing that you answered your own post which was, in turn, an
answer to your own post.

That's some kind of good shit you're tokin' man.

For those who have not heard of this new radio.....a couple of links.

http://gizmodo.com/341112/grundig-eton-satellit-750-shortwave-radio-yes-shortwave

http://www.etoncorp.com/product_card/?p_ProductDbId=351064

Looks pretty cool. I like the analog S meter. I understand it has DSP
but no Sync. Will be interesting to hear how it does.

Dave

From: mc <look@www.ai.uga.edu.for.address>
Message-ID: <Bwhgj.63956$K27.36821@bignews6.bellsouth.net>
Source record: 133488

Somebody said a while back that it worked acceptably only with the car engine turned off...

Can others tell me about the level of performance achieved? For SWLing with the car turned OFF, I'll just bring along my ICF-2010.

I don't want to do serious DXing on the car radio, but I do want to hear major international outlets while driving around. If that's not feasible, it's not worth the price.

Thanks!

Guys,

I guess I need to clarify a bit about my earlier statements about "having the engine turned off!!". There was fair number of stations (albeit CRI, Radio Australia, RNZI, BBC, NHK Japan etc) that I could listen to while driving, but when it faded at a certain point the vehicle ignition / electric / motor noise would come through at certain low revs / idle / cruising speed.

I did not attempt to try any noice / electronic condensor on the power supply etc as it usually was not too bad. Its just I usually am stationary on the side of the road / camping when playing with the shortwave :)

The other bad thing for my Pajero 4x4 is the antenna is it has an Electric Antenna, and so possible if I fitted a larger am/fm whip it may MAY yeild better results.

But I also am interested to hear from other people who have installed a SW car radio to gauge how it performed for them while driving :)

Cheers
Mark

Presumably it is not SDR; how would you do this in a DSP stage at
audio frequencies (after demodulation)? A pseudo sync-detection
by autolocking the BFO when an AM carrier is tuned is conceivable,
but wouldn't you think that such a feature would be mentioned?

Regards,

Michael

We are interested in offering any technical support necessary to get
these articles updated and automatically posted again at regular
intervals. This would include establishing contact with the original
maintainers for any necessary permissions. We would prefer to seek new,
dedicated maintainers at this time, rather than start auto-posting the
original articles ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

433. Grayland DXpedition - Jan. 2-4

Newsgroup: rec.radio.shortwave
Date: 2008-01-07 07:44:33 UTC
From: Guy Atkins <dxnospam@guyatkins.com>
Message-ID: <UJednejlFvr9RRzanZ2dnUVZ_gydnZ2d@comcast.com>
Source record: 133501

Last week I returned for a couple of nights at Grayland Beach State Park (Washington) for DXing. This was my first DXpedition trip with the new Perseus receiver, and it was a blast to use for active DXing as well as recording of 400 kHz portions of the band. It was also my first time staying in the new(er) yurts at the campground; that was a *great* choice for comfort, particularly in mid-winter at the coast in Washington!

Loggings are below, but also see the full report on my blog for more details with photos, Wellbrook Phased Array comparison audio recordings, etc.: www.perseus-sdr.blogspot.com.

73, Guy

---

594 JAPAN JOAK Tokyo, Jan 3 1230 - Fair to good with talk by male in Japanese, but much better signal the next evening. (Atkins-WA)

693 JAPAN JOAB Tokyo, Jan 3 1230 - Male announcer in Japanese, with mentions of Tokyo. Fair to good level. (Atkins-WA)

747 JAPAN JOIB Sapporo, Jan 3 1345 - Strong signal in Japanese; possible radio drama with sound effects and music. Parallel 774 JOUB, also very strong. (Atkins-WA)

774 JAPAN JOUB Akita, Jan 3 1205 - Male announcer with talk in Japanese. Fair, but brief peaks to good. (Atkins-WA)

828 JAPAN JOBB Osaka, Jan 3 1355 - Strong signal of radio drama with female actress or announcer. Parallel to 774 and 747. (Atkins-WA)

873 JAPAN JOGB Kumamoto, Jan 3 1402 - Fair signal of male announcer in Japanese, with humorous English lessons parallel 747, 774, and 828. (Atkins-WA)

909 JAPAN JOVX Abashiri (STV), Jan 4 1054 - Japanese talk by man and woman; parallel to 1440 JOWF Sapporo. Time pip at 1100 and possible tones or signature musical notes, but too weak to tell for sure. Mostly fair to good when not in a fade. (Atkins-WA)

918 CHINA CNR2, Jan 3 1228 - Presumed. Very echoey Chinese talk by male and female; signal obviously coming from multiple transmitters. Poor to fair level. (Atkins-WA)

936 JAPAN Unid., Jan 4 1330 - Faint audio in Japanese; JOTR Akita and JONF Miyazaki at 5 kW are the two most likely candidates on the frequency. (Atkins-WA)

963 CHINA CRI, Jan 3 1255 - Russian talk by male, followed by orchestral music and then signature tune and ID in Russian. Nice signal from this regular occupant of 963 kHz! Another ID noted at 1336 while tuning across frequency again; excellent signal. (Atkins-WA)

981 CHINA CNR1, Jan 4 0924 - Presumed; man and woman in Chinese with possible news items. I heard a mention of 'Harbin' at 0930. Fair to good, but frequent fades. (Atkins-WA)

1017 JAPAN JOLB Fukuoka, Jan 3 1336 - Fair to good signal of two female announcers in Japanese; possible unid. Philipino in Tagalog on the frequency during a brief peak. Very good level at 1328 on 1/4. (Atkins-WA)

1026 JAPAN Unid., Jan 3 1322 - Unknown Japanese station, in briefly with male announcer in Japanese. Numerous low power NHK1 synchros on this frequency listed in PAL. (Atkins-WA)

1053 JAPAN JOAR Nagoya, Jan 3 1305 - Male and female announcers in Japanese with lively talk and laughter. Good to very good on peaks; jammer signal in background. (Atkins-WA)

1062 MALAYSIA RTM Sibu, Jan 4 1225 - Presumed; good signal of Bahasa Malaysia talk by male announcer, slowly replaced by one of the low power Japanese stations on the frequency. Back up somewhat at 1231. I heard a number of mentions of Malaysia, beginning at 1225. Between 1240 and 1245, I heard snippets of audio that was possibly DEZC Manila, with a female announcer in poss. Tagalog at the same level as Sibu, then fading down. (Atkins-WA)

1098 MARSHALL ISLANDS V7AB Majuro, Jan 3 1315 - Distinctive island music, and talk by woman and man in presumed Marshallese. Fair. (Atkins-WA)

1188 JAPAN JOKP Kitami, Jan 4 0933 - Brief music interludes and talk by female in Japanese. Fair level, and parallel 594. (Atkins-WA)

1242 JAPAN JOLF Tokyo, Jan 4 0959 - Lively talk with male and female Japanese announcers. Many mentions of Tokyo. Very good signal. (Atkins-WA)

1269 JAPAN JOHW Obihiro, Jan 4 1005 - Presumed this stronger (5 kw) station of the two HBC outlets here. Female Japanese announcer heard, with soft JJ pop music at 1008. Good level before fading, and parallel to 1287 JOHR. (Atkins-WA)

1278 JAPAN JOFR Fukuoka, Jan 4 1011 - Man and woman announcers in Japanese, parallel to 1197. Fair to good, but frequent fading. (Atkins-WA)

1287 JAPAN JOHR Sapporo HBC, Jan 3 1720 - The last TP signal on the band, about 1-1/2 hours past local SR. Japanese announcers, noted with mention Hokkaido, and possibly Sapporo. Poor to fair signal. (Atkins-WA)

1287 JAPAN JOHR Sapporo, Jan 4 1009 - Soft Japanese pop music; parallel to 1267. Fair to good. (Atkins-WA)

1305 SOUTH KOREA HLSV Uljin KBS1, Jan 4 1016 - Talk by man and woman in Korean; orchestra and choir music 1020; seemed parallel to 1035 HLCP. Fair.

(Atkins-WA)

1314 JAPAN JOUF Osaka, Jan 4 1122 - Man and woman announcers in Japanese. Weak signal at first, then slowly building in strength. (Atkins-WA)

1323 CHINA CRI, Jan 4 1128 - Male and female announcers in Russian; tough copy in splash of 1320. Poor to fair. Presumed. (Atkins-WA)

1332 JAPAN JOSF Nagoya, Jan 4 1025 - Japanese announcers; brief advertisements with children's voices and animal sound effects. Good, steady signal but none of the parallels audible. (Atkins-WA)

1377 RUSSIA R. Yunost, Tavrichanka, Jan 4 1035 - Lively Russian talk with man and woman announcers, and short pop music tunes in Russian. Good on peaks. Location presumed, based on previous Grayland logs. (Atkins-WA)

1386 JAPAN Unid., Jan 4 1045 - Unknown NHK2 station in Japanese; multiple 10 kw outlets listed here. (Atkins-WA)

1422 JAPAN JORF Yokohama, Jan 4 1133 - Lively talk by man and woman in Japanese. Good level. (Atkins-WA)

1440 JAPAN JOWF Sapporo, Jan 4 1049 - Strong signal dominating the frequency. Woman announcer in Japanese, and parallel to 909 JOVX Abashiri. (Atkins-WA)

1475 MALAYSIA RTM Kota Kinabalu, Jan 4 1140 - Nice Malay pop music at tune-in; male announcer in Tagalog with mentions of Malaysia 1145. Fair. (Atkins-WA)

1512 PHILIPPINES DYAB Cebu City, Jan 4 1520 - Deep voiced Tagalog announcer reading news items from around the world. Mentions of Iraq, Russia, South Africa, US presidential candidates, Washington DC, etc. Frequent trumpet and orchestral fanfare made the broadcast sound very 'official'. I was hoping for an ID at 1530, but it coincided with a deep fade. Fair level. (Atkins-WA)

1557 UNIDENTIFIED Unid., Jan 4 1147 - SE Asian language noted briefly, before disappearing into the muck. Who?. (Atkins-WA)

1566 SOUTH KOREA HLAZ Cheju, Jan 3 1621 - Interview or debate program between two women in Chinese. Good to very good signal; unid. music station faintly in background. (Atkins-WA)

1566 SOUTH KOREA HLAZ, Jan 4 1152 - Very strong signal of call-in show with obviously distraught female caller in Chinese, and woman announcer or DJ providing the counseling. Very dramatic dialog, with sobs of 'Ma, Ma, Ma!..' between sniffles and snorts. Mellow singing and flute music at 1159; male announcer giving postal and e-mail addresses. Fanfare at 1200 with announcements. HLAZ listed in CC until 1230 UTC. (Atkins-WA)

1575 THAILAND VOA Ayutthaya, Jan 3 1615 - Presumed, with announcers in unid. SE Asian language (Bangla listed in PAL). Fair. Also heard 1/4 with strong signal at 1115 with SE Asian pop music. (Atkins-WA)

1593 CHINA CNR1 Heilongjiang, Jan 3 1608 - Male and female announcers in Chinese, parallel to 5030. Fair to good on peaks. (Atkins-WA)

1593 JAPAN JOTB Matsue, Jan 4 1106 - Japanese talk; possible weather report with city names 1617 as noted on previous DXpeditions; 'JOTB Matsue' ID at 1118. Fair level. (Atkins-WA)

It asked for a login. I'm not a member.
Maybe I'll join UDXF later
but I've got other projects going on now. (And the user
interface for those yahoo groups is not as friendly
as my usenet reader.)
There are some interesting utility signals. FSK, VFT,
MIL-STD-188-110B.

Interesting. He is a hell of a talented guy.
Besides being half of the characters on The Simpsons
he was also in The Right Stuff and he was the bass
player for Spinal Tap.
I didn't know he was into shortwave. Cool.

436. Sangean ATS-808A problems

Newsgroup: rec.radio.shortwave
Date: 2008-01-07 10:42:10 UTC
From: eyrewaves <eyrewaves@hotmail.com>

Source record: 133504

Hi,

I have been given a Sangean ATS-808A that has a few problems and would
like your help please.

No Audio from speaker or headphone jack.
All wires appear to be connected correctly.
Speaker is ok. Volume control is ok.

No manual tuning when turning rotary tuning knob.
Direct entry and up/down funtion ok.

Signal strength shows full scale indication on all or any frequency.

Should I bother trying to fix these problems or are they beyond help?

Thanks,
Mark.

Cable is horrible about this. Most of the commercials come in over processed...that is, with average level driven closer to the peak, for greater loudness.

Also, there's a good deal of spectral manipulation so the bulk of the audio falls into the spectra where the ear is most sensitive.

It's a phenomenon that's been applied to commercial audio since the early days.

This differs from most program audio which has higher dynamic range, and often, but not always, less spectral manipulation, so the ear doesn't fatigue through the program. So, there's a difference in perceived level between commercial and program matter.

Also at issue, is that local commercials come in produced by smaller houses, or in-house, with less attention to the audio. Levels can be low. Production values different. And the entry level operators taking in these local spots, or even locally produced access programs, don't pay attention to the incoming audio, and take corrective measures to see to it that levels are matched source-to-source.

And since cable doesn't, as a rule, process the audio for each channel at the head end for level/loudness/spectral distribution, the levels can vary not only source to source, but channel to channel, as well.

You'll notice similar issues with your DTV channels over the air from your local stations.

CBS network feeds tend to be pre processsed to remove a lot of the level variations at the network. As does CBS and ABC. Locally, though, this can vary.

You can take some steps to correct this, yourself, though. If you have a newer TV, in the Setup Menu, the audio portion has an audio level

control setting specifically designed to deal with these loudness variations. Toshiba calls it StableSound. Others have similar names. These can be effective, but a bit heavy handed.

Now, if you're using outboard audio for a home theatre setup, you can install a compressor, or limiter yourself. FMR audio makes a product called a Really Nice Compressor, with a street price of about $229. This particular device has what FMR calls "Super Nice" mode: Gain control without audible artifacts. Setting attack at a medium fast rate, release medium slow and compression ratio at about 3:1 or less, and using no more than 5db of gain control, in SuperNice mode, you can pull up the lower audio without the huge pump up of noise you hear in most installations, control the huge variations between program level audio and commercial audio, still appreciate the more natural sound of the less processed program audio, AND hear some of the very low portions that otherwise would be nearly inaudible.

In the case of gain control devices, like equalizers, less is more, so use it lightly for maximum benefits. If you can hear it working, you're using too much.

I didn't know he was the Bass Player in Spinal Tap !

(If you haven't see it, check it out the DVD)

Cool radio, BTW . . .

I have the Timewave unit and like it very much. I use it with a Wellbrook ALA-330S, using an active whip as the 'sense antenna'. It's made a big difference for me and I've never regretted buying it.

I've never used the MFJ unit so I can't comment on its effectiveness.

It's not at all clear to me what being a "maintainer" amounts to here.
Doesn't sound at all like a "moderator".

Look for a reset button...I'm sure there is one somewhere.
Alternatively remove all batteries from the radio and let it sit for a
day.

Thx for the links.

PDF specification file mentions a 12K AM output socket. Do you think
like me that it is to plug into the sound card of a computer to
demodulate radio transmitted in digital mode (ex : DRM) ? If so, this
gives the interest to this receiver !

Dear Mark,

I too had a Sangean ATS-808AP. It lasted about three years.
Unfortunately, this model seems to have somewhat variable quality
control and longevity. I know a person who has owned one since 1998
and it still functions perfectly, but, when they do "go," unless you
yourself can fix the problem(s) inexpensively, it is probably best to
relegate the radio to the trash. You can easily buy a new, far better
performing, radio for less than $80.00. I think a repair, if it is
possible at all, will cost as much or even more than that.

Best,

Joe

Yes, but this doesn't imply that those with brokerage accounts
necessarily tell the truth 100% of the time. Even if you're only
trying to throw up a smoke screen here, you'll have to be more subtle
than this.

"HD Radio & Apple -- What Would Jesus Do?"

By Jerry Del Colliano

I always get a kick out of it when someone asks "what would Jesus do". We're hearing it a lot these days. Who knows? How could you ever be sure.

But when it comes to HD Radio and Apple together -- I think even Jesus would pray. Pray a lot.

The radio industry is setting itself -- and its advertisers -- up for yet another in a long sustained series of disappointments by speculating that Apple's rumored decision to inject its cool into a very uncool device will jump start HD Radio. If Jobs, at the MacWorld Convention in a few weeks, unveils HD on-board boom boxes with iPod docking stations, it will wind up meaning nothing to the radio industry.

These docks would allow iTunes tagging so the next time a listener takes his or her iPod and connects to the iTunes store, they can buy the songs that were tagged.

Wait one minute.

What are these consumers going to tag? There's little HD programming which is why HD also stands for High Disappointment radio. The stations won't program it. The listeners won't buy HD capable radios. Advertisers have better things to do.

One of my readers sent me a jab the other day asking for my take of HD radio since I like Steve Jobs so much. Jobs is supposedly going to send the radio industry into a full and sustained orgasm.

My answer?

What would Jesus do?

Jesus would probably spring for satellite radio while he waits for the Internet royalty issues to be worked out. But the next generation -- maybe because they're a long way from the pearly gates -- thinks Internet radio is heaven on earth.

No kidding, the radio industry sets itself up for a black eye every time -- embarrassing itself. Let's count some of the many ways:

Less is More -- oops, nothing more than telegraphing to radio advertisers and agencies everywhere that there is a problem with radio

and their commercials will get lost in all the clutter.

Looking to Google's AdNonsense to sell commercials without human relationships -- putting radio on the same level with Internet advertisers -- that's radio, like in archaic and Internet like in interactive.

Attacking Arbitron's People meter -- smart, really smart. Might as well shout to your advertisers -- the ones who are spending increasingly more online -- that your industry rating service is not reliable.

Now this -- desperate radio types trying to be hip -- I mean cool -- by invoking the name of their lord and savior -- Steve Jobs.

Is there any sane person who actually believes a boom box is cool? An iPod is cool.

Does anyone in their heart of hearts really believe that tagging music on a boom box for purchase on iTunes at a later date is the same as connecting online or on a mobile device and downloading music immediately?

Does anyone think these misers running consolidated radio groups right now with their penny stocks are going to invest in even the most elementary HD broadcast if they do anything at all?

So let's not run from reality.

Radio companies have failed as consolidated operators not to mention public companies -- check their stock prices. They're heading for the exit as soon as they can get there. Their shareholders are stampeding ahead of them.

HD radio is a farce. It isn't high definition. It's an excuse to add inferior sub-channels that arguably interfere with some stations on the AM band. The last thing the industry needs is more channels.

Broadcasters support the HD radio initiative because -- sit down, please, so you don't hurt yourself -- the HD radio initiative is the number one advertiser on terrestrial radio. Not Mc Donalds. Not Geico. Not P&G. Maybe that explains one reason why radio companies give lip service to HD while doing nothing to offer appealing HD programming.

H frickin' D Radio -- a technology whose time will never come.

Listeners have proven they don't want it. Radio companies have proven for many years they won't invest in it and yet the radio industry props up this embarrassment in every meaningless way it can -- even tying its future to the apron strings of their nemesis Steve Jobs. Oh, I get it -- they're protecting their HD buys.

I'm sorry. I really am. This industry we love has to move on from these self-imposed embarrassments. There's lots of work to be done.

The main job is to re-purpose our talent and start broadcasting where the next generation actually lives.

Since 1996 I have been complaining rather loudly that our industry was in deep trouble. I took a costly lawsuit from a big consolidator for airing these views when consolidators were beginning to have their way with our industry. Ten years later my concerns are turning out to be right on the money.

Radio has nothing left to sell.

Nothing left to promise Wall Street.

Any business that is firing instead of hiring is headed for the junk heap.

So, back to the latest fantasy that Steve Jobs is going to save HD radio.

Jobs is not that dumb. Tagging or not, why do you think there is no radio band on your iPod or iPhone? Those who buy Apple iPods and iPhones don't want it. And if for one moment Jobs actually thought he was God and felt that he could lay his hands on the radio industry and save it, even he (small "h") would fail.

Why?

Because in the media entertainment business, we all have to answer to a higher power.

The listener.

Shall we pray?

<snip>

Yes and yes; the center freq (accurate to 1 Hz) that I gave put the space freq. at 1500 Hz (as a convenient reference) and the shift that I reported was from a waterfall display. The S/N wasn't too good that day and my eyeball averaging could have been off some, or the signal could have been at 100 baud/850 FSK as some logs on UDFX suggest that it is on occasion.

Regards,

Michael

<Yes, but this doesn't imply that those with brokerage accounts
<necessarily tell the truth 100% of the time. Even if you're only
<trying to throw up a smoke screen here, you'll have to be more subtle
<than this.

Investment accounts are subject to 1099 reporting. Any brokerage account 1099 will show distribution of dividends, long and short term capital gains and any other taxable transaction, with the data being transmitted to the IRS electronically. I even have an account that I closed but which ended up with about $30 left sine some kind of dividend was in processing when I closed the account and I get an annual 1099 for a couple of cents of dividends and occasional capital gains of a dollar or two. I have to put that on my tax return, too.

I can't see how anyone could hide income or capital gains from a brokerage account since the IRS gets all the data automatically on every such account. The IRS computers can instantly note a mis-match of income reported at the source and income declared on a return. Heck, even the interest on checking and savings accounts gets reported to the IRS.

There is an ongoing thread on this topic in sci.electronics.repair (and perhaps crossposted groups); missing from much of the discussion is the use of vertical interval clues to mute or attenuate audio during source changes (commercials). Thoughts?

I don't see how your remarks above are relevant. You aren't trying to
hide anything from the IRS, so far as I know. You're simply lying to
the readers of this group about how much money you have.

Have you ever thought about taking up a hobby, like stamp collecting?

There have been attempts for years to achieve this. Trouble is, that any technical solutions had to be implemented within products for which such solutions would be contrary to purpose. So, there were compromises which favored the manufacturer, and its commercial partners.

In each case, where there has been an attempt made, and successful or practical design implemented, it's been defeated by other interests. An extreme example being included in TiVo and TiVo-like DVR services, where an attempt to bypass commercials are met with popups. Or in the case of one DVR device, the Fast Forward is defeated during commercial messages. Hacking the hardware has been roadblocked by grinding off the identification numbers and manufacturers marks of chips on the board. Hacking the streams for outboard implementation has been met with inverted or modified video encoding, in some cases, encryption. Manufacturers are keenly aware that consumers which to have this

ability, but they realize they have a conflicting dog in the hunt, and commercial interests win out. With technical solutions to prevent the ultimate intent of the consumer.

And there are a spate of new laws that prohibit modifying the hardware, the stream, or the output of a commercially provided device to modify content.

The intent is that we should HAVE to sit through commercials as an entry fee into enjoying content of our choosing. Like current DVD's, encoded so one cannot blast past the 15 minutes of commercials and trailers at the beginning of DVDs on some current DVD players, this attempt at defeat of intent is being met with greater technological determination by commercial entities which live and die by advertising.

More importantly, there has been an attempt for some time, now, to actually define skipping commercials as 'theft of service,' and make it illegal. This issue was given voice by Ted Turner 10 years ago at a conference, in which he openly stated that people who skip through, edit out, mute or otherwise remove commercials from media are guilty of theft and ought to be prosecuted for their crimes.

Two bills made it to the Senate floor to bring this idea to fruition.

So, while as in warfare, where technical advantages are shortlived and bested by other technical solutions rather quickly, any attempts through technology to defeat the intrusion of commercial advertising, aurally, visually, or otherwise, is going to be transitory at best. And at worst, will lead to other technical solutions that are far more oppressive and intrusive than the commercials themselves.

Even now, it's nearly impossible to do it manually.

One TV demonstrated by Sony before advertisers in the mid 90's, defeated the Mute function during commercials. That's not in production. Yet. But more sets are now limiting the effectiveness of the 'mute' to prevent silencing entirely. Precisely for this reason.

So, if loudness of commercials is annoying, the most practical solution is to raise the levels of surrounding audio through outboard devices.

Or build your own players and cable interfaces. Because what's commercially available is simply not going to accomodate what we want, here.

For awhile in the late '70s and early '80s in some U.S. cities a homeowner could be subject to an intrusive search of premises if a certain size Yagi antenna pointed in certain directions was observed on his property; the intent was to prosecute 'theft of service' of directed pay TV services.

Erosion of freedom of information is one of the most disheartening aspects of living in this era; the music industries draconian prosecution of suspected illegal Internet downloading is just the most visible consequence. The absence of universally accessible library content as popularized by Al Gore's once proposed "information superhighway" never happened due to IP restrictions among other limitations (efforts like Wikipedia are not really serious substitutes IMHO). Too bad Mr. Gore abandoned this cause for another one more politically popular.

When will people realize that freedom of access to and unfettered rights to use information is as important to quality of life and advancement of civilization as the securing of physical and political freedom, and as worthy of sacrifice to establish and secure?

Commercials on over the air tv and cable tv and satellite tv providers (I subscribe to DirecTV) are almost always too loud, some of them are Very Loud.Somebody should invent a MUTE gadget, something that can be worn on a wrist or around the neck or lay it on the couch armrest.The MUTE gadget should have nothing more than a Big MUTE button on it and it would do nothing but MUTE the sound and turn the sound back on when the MUTE button is slapped again.Invent something like that and you can make a billion dollars.I have been thinking about removing all of the buttons except the MUTE button on one of my spare DirecTV tv remotes so I won't have to waste one or two seconds looking for the MUTE button.I love the MUTE button on my tv remote.

KEY POINT - Burying the Coax Cable is simply one of the many
Synergistic Elements that goes into making a Low Noise
Shortwave Radio Listening (SWL) Antenna -a-la- John Doty

1 - At the Antenna using a Matching Transformer between the
Antenna Element and the Coax Cable feed-in-line. {The Far-End}

2 - Plus a Ground Rod at this Matching Transformer.

3 - Near the entry to the House using an Isolation Transformer
between the Coax Cable feed-in-line and Coax Cable going
into the House to the RadioShack. {The Near-End}

4 - Plus a Ground Rod at the Isolation Transformer.

5 - Bury the Coax Cable feed-in-line between the Two Ground
Rods and Transformers.

Number "5" is realy only important when you have first
accomplished Numbers 1~4.

Effectively the Buried Outer-Shield of the Coax Cable is/does :

1 - Connects both the Antenna Ground and the House's
Feed-in-Line Entry Ground {RadioShack Grounding Point} :
-Thus- "Bonding" these two Grounds.
http://www.hamuniverse.com/grounding.html
http://www.mikeholt.com/newsletters.php?action=display&letterID=134
http://mikeholt.com/mojonewsarchive/GB-HTML/HTML/Grounding-Part-1-of-12~20041005.php

2 - Functions as a Ground Radial for the Wire Antenna
Element to 'unify' the "Ground Effect" {Ground Conductivity
Efficiency} between the two Ground Rods.
http://www.sgcworld.com/radialstechnote.html

3 -IF- The Wire Antenna Element is hung in the Air 'over'
this Buried Coax Cable it is in-effect a Counterpoise to the
Wire Antenna Element.
http://www.cebik.com/gp/cps.html

A trust or a corporation do not constitute having something in "someone else's name."

A living trust simply presestablishes the future ownership of one's assets upon death, with the objective being the avoidance of probate and the resultant delays and costs.

A corporation is not a person. It is a legal entity for an enterprise that shields the owners or shareholders from personal liability. There are corporations that are 100% owned by one individual, where all shares are in one name... and the shares are nominative.

In other words, you disagree with the need for living trusts and shielding
personal assets through incorporation?

On a semi-related note...

Sony/BMG are trying to redefine "illegal" regarding fair use of music. I
just read an article saying that they're pushing to make it illegal for you
to rip your own, bought and paid for, CD's to your computer or mp3 player,
regardless of whether you are sharing them or not. Their logic: ripping a CD
to your computer or mp3 player, even after purchasing the CD, is like
"stealing only one copy".

Do you have a site that anyone was actually busted, much less
convicted?
Here in central KY the cable company and I got into a pissing contest
and
when they leaned on me for my oversize Log Periodic Dipole, I pointed
out
that per FCC rules they shouldn't have any detectable leakage. When
they

sent nastygrams, I responded with a impromptu net on the 6M frequency
they used as the low band AGC control reference.

They called me and begged me to call it off and even offered free
cable
and I told them pound sand and complained to the FCC. They got cited
and had to clean up their leakage. No "if ands or but". Clean it up of
shut
it down.

I can still detect and if I cared pull in enough signal to watch any
unscrambled
signal, but since I don't and didn't watch TV, I used the LPD for VHF
and UHF
scanning. The fact my antenna was mounted in the vertical axis instead
of
the normal horizontal axis.

Of the many things I worry about in life, being nailed for picking up
illegal CATV
from leakage is way down on my list.

Terry

One would need to inspect the police blotter from legal newspapers in the
Twin Cities seven county metro area in that time frame; the issue was a
hot topic of the time; archives of the Mpls. Star-Tribune would have
articles. But yes, there were prosecutions and convictions and challenges
to the law which IIRC eventually succeeded, and IIRC involved hams
who were subjected to arrest and prosecution. Rather than cable leakage,
the service was a directed broadcast of pay TV (HBO at the time) from the
tallest building in downtown Mpls.

MARK - Don't waste the Money on repairing the Sangean ATS-808A Radio.

The Sangean PT-80 ProTravel Radio is the same size as the
Sangean ATS-808A Radio.
http://www.universal-radio.com/catalog/portable/1080.html
http://www.universal-radio.com/catalog/portable/1080spec.html

Etón E10 Radio is also about that size.
http://www.universal-radio.com/catalog/portable/0110.html

Grundig G4000A is too.
http://www.universal-radio.com/catalog/portable/4000.html

Kaito KA1107 Radio
http://www.universal-radio.com/catalog/portable/1107.html

IMHO "The Best Buy" - I would recommend the
Sony ICF-SW7600GR Radio which has the
AM-SYNC feature and is a very good Radio
in that size range.

Radio, except for government run facilities, is a business. Even private sector non-commercial stations, like HCJB, are businesses with budgets and systems intended to make them run efficiently.

Most broadcasters know that they can not have a successful business without listeners. So I have considerable respect for the listener and spend most of my time finding out at the street level what they want from radio stations in their market. MW and FM stations' markets are, today, the metropolitan area where they operate, not someplace far away... so for such cases, "listener" is synonymous with "local listener."

Having lived and worked many decades ago in a nation where, at one time, domestic SW was the only "local" radio for a significant part of the population, I can still remember when SW might have fit a commercial station's business model. Today, in most places, it does not. Any disdain I feel is for those who think that yesterday's radio is relevant today.

Again you are incorrect. Radio can be a business, but it need not be
so. There is a transceiver sitting on my desk. I have never attempted
to earn money with it.

>Even private
> sector non-commercial stations, like HCJB, are businesses with budgets and
> systems intended to make them run efficiently.

Most people who read this group are probably already aware that non-
commercial stations exist and have budgets.

>
> Most broadcasters know that they can not have a successful business without
> listeners.

And most of them know that they can't have listeners without
interesting programming. And most of them know that they can't
broadcast interesting programs when they're drowing in interference
from the station down the road.

So I have considerable respect for the listener and spend most of
> my time finding out at the street level what they want from radio stations
> in their market.

Interesting ellipsis. What you meant to say was "I have considerable
respect for the listener (who happens to share my misconceptions and
biases)..."

MW and FM stations' markets are, today, the metropolitan
> area where they operate, not someplace far away... so for such cases,
> "listener" is synonymous with "local listener."

This is a nice statement of the problem. Here's hoping we find a
workable solution.

Except of course for your disdain for those who aim to make radio
better, more relevant and better able to meet the needs of listeners.

You are being obtuse. We are talking about MW and FM broadcast stations and
such, not point to point communications devices.

Specifically, stations between 530 AM and 1700 AM and 88 and 108 MHZ in this
Hemisphere, not CB transcievers.

>Even private
> sector non-commercial stations, like HCJB, are businesses with budgets and

When you have talked with about 10,000 listeners a year, get back to me on
this. Most people who claim to be making radio "better" really want to make
radio better for their individual tastes or opinions. The rest of us who
work with real and successful radio stations don't look at "better" and
"worse" but at what the listener wants today.

I'll get back to you when I see some evidence of your actually having
listened to the radio once or twice.

Most people who claim to be making radio "better" really want to make
> radio better for their individual tastes or opinions. The rest of us who
> work with real and successful radio stations don't look at "better" and
> "worse" but at what the listener wants today.

People like you don't, and perhaps can't, look beyond the blinders you
wear. Five years from now you'll probably still be a luddite, but
others will read your posts and feel embarrassed for you.

Yeah, even I want to hear about how you defend democracy by leaving
the conflict.
```

The heroes I know, who risked life and property to defend democracy
took up arms and brought the fight to those who would challenge democracy.

There is no risk in leaving the fight behind.

And as I said some time ago, the only thing I've ever heard you
renounce is your citizenship.

It must be fun to rely on the guidance they provide in response to the
questions you selectively spoonfeed them.

Talking to listeners is hardly embarrassing; talking as if you
> knew what you were saying when you don't is.

Then why do you insist upon doing it?

For more than half a year, my colleague at Diario El Tiempo and I voiced opposition to the military junta in Ecuador by talking and writing about the promised return to democracy. He disappeared (or was disappeared) and I was given 24 hours to leave... the fellows in uniforms had rifles, so there was not a "road to appeal" available.

And what's wrong with buying 10,000 rounds of Russian ammo?

I often shot Russian ammo at the range when I was practicing. It's
dirt cheap, and plentiful. Corrosive. But that's just a matter of a
little extra maintenance for the weapon. Especially if I was shooting an
alloy frame.

And 10,000 rounds isn't a lot. 200 boxes. I used to go through that
in a three months.

As usual, you're trying to evoke a picture with an emotionally
charged accusation, rather than fact and reality.

As Telamon said more than once, a truthful position doesn't require
debate tactics.

You reveal yourself by your strategies.

511. Spanish numberstation last night

Newsgroup: rec.radio.shortwave
Date: 2008-01-07 23:19:10 UTC
From: Michael <md1966@optonline.net>
Message-ID: <4782b34f$0$13840$607ed4bc@cv.net>
Source record: 133379

Did anybody else hear the Spanish numbers station last night at 6:00 UTC that was coming in under Pastor Peters on WWCR 5890 ??? The numbers station had a zero beat on 5887, but in AM it was clearly audible under 5890. The signal strength of this signal was actually startling. Here in North NJ, I was receiving it as a 20+ on the R75 and randomwire. Not even the Sackville relays come in here that strong. It was killing Peters on WWCR #4, although that was a good strong signal also. I've heard dozens of number stations, but never one that sounded like a local MW station.

WOW !

Michael

My Promise For 2008
A Message From Radio Ink Publisher Eric Rhoads Regarding Radio in 2008

I'm trying hard not to be one of those old salts who is living in the past, wishing the "good old days of radio" would return. Yes, there are elements of the past that radio can learn from, but if radio returned to the old ways of doing business, we could not succeed in this fast-paced world of digital media. The keys to our success will be reinvention and reinvigoration, which are relevant to today's society and to advertisers. Radio remains strong in many ways, but seven years of negative growth on Wall Street have not helped, nor has the recent news of the 6 percent drop in radio advertising in November. Of course, not all radio is about Wall Street and what one reader of ours calls "the radio elite."

In this industry that I love passionately, I am seeing trends that I do not like: Some of radio's best managers and sales managers are resigning over proposed 2008 budgets that cut down to the bone and that they simply want no part of, and some of radio's best are being pushed out by executives who think non-radio people can do better. These group executives are not bad people; they are simply under enormous pressure from investors to solve their problems.

Who Broke A Mirror?
Radio's seven years of bad luck seem to be continuing. We should be investing in our product, yet it's the worst possible time to do so. With economic indicators signaling bigger problems, advertising -- at the end of the food chain -- is usually the first cut made. Although radio sometimes benefits in a recession from advertisers that cannot afford television and move their budgets to lower-cost radio, sadly, many of those advertisers have been seduced by new media and are moving away from traditional media altogether.

I Refuse To Accept Failure
What about you? During the last major economic downturn, Mel Karmazin told his staff at CBS that "recession is not an option" and continued to lead his company with the mindset that failure was unacceptable. It worked -- and while others stumbled, CBS held its own. I believe that each of us must make a personal commitment that, no matter what it takes, we will not allow our medium to decline. We will work harder, smarter, and more passionately than ever.

Human Decency
A decent human being would not abandon a spouse if he or she contracted cancer. Just as your care and attention are needed for a sick family member during a challenging time, your devotion to radio

is needed now -- no matter how great your frustration level with your employer. You are not alone. If you got into radio because you love it, find the devotion to fix it. Mounting pressure has detracted from radio's fun atmosphere, but solving our industrywide sales problem will relieve that pressure. You are valuable and you are needed now.

The Power Of One
Change always starts with one person who is bold enough to try one idea. Your one idea may be the catalyst that will change the radio industry. Ed McLaughlin's vision for Rush Limbaugh was that one idea that saved the dying AM radio band. One idea. Commit to trying new initiatives, even in the face of bold disagreement. Radio needs your innovation now.

Eight Promises To Radio
Don't assume that you cannot change the industry. Each of us can make a huge difference, including you. We each need to own the problem, to take on the problem at our personal level, and to experiment boldly. Here is what I am doing personally:

1. I have directed my editorial staff to publish your bold ideas in Radio Ink. I encourage any industry professional, in any size market, to share your vision with the entire industry in hopes that they, too, will try your initiatives. Submit your ideas to Editor-in-Chief Joe Howard (joe@radioink.com) or to me (eric@radioink.com). We want to follow your progress as well, so please keep us posted as ideas develop.

2. I've asked our editors to gather station success stories in all areas -- sales, promotions, marketing, etc. -- to disseminate practical and profitable ideas from around the country (and the world). This industry has a bad habit of not sharing successful ideas. This must change. We're all in this boat, and this is not a time to be focused on self. We will publish these success stories as you share them.

3. I'm sick and tired of radio stations selling against one another. It's one thing to compete; it's another to try to destroy the reputations of others. If it is happening in your market, I want you to phone me and give me specifics. I will personally call the individuals conducting themselves this way to tell them why they are hurting themselves and radio. Furthermore, I will phone their boss, their regional manager, and their group head. This must stop. And, if my lawyers tell me I can do it without litigation, I will publicly embarrass those who commit this cardinal sin. I need your commitment that 2008 is the year where we will build radio together as an industry and not tear one another down.

4. I will personally offer my time to assist any company that feels it is at a loss over what to do. I will take a proactive approach to meet with the heads of radio companies to offer a fresh perspective on their businesses. Frankly, these people are eminently more qualified

than I am when it comes to running radio companies, but a fresh perspective might prompt an idea or two.

5. I will be your messenger. If you feel your company is conducting itself badly, if you see clear mistakes being made, if you have a better way that you are convinced will help your company or your stations, if you are not being heard or fear that you might lose your job for offering suggestions, I will send the message on your behalf. You can e-mail me anonymously and tell me to whom you want your message directed, or you can e-mail me with your name, which I will keep confidential if you ask me to. I will make sure the group heads see your responsible suggestions.

6. The GM of our conference division has been instructed to pack the content of our conferences with even more practical, usable ideas. No fluff! I've instructed her to make sure that each speaker, moderator, and panelist is focused on solid, usable, moneymaking action items that are relevant to your needs, no matter what your market size or conditions. You'll leave with a list of action items you can implement at home the next day. Our upcoming conferences include:
March 10-11: CONVERGENCE: Radio's Digital Media Conference, San Jose
May 19-20: Radio Ink Hispanic Radio Conference, Miami
December 2: Radio Ink FORECAST, New York

7. At our Forecast Conference last month in New York, every group head emphasized the critical need for innovative ideas on how stations can make money in digital media. We've been told by countless market managers that they have been given high interactive budgets and they have no clue how they will meet them. With this specific goal in mind, I have designed our upcoming Convergence conference to do two things: 1) show you what is working and how it's being done (for example, one small-market station generates $600,000 in local interactive revenues, which exceeds its on-air billing) and 2) stretch your brain and make you uncomfortable by exposing you to things happening in Silicon Valley that you need to understand to build your station's interactive strategy to a new level. This conference is critical for managers, sales managers, and PDs -- not your interactive people. As a manager, you must not delegate this until you understand it fully. I've asked that every session have strong, income-generating action items.

8. I've asked Roy Williams to come out of hiding and conduct just one more conference for us. He has agreed to conduct a full-day, invitation-only conference at his private compound in Austin. I've asked Roy to create a special emphasis on building radio in recessionary times and a radio survival strategy. This conference will focus on solving radio's problems at a local level. If you wish to be invited, let me know. I think we can only accommodate 125 or so people.

THE FIGHT OF RADIO'S LIFE
"Small plans do not inflame the hearts of men." -- Napoleon

Radio is surrounded by companies and technologies that want to steal our audiences and our advertisers. Will you let your competitors take them away, knowing they may never return? This is the fight of our lives. This is not just about a dip in business, this is about a change in society, driven by technology. It's the perfect storm, as technology meets over leveraged companies with pressure to reduce expenses while the economy is suffering.

Radio is not only a viable medium, it is critical to the people in our towns across America. Perhaps our listeners are flirting with iPhones, digital media devices, and satellite radios, but every ear will be glued to your station when disaster strikes. But we need people glued to us every day. Radio needs to be relevant to communities and individuals at every level, at every station, no matter the format. Your station needs to be compelling now, because compelling radio cannot be touched by any competition. Listeners will only leave if we drive them away by not understanding and meeting their needs. Some in our industry are meeting those needs and reaping the rewards. Others need to become relevant and compelling again.

With your bold thinking, 2008 will be the year we reclaim radio.

It's time for big ideas, bold moves, and true revolution in our industry. It's up to you, not someone else. Are you in?

Yeah, it does have a retro look. The signal strength meter and speaker grill are reminiscent of the Sony ICF-6700W/6800W. The Grundig/Eton/Tecsun folks are clearly trying to appeal to our sense of nostalgia.

Now, they just need to load the unit with vintage recordings of old Cold War-era propaganda broadcasts, ready for playback on demand...

Interestingly, Universal's profile of the product contains no reference to the "advanced DSP technology" that's mentioned on the Eton website: http://www.etoncorp.com/product_card/?p_ProductDbId=351064

I would get a good chuckle out of finding out how you think I could have
remained, given I was escorted to the airport; the intent was to silence the
radio stations by nationalization, not to silence me personally.

So, regale us yet again with your tale of selling the radio stations which were
nationalized.

I did not ever sell any station in Ecuador. The government wished to nationalize the station group. In the 24 hours I had before being put on a plane (it was the era when there were not flights every day to the US out of Quito, which was then only a daylight airport) I had my attorney (Lic. Benjam&#65533;n Cevallos assisted by Lic. Segundo Maiguashca) transfer most of the stations to an employee cooperative, headed by Ulpiano Orozco. Since the junta felt it was " a people's government" and was similar to that of Gral. Velasco in Per&#65533;, they could not take the stations away from "the workers" which was my intent... both to save their jobs and to keep the government from closing the stations. The shares of two frequencies were transferred to my daughter's name, and the whole deal made contingent on this last step, under the hope the government would leave the whole arrangement alone due to the adverse publicity messing with an employee cooperative would bring.

Since I had a VP / General Manager position in what is now the US' 13th largest market within 2 weeks of leaving, I came out both alive and employed. The experience of building a dozen stations in just a few years, learning how to sell them and manage them, was of immense value... and given the economic conditions of Ecuador today, probably as positive as the whole thing was negative.

Apparently the experience wasn't valuable enough to relieve you of the
perceived need to lie about your educational background and a dozen
other things.

SPWAN9 writes,

This picture is posted in a Chinese BBS showing the
Tecsun S2000 Shortwave Radio -aka- Grundig Satellit
750 Radio on the Production Line, it is a small size
version of the Tecsun HAM 2000 -aka- Grundig Sattellit
800.

http://www.zmdz.com/bbs/incomefiles/20077/2222243235364.JPG

This Radio is now being re-badged as the the new
Grundig Satellit 750 Radio with an MSRP of $300

- -

The Question becomes is it more than just a 'smallerized'
Copy of the Grundig Satellit 800 Millennium ?

DOES IT HAVE ALL THE FEATURES OF THE
GRUNDIG SATELLIT 800 MILLENNIUM ? ? ?

New 'smaller' Grundig Satellit 800 'like' Radio ?
http://groups.yahoo.com/group/Satellit800/message/13014

How you would have stayed is not the question. You claim to have
been a defender of democracy. The question is, as a defender, how you
would risk life and property by leaving.

Changing the subject is another charming debate tactic designed to
get you out of clarifying a statement that makes no sense.

Once again, making my point for me.

535. Scratchy RF gain knob on 535D

Newsgroup: rec.radio.shortwave
Date: 2008-01-08 02:42:42 UTC
From: CelticDude <CelticDude2006@gmail.com>
Message-ID: <477885d0-7c4f-4c5b-8f70-5b68ca5d135d@k39g2000hsf.googlegroups.com>
Source record: 133403

Hello all,

I took a break from SWL for a few months (competing obsession), and when I went to listen a couple of nights ago, I got a scratchy sound from the speaker when adjusting the RF gain knob. On stereo equipment, when that happens I pull the offending knob off, and spritz the pot with some Radio Shack Tuner Control Cleaner & Lubricant. However, I don't want to start spraying stuff into my good SW radio without finding out what the risks, if any, are.

The radio is a JRC NRD-535D, bought on EBay about a year ago. Until now it's been working pretty well. Is the spray cleaner the way to deal with this problem? Or is there a better way to deal with it? What do you all recommend?

Thanks,

DWP

Isn't this what the computer industry already had in place?? That you
can not make copies of a program - even ir you own it-and then install
it on more than one computer.?? They call it licensing or site
licenses which are out and out highway robbery?? I think someone or
something has got to stand up to whomever: congress - the FCC - about
this stuff. Media is getting way too over regulated in some ways and
way too underregulated in others.

I just read an article in the National Educator's Association's members magazine - I beleive from December, in their Consumer Q & A section. Almost a whole page devoted to TRANSITION TO DIGITAL BROADCASTING (mostly in regards to television). Most of their information looks accurate to me - though I'm not that up on digital transition yet. The article is credited to the US DEPARTMENT OF COMMERCE. So, it was probably a PSA. What I found so interesting was that one of the most powerful unions in the country chose to include digital broadcasting transition in their publication. I wondered if there isn't some hidden agenda??

Sounds like they are on to you. Maybe they will catch you this year.
People don't get audited on a regular basis for nothing. You must be
doing something to raise their suspicions. Whatever it is you had better
stop doing it.

Several audits in 43 years of filing returns is hardly a lot. Never paid a
penny in additional charges, because I pay what I owe and pay it on time.

You, on the other hand, seem to know all about frequent audits.

No telling what Ace might do when he has his guns and his booze and his
prescriptions all at hand... keep him away from the ammo.

He was actually a really decent guy. I really hurt him by not getting
that Sailplane pilot training. He designed and built his own planes and
entered quite a few Soaring competitions.

Most of the few DRM transmissions can also be heard in analog so why
would you listen to them in DRM? DRM sounds like crap.

>way too underregulated in others.

One difference is that software has always been licensed, whereas music recordings in the past have usually been sold like books, i.e., if you have it, you have more or less unlimited use of it as long as you don't give copies to other people.

Another difference is that software isn't just something you listen to or read -- it's a tool that you use for productive work. I.e., you don't get a Microsoft Word license in order to enjoy Microsoft Word; you use Microsoft Word as a tool to create other things. Of course, that isn't an ironclad argument for licensing, but it does explain why software hasn't been treated like music.

Anyhow, the digital media industry is in a dither. The public wants the equivalent of phonograph records, but the sellers want to sell the equivalent of concert tickets (a limited and temporary right to listen).

And the public will win. Remember copy-protected diskettes? What killed them was that copy protection interfered with too much use that was undeniably legitimate. Ditto for DRM. Librarians in particular are worried about DRM, because it's likely that in 100 years, some of today's music will be unplayable, even by people who have authentic equipment and software to play it, because nobody is around who can renew the license.

Vote with your pocketbook. Don't buy music with unreasonable license conditions.

Incidentally, a similar kind of thing has started happening with software. It started with Borland's "no-nonsense license agreement," which said,

basically, "copy and install this anywhere you like as long as only one copy of it is in use at a time." (They recognized that programmers often have more than one computer.) Today, many software packages explicitly permit making a copy for your laptop or home computer, for use by the same person at different times.

Ultimately we may need some laws defining fair use. There's a strong feeling among copyright experts that, basically, copyright only gets involved when *other people* receive copies of the material, not when you copy your own stuff for backup purposes or for use on different kinds of equipment.

Clothes and a check for $1,400 from Lorillard for an advertising invoice. I was given use of a WQBA hotel suite in Miami by the manager, Herb Levin, for the two weeks it took me to be hired by Mooney Broadcasting Company as manager of WUNO in San Juan, PR.

I have it on VHS. (Remember VHS?)
It's a classic.
I remember when he couldn't get
through airport security. They found a cucumber
wrapped in tin foil in his pants. LOL.

RHF gave some great links to modern yurts. The structural idea is the same as the yurts used by nomadic tribes for generations, but the materials are a mix of natural and high-tech. The yurts at the state park I DXed at came from www.rainieryurts.com, and their Web site has some great photos of these versatile structures.

At the top of the lattice work wooden frame, I spotted a 1/4" steel cable running through holes at the top of each lattice wood piece. This cable provided the tension for the ceiling spokes or beams to push against, rather like staves against the hoops of a wooden barrel.

BTW, the canvas walls of the yurt was unusual and very heavy duty. It appeared to be made of outer layers of heavy canvas, with an inner insulating layer. The total construction was 3/8" thick or so. It has good sound absorbing qualities and retained the heat from the elec. heater extremely well. The first nap I took at night, I set the thermostat at 65 degrees. When I woke up a couple hours later, I was really hot...I looked at my little thermometer I had on the table and it was showing 84 degrees actual! Outside, it was 36 degrees Fahrenheit. So, these yurts are far better for winter camping than a simple tent.

I suppose the nomads in Kazakstan and Mongolia used goat hides or similar on their yurts, which probably offered a bit of insulating effect as well.

73,

Guy

I find the audio from this radio a little harsh. I don't know how much of this is actually due to the radio itself or has something to do with the audio processing chain in the PC. Instructive in this regard is the link you provided

<http://www.tadx.mediumwaveradio.org/perseus_audio_clips.html>

scroll down a bit and you see a section "Audio checks against other receivers". I thought the Racal and the AOR7030 sounded the best. The Perseus comes in last place. I don't know about other people but I had a great deal of trouble making out some of the words in the recordings from the Perseus. There is no reason for this as my RX340 sounds just fine to me with its digital sampling, demodulation, and detection. Your recordings sound more intelligible to me from this radio than the referenced link above for whatever reason but it sounds just as harsh to me. I can't think of a more descriptive way to describe the audio quality from this radio. Harsh is the best I can do.

Regarding the coax signal to noise improvements the chokes at either end of the coax makes a great deal of sense. This is standard technique to prevent EMI/RFI on equipment cabling. Earthing the coax shield somewhere in the middle seems slightly unclear to me. I think you would be better off burying the cable in the ground most if not all the cable run. Burying the cable should be much more effective than a single point ground.

Not last night but on other recent evenings they have been 5KHz down
from 5890 and as strong as WWCR. In other words they sounded like a
local station.

How so? I've never been audited and most people only randomly get
audited once so the fact that it has happened to you a number of times
means you are raising red flags.

FWIW - A Tax Audit for a Given Year :
Leads to a Review of Prior 'associated' Tax Year(s) :
Any 'Discovery' in any of the Prior 'associated' Tax Year(s) :
Can lead to a Tax Audit of that Year(s).

Audits Begets Audits - Audits Can Take-On a Life of Their Own.

Stay Out The IRS ! ~ RHF

You need to work on your story. It keeps changing with each telling.

579. Re: WHY - Bury Your Shortwave Radio Listening (SWL) Antenna's Coax Cable Feed-in-Line ?

Newsgroup: rec.radio.shortwave
Date: 2008-01-08 10:18:47 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <d2c1de82-d85f-4c7e-9079-848f06780c45@l32g2000hse.googlegroups.com>
Source record: 133447

KEY POINT - Burying the Coax Cable is simply one of the many
Synergistic Elements that goes into making a Low Noise
Shortwave Radio Listening (SWL) Antenna -a-la- John Doty

1 - At the Antenna using a Matching Transformer between the
Antenna Element and the Coax Cable feed-in-line. {The Far-End}

2 - Plus a Ground Rod at this Matching Transformer.

3 - Near the entry to the House using an Isolation Transformer
between the Coax Cable feed-in-line and Coax Cable going
into the House to the RadioShack. {The Near-End}

4 - Plus a Ground Rod at the Isolation Transformer.

5 - Bury the Coax Cable feed-in-line between the Two Ground
Rods and Transformers.

Number "5" is realy only important when you have first
accomplished Numbers 1~4.

Effectively the Buried Outer-Shield of the Coax Cable is/does :

1 - Connects both the Antenna Ground and the House's
Feed-in-Line Entry Ground {RadioShack Grounding Point} :
-Thus- "Bonding" these two Grounds.
http://www.hamuniverse.com/grounding.html
http://www.mikeholt.com/newsletters.php?action=display&letterID=134
http://mikeholt.com/mojonewsarchive/GB-HTML/HTML/Grounding-Part-1-of-12~20041005.php

2 - Functions as a Ground Radial for the Wire Antenna
Element to 'unify' the "Ground Effect" {Ground Conductivity
Efficiency} between the two Ground Rods.
http://www.sgcworld.com/radialstechnote.html

3 -IF- The Wire Antenna Element is hung in the Air 'over'
this Buried Coax Cable it is in-effect a Counterpoise to the
Wire Antenna Element.
http://www.cebik.com/gp/cps.html

READ - WHY - The Far-End-Fed Shortwave Listener's (SWLs)
Inverted "L" Antenna
http://www.google.com/group/rec.radio.shortwave/msg/22cfc6b9cb2447c0
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/11698

4 - Digging the Trench to Bury the Coax Cable feed-in-line
Opens-Up-the-Ground ! -meaning- You now have a Trench in

the Ground to place 'things' in.
http://en.wikipedia.org/wiki/Ground_conductivity
* While the Braided Outer Shield of the Coax Cable can 'connect'
the two Ground Rods at each end of the feed-in-line : It is not a
Solid Copper Wire.
http://en.wikipedia.org/wiki/Ground_%28electricity%29
* While the Braided Outer Shield of the Coax Cable can 'be'
a Ground Radial between the two Ground Rods at each end
of the feed-in-line : It is not a Solid Copper Wire.
http://en.wikipedia.org/wiki/Radial_%28radio%29
TIP - While the Trench is Open : Place a Solid Copper Wire
in it to :
http://www.chem.hawaii.edu/uham/radials.html
* Better Connect {Bond} the two Ground Rods at each end
of the feed-in-line.
* Be a Better Ground Radial in the Ground then the Coax Cable
can be by itself.

ABOUT - Ground Radial Wire
Buried Radials: A Small Compendium -by- L. B. Cebik [W4RNL]
http://www.cebik.com/gp/gr.html
* Solid Bare Copper Wire to 'connect' along it's full lenght
with the Earthen-Soil {Ground} that it is laying in.
http://www.bencher.com/pdfs/00361ZZV.pdf
* # 16 AWG or Larger - In the trench running parallel with the
Coax Shield # 16 AWG Solid Bare Copper Wire will do OK.
http://www.radiobooks.com/products/grw1k.htm
-but-if- you happen to have a coupl of hundred feet of # 12 or #14
Insulated Solid Copper Wire laying around; and want to Strip
the Insulation off-of-it to use as for Ground Radials - Go For It !
http://www.signalengineering.com/ultimate/earth_ground.html

The Radial "Rule-of-Thumb" for Receive Only Shortwave Antennas :
The More Radials the smaller the Radial Wire that can be use;
with # 16 AWG being about the smallest.
http://www.davisrf.com/ham1/grndwire.htm
16~18 or more Radials : # 16 AWG Solid Bare Copper Wire
8~9 Radials : # 14 AWG Solid Bare Copper Wire
3~4 Radials : # 12 AWG Solid Bare Copper Wire
Single Wire Counterpoise : # 10 AWG Solid Bare Copper Wire
http://en.wikipedia.org/wiki/American_wire_gauge

The Guiding Principle of Radials : The More Radials The Better.
http://www.ncjweb.com/k3lcmaxgainradials.pdf

Simple Antennas and Good Grounds
http://www.chem.hawaii.edu/uham/radials.html

Topics :

* Antennas That Are Only Half There
{ Are You Missing The Other Half of Your Antenna ? }

* Good Ground {Earthen Soil} is Hard to Find

* A Local Example of a Commercial Installation
-from- Dean [KH7B]

* Some Rules of Thumb for Ground Radials

* Cool Water and other Ground Friends
{What's 'Connected' To Your Fire Hydrant ?}

* Ground Leads Must be Short at Radio Frequencies (RF)

* Bad Grounds Can Lead to RF Burns ! - Doh !

* Above Ground Solutions
{When On and Under 'The Ground' Is Not Possible}

* Return to UH {University of Hawaii} Ham Club Home Page
Hawaii Ham Radio Information Pages
http://www.chem.hawaii.edu/uham/index.html
-hosted by- University of Hawaii (UH)
.

Let's get this straight, DxAce has a long history of verbal abuse and making threats on this group and you two idiots think that Mike needs the twelve step program? Unbelievable!

Roy, he is talking about, I'm OK.

Also, ass hole Hoopla, don't say nothing about my cousin or I messa with
your face. Blood runs thick around here!

Got it.

-

Hoopla,

FWIW - Most of Mike [M II] posts here have a decided
Anti-USA Slant to them; and in general He preaches
Hatred for Americans. Plus he never says anything
good or bad about his native land of Canada. Seldom
does he have any thing to say about Shortwave Radio
or AM/MW Radio. Mostly he is here to Bash Americans
and the USA. I believe Mike [M II] needs our attention.

While DX Ace does have his many faults : He also does
Contribute to the Topic of Shortwave and Post many ON
TOPIC Posts here that are Interesting and Useful for the
Readers of the Rec.Radio.Shortwave NewsGroup.

Here Are Four Recent Examples of DX Aces Good Works Here :

Latin American SW Logs Updated

Plenty of people are talking about it. Perhaps the problem is that no
one is listening.

Threats? I don't recall making any real 'threats'. What I do recall is making truthful statements about certain individuals.

Now, those individuals may indeed find the truth 'threatening', but that is a whole different issue.

dxAce
Michigan

Yes, I did make a point. Whether you left voluntarily, or you were
removed at gun point, is a semantic matter-- the point is that you did
not stay and fight. The conflict remained in your absense. You did
nothing to defend democracy, because you didn't participate in the
fight. You did not risk life and property by leaving the fight behind you.

Whether there was personal risk or loss is one thing. Whether you
risked, or lost defending democracy is something else.

Chauncey, your stories, and supporting evidence on your website,
change with the telling.

Doroteo Arï¿½mbula you are not.

<Plenty of people are talking about it. Perhaps the problem is that no
<one is listening.

Describe a couple of these supposedly plentiful cases of NYC stations being
interferred with inside their interference free contours.

You can't because there are no cases.

The mere fact that the ratings, which came out 15 minutes ago, show no
changes in listening levels in the NY market, disproves your point.

My Echostar VIP622 DVR proudly fast-forwards through the commercials.
In fact, it has a 30 second jump dorward button. In most of the
civilised world the commercials come at the beginning and at the end of
a program, not every 8.5 minutes.

The ad-supported model is hopefully on its last legs. It is a very
flawed system, left-over from the days of steam locomotives and spats.

It's the same "story" each time... I may use different words, but the dates and facts are the same because the story can't change as it is history. Find Herb Levin at the 1020 AM in Miami and ask him. He is the guy who provided lodging when I left Ecuador until I found something new. Or talk to Betty Pino, mid-day talent on WAMR, Miami's #1 radio station... she is Ecuadorian and came to Miami at about the same time due to the difficult situation for all radio under the junta.

<Yes, it appears you didn't get away with anything of value.

That was enough to tide me over until I found a management position I liked.
When you have nothing else, $1400 in 1970 was a tidy sum.

Kind of like a half-million or so of the Cubans in Maimi... some of whom got
to the US with absolutely nothing after woning banks, facotries, hotels,
plantations, etc.

There was no fight, other than in the media. The junta fell when the members
started to disagree, and elections were finally held. In aobut 8 years, I
saw 5 changes of government, only two by elections. On person alone could
not do anything about that...

It's an amazing "rating" that can "disprove" the truth. Very lame even
by your anemic standards.

Sangeans are nicely voiced. Mr. Shearer can be heard live every Sunday morning at 1800 z on "KCRW Simulcast" via www.shoutcast.com (when he broadcasts from "the home of the homeless" you can view the show at the KCRW web site.

He started as a DJ at KPPC, 106.7 in Pasadena. The station evolved very organically into KROQ. Since then, it has been assimilated by the Borg otherwise known as CBS (not affiliated with Columbia records).

He is also into recording wild feeds on the big ugly dish and using the video of famous people in unguarded moments in avante gard art installations. (Where else can one see Barbara Walters eating chicken salad?)

He makes over $1 million dollars an episode for The Simpsons.

WADO and WCAA.

>
> You can't because there are no cases.

<You are incorrect. I'm listening to plenty of them right now.

Unless you are talking about the interference caused by dimmers, computers
and the like (which only affects AM... which is only about 19% of the
listening to radio in NYC), there is no interference.

What is the cause of this alleged interference?

>
> The mere fact that the ratings, which came out 15 minutes ago, show no
> changes in listening levels in the NY market, disproves your point.

<It's an amazing "rating" that can "disprove" the truth. Very lame even
<by your anemic standards.

Were there interference that made radio unpleasant to listen to, the overall
PUR (Persons Using radio) would decline as people listened less or not at
all and picked other forms of entertainment. Ratings also quantify the
number of persons using radio and the time they listen, so any such problem

would be immediately shown.

And certainly not to fuel IBOCCRock, but if this may be an indicator that the financial interests that have been screwing with RADIO for the past decade, are about to slide out of the mess they've created, and move on to other pastures.

Talk about your Good News/Bad News.

Radio was never meant to be a Wall Street investment commodity. A business, yes. But not the kind of business that MBA's salivate over. When Money got into broadcasting, much of the public service commitment left the building. There's little or no money in public service. News became a profit center, and as such had to become entertainment. News, when correctly done, is not, and never will be a high profile profit center. It may pay for itself, but News, correctly done, is expensive and it's messy.

And it's a key part of public service.

What passes for Radio, today, like television, is a commodity.

It may be that the money guys are starting to see that Radio, the public, and themselves are not best served as a commodity.

If this signals a resetting of priorities...there may be some hope. And a realization that, for those of us who still believe in shortwave, profit is not the Only Thing.

Then, again, the brain surgeons in the corner offices at Radio are not known for 'getting it.'

I don't need to mention any names.

From AllAccess.com

Clear Channel Buy-Out Doubts Keep Growing
Deal Still Likely, But Doubts Are Growing

I don't see anything yet that indicates the deal won't go through...

The $19.5 Billion leveraged buy-out of CLEAR CHANNEL COMMUNICATIONS, could be the next victim of the storm in the deal world, reports THE FINANCIAL TIMES. Skepticism that THOMAS H LEE and BAIN CAPITAL will go through with their purchase on the original terms has been fed by the falling share prices of comparable companies.

CLEAR CHANNEL's stock traded yesterday at $35.06, a discount to the $39.20 price the buyers agreed in MAY 2007, which suggests that investors are betting against the deal. "It is susceptible to recession

but that was built into the plan," said one person familiar with the thinking of the buying group. "There is no good reason to walk."

The purchase is expected to receive FCC approval as early as the end of this week. Bankers familiar with the transaction say the buyers are unlikely to do anything before regulators sign off on the deal, if only to keep their options open.

"I don't see anything yet that indicates the deal won't go through," said one senior banker involved in the deal. "But there are a lot of undercurrents, including the fact that the returns for the sponsors are terrible and the break-up fee isn't huge."

A Tougher Viewpoint

24/7WALLST.COM takes a harsher view, writing "the odds that the buyers of CLEAR CHANNEL (CCU) will walk on the deal are probably north of 99%. The total value of the buy-out is $19.5 billion. According to the FT 'skepticism that THOMAS H. LEE and BAIN CAPITAL will go through with their purchase on the original terms has been fed by the falling share prices of comparable companies.'"

If the private equity buyers walk away, they would be likely to have to pay a $500 Million break-up fee to the company.

Some of the banks providing the debt are also committed to coming up with some of the equity and would share in paying that fee. Banks have been trying to reduce financing commitments for buy-outs. Even when the deal was first struck, in NOVEMBER 2006, competitors to THOMAS H LEE and BAIN CAPITAL thought the terms aggressive.

When contacted by ALL ACCESS, a CLEAR CHANNEL spokesperson declined comment.

The frequency of audit increases dramatically for those in higher income brackets. The frequency of audit increases dramatically for those filling the long form. The frequency of audit increases dramatically for those filing the self-employment income schedule. The frequency of audit increases dramatically for those with high charitable contributions. Those with a high number of claimed dependents get audited more often, too.

Those filing form EZ1040 with a W4 that matches the IRS computer seldom get audited unless. Those with incomes over a half-million may get audited routinely every few years.

The root cause for these doubts has nothing to do with radio. It has to do with the mortgage and banking and housing crisis, which has made credit tighter as well as impacting the investment bankers who are part of the radio deals who also may have exposure to mortgage related issues.

This same situation affects auto parts companies, biomeds, Internet companies, etc. It's a credit issue, not a radio one.

Then don't sell yourself as a Freedom Fighter. Do not sell
yourself as Risking Life and Property as a Defender of Democracy.

You had been removed from the game. No risk. No defense.

>
>> Whether there was personal risk or loss is one thing. Whether you
>> risked, or lost defending democracy is something else.
>
> The fact is, I did lose everything from home to business.

Again, thank you for making my point. You lost, but you did not
risk. You accepted your losses and you left. Risk in the Defense of
Democracy would have required you to remain and make a stand. You did
not. Put whatever spin you wish on this, the facts are that you didn't
risk in the defense of democracy. You didn't make your stand. You took
your screwing by the junta and left.

Doroteo Arï¿½mbula you are not.

You cannot regale us with your implications of heroic defense of a
cause, when you didn't face the conflict. Put a weapon in your hand and
make a stand, yes, then, you'd be a hero.

Put you on a plane at gunpoint and you're just another faceless
American who got run out of a South American dictatorship to return to
the country he worked so hard to leave.

If it weren't so insulting it could be a Movie of the Week.

With each telling, you more become Cliff Clavin: Invincibly
convinced of his superiority, while cluelessly the butt of everyone's

jokes. Going and blowing about his great feats, while in reality being just a mailman. A letter carrier, who hides behind his uniform as some great hero of Liberty and Democracy, who, in fact, has done nothing but carry mail. And lives with his mother.

I have no doubt that you've lived a life and accomplished things that you're proud of. That many of us would respect. But your self aggrandizements cut the nuts off your credibility, and point to something that's less than there may actually be.

And that's a shame. Because, here, in this group, we're all allies. Disparate. Broadly distributed in social position. And economics. But, here to share experiences of radio hobbycraft, and some more general interests. Here, we're all colleagues. Having a beer.

And then there's you. The guy in the uniform at the end of the bar. Telling us all of his heroics.

I thought you were better than that.

Apparently, I was embarrassedly mistaken.

>> Chauncey, your stories, and supporting evidence on your website, change
>> with the telling.

Scans of documents supporting your claims, however, have. As documented in this group. DXAce having made that point more than a year ago. Myself having witnessed what he pointed out had changed.

You're very good at playing semantic games. Your debate coach would be proud. But you are in conflict with your own facts. Your credibility, like CCU's stock price, is slipping.

>> Doroteo Arï¿½mbula you are not.
>
> Nor would I want to be.

Probably the truest thing you've said, to date.

Excuse me, but when one comes within a hair of being shot (as evidenced by the disappearance of my colleague at the newspaper), and exiled with next to nothing, about all that can be risked has been risked. There was not a civil war, just one of over 100 changes of government in the 150 years of independence of Ecuador. The people had not taken up arms for decades there...

> Scans of documents supporting your claims, however, have.

Additions add depth, and do not change the underlying facts. It took me 5 years to get a scan of a verification letter for HCRM1 that I had written in the 60's, and I finally got one from well respected DXer John Callerman of Krum, TX. Adding that only gave a bit of dimension to the information, and changed not a tad the facts.

> As documented in this group. DXAce having made that point more than a year
> ago. Myself having witnessed what he pointed out had changed.

DXace proved nothing... in fact, I have given dozens of names of persons who can corroborate the facts he so glibly dismissed. To his crippled mind, the idea of a 17 year old with a corporation and a business is impossible... witness his obsession with "nothing in your name" when corporations are a way of life in business. He is simply ignorant of how things work in business and outside the US.

Pancho Villa was basically a thief and a thug, who latched on to the Mexican
Revolution to achieve notoriety and to escape prosecution by the law.

I think the poor programming has already made the radio so unpleasant
to listen to that interference can now do little additional harm.

>Ratings also quantify the

Yes, they'd better develop a better methodology as it obviously isn't
working.

Impossible? Not at all. Not even that unusual. What DxAce finds
difficult to believe, I think, is that you'd actually tell the truth
about something.

I'll take a guess -- there is a DXpedition to Suriname in South America
using call sign is PZ5YV. They are working split -- that is - they call at
about
18.145 MHz and listen for callers at 18.150 to 18.155 MHz

The callers repeat their callsigns over and over again in hopes PZ5YV picks
them out.

It's called a DX Pileup

There is only a few hundred hams in Suriname so it is a rare DX country. The
aim of a DXpedition is to put the country on the air and provide a large
number of contacts for dxers that need credit for theit ARRL DXCC.

Lamont (A Ham DXer)

People who do heroic things aren't prone to the kind of indecorous
chest-thumping you seem to enjoy. Ditto for people who "come within a
hair" of being heros. If anything's impressive here, it's that someone
as paralyzed by self-doubt as you, and as obessed with other people's
opinions as you, can still manage to hold down a full time job. That
is impressive (assuming, of course, that you do have a job).

Pipester wrote:
> I was listening to 18.155 Mhz and Heard Hams, repeating callsigns over and
> over again. What are they doing?

Most likely they are trying to attract the attention of a rare station.

The station calls CQ and includes "up 10" or (I am listening 10khz
higher than I am transmitting). The operator then picks on callsign
and replies to that ham, they exchange enough information to make
it a legal contact, and the operator moves on to another ham.

It's called a pileup, and the rare station is "working split".

The minimum information for most awards is callsigns and a signal
report each way. Some hams send "59" (very readable and very strong)
for voice or "599" (very readable very strong and very clean tone)
for CW (morse), most send a real report. Contests include a serial
number for the contact, and if sponsored by a group, the membership
numbers of the stations in that group.

More intersting splits occur on 80m (3.5mHz) and 40m (7mHz) because
U.S. hams are restricted where they can send morse code only and
where they can send morse and voice, but hams in other parts of the
world don't have those restrictions or are not allowed to send at
all on those frequencies.

Geoff.

But he didn't leave the fight behind and then wave the flag of
Liberty. If nothing else, he stood and fought for what he believed.

Like I said, leave the fight behind, and you risk nothing. Put a
weapon in your hand, and you can make the claim.

You opted to take the road out that was handed you.

You may have lost much. But your risk, like other things, isn't what
you claim.

Eduardo - Your industry is in free-fall due to bad decisions made
radio execs that have a total disconnect with their audience.

It has nothing to do with the mortgage and banking industry - nice
try

"BRACING FOR THE WORST"

"In fact, the earnings report was so dismal that it shocked industry
analysts and led to yet another drop in Citadel's already sagging
stock price, pushing it further into penny stock territory. Given a
brutal outlook for the radio business and its own particularly
alarming financial future, the company was forced to write off an
unexpectedly large portion of the value of its stations, sending
investors running for cover. UPDATE: as the trading day continued, CDL
shares were pounded even further, closing down $1.46 at $2.40 a share
(a 38% loss in just one day). Volume was a heavy 11.5 million shares

(405% higher than normal) and Citadel's total market cap loss for the day was a staggering $385,000,000. As recently as 2003, Citadel shares traded as high as $23.00"

http://radioequalizer.blogspot.com/2007/11/new-imus-employer-abc-owner-faces.html

Hey, Eduardo - is your little research staff laughing, now? That is,
if they haven't been laid-off, yet. I hope that your retirement isn't
in a
company-sponsored pension plan - it will get raided by Univision, once
it really starts to tank. How does it feel to be in a decline
industry? No wonder, the HD Alliance is throwing terrestrial radio
under-the bus, in their new joke of a marketing campaign:

"HD Radio's New Campaign"

"In a sort of snarky approach, the campaign features a humanized radio talking to his owner about why HD Radio product is so attractive and not worth the bother. But in the process, traditional radio is repositioned as old-fashioned, repetitive, and lame... You have to hear these commercials a few times before you really get a basic understanding of what they're trying to accomplish, while they throw AM/FM Radio under the bus."

http://jacobsmedia.typepad.com/jacobs/2007/12/hd-radios-new-1.html

"GSD&M Preps $200 Mil.+ HD Radio Push"

"GSD&M has already begun producing work. The ads feature the voice of cartoon character SpongeBob (actor Tom Kenny) as a conventional car radio calling its owner and leaving messages as if it's a jilted lover. 'You know, I could totally pick up those new extra HD stations if I hit the gym,' the radio says in desperation. 'Is that what you're into now? Huh? Call me!'"

http://www.adweek.com/aw/national/article_display.jsp?vnu_content_id=1003691980

"Radio: You don't want HD Radio's Bilk-o in your foxhole."

"How would you like it if one you believed to be a business partner did an about face and supported the very thing your industry is fighting against? Memo to terrestrial radio: iBiquity and the HD Radio Alliance just double-crossed you."

http://gormanmediablog.blogspot.com/2008/01/radio-you-dont-want-hd-radios-bilk-o-in.html

You work in such a proud industry, Eduardo!

It's interesting how much you are now infatuated with the corporation thing! I do recall you saying in the past (when questioned about the ownership thing) that the number one reason you wanted Ecuadorian citizenship was so that you could put your *radio stations* in your name.

But *conveniently* you were thrown out of the country just days before getting citizenship.

It all makes for an interesting story, with little or no paper trail.

Thanx. If your in CA and copied it as strongly as I did, I'd guess that is
an indication that there is a lot of juice behind it and not necessarily a
result of it being very close to me as I initially thought. I've heard
dozens of numbers stations but the frequency and strength of this one is
extraordinary.

Didn't you say in the past that after going back to the US and/or Puerto Rico
(after getting tossed) that you were still trying to sell your stations in
Ecuador?

Now, in one rapid 24 hour period, you are telling us that you *transferred* it
all to some employee cooperative, before you got tossed?

Did you do that at gunpoint as well?

Certainly looks like an interesting radio. The real signal meter and rotatable AM antenna definitely harken back to classics like the RF2200. Wonder what the tuning resolution is. A $300 price tag will require more than good sounding audio.

- And of course there's the new phasing unit from DX Engineering,
- if you have a lot of dough in your pocket:
-
- http://www.dxengineering.com/Products.asp?ID={6F07CEB4-27D0-4664-A2AA-352A69ED88CD}&SecI
D=114&DeptID=12
-

Steve - Yes that would be the DX Engineering Model # NCC-1
http://www.dxengineering.com/Products.asp?ID=215&SecID=114&DeptID=12
P/N : DXE-NCC-1 - Noise Canceling Controller @ $495 +S&H
http://www.dxengineering.com/ProductDetail.asp?ID=215&SecID=114&DeptID=12

The NCC-1 "Noise Canceling Controller" is a Two-Channel
Receiving Antenna Phasing System. - http://tinyurl.com/oms63
http://www.dxengineering.com/Parts.asp?ID=1227&PLID=215&SecID=114&DeptID=12&PartNo=DXE%2DNCC%2D1

Currently my Noise Cancelling needs do not exceed the $495
price tag of the NCC-1 "Noise Canceling Controller". ~ RHF

- = * RE-POSTED SO PLEASE READ * = -

New Grundig Satellit 750 Radio -better than-
Eton E1 Radio and Sangean ATS-909 !

The sample of Tecsun S-2000 Radio -aka- Grundig Satellit 750 Radio
has come out! Better than the Eton E1 and Sangean ATS-909 Radios !

TECSUN S-2000 RADIO - http://tinyurl.com/2fss5l
http://www.dxing.info/community/viewtopic.php?p=4486&sid=9c8bc3caf9101132877fdf7f8c0a64c6

OK so from this can we 'infer' that the new Grundig Satellit 750
Radio
performs in some respects better than the the Eton E1 Radio and the
Sangean ATS-909 Radio ?

Plus the Eton E1 Radio is considered to perform better than
the Grundig Satellit 800 Millennium Radio in most aspects.
-ergo- The new Grundig Satellit 750 Radio should also perform
better than the Grundig Satellit 800 Millennium Radio in most
aspects.

IMHO - That would make it a pretty good $300 Radio. ~ RHF
.

Huh? When times are tough you need to push harder. Peter's right,
radio is not the most amenable business when it comes to
standardization. Every market is unique. Cookie cutters suck.

I actually got RF burns a lot when I worked at KRIZ (now KOY). In the
mid '60s you had to take antenna current measurements (every 30
minutes!) at the base of the tower, which involved a big-ass slide
switch. If you touched the wrong stuff you'd get bad to the bone RF burns.

You can use contact cleaner, or just plain ole WD40, spray and work
the control back and forth a few times to break loose the
'dirt' and then spray again to rinse it away. Wait about 1 hour,
for the spray to dry, before using the radio again. WD and some
contact cleaners are a) flamable and/or b) conductive

-
- http://www.bwantennas.com/ama/fdipole.ama.htm
-

Terminated Tilted Folded Dipole (T2FD) Antenna
-for- Shortwave Radio Listening (SWL)

David,

While the B&W Terminated Tilted Folded Dipole (T2FD) Antenna
T2FD - http://www.bwantennas.com/ama/fdipole.ama.htm
T2FD - http://mywebpages.comcast.net/smithab11/T2FD.htm
http://www.universal-radio.com/catalog/hamwire/0872.html
is a Low Noise and Broad-Banded Antenna. It will not acomplish
the same Noise Reduction for local 'point-source' Man Made Noises
like using two Antennas : a larger SWL Receiving Antenna; and a
smaller Noise Pick-up Antenna; using a Combiner {Signal Phasing
Unit}.

T2FD -- The Forgotten Antenna -by- Guy Atkins

649. Sporadic E Opening on 26 MHz 20 UT Jan 8

Newsgroup: rec.radio.shortwave
Date: 2008-01-08 20:42:29 UTC
From: dxAce <dxAce@milestones.com>
Message-ID: <4783E034.7AEB275D@milestones.com>
Source record: 133567

Hi Glenn

26.130 25.990 and 25.910 all coming through. Times UTC.

25.910 USA WBAP Ft. Worth, TX in FM at 1942 with mentions of Senator Huckabee. 333 Jan 8/08 (Ross, ON)

25.990 USA KSCS Arlington, TX in FM at with fiddle music at 1952 "All the best Country" at 1954 into country music selection. 333 Jan 8/08 (Ross, ON)

26.130 USA WIBC Indianapolis, IN in FM at 2002 with "WIBC FM 93.3" mentioned at 2004 Ad for Garleek and Indianapolis Monthly Bridal Show Jan 13 http://www.indianabride.com
Several IDs "Indies News Centre "FM Ninety Three One". 333 Jan 8/08 (Ross, ON)

73 David Ross VA3MJR

I am also seeing signs of signals on TV channels 2-5 (gh, via DXLD)

Interesting; more skip on 10 and 11 m than much of last summer;
CB is full of southern US as heard here in no MN.

Michael

651. Birdies (spurs) in Grundig YB 400

Newsgroup: rec.radio.shortwave
Date: 2008-01-08 21:19:34 UTC
From: msg <msg@_cybertheque.org_>
Message-ID: <13o7psvir9t6869@corp.supernews.com>
Source record: 133569

Would someone who owns an unmodified Grundig YB 400 be willing to
do a birdie hunt on it? You would need to put it in a faraday cage
and power it on batteries and have access to the controls without
compromising shielding (by using a wooden or fiberglass chopstick
for example through a tiny opening to run the keys. The scan
function would probably find the strongest ones but some manual
tuning would also most likely be necessary.

I am using components from this radio in a project and don't have
an unmodified one for testing; getting a baseline on spurs is
vital to other mitigations I am undertaking.

Old Usenet postings mention a few birdies but there is no comprehensive
list across the full tuning range of the rig.

Thanks,

Michael

I strongly recommend using the appropriate Caig product (available at Radio Shack) rather than WD-40 or a solvent chosen at random. That will help ensure that it stays clean and properly lubricated after the cleaner dries.

> Huh? How hot a spark can you make with 6 V?

You can certainly make a spark with 6 volts. It's unlikely to happen in an RF gain control.

Hi Mike,

Thanks for the link to the pictures. I noticed this in the text..
"There's also an aux in for audio input."

Shouldn't that say "output" instead of "input"? Yes, I know Brian Lam
wrote the piece, but I'm just curious about that quote.

All afternoon yesterday and all afternoon today the CB band was open from the southern US to Pennsylvania. Granted, a lot of these people were probably using illegal power levels, but they were really booming in. Today just about every channel was occupied.

I heard a few faint 10m ham conversations yesterday and a few loud ones today.

Yesterday I didn't hear any 11m out-of-band CBers, today I did.

Yesterday I checked the entire band for FM broadcast links and heard nothing. Today I forgot to check but I wish I had since other signals were stronger today.

Don't use WD40! Use DeOxit, or regular old control cleaner instead. If
the pot is bad, it's not all that hard to replace it.

You must have an early version. The later revisions were much better, and a damn fine radio.

Addition Thoughts and Comments :

One of the things that I like about the MFJ-1025/1026
Noise Cancelling Antenna {Phasers} is the fact that they
have a SO-239 Jack for the Auxiliary {Noise} Antenna.
http://www.universal-radio.com/catalog/preamps/3542rear.html

MFJ-1025/1026 Noise Cancelling Enhancers
http://www.universal-radio.com/catalog/preamps/3541.html
http://www.mfjenterprises.com/Product.php?productid=MFJ-1025
http://www.mfjenterprises.com/Product.php?productid=MFJ-1026

While the Timewave [JPS] ANC-4 RF Noise Canceller
uses an RCA Jack for the Noise Antenna [J1]
http://www.universal-radio.com/catalog/preamps/0094dia.html

Timewave [JPS] ANC-4 RF Noise Canceller
http://www.universal-radio.com/catalog/filters/0094.html
http://www.timewave.com/support/ANC-4/anc4.html

I plan on using a 15 Foot Vertical 'Snake' Antenna made
out of a single piece of Coax Cable for the Noise {Sense}
Antenna with the Noise Cancelling Combiner/Phaser.
I want this Noise {Sense} Antenna about 25 away from
the House to pick-up the local outside Noise.
http://groups.google.com/group/rec.radio.shortwave/msg/e30c9dfd1a8b21a2
http://groups.google.com/group/rec.radio.shortwave/msg/4f0482421d02e624

15 Feet Vertical Noise {Sense} Antenna
o
l
l
l
l
l

```
F====================================P-
'o' =End Insulator for Rigging Rope
'l' = 15 Foot Vertical Antenna Element using the
Center Conductor and Insulator of the Coax Cable.
'F' = Snap-On Ferrite Bead placed where the
Antenna Element begins.
'=' = 35+ Feet of Coax Cable feed-in-line
'P-' = PL-359 Plug to connect to the Noise Cancelling
Combiner/Phaser.

FWIW - I understand that the MFJ-1025 without the little
built-in Whip {Noise} Antenna is preferred over
the MFJ-1025 that has the little built-in Whip {Noise} Antenna.

No, I said that in '69, thinking I could sell, I worked briefly with Art Keller as a manager at EZ Communications and had a deal to buy 25% for $100 k, but when I got back to Ecuador things were so bad that foreign currency transactions were frozen and I could not do any deal. About then, I put the talk AM on and made the mistake of speaking out against the government.

They did have airplanes back then, and I could come and go.

No, I signed some documents with my lawyers, and they filed them within hours. A socialist government could not go against a worker's cooperative, a day old or a century old. I lost the stations, but not to the government. I still grin when I imagine the faces of the military junta guys when they realized they had a Catch 22 on their hands.

I suggest that you keep an open mind about what serves as your noise antenna. You might find that the coax antenna described above is just the ticket. However, I hope you'll at least try a few different kinds of antennas, or a few different configurations/lengths of your wire antenna, to see what works best most of the time. You might be surprised!

You probably sank to your knees and serviced some of the junta members
in the hope that they'd allow you to climb on board the rapidly
approaching gravy train. As soon as you were done, they had no further
use for you. And the gravy train? Darn it, wouldn't you know it was
overbooked...

I know you can make a spark; is it enough to ignite light oil? Naptha
perhaps...

I work in an electronics lab facility where we use every kind of cleaner
there is. We've never waited an hour to avoid explosions from the
De-Ox-It or the WD-40.

From: AussieDrifter <Mark__Rutherford@hotmail.com>
Message-ID: <fm19ra$3go$1@news-01.bur.connect.com.au>
Source record: 133789

G'day All,

Well I've returned back to Canberra and have now been able to get a couple of videos done to show the Sony CDX-GT260 AM/FM/SW Car Radio in action.

Video1:

Quick scan of SW2 from 9500 khz to 17500 khz. I just used quick scan, and am sure there would have been a fair few more stations picked up if I had manually scanned. - its a 15mb video approx 3min 30sec.

http://www.mediafire.com/?0ljjgceexoz

Video2:

Shows what happens when the car starts / is running. Like I've said earlier a power supply filter / condenser may help fix this, but I haven't needed to worry about this. - its 5mb ~ 1min 30 sec

http://www.mediafire.com/?eg11gzp2g1x

Picture 1:

Shows the external AM/FM whip antenna. Looks very similar to a 27mhz cb antenna.

http://www.mediafire.com/imageview.php?quickkey=9vdmz30njsm&thumb=4

Hope this helps

Mark

I am a victim of RNM here in Canada. My life haas been horrible the last 1.5 half been harassed by a local member of society. I am thinking of moving to the UK or to New Zealand. Will this technology reach these countries. If I migrate to them will I end up being free from this harassment or will satellites of some sort continue on the harassment in my newly respecetive countries?

Thank you!

This receiver probably does not exist but here's what I am looking
for.

coverage from 500hz to 30mz with dual or triple conversion and
with a sensitively of 10mv capable of receiving AM, CW and SSB
and the capability of using batteries or a solar powered array.

That's a bunch of baloney. I told you I not been audited and my tax
situation is light years away from the easy tax forms and I know many
people that make millions a year don't get audited either.

So it's like I said. You are doing something that is questionable in the
eyes of the IRS. I'm not saying you are doing anything wrong but that
maybe you fit a profile that raises a flag.

This reminds me the argument we had where you posted that I had to be
lying about the signal strength of stations I was receiving on AMBCB.

You ever make it up this way with a portable radio?

If you meant 150 kHz (not 500 Hz) then the Sony ICF-2010 is pretty close to what you want... it runs on 4.5 volts and the solar power supply becomes a separate design problem.

If you actually meant 500 Hz, well, then, I'm not sure that's a *radio*...

Thanks!

I'm impressed that its Seek function always lands on the signals, not 5 kHz short of them.

Your engine interference may be coming in through the antenna, which is not shielded from the engine. I'm planning to use my regular radio antenna and replace it with a longer one if needed. In my part of the world there's a lot of Spanish on the radio (everybody aims for Cuba, and I'm close enough), and in general I think there's more on shortwave here than in the Pacific Rim region.

This is very useful information. There's a Singapore dealer who advertises these on eBay -- do you know anything about him? The alternative is "Shortwave Store" in Canada, with a much higher price. We Americans apparently aren't supposed to have shortwave radios in our cars, according to Sony :)

679. New Grundig Satellite 750 !!!

-
- I suggest that you keep an open mind about what serves
- as your noise antenna. You might find that the coax antenna
- described above is just the ticket. However, I hope you'll at
- least try a few different kinds of antennas, or a few different
- configurations/lengths of your wire antenna, to see what
- works best most of the time. You might be surprised!
-

Steve - That is all very true.

Three Different Noise "Sense" Antennas To Use For
Noise Cancelling Antennas With An Antenna Phaser.

Noise "Sense" Antenna # 1 - Short Vertical Antenna :
The short 15 Foot Vertical Antenna is a good 'starting-point' :
Since a Vertical Antenna should 'Sense' equally in all
directions {omni-directional} from all noise sources that
surround it.

Both the MFJ and Timewave-JPS Boxes have a Noise Antenna
"Gain" Adjustment so hopefully 15 Feet will be in the useful
Range of this Gain Control. Otherwise, I will have to shorten
it down to 5 Feet and try again. But, if I do shorten it down to
5 Feet : I still want the Top-End to be at about 15 Feet above
the surface of the ground; meaning that part of the Coax Cable
will also be part of the Vertical-Up-Leg.

Noise "Sense" Antenna # 1S - Shorter Vertical Antenna
Five Feet (5') Vertical Noise {Sense} Antenna
o - 15 Feet above the ground

l
l
F
ll
ll
ll
ll==========================P- Ground Level
'o' =End Insulator for Rigging Rope
'l' = 5 Foot Vertical Antenna Element using the Center
Conductor and Inner Insulator of the Coax Cable.
'F' = Snap-On Ferrite Bead placed where the Antenna
Element begins and the Outer-Shield Ends.
'll' and '=' = 45 Feet of Coax Cable feed-in-line
'P-' = PL-359 Plug to connect to the Noise Cancelling
Combiner/Phaser.

Noise "Sense" Antenna # 2 - Short Dipole Antenna
Beyond the 15 Foot Vertical Antenna; I have also though of
trying a Short 6-Foot Tip-to-Tip Dipole Antenna mounted on
a 10 Foot piece of PVC Pipe and directly wired to a Coax
Cable feed-in-line. Manually position the Dipole Antenna
one-time for the Best Noise Pick-up and Cancellation.

Noise "Sense" Antenna # 3 - One-Metre Loop Antenna
Next might come a single-turn One-Metre Loop Antenna;
again mounted on a 10 Foot piece of PVC Pipe and
directly Wired to a Coax Cable feed-in-line. Manually
position the Loop Antenna one-time for the Best Noise
Pick-up and Cancellation.

I have an HP 3586B for sale if you are interested. It will receive below
500 KHz and above 30 MHz in the modes you desire, with the sensitivity
you desire. However it is a large and heavy instrument. Your solar
panels and batteries will be a bit large!

See below for more info.

http://bama.edebris.com/download/hp/3586/HP%203586%20OPERATING%20GUIDE%20V2.0.pdf

2. DESCRIPTION OF THE HP3586
2.1 General ï¿½ For those not familiar with selective level meters they
can best be visualized as a receiver
having very high selectivity with a detector system capable of
accurately measuring low power signal
levels from +20dbm down to ï¿½100dbm and frequency over a wide range from
200Hz to 32MHz and. It
also will output a signal of 0dbm, one miliwatt, at exactly the same
frequency that the instrument is tuned
to, which is usually the center frequency of the selected receiver band
pass filter. Itï¿½s also a SSB receiver
to aid in tuning the signal to be measured. Because of these features a
selective level meter is extremely
valuable for measuring and the analysis of audio up through RF signals,
itï¿½s a whole lab of instruments in
one package. Because of this it can be used to measure the performance
of electronic radio and RF
circuits, measure the strength and frequency of radio signals along with
driving other electronic devices
using itï¿½s one miliwatt low distortion output signal as a low power
signal generator.

Above reference provided by N6PY.

G'day MC,

Sorry mate I don't know anything about the EBAY seller as I haven't needed to have any dealing with them. However The Canadian store I've had dealings with as it was them whom I purchase the Sony XR-5100 tape deck AM/FM/SW radio from back in 2005, and they were very helpful.

The only reason why it was somewhat financially viable for me was that I was going to Hawaii on Holiday and it the only cost a few dollars to ship it to the Hawaiian Hotel and the CAD$ was on par with the AUS$.

Back in 2005 I was in a similar position in that I had the options of getting the radio from Asia or Canada/US. However I was totally surprised to see these radios selling at my local auto store and why I quickly snapped up two, I've just checked the original boxes they came in and I actually purchased the (GT260 and GT360) not the GT160 as I originally thought :)

Regards
Mark

<The government went against the cooperative. So much for that story.

Nope, not so. Cooperative operated 590 and 810 for about 30 years.
Foolishly, they abandoned the FM simulcast licenses and when AM started to
die in the larger cities of Ecuador, the stations went silent.

There was only one change to Sat 800, and that was the installation
of a shaft bearing on the tuning mechanism.

There has been a lot of noise swirling around this radio since its
announcement. One was the existence of three 'generations.' This
particular bit of myth was created by a certain eBay seller looking to
spike his profits on refurbed units he acquired, hoping to distinguish
them from untweaked production runs. It's entirely a marketing trick.
Even Lextronix reps, when asked directly, openly admitted that there was
only one change to Sat 800. And that they adopted the 'Third Generation"
tag to spike their own flagging sales, because there had been so much
bad breath about this radio.

There were no revisions of Sat 800. One version, one generation.

Quality control improved over its production cycle, but it was there
were no differences between productions samples except the shaft bearing.

Sign - on San Diego which is owned by one of the major papers out
there -- just started 2 new internet radio stations. They are hoping
this will bring in extra income as their print income is declining.
Thought that was interesting. Apparently, they have invested a lot of
money, man hours and space to pull off these two new stations. I know
one is supposed to be talk and primarily news, but I'm not sure what
format the other one is going with. They have also just hired a
complete staff - with talent, sales and everybody else.

Most of the personal finance magazines have calculated the different odds of
audit at different income levels and with different types of filings.
Everything I listed increases the probability of audit. Self-employment is
also one of the major triggers, as it is one of the places income can be
understated.

> So it's like I said. You are doing something that is questionable in the

Since both instances had to do with split tax years in Puerto Rico, that was likely the reason. If one changes residence during the year, the portions of the year lived in each tax jurisdiction are taxed separately and without overlap, as with all other separate tax jurisdictions.

Again, simply: Inside the 10 mv/m contour for AM and the 64 dbu contour for FM is where about 95% of all listening takes place, irrespective of whether the areas beyond the contour are highly populated or rural. Listeners do no tune to weak signals.

The fact that you can hear a station does not mean any local listeners will tune to it. That is because what may be easy for you to tune, and of acceptable strength, is not for nearly everyone else. Whether it is New York or Florida or Texas or Puerto Rico, carefully tabulated diary returns show where listening takes place, and it is almost entirely inside the named contours.

And again I'm not talking about weak signals. Strong signals that are
picked up with no background noise on a PORTABLE RADIO with its INTERNAL
antenna. The table top radios were just used as a reference because it
has a signal strength meter.

I don't much time listening to weak signals. I don't care for putting up
with noise.

The fact is that they may seem strong to you, but they are not considered
listenable by nearly everyone else or there would be vastly more listening
nationally outside the named contours and there is not.
>

Yep, that is what the listeners say via their behaviour... signals below the
strength I mentioned are more subject to noise, harder to tune, etc. So they
don't listen.

It was merely called the "cooperative". It was the government.

Through The Internet
INTRODUCTION
The following story occurred on the Internet
through one of the chat programs (Freetel) in January 1999. It is a
real dialogue between a Christian and a Muslim. The story centers on
Derek's realization of today's Christianity and his subsequent
conversion to lslam. This Christian-Muslim dialogue has been edited
for readability and for the clarity of its message.

ABDULLAH: Hello there! How are you man?
DEREK: Hello! Well, how are you?
ABDULLAH: I'm fine and you?
DEREK: I'm fine thanks.
ABDULLAH: Where are you from?
DEREK: I'm from L.A. (Los Angeles).
ABDULLAH: The land of Hollywood!
DEREK: Well that's right. Have you ever been to L.A.?
ABDULLAH: No, never. Why are you calling yourself the Black Magic?
DEREK: It's just a nickname, man!
ABDULLAH: I see.
DEREK: Where are you from? Are you an Arab?
ABDULLAH: Yes, I am from Saudi Arabia but I'm in Qatar now. What is
your name?
DEREK: My name is Derek. What's your name?
ABDULLAH: My name is Abdullah.
DEREK: What does Abdullah mean?
ABDULLAH: Abdullah means the servant of Allah and it is the function
of each individual on the face of the earth to serve llah according to
what Allah wants from us. By the way, Allah is the proper name of
God.
DEREK: How do we know what God or Allah wants from us?
ABDULLAH: All of this is outlined in the Qur'an and the Sunnah (Ways
of Prophet Muhammad; his sayings, actions and aprovals). These are the
two major sources of guidance in lslam. Could you please tell me more
about yourself? How ol are you?
DEREK: I am 19 years old, black and very uch interested in
knowing more about lslam. First of all, what should a person do or
believe in to become a Muslim?
ABDULLAH: Very easy, you just say that there is no god worthy of
worshi but Allah and Muhammad is His Messenger, and you become
Muslim,
DEREK: You mean Muhammad is his apostle? But a a Christian or non-
Muslim, this sentence is not enough to make it clear to me.
ABDULLAH: Ok Allah sent Muhammad a His last Prophet and Messenger and

revealed the Qur'an to him as the final revelation to mankind. Allah said that He perected His religion and called it lslam (see Qur'an 5:3). Islam means peaceful submission to the Will of Allah.
DEREK: I see.
ABDULLAH: Yes, and unfortunately most Christians don't know or they deny that the coming of Prophet Muhammad is foretold in their scriptures (See Deuternomy 18:18; 21: 21; Psalms 1 18:22-23; Isiah 42:1-13; Habakuk 3:3-4; Matthew 21:42-43; John 14:12-17,15:26,27; 1:5-16). Muslim theologians have stated that the person who is described by Jesus to come after him (in the above verses) is Mhammed (peace be upon him).
DEREK: OK Fine, but why was there a need for another prophet after Jesus and another revelation after the Bible?
ABDULLAH: All of the Prophets came to teach their peoples the Oneness of God. In the case of Jesus, he was only sent as a Messenger to the lost sheep of the house of Israel (see Matt. 15:24). What happened was that all of these prophets were not well received by the majority of the people. For instance, they started tampering with the teachings of Moses and Jesus, peace be upon them (see Qur'an 2:79). That is why Allah sent Muhammad with the last Message, (i.e., the Qur'an), to bring all of mankind back to the belief in and worship of One God, without partners or intermediaries.
DEREK: Is the Qur'an similar to the Bible? I mean, what is it composed of?
ABDULLAH: The Qur'an came as the last code emphasizing the same pure monotheistic teachings of Jesus peace be upon him, defending all the previous pure teachings of monotheistic beliefs and clarifying who Jesus was and who his mother was, showing that they were no more than great people.
DEREK: OK then, how-can we be sure that the Qur'an has remained the same since the time of Prophet Muhammad?
ABDULLAH: Allah Himself has guaranteed that He would guard the Qur'an from corruption (see Qur'an 15:9). Hence, the real and pure words of Allah are found in the Qur'an, which was revealed in Arabic, the language of Mohammed's people. Since then, not an iota has changed. This is unlike what has happened in the other religions. For example, if you look at the Bible, you find a lot of versions; the name Bible itself is indicative of those changes because Bible means a collection of books from different writers.
DEREK: But didn't God call it the Bible?
ABDULLAH: God calls the Scripture revealed to Jesus "Injeel" in the Qur'an for which the closest name in the Bible would be the word Gospel. The Bible was written may years after the time of Jesus in a language that was alien to Jesus; it was Latin Vulgate, a language that he never spoke. Isn't this strange? Interestingly, most of what was written in the New Testament was authored by Paul, who, according to James, the brother of Jesus in the Bible, had a polluted mind because he changed and contradicted most of the teachings of Jesus.
DEREK: I think you know more about Christianity than the Pope does.
ABDULLAH: You are wrong by saying that I know more than the Pope. I

have simply investigated the Bible with an inquiring mind, which is something that all Christians should do.
DEREK: Is there any English version of the Holy Qur'an?
ABDULLAH: There are many translations of the meanings of the Qur'an. The Qur'an was revealed in Arabic which means that the words of ALLAH are in Arabic. The translations are the words of human beings relating to the meanings of the Qur'an to the non-Arabic speaking masses.
DEREK: How does the Qur'an define God to mankind or how does the Muslim perceive God?
ABDULLAH: GOD is the One and Only True GOD, and the Creator of all. He does not beget nor is He begotten. He is unlike His creation in every respect. He is the All-knowing, The Powerful, The Merciful, The Irresistible, and The King of kings.
DEREK: But it is somehow difficult for me to perceive God as being the same as His creatures.
ABDULLAH: You are absolutely right to have difficulty perceiving this because human beings have a limited capacity. This is why ALLAH sent revelations to His Prophets and Messengers to tell us who He is. So if you want to know who God is, just read the Qur'an.
DEREK: Christians believe that Jesus was sent for the salvation of all mankind. If this is not true, then the foundation of Christianity is faulty. Right? What do you think?
ABDULLAH: That's correct. The Christians of today are following what Paul taught and also tend to follow what the priests tell them to do instead of following what Jesus said.
DEREK: Kindly explain the concept of salvation through the crucifixion of Jesus.
ABDULLAH: In Christianity, the Doctrine of Original Sin is the reason that there is a need for salvation through Jesus' crucifixion. However, this doctrine was invented by Paul and it is strongly negated in the Old Testament (see Ezekial 18:20, Jeremiah 31:30, Deut. 24:16). This doctrine is an attempt to escape the responsibility of righteousness with the belief that punishment is given to someone else to release us from our burden of sins (see Ephesians 1:7, Romans 4:25, 10:9, Corinthians 15:21) In the Qur'an, every soul is responsible for its own deeds, good or bad (see 74:38,41:46, 3:25, 6:154).
DEREK: What about the crucifixion itself?
ABDULLAH: The Bible says Jesus cried out in a loud voice beseeching God for help on the cross: "My God, my God, why hast thou forsaken me?" (Matt. 27:46) Does that sound like Jesus to you?
DEREK: No, then what about Jesus' appearance to his disciples after the crucifixion?
ABDULLAH: Jesus didn't die on the cross nor was he resurrected. If he were resurrected, then he would have come to his disciples in a spiritual body. As shown in Luke 24:36-43, he met them with his physical body after the event of his alleged crucifixion. In the Qur'an, it says that Jesus was not crucified, but it was someone else who was made to look like him (see 4:157,158).
DEREK: How did the story of the crucifixion of Jesus get into the Bible then?

ABDULLAH: Once again, Paul was responsible (see Timothy 2:8 and Romans 5:10).
DEREK: Well, I, very deep in my heart, believe that God can never look like his creation nor does he do what they do. What I believe is that God is the perfect one who is very much different from everything we see or touch. In other words, I think the writer can never look like his book.
ABDULLAH: You are right. There is nothing comparable to Allah (see Qur'an 112:4). The prophets came with a very clear message to worship God alone, without any partners or intercessors.
However, Paul took pagan beliefs and practices from the Romans and mixed them with the teachings of Jesus. Consequently, Paul was mostly responsible for elevating Jesus to the status of Son of God (see Acts 9:20) and God.
DEREK: Yes. Now I remember. The first Commandment is, " Hear, O Israel, the Lord our God is One Lord."
ABDULLAH: You're right. That's in Mark 12:29. Moreover, the Qur'an confirms that God is One: "Say He is Allah, the One and Only (God)." (Qur'an 112:1)
DEREK: What you are saying makes perfect sense. This is just incredible! You mean that for almost 2000 years what the Christians have been following is wrong?
ABDULLAH: Yes, especially their misunderstanding of who Jesus was.
DEREK: Oh my God! I've been deceived! Really, I feel religiously raped. I have been fooled simply because I followed blindly the religion that I was born with and didn't take care to investigate it thoroughly. But still inside me there is something holding me back from accepting lslam, even though lslam is clearly the True Religion.
ABDULLAH: Your last comment shows that you are a Muslim not a Christian and if you really love God and His Messenger Jesus, you will follow lslam and Prophet Muhammad. Break this barrier inside you and come back to the way of your ancestors. You are now free because you are looking for the Truth and our great prophet Jesus told us that we should look for the Truth and the Truth will set us free. So, you will be a free man as soon as you accept It. Be strong enough to accept lslam as the Truth, without any hesitation on your part and you will taste real freedom and real happiness that you have never tasted before.
DEREK: Frankly, I am concerned about the negative way lslam and Muslims are shown in the media. In the West, there is a stigma attached to being a Muslim and I'm not sure I'm ready to live with that stigma.
ABDULLAH: This is why I have chosen to tell people about the right picture of lslam.
DEREK: Then, what is the right picture of lslam?
ABDULLAH: The right picture of lslam is conveyed in the Qur'an, which is exemplified by Prophet Muhammad peace be upon him. The reality is that it is not fair to judge a religion by the actions of its followers alone because there are good and bad followers in every religion. The correct thing to do is to judge a religion by its

documented revelation from God and the prophet who brought that revelation.
DEREK: I see. I agree with you, but I'm still concerned about the reaction of my family and friends if they know that I am a Muslim.
ABDULLAH: On Judgement Day, no one will be able to help you, not even your father, mother or any of your friends (see Qur'an 31:33). So, if you believe that lslam is the True religion, you should embrace it and live your life to please the One Who created you. Be an illuminating torch for them. Do not delay your coming to lslam. If you die before becoming a Muslim, then it's too late (see Qur'an 2:132, 3:102, 3:85). So grab this opportunity now. You can only remedy this pain inside you by becoming a Muslim and being able in the future, God willing, to come and perform pilgrimage (Hajj).
DEREK: You are very wise man, I want to say that when I sometimes see on the satellite, especially in the season of Hajj, people of different colors and different races sitting side by side and praying to God, I feel pain deep inside my heart and I feel something urging me to talk with someone to know more about that great religion that can gather all the races in the same place. Thanks to you, I have found that person. So please help me become a Muslim!
ABDULLAH: Brother let us take it step by step. First, enter lslam by saying: I BEAR WITNESS THAT THERE IS NO GOD WORTHY OF WORSHIP EXCEPT ALLAH. AND I BEAR WITNESS THAT MUHAMMAD IS HIS SERVANT AND MESSENGER. I BEAR WITNESS THAT JESUS IS HIS PROPHET AND MESSENGER. Let us say this again, I BEAR WITNESS THAT THERE IS NO GOD WORTHY OF WORSHIP EXCEPT ALLAH AND I BEAR WITNESS THAT MUHAMMAD IS HIS SERVANT AND MESSENGER. I BEAR WITNESS THAT JESUS IS HIS PROPHET AND MESSENGERS. I BEAR WITNESS THAT JESUS IS HIS PROPHET AND MESSENGER.
DEREK: I BEAR WITNESS THAT THERE IS NO GOD WORTHY OF WORSHIP EXCEPT ALLAH. I BEAR WITNESS THAT MUHAMMAD IS HIS SERVANT AND LAST MESSENGER. I BEAR WITNESS THAT EISA IS HIS SERVANT AND MESSENGER.
ABDULLAH: By the way, Jesus' name is not Jesus. It is a latinized name. His real name is Eisa. Now you will say the same thing in Arabic, the language of the Qur'an. I will transliterate for you.
ASH'HADU AN LA'ILAHA ILLA ALLAH WAASH'HADU ANNA MUHAMMMADAN RASOOLULLAH WA ASH'HADU ANNA EISA ABDULLAHI WA RASOOLUHU.
DEREK: ASHADU AN LA ILAHA ILLALLAH WA ASHADU ANNA MUHAMMADAN RASULULLAH WA ASHADU ANNA EISA ABDULLAH1 WA RASOOLUHU.
ABDULLAH: Brother, say ALLAH is the greatest because you are a Muslim now. You are not a Christian anymore. Your are in the House of lslam. If I were with you, I would hug you as my brother in lslam. How do you feel now? A burden has been removed from you and you feel like you are so light, isn't this right?
DEREK: If you were with me now, you would have seen my tears reaching my neck. You are a great brother. I feel that I have just come to life, This is exactly how I feel from now. I don't have to listen the silly words of the priests in the church, who knowingly or unknowingly lead people astray. I hope to be a good servant of ALLAH.
ABDULLAH: You know what came out of you was disbelief and it was replaced by belief. You are so clean now, because when someone

embraces Islam sincerely, Allah forgives all of his past sins. So, go to the Islamic center that has Muslims from all over the world and announce your lslam there, and continue to learn more about lslam from them. In addition, find a book on prayer in lslam and practice it. This is essential. Now after you are through with me, you must take a shower to purify yourself from previous wrong beliefs. Remember to stay away from bad company and be with righteous Muslim people. Also, beware of those so-called Muslims who call to nationalistic ideas or racial thoughts, which are rejected in lslam. I love you as a brother in lslam and I hope one day I will see you and hear your voice.
DEREK: I will for sure do what you have asked. And tomorrow I will go to the Islamic center. Thank you for showing me the Truth. I will do my best to meet people who know about lslam for sure. May God help you guide more and more people to the true word of God. There is no God but ALLAH and Muhammad is his Apostle... Well it is as difficult for me as it is for you to leave you.
ABDULLAH: Well brother, you will not leave me for a long time. I will soon be with you through my supplications. God willing. Pray for me, brother.
DEREK: Well, I thank you, I love you although I do not know you yet. But it is enough for me to remember that one day, a very dear man has picked me up from the mud of life. Please teach me another Islamic word in Arabic so as to make use of it in the Islamic center.
ABDULLAH: Assalamu Alaikum Warahmatullahi Wabarakatu and Astaghfirullah.
DEREK: What do they mean?
ABDULLAH: May the Peace, Mercy and Blessings of Allah be upon you. This is used as a greeting to all Muslims. The last word means, Allah forgive me. Well, I have to leave you now but be sure it will not be for long.
DEREK: Assalamu Alaikum Warahmatullahi Wabarakatu and Astaghfirullah for being astray from the Truth all those years. May God bless you. You have occupied a great place in my heart and I will never forget you. Bye and talk to you later. Your brother in lslam, Derek, but I will call myself Eisa from now on.
ABDULLAH: OK Eisa. I will leave you some final words of inspiration. Certainly, the ultimate goal of every individual is to be in Paradise forever. This reward of Paradise is too great to not have a price. That price is true faith, which is proven obedience to Allah and following the Sunnah of Prophet Mohammed (pbuh). THIS IS THE ROAD TO PARADISE. Let's stay in touch! Assalamu Alaikum!
DEREK: O.K. Assalamu Alaikum Warahmatullahi Wabarakatu

Interesting! Do you know of any mail-order suppliers in Australia that
might have this radio and be willing to send it to America? I just checked
Jaycar Electronics and they don't seem to sell car audio.

Very good point. Waiting a couple of minutes, until the obvious fumes
disperse, ought to be sufficient.

The signals are strong. Anyone but you would agree that they are strong
signals except for you.

No I disagree. It must be content not the ability to get a noise free
signal. So it looks like you never made it up here.

They are not strong enough based on the field strength and the criteria that millions of diarykeepers for the ratings have shown us. It does not matter what you think. What matters is whether local listeners use those signals, and they do not.

There is considerable workplace listening to LA stations by commuters who live in Ventura county and work closer to the LA stations. The fact that they listen where the signal is stronger and not where it is not pretty conclusively shows that what you consider a "strong" signal is not.

The way I look at it is that is does not matter what you think. Your
data or thinking is flawed.

> >>

Yeah, I live and work in Ventura and I listen to those LA stations so I
know and you continue to speculate. I don't listen in the workplace
because it is not appropriate. I do listen at home in the car and in
parks with a portable radio.

Certainly agree on the real S meter, and I do like the retro looks.
Now if we can get the radio to smell like a tube rig........someone
should make a candle that smells like a vintage tube receiver.

Message-ID: <fm1oi0$e7d$1@news-01.bur.connect.com.au>
Source record: 133826

MC,

I bought my two from the local auto store called "SuperCheap" they may
be willing to do business international however not sure of anyone else
locally.

That said, I did a google on GT260 "Australia Only" search and found this:

http://www.ryda.com.au/Sony-CDX-GT160-Car-CD-Tuner-p/cdxgt160.htm -
AUD$ 130

http://www.ryda.com.au/Sony-CDX-GT260-Car-CD-MP3-Tuner-p/cdxgt260.htm -
AUD$ 170

http://www.ryda.com.au/Sony-CDX-GT360-Car-CD-MP3-Tuner-p/cdxgt360.htm -
AUD$ 187

Now when I attempted to proceed through the check out, it only allowed
me to select "Australia" for country. But maybe attempt to send them an
email to see if they may do any international order ?????

Regards
Mark

What I got is that you also make personal threats. Is alcoholism your excuse too? I'm tired of you and your posse contributing to the degradation of this group. Almost all of the valued contributors have left for greener pastures because of your ilk. Guess what, I'm out of here too. Have fun with your childish BS.

Thank you kindly. I realize that the vast majority of the Folks down south aren't like the toilet mouthed clown. Once he stops insulting the rest of humanity with his drunken vulgarity, I'll stop responding to him. I promise.

Of course they listen to whatever station has the content they want but it must also have a good signal. If either criteria is lacking, they find another outlet or give up. That's the behavior of the vast majority of AM listeners. They are the ones that create the ratings which are reflected in the diaries. The fact that MW Dx'ers don't like this reality, including myself, is unfortunately irrelevant.

Shouldn't the noise antenna be a vertical whip?

It certainly does look interesting. I'm wondering what the tuning resolution
is though. I hope it's better than the SAT 800's 50 Hz.

> > ~ RHF
> > .
-
- Shouldn't the noise antenna be a vertical whip?
-

M...Sushi - Yes and No - Well May-Be-So !

Yes for a general One Whip {Vertical} Antenna "Fits" many
'possible' Noise Source Needs - When the Location and
Direction of the Noise Source is Not Known. The Whip
{Vertical} Antenna will in-fact collect all signals equally
and be very effective for most local Noise Cancelling uses.

* This would be a Two Sigma [95%] solution to the vast
majority of Home Radio Shack and/or Amateur Radio
Station needs for 'local' Noise Reduction {Cancellation}.

The Whip {Vertical} Antenna is a One-Size-Fits-All solution
for a Simple and Practical {Cost Effective} Noise Antenna
and is very easy for the End-User to use and get good results.
KISAP - Keep It Simple And Practical

When the Location and Direction of the 'local' Noise Source is
Known; or when the Noise is Severe : Then a more directional
Noise Source Antenna may be used to 'pin-point' the Source
of the Noise and Optimize the Noise Cancellation Totally and
Completely : In these cases a Dipole Antenna or Loop Antenna
can be used to better Focus in on the Noise Source and Tune
It Out; to the exclusion of other Noise Sources not in the same
direction.

* This would be a Three Sigma [99.73%] solution to the small
number of Home Radio Shack and/or Amateur Radio Station
needs for complete elimination of 'local' Noise is the objective.

The Dipole and Loop Antennas are not a One-Size-Fits-All Solution : not simple to implement; not always practical to use; they cost more; and are more dificult for the End-User to use; but when done right can yield super results.
* ITALOWTGIR - It Takes A Lot Of Work To Get It Right.

Hence - Start with the Whip or Vertical Antenna and build on your personal experience until you are satisfied with your Noise Reduction {Cancellation} efforts to optimize your Radio Listening and Enjoyment.

Just put an old Tube Rig under the Table and leave it on 24/7;
pretty soon your Ham Shack will smell like some Ham has
been Cooking in his own juices all day long. :o) ~ RHF

Didn't Eton/Grundig go through several rounds of product delays
following excited new product announcements with the 800? Maybe I'm
thinking of another model.

Seems as though they did that with the E1, which was originally planned as the 900. I don't recall whether they had the same
troubles with the 800 or not.

Ya know, it would really seem as though there would have been better remedies out there to ensure the preservation of his investment.

That is of course if it were all real.

This is a particularly lame part of your story, Cornholio. How hard
would it be for the govt to claim that it had to intervene due to
financial wrongdoing within the cooperative--or for one of a thousand
other convenient reasons? Trumping up these kinds of excuses is second
nature to small, conniving minds, as you know perhaps better than
anyone. Juntas aren't typically sticklers for due process. You just
weren't in much of a position to see all of this, being on your knees

most of the time.

- If that's what responds best to your noise, however some power line
- carried noise such as arching hardware down the street are better
- received with a horizontal.
- One trick I use with my ANC-4 when using a long broad banded sense
- antenna is to run it through a pre-selector to leave only the noise
at
- your frequency of interest. That reduces overload issues. I have an
old
- Grove TUN-3 pre-selector from back in the 80s that I use for this.
- --
-
- 73 de
- KM6RF
- Bart

BB - That is an Interesting Idea and a Good Tip to use a
Pre-Selector between the Noise 'Sense" Antenna and the
Combiner/Phaser to better 'select' the Noise Signal to you
are trying to reduce / eliminate. - iane ~ RHF

Plus you are also right that the Noise "Sense" Antenna
should 'match' your Noise Source to achieve the best
results from your Noise Cancelling Antenna set-up.
Noise from Street side Overhead Power Line may in-fact
require a Horizontal Wire Antenna Element to get the
best reduction from such a source. The Turn-able short
Dipole Antenna or Loop Antenna may also be a better
Noise "Sense" Antenna to pick-up and eliminate this
type of locatable source of Noise.

-ps- Those old Grove TUN-3 Pre-Selectors are little gems.
.

My MFJ-1026 works very well for some kinds of noise, with two rather dissimilar external antennas attached. It gets rid of most of the noise that I hoped it would, that is, the continuous static and droning kinds of things (only one noise source at a time, however). It could probably get rid of lightining crashes and sporadic noise as well, but in practice the knob-twiddling required takes a tiny bit too long fo rti to be effective; ANL and NB work better for those sources.

There is some minor internal diddling that must be done, explained in the manual, depending on your antenna configuration, but it is very easy and quickly accomplished. Some people install a switch to reverse the main and accessory antennas, and it is too bad that MFJ have not simply provided one. I will probably do this on mine eventually. There are plans for this on the web, IIRC, another very simple mod.

This unit also attenuates MW, especially at the low end; there is a specific component inside that can simply be crushed to eliminate this

attenuation if MW is high on your list of uses for this device. In fact, some like it just for that reason, because it is VERY effective at nulling strong stations so that weak ones can be heard underneath. I have tried this on several occasions, and have been astonished at how well it works.

I would get one again (maybe even two in tandem if two sources of noise are annoying simultaneously), but I think for best results you need two antennas that are very close in design. You should have plenty of room up thar in the hills for that!

Bruce Jensen

If you remove the whip and configure the internal shunts
appropriately, the 1026 effectively becomes the 1025. Interestingly,
that little whip works quite well if no other antenna is available.

Bill Frost's reply:

I just checked with our engineering department and they were not aware of a
Grundig Satellit 750, so I guess we were not involved.

This is, I believe, a record price on Ebay for
a HQ-180 series receiver (assuming the winning
bidder went through with it)

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=180202273605&ssPageName=STRK:MEWA:IT&ih=008

- Certainly looks like an interesting radio.
- The real signal meter and rotatable AM antenna
- definitely harken back to classics like the RF2200.

- ? Wonder what the tuning resolution is. ?

Anyone Got The Answer as to the "Tuning Resolution"
of the new Grundig Satellit 750 Radio for both :
Shortwave AM __ kHz ?
Shortwave SSB __ Hz ?

Hello - Someone get on the Telephone and give Eton Corp
[Grundig Radio of North America] a Call and Get-the-4-1-1
on the Tuning Resolution of the Grundig Satellit 750 Radio.

- A $300 price tag will require more than good sounding audio.

i want to know ~ RHF

Of course, considering Tecsun's talent for imitation, Drake's direct involvement may not be necessary. Although the DSP incorporation, and the brands Tecsun has been building for, suggest that Tecsun may be coming into its own as a producer.

If build quality and quality control have improved, I may be interested in this one.

I"ve noted, too, that Lex/Tecs/Pass/dig/sahn has moved away from Tecsun as an exclusive manufacturer since the acquisition by Eton. This

may signal a better range of quality products in the pipe.

Make a 12" loop of kite string, then make a small loop in that to go
around the knob. By moving your hands slightly you can work that knob
back and forth very easily.

CC,

(OT) : Ecaping SkyNet's Remote Neural Monitoring Global Satellite
Rays !

Remote Neural Monitoring (RNM) is now done throughout
the World and in every Country of the World via a Global
Network [SKYNET] using Satellite Rays.
http://en.wikipedia.org/wiki/Skynet_%28fictional%29
http://en.wikipedia.org/wiki/Terminator:_The_Sarah_Connor_Chronicles
The SkyNet Satellite Network is Sentience.

You can not excape SkyNet's Remote Neural Monitoring
(RNM) Rays by leaving Canada and moving to another
Country : So Stay In Canada.

The One-Way that you can 'Excape" SkyNet's Remote
Neural Monitoring (RNM) is underground in an old Iron
Ore Mine. Canada has plenty of these Anti-Remote
Neural Monitoring (RNM) resouces. So Stay in Canada.
http://www.ame.com.au/Countries%5CFe/Canada.htm
MAP - http://tinyurl.com/37sru4

Find an old Iron Ore Mine -or- better yet Get-a-Job
in an Iron Ore Mine. The SkyNet Remote Neural
Monitoring (RNM) Satellites Rays can not penatrate
the Iron Rich Rock and Soil around an Iron Ore Mine.
http://en.wikipedia.org/wiki/Iron_Ore_Company_of_Canada
http://www.steelonthenet.com/links/mines.html

Until them use an "AFDB" to Stay-Out SkyNet's
Remote Neural Monitoring (RNM) Satellite Rays.
Aluminum Foil Deflector Beanie (AFDB)
AFDB - http://zapatopi.net/afdb/
An Effective, Low-Cost Solution To Combating Mind-Control
HOW TO : AFDB - http://zapatopi.net/afdb/build.html

WARNING : Against the Long term Use of AFDBs
Aluminum Foil Deflector Beanie (AFDB) are still
Susceptible to SkyNet's Frequencies and these
Dangerous RAYS can "Zap" Your Brains !
http://groups.google.com/group/rec.radio.shortwave/msg/9b260fb0b38afd68
For Above-the-Gorund Long Term Protection from
SkyNet's Remote Neural Monitoring (RNM) Satellite
Rays it is recommended that Individuals us a stronger

As I mentioned in earlier post (did you not receive it?) I have the 1026, and it works pretty well. Here is the text:

>>My MFJ-1026 works very well for some kinds of noise, with two rather dissimilar external antennas attached. It gets rid of most of the noise that I hoped it would, that is, the continuous static and droning kinds of things (only one noise source at a time, however). It could probably get rid of lightining crashes and sporadic noise as well, but in practice the knob-twiddling required takes a tiny bit too
long for it to be effective; ANL and NB work better for those sources.

There is some minor internal diddling that must be done, explained in the manual, depending on your antenna configuration, but it is very easy and quickly accomplished. Some people install a switch to reverse the main and accessory antennas, and it is too bad that MFJ have not simply provided one. I will probably do this on mine eventually. There are plans for this on the web, IIRC, another very simple mod.

This unit also attenuates MW, especially at the low end; there is a specific component inside that can simply be crushed to eliminate this
attenuation if MW is high on your list of uses for this device. In fact, some like it just for that reason, because it is VERY effective at nulling strong stations so that weak ones can be heard underneath. I have tried this on several occasions, and have been astonished at how well it works.

I would get one again (maybe even two in tandem if two sources of noise are annoying simultaneously), but I think for best results you need two antennas that are very close in design. You should have plenty of room up thar in the hills for that! <<

I would add to the initial post that, the reason I think two similar antennas would be better is because you really want each of them to "hear" the same noise at roughly the same level and the same way. The ability to null that noise is optimized when the noise signals are about the same strength. Having said this, it is best also to have the antennas separated by a fraction of wavelength of interest, which is usually not a problem for most people.

Right now, I am using a DXUltra sloped multiband Dipole and a 45' random wire; these two are fairly effective together, but I think that two dipoles or two similar random wires would be even better - based on my limited experience, I think I could get some really deep, quiet nulls on pretty nasty noise with that setup. I just wish I only had one noise source!

Also, regarding that little whip - when I first got the device before putting up antenna No. 2, I used the whip quite a bit, and it amazingly did a pretty good job on 60 and 75 and 90 meters, which are real problem bands for me. If noise nulling is all you are interested in, rather than actually phasing antennas, then all you need for the accessory antenna is something that will "hear" the noise, and that little whip did fine job, at least here. It also heard the stations pretty well, given that it has a fairly strong preamp behind it :-)

I never tried the whip as a MW station nuller.

Maybe, that most of the (US) population doesn't have a clue
and the government is a bit worried about it?

My Brother-in-law said that his co-workers argued with him that the
only way you could get digital TV was over cable or from satellite.
If they use over the air TV now, boy, are they going to be surprised
a year or so from now.

Sure it does! It's for sale at auction.

Is the seller getting money for it? Yes.

When the hammer is dropped does the auctioneer often times say 'Sold!"? Yes.

Therefore a sale has been made.

I rest my case.

I'm surprised that none of Hillary's opponents have called her on being a 'carpetbagger' by running for Senator in New York. No family there, no connection, just that there was an opening and she thought she could win; -- pure opportunism (carpetbagging). I'm surprised the New York voters were so gullible. Just say 'No' to the Dragon Lady.

> * This 'becoming' Economic Recession has started in 2007
> and will increase in 2008.

Well, I'm glad you (and several of the big New York financial houses) realize that it is starting in '07. However, I hope you also appreciate the fact that recessions don't just happen overnight and that it has been a few years coming -- which might possibly mean that the current Administration deserves a wee bit of the credit.

> * By 2009 when Hillary is sworn-in as President People there
> will be US Citizens Waiting in Gas Lines and Standing in
> Food Lines.

Many predictions for $4.00 a gallon gas by this summer (and over $3/gallon as we speak), long before a new Republican -or- Democrat takes over. Again, seeing as this is occurring on -their- watch, don't you think the current Administration should take a bit of the blame? It's thoughtful of you to blame it on Shrillery, but the recession is starting NOW, long before she gets into office (if she ever does).

> The current Economic Recession in the USA has started in 2007
> and will increase in 2008 with the US Presidential Race.

Again, started in '07 and a long time coming before that. Who do you think might be responsible?

I'm no fan of Shrillery's, but I find it quite amusing for you to place blame on someone who may -- or may not -- be in office a year from now,

while blithely giving a free pass to those who have been in power for
the last seven years.

> Remember "ABbH" AnyBody but Hillary* in 2008 !

!!! Ron Paul in '08 !!!

As a disinterested observer and without taking sides in this Great
Debate, just how much 'paper trail' should be expected from something that:

a) happened around -40- years ago
b) in a foreign country
c) and occurred during a turbulent government take-over

Do you speak/read Spanish?

Do you have access to the 40 year old foreign newspapers? If so, have
you researched them?

No?

Well then, how do you know there -isn't- a 'paper trail'?

How does one get confronted *at gunpoint*, then is conveniently released to go about his/her business for 24 hours pulling a *Catch 22* on some f00kin hunta, then is picked up later on to be brought to the airport *at gunpoint*?

Lots of questions.

If of course it were all real.

Similarly, it's difficult to be defender of democracy, risking life
and property, when one has been removed, does it not?

Which was my point.

If one insists on claiming rights to risk of life and limb, as keeper
of the flame, one must remain in order both keep the flame and face the
risk.

The issue is not whether he left or was removed. The issue is
whether, by not being there, he can't claim great risk as defender of
democracy.

Because I long ago discovered that David 'Eduardo' was a pathological liar.

I just emailed another HQ-180 fan about that auction. I Have been watching these for some time now, and I think you sold one recently that did pretty well. I thought I paid way to much for mine at 495 locally! I had thought this one may go for 800-900. . Amazing.

Also remarkable how some positive published reviews on a used radio can affect the market price.

Dave

Sorry, you are confusing me with dxace1. We are two different individuals.

As I recall though, we both worked for the government, and we've both been to Djibouti.

Hi Glenn,

Just received this e-mail:

Hello Ron:

The future of CKZU [6160 kHz] is currently being evaluated. There is a distinct
possibility
that the operation could close. However a final decision has yet to be made, and

will depend in part on whether the FM application is approved and the
new service
is implemented. At this point a "wait and see" approach is best.

Thank you again.

They must have changed their mind since they put the add for the
Satellit 1000 behind the front cover of the 2008 Passport. No mention
of the G1 or 1000 on the Eton website.....but the E1 is still there.

The data is not flawed. In fact, a number of reserchers as well as Arbitron itself have done studies to determine the concentration of listenership in areas of different signal strenght. I participated with Arbitron and DataWorld in an overlay study of singnal contours vs. diary returns with follow up personal contact with diarykeepers to determine the ascription of listening entries in areas of a market served by many overlapping simulcasts. The premise of 95% of listening in the 64 dbu FM countour and in the 10 mV/m for AM was confirmed, and is the standard for that market which has over a dozen simulcast operations in it.

You are one of very few. In fact, ZIP code and diary analysis shows that listening to LA stations by residents of Ventura County occurs either while working in LA County or in areas where signal intensities are adequate. For AM, that mostly means within a mile or two of the coast; farther inland there is nearly no listening save to KFI.

<You amuse very easily in that case.

There is no interference inside the protected contours of any NY station. An FM is worth $150 to $300 million, and an AM from about $20 million to perhaps $175 million, and no owner is going to let any portion of the protected contour be subject to interference.

Again, you are judging by US standards the things that go on in nations that do not have, or for a period, do not have rule of law. A government like that can nationalize anything they want.

In Cuba, American mining, refining, hotel and package goods companies had all their assets nationalized in 1960. None have been recovered.

In Mexico, L&#65533;zaro C&#65533;rdenas nationalized foreign oil, rail and mining companies in the early 30's. None of these assets has been recovered to this day, over 70 years later.

And look at Bolivia's nationalization of the tin mines. Or Ecuador's nationalization of petroleum resources. The list is endless. And there has been no recovery. Venezuela has just nationalized the majority share of the petroleum industry. Several US companies did not want to work with the government, and abandoned their remaining interest and received nothing.

As I said, and you did not read, the Ecuadorian junta was modeled after the Peruvian one commanded by Gral. Velasco. It was not a rightist military movement, but of the extreme left. The whole idea of giving the stations away before they were nationalized was that a leftist "peoples" government would never, ever, in Latin America, do anything against a union, cooperative or leftist organization. Such a move would have caused the entire labor, farm workers and cooperative movements to have risen in protest. And that was why I did it.

And, more to the point, there was no "fight." There was opposition in the
press and the political parties, but much of that was silenced by a good
beating, a convenient disappearance or imprisonment.

I was confronted and told I had to leave; as I have said for the period up to the next flight, I was escorted by my new buddies with rifles. As I also said, my colleague at El Tiempo was disappeared, the producer of a major TV station imprisoned (he escaped with the help of a tractor), etc., etc. A month or so after I left, the son of Quito's largest department store, Jaime Briz, my neighbor, was kidnapped... his head was thrown into the family's patio a few days later. Those were not nice times.

Oh, I didn't say they're "letting" it happen. I simply said it's
happening. I'm glad we got this misunderstanding out of the way.

I took the risk by speaking out while there. The effect of doing so was the
loss of everything I had, including the right to live where I wanted to
live.

As I said, and you did not read, it would be trivially easy for the
govt to claim that it had to intervene due to financial wrongdoing
within the cooperative--or for one of a thousand other convenient
reasons. Trumping up these kinds of excuses is second nature to small,
conniving minds, as you know perhaps better than anyone. Juntas aren't
typically sticklers for due process. You just weren't in much of a
position to see all of this, being on your knees most of the time.

>
> Because I long ago discovered that David 'Eduardo' was a pathological
> liar.

With absolutely no proof.

What you have done is trumped up insignificant issues and used them to
support your claim. For example, the NAB's error of incorrectly printing my
title in the program for a convention seminar was seen by you to be evidence
of lying about my title. Despite demonstrating to you how the error occured
and how the title, in fact, did not exist, you laid claim to your belief
that there was some kind of chicanery or deceipt involved.

Even more amusing was the insistence that I could not have editied my high
school's paper since I was but a Sophomore when I became editior... yet the
totally verifiable fact that in that year, there was no Junior or Senior
class fell on your deaf ears. My class was the first to "extend" the school
from 1st to 9th grade to 1st to 12th grade, meaning that for that first
year, the "High School" had only one grade. You could verify that with an

e-mail, but didn't. You preferred to trump that realtive triviality into a
case to demonstrate your claim I had lied... which is not so.

And on and on with the same sort of thing, none of which proved anything.

You got out alive by informing on others, who quite likely did not
survive, by bribing officials and by doing "favors". You aren't
fooling anyone.

The 'Item' is being "Sold" at Auction.

The 'Item' is being "Placed" at Auction.

Each is understood to mean the 'Item is : "For Sale"

~ RHF

I don't think being a stool pigeon counts as "speaking out", Tardo.
Even though the effect of doing so was getting out alive.

That is funnier than your usual crazed stuff about all NYC radio stations
being interfered with (men in black, anyone?)

How could one who was in opposition to the government inform on anyone?
Since the "opposition" was printed every day in the paper and broadcast on
radio and TV, there were no secrets as to who was in the opposition and thus
nobody to inform on.

Lol. Face it Tardo, you were caught in your lies. I know being caught
was traumatic for you, but look on the bright side: no one else has
given it much thought since it happened. The only person worked up
into a lather is you.

I understand the theory as its pretty straight forward and simple.

So you have a plausible theory and some empirical data that appears to
validate it but something has gone wrong. Might be a problem with the
data collection process.

If the problem is good contact between the metal wiper and the carbon
or plastic resistive element, a little conductivity might not be a bad
thing.

>I strongly recommend using the appropriate Caig product (available at Radio

From the directions on their web site, "CaiLube MCL". I found it at the
local Fry's. MG Chemical's "Nu-Trol" works about the same. Lubricating
control cleaner seems to be the generic name.

I reserve the De-Oxit type stuff for cassette tape unit "Record"
switches, leaky battery holder terminals, VCR Mode Switches,
intermittent phone jack cutout switches, and the like where the
problem is cruddy metal-metal contacts.

> OK so from this can we 'infer' that the new Grundig Satellit 750
> Radio
> performs in some respects better than the the Eton E1 Radio and the
> Sangean ATS-909 Radio ?

We can infer the someone posting on DXing.info as "Jin Changge" is making some pretty tall claims regarding the Satellit 750, and offering nothing substantive to back it up.

And sure, potentially better than the Eton E1 in some respects: it has an RF gain control, a rotatable MW antenna, and a cell phone charger. Oh, there's also the inclusion of the Air Band...a great cure for insomnia.

>
> Plus the Eton E1 Radio is considered to perform better than
> the Grundig Satellit 800 Millennium Radio in most aspects.

Sure, in most but not all respects, the Eton E1 performs equal to or better than the Satellit 800.

> -ergo- The new Grundig Satellit 750 Radio should also perform
> better than the Grundig Satellit 800 Millennium Radio in most
> aspects.

???? Now there's some flawed reasoning. Try again.

A look at the specs sheet and the front panel of the radio certainly doesn't suggest that this radio is going to offer superior performance to the Satellit 800 or the Eton E1.

Sure, the MW antenna is a plus. Perhaps it might offer superior audio to the E1, but I'm guessing it won't be on a par with the Satellit 800. Looks like it'll have only two bandwidth filter settings, as opposed to three on the Sat 800 and E1. No indication of passband tuning. No indication of synchronous selectable sideband. I'd be surprised if it offers the 10 Hz tuning resolution that the E1 offers. Interestingly, the Universal website makes no mention of the "advanced DSP technology" touted on the Eton webpage for the Sat 750. I'd be really interested to hear from the folks who've dropped by the Eton booth at CES 2008 as to what the Eton folks have to say about the DSP technology that's incorporated into the Sat 750.

It looks like a potentially interesting radio. And it could well be that this will emerge as a portable of choice for the MW DXers, given that some though has obviously gone into making this radio attractive

to that segment of the market. But looking over the pictures, I'd be surprised if this radio offers performance approaching that of either the Sat 800 or Eton E1. And perhaps this is why that opted to choose a model number designation that's below 800 rather than above.

The rotatable ferrite bar antenna, cool styling and the potential for pleasant audio could prove nice advantages for this radio. I'd like to see some elaboration on the "advanced DSP technology" that is purportedly incorporated into this radio.

I'm guessing that in some time from now, Eton is going to re-introduce the Eton E1 as the Grundig Satellit 1000 or G1. In looking through the Eton website, it's interesting to note how the offerings under the Eton branding are shrinking, while those under the Grundig name are expanding.

In any case, I hope the Sat 750 proves to be a top-notch performer (and one that sees significant mark-downs!).

Regards,

Junius

Well, according to the Passband.com article, Eton's Walter Hess confirmed only that the Eton E1 was being discontinued. He was evidently not in a position to comment on the Grundig Satellit 1000 / G1.

As the shortwave radio selections on the Eton website seem to indicate a shift away from Eton branding toward Grundig branding, my guess is that the Eton E1 will soon re-emerge as either the Grundig Satellite 1000 or G1.

813. The 4-1-1 on the "Silicon Scientific" # 75498 Multi-Band Radio

Good. It was an over-priced and over-hyped Chinese-PCB's-made
assy-in-India-and-the-phillipines piece of crap. The Eton was
almost as hyped-over as was it's predecessor the Sony 2010
which was another medicore radio.

It's a Grundig in name only. Inside it's just another piece of Chinese
made crap. Just like the consumer products labeled as RCA, Emerson,
Memorex, Jensen, Phillips and others. All now Chinese made crap
which the Chinks have purchased the rights to use the (former) brand
names upon. Ope them up and they are utter garbage with thru-hole
components mounted sideways, SMT chips that were obviously
hand placed and PC Boards which are utterly filthy with solder flux
residues and bits of plastic, metal and other foreign materials
shavings lying all about inside. Pure junk. It's no wonder why driving
4 miles to the office on trash day I see almost half-a-dozen DVD
players, vaccum cleaners, VCR's and other assorted consumer
electronics
most of which barely a year or two old sitting by the can on the curb
waiting to be picked up by the scavengers or the trash truck. The most
I
counted once was 9 DVD players all stacked up between 5 houses
sitting on the curb waiting to be crunched into little bits by the
gaping maw
of the rear of the municipal waste truck. Keep your old stuff folks.
The new stuff is poorly designed and manufactured chinese crap that
breaks
within 8 months of purchase. Some of these folks will wish they never
tossed away their old CRT monitors. I've also seen adleast 3 Dell
flatscreens
on the curb already also. Grabbed one, made in China, Power unit PCB
all SMT looks like it shorted out and burned thru, un-salvagable.

You definitely live up to your handle.

And you are just a little late to the review party. The specifications
and reviews from people that are not flakes such as your self have
written quite the contrary. Now go back to watching the radio little
Troll.

US businesses have pumped billions into the Chinese economy and the
quality has improved and will continue to improve. We can't compete with
slave labor wages in China. Blame Washington.

It was a good question, with two good answers.

Now try something like DX Summit to find the callsign and frequency of
that sought after station, and whether you can hear him too.

I don't believe I ever *insisted* that you were not the editor 'Tardo, the question was about the date(s) that you were the editor. In the beginning when I questioned that date, which did not jive with your story, you conveniently tried to hide the date that was on the document displayed on your website.

Remember, 'Tardo?

Nice try.

Thanks to all who have replied.
It looks like the 808 will be out in the trash.
Now it's time to work on the birthday wish list!

Regards.
Mark.

hi
We are the biggest wholesale suppliers.....We have a lot of very nice quality merchandises with the very special price

We are wholesaler of Nike Jordan and Other Shoes in China. We are big Shoes Manufacturer in China. We supply many kinds of Shoes, such as Nike Shoes, Jordan 1-22, Air Jordan, AF1, DUNK, Air max series etc. Most of them are in stock and can be supplied surely on time. All these shoes are packed with original-boxes and cards. So we can offer series of brand Nike shoe with the lowest price and high quality, We are looking forward to doing business with you
Very fast and safety delivery by TNT, UPS, DHL OR EMS, we can delivery within 24 hours upon receiving your payment. It is very safe door to door service, never get problems with customs.
There are various and latest styles for your choice in our website.
Our main markets are the USA, the UK, Germany, France, Italy, Greece, Jordan, Australia, Canada,Sweden, and many other countries in Europe and the Middle East regions.

our brands , Ipod nano 1G 2G 4G 8G 30G 60G ,Ps3 ,psp ,wii,are also available for sale at cheaper rate. They are all brand new with full accessories and 1 year international warranty, unlocked, work effectively with any network worldwide and come with user manual guide in various languages.
Ipod nano 1G 45$,2G 55$, 4G 65$,8G 70$, 30G 100$,60G 120$
ps3 60GB 300$ 20GB 180$
psp 150$
wii 200$

We have all models of nokia
NOKIA N95 $250
NOKIA N93 $190
NOKIA N92 $160
NOKIA N91 $170
NOKIA N90 $180
Nokia N70 $165
NOKIA N73 $180
NOKIA 7600 (UNLOCK) $150
Nokia 8800 Sirocco Gold Edtion -$250

Sure hope so. 100hz would be a minimum.

100 Hz would be a disaster IMO for SSB.

I'm actually looking forward to the 750 and hoping it delivers good performance with well thought out controls. A through review will help to separate some of the nonsense (negative and positive) that surrounds this latest radio. The Eton E1 was a fine radio in many respects, but I think it suffered from feature overload. The manufacturer focused electronic controls but scrimped on the AM antenna. I'll probably look for the Chinese branded version of the 750 since that name is truer to it's roots.

There is an unfortunate amount of unsubstantiated salesmans hype about the 750 radio being repeated by one individual on Dxing.info. It's so incessant I wonder if he is not connected to either Eton or the manufacturer.

100hz in my experience delivers listenable if not perfect audio for
voice ssb. Two radios i'm familiar with, the Sony 2010 and Panasonic
RF B600 both used that resolution and both were perfectly capable of
producing good sounding ham and other voice ssb signals. 10hz or 1 hz
would allow selectable sideband listening to AM broadcasts, but my
guess is that this radio will not have that level of tuning
resolution.

Well, no don't blame Washington for the success of manufacturers in low cost third world countries. Blame growing demand from consumers like you and me for the cheapest price consumer goods. If we were willing to pay a premium for USA made goods then the third world manufacturers would not have a market for their goods.

Bart, do you know if that 6 dB loss is even with both antennas receiving the desired signal? One would think that the *very approximate* 3 dB gain provided by the second antenna would help offset this loss...

I think that makes two 180's I have seen in recent years
going way above the $1,000 mark. It's interesting to
watch these as obviously a lot depends on the condition.

But I am amazed at this level, I would expect only
near NIB to achieve....

Well, no don't blame Washington for the success of manufacturers in
low cost third world countries. Blame growing demand from consumers
like you and me for the cheapest price consumer goods. If we were
willing to pay a premium for USA made goods then the third world
manufacturers would not have a market for their goods.

If you can convince me that Uncle Sam isn't obsessed with taking bribes from
big business then ok. Uncle Sam was bought out so big business could move
manufacturing elsewhere to use slave labor and then ship their products back
here to sell. Thereby putting MANY Americans out of work.

They also fought against lowering the speed of phonograph records from
78.66 RPM to 33.33 RPM.

My definition of audiophile is someone who spent so much money on
hardware he can't really enjoy the tunes.

True the 2010 was poorly rendered, but I see no long list of "fixes"
here for the E1, like we had for the Sony FETs always frying.

"Uncle Sam" is big business. That's what modern fascism is. Benevolent dictators, surrounded by fat gay guys, running the world as if it was a business.

858. A truly remarkable portable

Newsgroup: rec.radio.shortwave
Date: 2008-01-10 18:21:15 UTC
From: plimmer@telkomsa.net
Message-ID: <782db358-e086-46ad-9482-141b0e31bde7@n22g2000prh.googlegroups.com>
Source record: 133676

I have owned my Redsun RP2100 for eighteen months now and it continues to work superbly. Everything keeps going right! I have just returned from an 800 mile trip inland to Johannesburg, staying overnight on farms along the way there and back.

Reception on MW band was superb off only the internal ferrite rod: 1521 Saudi Arabia, 1323 BBC Cyprus, 1557 Nice, France all about 4,500 miles/7,000 kilometers away.
Then also 1566 AIR Nagpur, 1377 CNRI China and 1458 Comores
But the big juicy cherry was getting 1377 Lille, France and 1395 "Big L"
Holland some 5,500 miles/9,000 kilometers away. Truly amazing for a portable with only the internal ferrite rod. These catches are normally only associated with beverage antenna's, high end communications receivers and from a favourable DX site. HF SW reception left nothing to be desired either and FM from the distant stations was also amazing. A very remarkable portable for the modest $100 price.

I have also own a GE SRIII but it;s performance comes nowhere near the RP2100.

On the second night out, I unpacked the Redsun for a nights DXing and to my horror and panic it was totally dead. I checked the batteries and they were good and nearly new, pushed the reset button, but nothing at all = dead!!!
Now I was completely dumbfounded but had a swig of beer and a smoke and tried to relax and think this through. Could the bumpy roads have caused it to go dead? I didn't think so. More checking and I finally stumbled on the problem. Whilst packing and unpacking the battery compartment switch for "D" batteries OR "AA" batteries had become switched to AA. I switched it back to D and suddenly the radio came to life again = huge relief!!

So if you want a great portable at a modest price, some dealers are offering
great deals. Go buy one, you won't be disappointed with this fine radio,
wonderful reception and good audio.

Possibly the 2000 differs from the DX750, but I don't see a BFO in
this picture. Lower left shows a Bass control. There is a USB/LSB
button which I assume switches between modes.

We must be looking at different radios because lower right on the unit
I listed shows a squelch control. Maybe there is a difference between
the domestic and export models.

Yeah, sure looks like it says 'SSB BFO'

868. Clear 'Differences' Between the Tecsun S-2000 Radio -and- Grundig Satellit 750 Radio

- The picture you're looking at doesn't go low enough.
-
- http://gizmodo.com/photogallery/etonsatellit750/
-

DPM - Yes - There is a 'difference' between the Chinese domestic
Tecsun S-2000 Radio and the re-badged Grundig Satellit 750 Radio.

Clear 'Differences' Between the Tecsun S-2000 Radio
-and- Grundig Satellit 750 Radio

The Chinese 'domestic' Tecsun S-2000 Radio
http://hkradioer.googlepages.com/s200l
has Three Controls on bottom-right-front :
* RF Gain {Works for the AM/MW and Shortwave Bands ?}
* Pre-Selector {Works with the Shortwave Bands ?
* Squelch {Works for the AIR Band ?}

NOTE - The Arrangement of the Function Buttons around
the Tecsun S-2000 Radio's center-front Numeric-Key Pad

The re-badged Grundig Satellit 750 Radio for Export
http://gizmodo.com/photogallery/etonsatellit750/1000422301
has Three Controls on bottom-right-front :
* RF Gain {Works for the AM/MW and Shortwave Bands ?}
* Squelch {Works for the AIR Band ?}
* SSB BFO {Answer to the AM-Sync ? Question "NO"}

Please also note the [SSB] Button with USB/LSB
http://gizmodo.com/photogallery/etonsatellit750/1000422293
? Question - Is the simply Single-Side-Band (SSB) to be used
in conjuction with the SSB BFO Control -or- Is this a Selectable
SSB Button with a USB and LSB feature ?

NOTE - The Different Arrangement of the Function Buttons around
the Grundig Satellit 750 Radio's center-front Numeric-Key Pad
http://gizmodo.com/photogallery/etonsatellit750/1000422293

RANT # 1 - With Scanners - Who Needs the AIR Band in a
Shortwave Radio ? - RANT # 2 - Who Wants The AIR Band ?
IMHO - The 'better' designed Grundig Satellit 750 Radio would
http://gizmodo.com/photogallery/etonsatellit750/1000422341
have had Three Controls on bottom-right-front :
* RF Gain {Works for the AM/MW and Shortwave Bands ?}
* Pre-Selector {Works with the Shortwave Bands ?}
* SSB BFO {Answer to the AM-Sync Question "NO"}

the devil is in the details ~ RHF
.

869. Want to buy / trade: Monitoring Times

Newsgroup: rec.radio.shortwave

Hello

I want to buy or trade for the following issues of Monitoring Times:
1989 Feb
1991 Aug
1995 Nov
I have two boxes of duplicates from ca. 1992-2003.

Even if you have just one of these issues, I would like to hear from
you. Please respond with condition and price shipped to Minneapolis,
(ZIP MN55424), or with a wants list.

Thanks and 73

Yeah, I see your point now. I wonder if this value holds for the MFJ units as well?

Thanks for clearing that up. I kinda figured he was looking at another picture and not the one I posted.

So for purchasers of the domestic version they get ssb capability but no bfo? Or finer tuning resolution maybe?

The air band is all but useless. I would trade it for true usb and lsb and finer tuning resolution. Now that the devil has shown himself in the details it is clear there are way too many unanswered questions about either the domestic or export version of this radio to get very excited.

I have a Lowe 250 in mint condition, its boxed and has all that came with it when new.
Also a Lowe 125, also in mint condition, boxed etc.

I am after a decent portable shortwave radio as at the moment I do not have a portable at all and with summer arriving I thought I would get one to take on holiday with me.

I would want something that is capable of receiving ssb please (or a wide range scanner with ssb would do fine)

I live in UK but will gladly ship worldwide.

cheers
Robert

I have an AOR but I don't want to get rid of it. I know the ICOM and
the Yaesu are pretty useless for HF. I've heard good things about
Yupiteru, but no personal experience. I can copy good HF on my 8200
MK3, using a Hustler discone on the roof.

I see the issue.

In RadioGuy's link, the radio has, from top to bottom,

RF Gain
Preselector
Squelch

In Peter's, the Eton has

RF Gain
Squelch
SSB BFO

Two different radios.

==========

I was never comfortable with the quality control in manufacturing of the E1 and resisted purchasing one. It maybe a very fine reciever but I jut do not like a history of questionable construction and a large number of failures as demonstrated in this NG and elsewhere. Too bad.

Both the Grundig and Eton names will suffer especially as their equipment is built in China that simply does not have any substantial quality to any of their produced products. I trust products made in Japan, Malaysia and to a degree India before China, but would much rather see same made in the US or Canada.

I opted for the Icom R20 instead.

- The air band is all but useless.

I would agree especially when you can only tune-in
one Frequency at a time. Most scanners will do a
much better job by covering several Frequencies.

- I would trade it for true usb and lsb and finer tuning resolution.

Me Too !

- Now that the devil has shown himself in the details it is
- clear there are way too many unanswered questions
- about either the domestic or export version of this radio
- to get very excited.

Well the Grundig Satellit 750 Radio is most likely the 'major'
new Portable AM/FM Shortwave Radio for the North American
Consumer Market in 2008.

At the $300 Price Point and with all of it's features the Grundig
Satellit 750 Radio will be the "Got-To-Have-It" NEW Radio for

My-Radio-Shack by many Shortwave Radio Listeners in 2008.

~ RHF

891. Jesus in the Quran

Newsgroup: rec.radio.shortwave
Date: 2008-01-11 06:39:20 UTC
From: small giant <mutawafayez@yahoo.com>
Message-ID: <e4c1cc6f-f9a7-4458-9724-9dcf2dca2c6a@u10g2000prn.googlegroups.com>
Source record: 133759

Introduction
The Qur'an tells us a lot of wonderful things about Jesus. As a result, believers in the Qur'an love Jesus, honour him, and believe in him. In fact, no Muslim can be a Muslim unless he or she believes in Jesus, on whom be peace.

The Qur'an says that Jesus was born of a virgin, that he spoke while he was still only a baby, that he healed the blind and the leper by God's leave, and that he raised the dead by God's leave.

What then is the significance of these miracles? First, the virgin birth. God demonstrates his power to create in every way. God created everyone we know from a man and a woman. But how about Adam, on whom be peace? God created him from neither a man nor a woman. And Eve from only a man, but not a woman. And, finally, to complete the picture, God created Jesus from a woman, but not a man.

What about the other miracles? These were to show that Jesus was not acting on his own behalf, but that he was backed by God. The Qur'an specifies that these miracles were performed by God's leave. This may be compared to the Book of Acts in the Bible, chapter 2, verse 22, where it says that the miracles were done by God to show that he approved of Jesus. Also, note that Jesus himself is recorded in the Gospel of John to have said, "I can do nothing of my own authority" (5:30). The miracles, therefore, were done not by his own authority, but by God's authority.

What did Jesus teach? The Qur'an tells us that Jesus came to teach the same basic message which was taught by previous prophets from God--that we must shun every false god and worship only the one true God. Jesus taught that he is the servant and messenger of that one true God, the God of Abraham. These Quranic teachings can be compared with the Bible (Mark 10:18; Matthew 26:39; John 14:28, 17:3, and 20:17) where Jesus teaches that the one he worshipped is the only true God. See also Matthew 12:18; Acts 3:13, and 4:27 where we find that his disciples knew him as Servant of God.

The Qur'an tells us that some of the Israelites rejected Jesus, and conspired to kill him, but Allah (God) rescued Jesus and raised him to Himself. Allah will cause Jesus to descend again, at which time Jesus will confirm his true teachings and everyone will believe in him as he is and as the Qur'an teaches about him.

Jesus is the Messiah. He is a word from Allah, and a spirit from Him. He is honoured in this world and in the hereafter, and he is one of those brought nearest to Allah.

Jesus was a man who spoke the truth which he heard from God. This can be compared with the Gospel According to John where Jesus says to the Israelites: "You are determined to kill me, a man who has told you the truth that I heard from God" (John 8:40).

The Virgin Birth of Jesus
Muslims believe in the virgin birth of Jesus. When the angels announced to Mary (peace be upon her) about Allah's promise that she will have a son, she was surprised, since she was a virgin. "How can this be?" she thought. She was reminded that it is easy for Allah to create whatever he wills.

She said: My Lord! How can I have a child when no mortal hath touched me? He said: So (it will be). Allah createth what He will. If He decreeth a thing, He saith unto it only: Be! and it is (Qur'an 3:47).

It is not difficult for Allah to do anything he wants. He can create a child with both human parents or only one. No miracle is beyond His power. After all, He had created Adam (peace be upon him) from neither a man nor a woman. He created the rest of us from both man and woman. What is so hard if Allah decides to create a human being from a woman only? He only commands "Be!" and it occurs.

Some people think that since Jesus, peace be upon him, had no human father then God must be his father. The Qur'an rejects this view. The position of Jesus with Allah is comparable to the position of Adam with Allah. Just because Adam had no human parent does not mean we should call him the Son of God.

Lo! the likeness of Jesus with Allah is as the likeness of Adam. He created him from dust, then He said unto him: Be! and he is. (Qur'an 3:59).

According to the Qur'an, everyone except Allah are His servants.

And they say: the Beneficent hath taken unto Himself a Son. Assuredly ye utter a disastrous thing, whereby almost the heavens are torn, and the earth is split asunder and the mountains fall to ruins, that ye ascribe to the Beneficent a son, when it is not meet for (the Majesty of) the Beneficent that He should chose a son. There is none in the heavens and the earth but cometh unto the Beneficent as a slave. (Qur'an 19:88-93)

The Miracles of Jesus
According to the Qur'an, Jesus, on whom be peace, performed the following miracles by Allah's leave:

1. Spoke while he was only a baby.
2. Healed those born blind.
3. Healed the lepers.
4. Revived the dead.
5. Breathed life into a bird made of clay.

In the Qur'an Allah quotes Jesus, peace be upon him, as saying:

Lo! I come unto you with a sign from your Lord. Lo! I fashion for you out of clay the likeness of a bird, and I breathe into it and it is a bird by Allah's leave. I heal him who was born blind, and the leper, and I raise the dead, by Allah's leave. And I announce to you what you eat and what you store up in your houses. Lo! herein verily is a portent for you if you are to be believers.
And (I come) confirming that which was before me of the Torah, and to make lawful some of that which was forbidden unto you. I come unto you with a sign from your Lord, so keep your duty to Allah and obey me. Lo! Allah is my Lord and your Lord, so worship Him. That is a straight path. (Qur'an 3: 49-51).

Again, in the Qur'an Allah tells us about the situation on the Day of Judgement:

In the day when Allah gathers together the messengers and says: What was your response (from mankind)? they say: We have no knowledge. Lo! Thou, only Thou art the Knower of Things Hidden.
When Allah says: O Jesus, son of Mary! Remember My favour unto you and unto your mother; how I strengthened you with the holy Spirit, so that you spoke unto mankind in the cradle as in maturity; and how I taught you the Scripture and Wisdom and the Torah and the Gospel; and how you did shape of clay as it were the likeness of a bird by My permission, and did blow upon it and it was a bird by My permission, and you did heal him who was born blind and the leper by My permission . . . (Qur'an 5:109-110)

Not all of these miracles are recorded in the canonical gospels, the four gospels contained in the Christian Bible.

The fact that Jesus spoke while he was yet a baby is not written anywhere in the Bible. This should not be surprising, because none of the Gospels can claim to recover every single event in the life of Jesus. Instead, the gospel According to John seeks to emphasize that the events were too many to record.

Similarly, the miracle of breathing life into a bird made of clay is not attested by the Christian Bible. This too should not make us wonder. It is obvious that the writers of the gospels could write down only the tradition that was available to them. Furthermore, they could not write down everything they knew about Jesus for they were writing on papyrus material that were very limited in length.

What is worthy to notice here is that the Prophet Muhammad, may peace and the blessings of Allah be upon him, was honest enough to promulgate this information about Jesus. The religion taught by God through Muhammad would deny the divinity of Jesus. Any human being, therefore, who wished to deny the divinity of Jesus would have tried to belittle Jesus. Since Christians looked upon the miracles of Jesus as a proof of his divinity, we might expect that any human being who tries to deny the divinity of Jesus would not have informed people of

miracles not previously known to them. He might have even tried to deny some of the miracles recorded in the canonical gospels. On the other hand, the prophet Muhammad honestly conveyed the message delivered to him from Allah. (May the peace and blessings of Allah be upon him.)

Allah tells us the truth without fear. Human beings trying to win followers tell us only what is conducive to winning us over. They usually withhold information that could lead to opposite conclusions. On the other hand, Allah informs us about the miracles of Jesus even if people use this information to support their prior commitment to the doctrine of the divinity of Jesus. Allah does not need to win worshippers. Those who worship Allah does so for their own good. And those who worship false gods do so to their own detriment.

What Allah emphasizes, though, is that the miracles of Jesus do not prove he was divine. The miracles he performed were a sign, a proof, that he was God's messenger. He performed them with God's help and permission. Those who use his miracles as proof of his divinity would choose to forget the following sayings of Jesus:

I can of my own authority do nothing. (John 5:30)

They also forget the declaration of Peter:

Jesus of Nazareth, a man approved of God among you by miracles and wonders and signs, which God did by him in the midst of you, as ye yourselves know. (Acts 2:22 KJV).

These passages suggest that Jesus did not do miracles on his own. These, rather were accomplished by God's leave. Allah reminds us of this. Jesus also constantly repeated to his audience that the miracles he performed were by God's leave.

Cross-posted to: rec.radio.shortwave, rec.radio.scanner

It is Fri, 2:18am (0718z)
I believe I am hearing Gander on 6577 kHz which would be unusual.
Usually that freq is a MWARA CAR-A Caribbean Area freq used by
stations for Barranquilla, Boyeros, Merida, New York, Panama, Piarco.
Reception is not the best and the voice is a bit muddled; but maybe
some MWARAs have switched.
One of the flights was a "World ###" flight, which I often hear on
the Caribbean MWARA. It might just be a poorly pronounced "Merida" I
am hearing.
Anyone else sharing the wee hours with me tonight and listening in?

ooo, don't agree there. this is the 2010's biggest design flaw I think. 20 hz I think is about the minimum. Why Sony did not put a fine tune control on that radio is a mystery. I can't listen to SSB on that radio.

That's one of the real oddities IMO. The Sony 2001 had fine tuning and
then the 2010 didn't. I agree absolutely, 20 Hz minimum!

897. Differences in Sony 7600G and 7600GR (sync detection)

I've noticed that no 2 are alike. The alignment for sideband symmetry
is especially troublesome. Not impressed.

Dear Sir,

I own seven examples of these radios: two '7600Gs and five '7600GRs, all purchased new (from Universal and Amazon) between 1998 and 2005. While the feature sets are different between the two models (the '7600GR being superior), the overall reception and the synchronous detection circuits are absolutely identical in performance.

I have heard of some sync alignment problems with this model but most of them seem to occur with either early examples of the '7600G (which had quite a bit of teething pains when first introduced in 1994) and examples of the '7600GR bought used, especially those bought from from private individuals on an online auction site.

This opinion is, of course, based solely on what I have read. While I am certain that there may have been a few '7600GRs, bought new, which may have had some problems (just like any other item made in this world), I believe this number is VERY small and that is based upon my own personal experience over a number of years. Thus I have had no personal experience whatsoever with any problems with any of these radios which, in my opinion, are built exceptionally well and will hold up very well indeed IF GIVEN REASONABLE CARE and that includes the performance of the synchronous detection circuit which is spot-on on all of my units. It is my opinion (and my OPINION only) that many of these radios being sold on auction sites have NOT been given proper care - and that is why the owners are selling them. It would seem very strange that I should buy so many over several years (different lots) and not have any problems at all but others claim to have had them. Surely, while a few people might possibly have gotten a defective new unit, this would be taken care of under warranty. That is why I feel that these used units have been given substandard care and why a new owner (P. T. Barnum said it all!) might think poorly of the radio when, in fact, it is not the radio's fault at all, the fault lying with the previous owner.

If I were you, I should be VERY careful in buying a used unit UNLESS you personally know the seller and his/her habits in taking care of his/her possessions. After all, the price of a NEW one, complete with a one-year manufacturer's warranty and a dealer who wants your future business, is only about $150.00. If you can't afford that just now, save up until you can. If you can afford some money now for a used one, you need only save up the difference between what you have now and the price of the new one.

I hope the above is of some use to you and that you will carefully
consider my comments (which, again, are only MY opinion - others may
and will disagree).

I wish you the best of luck.

Joe

G'day Guys,

I originally caught RdP Radio Portugal on 11825 khz, but was very faint and had to use USB as AM had a servere HUM/BUZZSAW. - Listen Here : http://ustream.tv/recorded/QiG4Ga5NCKPUl16WWwmuPUOrWWsJHRGQ

But when I went to 9795 to confirm it was RdP Radio Portugal I got a nice clear clean signal :) - listen here : http://ustream.tv/recorded/J.Qvbc6gf1NeChUyWRczqKSzIV5YBH78

Its a football match and boy does the commentator GO OFFF when a GOAL is scorred :)

Station ID 2116 UTC :)

While I try to avoid responding to off topic subjects, I just can't restrain myself.

I strongly suggest that anyone wishing to understand the current world 'mess'
take the time to read the Qur'an (AKA Koran) and study the history of Islam.

Objective reality suggests a somewhat different viewpoint.

Hint; look up "dhimmis", the legal status of Jewish and Christian subjects.
under Sharia Islamic law.

The truth is a little uglier then mutawafa would suggest.

I read the Koran at least once a every other year and have since I took a course
in "Comparative Theology" during my first year of college. The truth is rather
strange.

Terry

The E1 is being dropped but NOT the E1-XM. Check out the link below.

http://www.passband.com/2008/01/

910. Eton E1 (in some form or another) to be retained in Eton's product line

Newsgroup: rec.radio.shortwave
Date: 2008-01-12 07:08:52 UTC
From: junius <junjunius@yahoo.com>
Message-ID: <3eded839-f53b-4f92-8b48-1bdf8961e22d@v46g2000hsv.googlegroups.com>
Source record: 133778

http://www.passband.com/eton-retains-e1-xm-drops-e1

Interestingly, the Passband.com article states that the E1XM is to be retained and the E1 discontinued. Yet, there have been a number of folks on the Yahoo E1XM group who have called Eton enquiring as to this matter and who were told that it was the E1XM that was being discontinued, while the E1 (non-XM variant) was to be retained in the product line. I guess this story will require a bit more time before the facts are entirely sorted out.

In any case, the Eton folks really need to get a consistent story out, one way or the other. And they should've ensured that there was a consistent and internally understood position on this prior to CES 2008. As it is, the Eton E1 / E1XM discontinuation bit was presumably spawned from a comment made by an Eton rep at CES 2008. As result, for a wide range of radio enthusiasts in various online fora, the discontinuation story was just as big a news item as the Sat 750 unveilling. And given the apparent feature omissions of the Sat 750 (no sync, no PBT, apparently 2 bandwidth filter selections, as opposed to the three on the E1), the overall Eton story emanating from CES 2008 was one of a retreat from the premium shortwave portable market.

Time will tell...

I have both models (two of the 7600G and one of the 7600GR). No
difference noted between the two models in the sync performance. The
7600GR adds the variable attenuator, which can be useful at times.
But any performance difference between these two models is not
significant.

the best sounding stereo I own, cost me $10- it was built in 1965, and
is a single ended tube design- dual monoblocks- in an Akai reel to
reel, model M8

it sounds better than my modern digital Technics solid state rack
system

even a "cheap" stereo tube set, sounds better than solid state- tubes
color the sound- solid state music has no soul

Interesting. There was someone on the yahoo E1 group a while back who
was talking about how sales of the E1 and its variants were lagging
far behind Eton's sales projections. At the time I thought this
sounded pretty ominous, but of course this person was silenced
immediately.

My guess is that there are many more people interested in owning a
radio like the 750 than the E1 and/or E1XM. If I want the sorts of
features sported by the E1, I'll buy a tabletop receiver. For a
portable, I want something lean and relatively simple.

920. Options for listening to FM radio at work?

Newsgroup: rec.radio.shortwave
Date: 2008-01-12 13:29:31 UTC
From: Peter <peter@nospamerino.com>
Message-ID: <i-6dnfTuD7qYXBXanZ2dnUVZ_vGinZ2d@comcast.com>
Source record: 133938

I use to be able to listen to FM radio through the web at work but the network police have shut that down. Now I want to purchase an FM radio so I can listen to the stations the old fashion way. The only problem is the reception where I am is not so great. I am not close to the window and more towards the center of the building. I brought in an RCA analog portable that I had bought a few years back but that didn't seem to pull in my stations.

Should I consider a good digital radio(e.g. sangean dt-300) with the hopes it could pull in the signal from where I sit? Or perhaps rigging up some sort of antenna? I see some of these offerred online. My last thought was if there was a wireless device that I could place near a window that could transmit FM signals back to my desk radio that would be optimal but I doubt such a device exists. Any recommendations on any of these options would be greatly appreciated!

That's absurd. Perhaps true 40 or 50 years ago.

While I agree whole heartedly with everything you say, I was trying to address his comments with 'real world' facts that even my agnostic friends have agreed are valid.

Christianity isn't without blood on our collective hands, but those are aberrations of what I perceive the message to be. Of course the Irish troubles with two groups of Christians killing each other for the last 400 years certainly isn't something to be proud of.

And before anyone jumps in, I am very familiar with the social, political, historical and realities of Northern Ireland. I have kin on both sides of that divide.

But on the whole I think it is clear that the message of Christianity is very different from that of Islam.

I suspect the shiny chassis was a factor, not just because it was
shiny but also because it sent a message that the receiver is just out
of the box.

There is no difference. Anything that tells you that death is not final
is dangerous. Religion makes war possible. Religion is evil.

Hum....I guess by your definition Communism is a religion??
Back in 1968 the USSR and the PRC had several minor skirmishes
that rapidly escalated to the point where the USSR are reported to
have given the authority to the local political officers for the use
of
tactical nukes. Even if that part is less then accurate, there were
several full sized battles and I don't remember Marx talking about
God.
From my readings of both the PR supplied by the PRC and USSR
they denied the existence of 'God".

Sorta shoots your argument that "Religion makes war possible".

Rather it appears that man and the other primates are all too
disposed to us violence at the slightest excuse.

I took several Anthropology courses in college and in one the
Professor
said he feared Baboons more then Lions, Leopards or Hyenas. Male
Baboons are extremely likely to attack any other primate. And somehow
I doubt that they worship any God.

Dear Steve,

I absolutely agree with you about your desires between a portable and
a tabletop. Though there is probably a place for something like the
Eton E1, why, if it is a portable, does it have no handle? And why, if
it's meant to be a serious (no pun intended) radio, does it have only
one external antenna input and a weird one at that?

And why such poor quality control after several years of production?

It's not for me!

Best,

Joe

That is truly warped reasoning. War is not conducted by diplomats. It
is conducted by dumb people willing to sacrifice themselves for a poorly
defined cause. Promise of an afterlife helps tilt the scales.

Religion and war are two luxuries we can no longer afford. If we don't
put all our resources into solving the immediate problems of the
environment we really will need a saviour.

Kill for peace. Scream for sanity.

Give up! There will be no more new HF hobbyist tabletop receivers.
There is no more audience. There is no more market. The world has
moved on.

I was reading a while back about a double dip in the sun spot cycle. I
think a reversal was noted about a year ago.

Apologies are unnecessary. You've done nothing wrong. You apologizing
for attempting rational discussion in this group, is like Lincoln
apologizing for the noise at the theatre.

Huh? It has nothing to do with stupid religion. The RHF asshole pisses
me off with his inane googling.

"Fuck you" isn't really cursing. "Go to Hell" is a curse.

If you ever experienced reality you wouldn't be arguing religion. The 2
are opposites.

A better radio will still not pick up signals that aren't there. You might try a couple of other radios, just to see if the original one is exceptionally weak, but don't expect miracles. FM demodulation is still done the same way it always was, whether or not the local oscillator is digital.

How about putting the radio at the window, and running an audio cable from its earphone jack to a pair of powered computer speakers on your desk? I'm guessing an audio cable is easier to set up than an antenna cable.

A wire would run across an aisle where folks could potentially trip over it. I don't think they would be too keen on me taping it down either. :-) Are there any homemade solutions for antenna's that I could try. Like a length of coaxial cable. Would that help? It could be an exceptionally weak radio. I didn't pay alot of money for it and it is analog. If I did go with a digital radio, does anyone have any recommendations. I was looking at the KA1103 or the DT220. I probably don't want to spend over a $100... I thought the KA2100 or ICF-SW7600R might be more expensive options. Any thoughts on any of these?

- Huh? It has nothing to do with stupid religion.
- The RHF asshole pisses me off with his inane googling.

Gee Thank You for Giving Me Control Over Your Life.

- "Fuck you" isn't really cursing.

That May 'be' Your Reality - To Most It Is [.]

- "Go to Hell" is a curse.

Good Advise - Please Take It.

- If you ever experienced reality you wouldn't be arguing religion.

- The 2 are opposites.

In your Sad Hateful Reality May Be.

To Many Religion 'IS' An Intergral Part of Their Reality.

DaviD2 - There is Your Sad Hateful Reality.

And then There 'IS' the Joyful Reality of Those Who
Incorporate Religion as Part of Their Life.

May God {Allah} Bless You With . . .
A New Joyful Reality - Amen ~ RHF
.

Coaxial cables are not antennas -- they're what joins the antenna to the
radio. As a homemade antenna try a wire whip 30 inches long, vertical.

If you don't know whether there is enough signal, there's no point in buying
one. Try another radio in the same location.

$300 is quite a bit for a radio that from all appearances seems not to offer any performance-enhancing features beyond what you'd expect from a DE1103, E5/G5 or a Kaito KA2100? Sure, it has the rotatable MW antenna, but what else is it offering besides an alternate means of charging your cellphone (not generally considered a compelling reason to purchase a shortwave rig).

As for the tabletop HF receiver market, it's an area that's drying up, as well. It's good that you enjoy your Ten-Tec RX-320D as you do. My guess is that going forward, SWLers wanting a performance upgrade from the under-$150 portables (and who want to purchase new) are going to increasingly be compelled toward considering such computer controlled radio options, as the premium portable and under-$2000 HF tabletop receiver markets continue to dry up. Admittedly, there will be those who will be drawn toward amateur rigs for SWLing.

Yeah, those requiring handles should avoid the Eton E1, no doubt about that. Not even a shoulder strap, with which one could happily sling the E1 over the shoulder before running out the door, as so many of us enjoy doing with the Sony ICF-2010.

And that pesky PAL connector has been the bane of many an SWLer. It would appear that the Sat 750 continues the PAL antenna jack tradition. Heaven help us!

would appear that the Sat 750 continues the PAL antenna jack
tradition. Heaven help us!

That jack has been a staple on Grundig radios for about three decades.
Before that, they opted for the familiar (at least to those who have worked
with car radios) Motorola pin jack. I actually found that kind of nice with
my old Grundig Transistor 1000, as I could use it in the car for SW and FM
and it was a very good performer connected to a car antenna.

Any recommendations on any of these options would be greatly appreciated!

Peter,

1 - Take the portable RCA Analog AM/FM Radio and wrap
several turns of your telephone line around it.
? Does your FM Radio reception improve ?
Then your problem is solved.

2 - Take your portable RCA Analog AM/FM Radio and walk
with it to the nearest Window.
? Does your FM Radio reception improve ?
Then an FM Antenna near the Window may help.

3 - Use Two FM Radios and place One near the Window
with an FM Re-Broadcaster Tuned to an local FM Radio
Station who's Frequency is not in use.

Pogo makes a nice toy for this. You can record hours of music, off
air, replay it at will. Good for recording talk shows, too. And more
involved productions like Prairie Home Companion.

It's about $200. Called Radio Your Way.

The Kaito 1103 has excellent FM and audio, and reputedly the 1101 and 1102 do, too. Your best solution, however, is probably recorded FM, as another poster noted.

I have a $30. Amazon gift card burning a hole in my pocket.

Should I get:

1. A Grundig Mini 300;

2. Grundig Mini 100;

3. Kaito WRX 911;

4. Sony M37V (I already have an srf-59);

5. other?

I don't expect amazing DX from such a small, cheap radio; just a good
radio for the price.
Shortwave would be nice, but not essential.

Any thoughts welcome.

Keith

Easiest thing to do would be to make a folded dipole out of 300 ohm twin
lead and tape it up on a cubical wall.

Now I want to purchase an FM radio so I can listen to the stations the old fashion way. The only problem is the reception where I am is not so great. I am not close to the window and more towards the center of the building. I brought in an RCA analog portable that I had bought a few years back but that didn't seem to pull in my stations.
>
> > > Should I consider a good digital radio(e.g. sangean dt-300) with the hopes it could pull in the signal from where I sit? Or perhaps rigging up some sort of antenna? I see some of these offerred online. My last thought was if there was a wireless device that I could place near a window that could transmit FM signals back to my desk radio that would be optimal but I doubt such a device exists. Any recommendations on any of these options would be greatly appreciated!

Though, it's worth noting that Kneisner and Doering will soon come out
with the KWZ 50...the first receiver they've produced in a long time.
It's also been rumored that AOR intends to produce a successor to the
7030+, which will again benefit from the design expertise of John
Thorpe.

WELLINGTON, New Zealand -- Sir Edmund Hillary,
the unassuming beekeeper who conquered Mount Everest
to win renown as one of the 20th century's greatest adventurers,
has Died, New Zealand Prime Minister Helen Clark
announced Friday. He was 88.

-
- Though, it's worth noting that Kneisner and Doering will soon
- come out with the KWZ 50...the first receiver they've produced
- in a long time.
-
- It's also been rumored that AOR intends to produce a successor
- to the 7030+, which will again benefit from the design expertise
- of John Thorpe.
-

Steve - Naturally these will not be $300 Radios
intended for the general consumer market. ~ RHF

G'day Guys,

While listening to the 40m hams trying to catch VA7MLW Canadian sailing solo run the world, the band is total washed out with this spectrum noise. I have a recording of this BLOODY annoying spectrum noise, which I'm sure is OVER HORIZON RADAR or something very similar, can anyone else please confirm this ?

Recording - http://ustream.tv/recorded/K86S2mXnhNYZzaOknbgAMg

Cheers
Mark

Grundig used to be made in Germany, so Grundig is hoping that consumers will continue to buy their crappy products, under false pretenses.

Yes, maybe the long (very long indeed) awaited KWZ50 actually shall be
released next month, and the 5 1/2 year wait (or has it been longer?)
will come to an end.

(of course, then, too, perhaps King Sebastian will finally return to
solve all of Portugal's woes)

In truth, I hope that we do see these new entrants to the HF tabletop
receiver market, but I'm certainly not holding my breath...

Adapters are readily available. When I got my E1 a few years back, I
went on and ordered a few such adapters, and it hasn't been an issue
for me.

That said, it has posed some problem for a noteworthy group of folks,
for whatever reason.

What would I prefer? Personally, the PAL is just fine. Given the
helplessness that many have displayed in dealing with the PAL jack,
perhaps an RCA jack would have been more agreeable overall (certainly
NOT a mini, BNC, or UHF).

In any case, it should be a non-issue; but it hasn't been.

"Shortwave Awaits DRM in United States"
DRM Proponents Eye 2008 Olympics, 26 MHz Band

by Jeff White, 7.18.2007
The author is vice chairman of the U.S. DRM Group and president of the National Association of Shortwave Broadcasters.

ELKHART, Ind. U.S. shortwave broadcasters anticipate the availability of the first low-cost Digital Radio Mondiale receiver by the end of the year, though no DRM transmissions are originating yet in the United States, despite FCC approval.

China may begin DRM transmissions in time for the 2008 Olympics, spurring a global receiver launch and shortwave broadcasters from the U.S., and other countries would like to use DRM on the 26 MHz band for low-powered local FM-quality broadcasting.

These were the highlights of the U.S. DRM Group meeting, which was held in May in conjunction with the annual meeting of the National Association of Shortwave Broadcasters.

Broadcasters, manufacturers and others interested in the progress of DRM in North America gathered for their fourth annual meeting, held at the HCJB Global Technology Center in Elkhart, Ind.

About 60 persons attended the meeting, which included program producers, station managers, network operators, marketing people, shortwave listeners and consultants.

DRM sends text, graphics

"This is our big opportunity," said Mike Adams, chairman of U.S. DRM's International Broadcasters Committee, "to get together each year and find out what's going on with DRM in North America." Adams is an engineer who monitors new technologies for Far East Broadcasting Company, a worldwide religious broadcasting network.

FEBC's Mike Adams, TDF's Michel Penneroux and Continental's Don Spragg lead a discussion about DRM's future in North America.

Herb Jacobson of HCJB began the meeting with a detailed explanation of the basics of DRM -- its advantages to broadcasters and how it works. He explained which popular shortwave transmitters are easy to convert to DRM modulation and which ones are more difficult.

Don Spragg, formerly of HCJB and now working for Continental Electronics -- which, along with other U.S. manufacturers Nautel, BE and Harris, sells DRM transmitters -- explained that shortwave

broadcasters were really behind the origins of DRM because they wanted a system to enable them to go digital.

DRM officially was launched in 2003 and it has expanded to AM, longwave and now FM use as well.

Spragg said that DRM technology enables broadcasters to transmit in various grades of audio and can carry up to four programs simultaneously in one channel. DRM can be used to transmit voice, music, text, graphics, slide shows and multiple languages. There are currently 766 hours per day of DRM transmissions, according to the DRM Consortium.

Most, but not all, of these transmissions are in Europe, including those from Deutsche Telekom's T-Systems, which attended the meeting in Elkhart. In the Americas, there are DRM transmissions from CBC Radio-Canada in Sackville, New Brunswick; Telediffusion de France in French Guiana, HCJB in Quito, Ecuador; Radio Netherlands in Bonaire; and Christian Vision from Chile.

All of these facilities except Bonaire conducted special DRM transmissions during the U.S. DRM meeting, and the monitoring station in Elkhart was able to pick them all up with excellent reception. The audio was FM mono quality.

There was also a special trans-Atlantic DRM test during the meeting from Vatican Radio. The Vatican organ music and special conference ID's were heard with excellent quality and a 21-27 dB signal-to-noise ratio. Transmission power levels ranged from four kilowatts from Quito up to 250 kW from Vatican Radio.

Receiver timeline fluid

"DRM has much to offer," concluded Spragg. "It's an exciting time. DRM has an important place, especially if we're going to see a revival of the shortwave broadcasting spectrum."

The current problem with DRM is that consumer-friendly receivers are not yet available in North America. A few early receivers are now on the market in Europe for as little as 200 euros, or about $270; but improved versions are still being developed and have yet to hit the store shelves.

For some time now, it has been possible to use certain shortwave receivers connected to a personal computer with special DRM software to listen to DRM transmissions. However, the goal is to have stand-alone receivers that can pick up DRM signals without the need to connect them to PCs. Recently, a few of these types of radios have been released on the market in a small scale in Europe, even as modifications and improvements continue to be made.

Michel Penneroux, chairman of the DRM Consortium's Commercial Committee, said, "The problem is in this kind of situation, the

timelines of the various players are different from one to the other. The broadcasters have one timeline. The transmitter industry has another. The receiver industry has [yet another]. So you wait until the retailers say 'We want this because the customers are interested in this.'"

So far retailers like RadioShack have not yet shown much interest in selling DRM receivers. "The numbers [they need] are very big," said Penneroux, "with 2.5 billion receivers to renew worldwide. Manufacturers are very secretive about what they want to do, what are their plans, when they're going to launch. This is the reality."

Some participants at the meeting said that there may also be a role for DRM in AM broadcasting in the United States, given the controversy over problems with IBOC at night. They speculated that combined DRM/HD Radio receivers might be on the horizon.

"We are building a digital radio world for the next 20 years," said Penneroux. "We are expecting by around the end of this year the first low-cost DRM receiver with an ST chipset. The receiver will be made in China, will cost less than 50 U.S. dollars, and will have a high-quality front-end."

2008 Olympics

In fact, China may be where the big global DRM boom begins.

The Chinese appear to be moving toward domestic DRM transmissions in time for the 2008 Olympics, which would mean massive production of DRM receivers that would be available to both the internal and worldwide markets at low cost.

Several U.S.-based and European shortwave broadcasters plan to begin DRM transmissions to China in time for the Olympics.

There is also a great deal of interest in the United States and other countries in using DRM on the 26 MHz band for low-powered local FM-quality broadcasting.

Participants in the meeting in Elkhart acknowledged that this would involve regulatory hurdles, since the 26 MHz band is allocated to long-distance international broadcasting. But the High Frequency Coordinating Conference, where most shortwave frequency planning is done worldwide, recently proposed a division of the band, with one portion to be used for international broadcasting and the other part for local DRM broadcasts.

So far no shortwave stations have begun DRM broadcasts from U.S. soil, however the FCC has approved it and many stations are watching the development of DRM and the receiver market.

No one wants to lose their current analog audience, but the concept of transmitting on shortwave with an FM-quality signal and reducing their electrical bills to a fraction of their current levels has most U.S.

international broadcasters keeping a close eye on DRM.

Jeff White is general manager of WRMI - Radio Miami International in addition to his roles with the U.S. DRM Group and NASB.

http://www.rwonline.com/pages/s.0049/t.7242.html

This sounds exactly like the situation with HD/IBOC - no one wants it, except for the scammers peddling their hyped-products. Interesting, that Radio Shack has shown little interest in DRM receivers - maybe, they learned after getting burned with having to unload dust-collecting HD/IBOC receivers. Digital radio is stalling everywhere:

"Straining to hear digital radio - Europe has a head start in terrestrial digital radio, but is anybody listening?"

"But today, digital radio is struggling to find its legs. While it's still in the cradle in the United States, it has begun to crawl, a bit, in Europe and elsewhere... Europe has had a standard for digital radio for some time. The European Union adopted the standard, called Eureka 147, 10 years ago. But high prices and a lack of consumer interest have kept the market tiny."

http://www.edn.com/index.asp?layout=article&articleid=CA266524&ref=nbra

"Annual DAB sales 50% below forecast"

"The following graphs are copied from the DRDB's (Digital Radio Development Bureau -- UK DAB's marketing and PR arm) sales forecast documents from 2004 and 2007, and they show that the forecast sales for 2008 are a massive 50% below what the DRDB had previously forecast they would be for 2008, and the cumulative sales will be 18% below previously forecast by the end of this year and 30% below what they had previously forecast by the end of next year."

By John Plunkett
guardian.co.uk,
January 10 2008

Digital radio will suffer a double blow this weekend with the closure of two
national digital stations, Oneword and Core.

GCap Media's music station Core is expected to close tomorrow, while UBC's
spoken word outfit Oneword, whose future has long been in doubt, will cease
broadcasting on Saturday.

Both stations were broadcast via digital audio broadcasting (DAB) on Digital
One, the national digital radio multiplex majority-owned by GCap.

In a dramatic scaling back of GCap's digital offerings, its digital music
station Life is also set to close while its chillout station, Chill, has
been removed from the Sky Digital platform. It continues to broadcast on
regional DAB multiplexes and online.

GCap's other digital-only stations are TheJazz and Planet Rock, which both
remain on Digital One. TheJazz, which has just celebrated its first
birthday, has upped its capacity on Digital One and now broadcasts in
stereo.

Oneword, which was launched by UBC in 2000, was part-owned with Channel 4
until the broadcaster sold its 51% stake, bought for £1 million in 2005,
back to UBC for £1 in the run-up to Christmas.

UBC, as the sole shareholder, will close the station, which plays a mixture
of books, comedy, drama and reviews, on Saturday.

Oneword had 151,000 listeners in the third quarter of last year, according
to the latest Rajar figures, but its prospects suffered a serious blow after
the BBC launched its own spoken word digital station, BBC7.

"Unfortunately Oneword will no longer be broadcasting from Saturday January

12," said a statement on the Oneword website.

"We are genuinely grateful to all our listeners for their loyal and
continued support over the last eight years. We wish you a very happy
2008."

GCap's Core, which launched in 1999, became a jukebox music station in
March
last year when it took its presenters off air. It had 122,000
listeners in
the third quarter of last year.

Digital One is in negotiation with a number of potential operators
about
filling the vacant berths on the national multiplex

What about the C. Crane FM Reflect Antenna? I was reading an Amazon review
on this antenna and it said it was simply a dipole antenna made of high
quality coaxial cable

$MAKE LOTS OF QUICK CASH THE EASY WAY$$ Dear Internet User, Good day, This article I've written is all about the fact where I earned an ASTOUNDING amount of money in less than a month and I've decided to share or reveal the secrets behind making big bucks in the Mail Order Business. So all money seekers, read this carefully. **READING THIS COULD CHANGE YOUR LIFE!** I found this on a bulletin board like this one and decided to try it. A little while back, I was browsing through several newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you need to send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: "what have I got to lose except 6 stamps and $6.00, right?" Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works.... Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy! SUGGESTION: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the money come in! It's easy. It's legal. And, your investment is only $6.00 (Plus postage). IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends. PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue it?s success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists.

However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. ========== -->HERE ARE 4 EASY STEPS TO GET STARTED<-- STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (Please make sure that the bill wouldn't be noticed in the envelope to prevent thievery). Send out US $ DOLLAR, so it would be more acceptable. STEP 2: Next, place one paper in each of the 6 envelopes and seal them properly. You should now have 6 sealed envelopes, each with a piece of paper stating the phrase, "PLEASE PUT ME ON YOUR MAILING LIST.", your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting for a legitimate service and you are paying for it! Like most of us, I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the US$6.00 to the following addresses: 1)James Small 4690 Sierra St Riverside CA 92504 2) Brandon Corbin 307N Church St Lancaster PA 17603

3) Lierin Quinn P.O. Box 242 Bausman PA 17504

4) L Middlebrook P.O. Box 2079 Beaverton Ontario Canada L0K 1A0 5) Phyllis M Whiddon 256, JD Road DeRidder LA 70634

6) Luke Camacho 594 east 260 south Midway UT 84049
STEP 3: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. STEP 4: Copy this article. Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 2.4million groups) All you need is 200, but remember, the more you post, the more money you make! This is perfectly legal! If you have any doubts, refer to Title 18, Section 1302 and 1341, US Postal and Lottery Laws or Title 18, Section 3005 in the US code, also in the code of Federal regulations, Volume 16, Sections 255 and 436, which states; "a product or service must be exchanged for money received." The simple note in the letter, "PLEASE PUT ME ON YOUR MAILING LIST", makes it legal because you are paying for exchange of a service, (adding the purchasers name to his mailing list) for a $1.00 fee. IMPORTANT: Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly

providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business! ========== -->DIRECTIONS FOR HOW TO POST TO NEWSGROUPS<-- Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your mouse cursor at the beginning of this letter, click and drag your cursor to the bottom of this document, right click and select 'copy' from the edit menu. This will copy the entire letter into the computer's memory. Step 2) Open a blank 'notepad' file and place your mouse cursor at the top of the blank page. Right click and from the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name and postal address to the list. Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to. Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the "post" message button. You're done with your first one! Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about a minute for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.** ========== *Now the WHY part; Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200

newsgroups with my name at #1 and if still ONLY 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet!!! REMEMBER, PLAY FAIRLY AND HONESTLY AND THIS WILL WORK FOR YOU!!! GOOD LUCK to all and please play fairly and reap the huge rewards from this, which is tons of extra CASH. By the way, please DON'T try to deceive people by posting the messages with your name in the list and not sending the CASH to the rest of the people already on the list, you will NOT get any. This is the fairest and most honest way I have ever seen to share the wealth of the world without costing anything but our time!!! You also may want to buy mailing and e-mail lists for future cash. Make sure you print this article out RIGHT NOW! Also, try to keep a list of everyone that sends you CASH and always keep an eye on the newsgroups to make sure everyone is playing fairly. Remember, HONESTY IS THE BEST POLICY. IMPORTANT: If you're not interested to my article, (don't want instant cash?), please pass this message to anyone who wishes quick money. Thank you so much. ==========

Shortwwave is not all about listening to advanced cultures in well-established developed countries with wherewithal to promote themselves on most the more advanced medium. Shortwave is more about listening to and being able to get stations in countries, locations around the world that are seldom heard, who have few stations if they have more than one, broadcast at short spurts at odd times to other countries, and do not broadcast in digital. I know you are all the experts, but please, do not turn shortwave into the same kind of mess that the government is turning television into. Perhaps those of you who are serious about your efforts want only the latest equipment, and

are most satisfied when you have to go out and buy some new gadget, but I, for one, do not like to have to change equipment that is perfectly fine for my purposes. I know that at some point, the promoters of digital may prevail, but I hope it is not in my lifetime.

i do not know where you are working or what was in the original post,
but i found that after our building at work was made wireless, the FM on
my little earplug drug-store radio now comes in very well. Before that,
a coworker let me borrow his little Sony walkman and that pulled in the
local FM stations very well. The other option is using over-the
internet web sites of stations that broadcast over the internet, as well
as bit streamers, if you are allowed to do that at your office.

"Is shortwave radio dying? A look at station counts from South America"

Yea, this is why the BBC, and others, have stopped broadcasting to the US - others have blown up their shortwavbe towers. Radio Shack only carries a handful of SW receivers, and are not usually on display. Radio is the US is declining, just a sSW radio is, too. There's something called "progress", and the Internet.
